

Purpose

The purpose of this quick reference guide is to step through the process of creating Minimum Pay Rate (MPR) records. The intended audience for this document is System Administrators / Standard Users.

MPR records facilitate the automatic creation of Timesheet Assignment Rate records for Assignments with matching Assignment Rate Template Group, Interpretation Rule, Award Classification and if applicable, Award Levels populated.

Once an MPR with matching values is identified for an Assignment, automation will generate Assignment Rates according to the details of each related MPR record. If no Pay Code is populated, one Assignment Rate will be created for each Pay Code from the related Interpretation Breakpoints. Any additional MPRs with a defined Pay Code will create their Assignment Rates using the specific Pay Rate on this MPR.

If Timesheet Activities or Project Codes are related to Assignments, additional MPRs must be created using the Parent/Child structure, to ensure Assignment Rates are defined for each potential combination of Pay Code and Timesheet Activity/Project Code.

- Parent MPRs capture the base Pay Rate for each Pay Code associated with Timesheet Activities/Project Codes.
- Child MPRs define a specific Pay Rate for the Timesheet Activity and/or Project Code populated.

Steps

Create a Minimum Pay Rate record

Create a new MPR for use with Rates Automation by following the below steps:

1. Click on the **App Launcher** icon (see Figure 1).
2. Go to the **Minimum Pay Rate** object by using the Search function (see Figure 2).

Figure 1

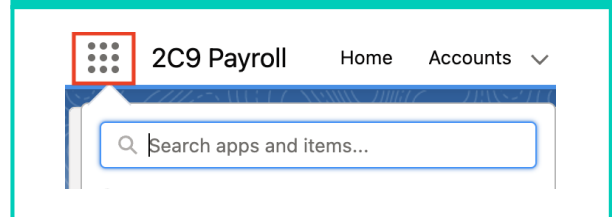

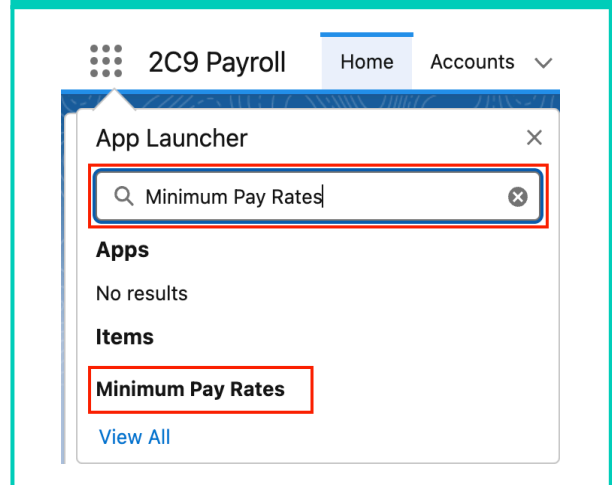

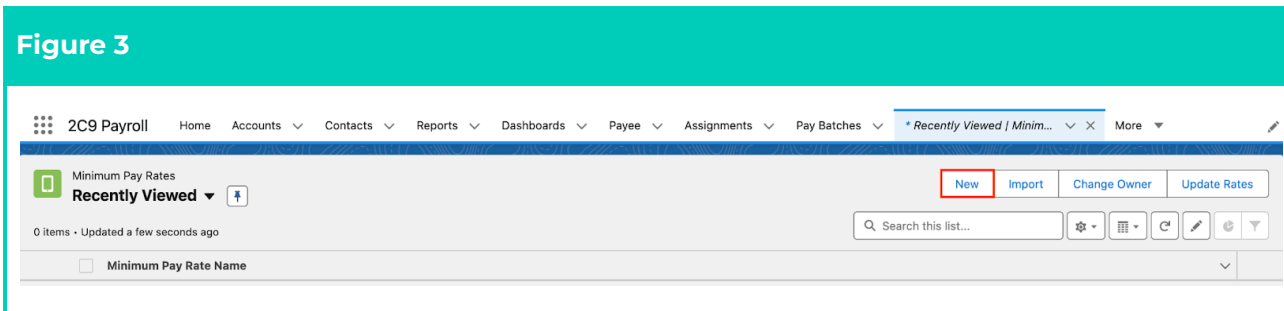

Figure 2

3. Click on the **New** button (see Figure 3).

Figure 3

The screenshot shows the 2C9 Payroll system interface. The top navigation bar includes links for Home, Accounts, Contacts, Reports, Dashboards, Payee, Assignments, Pay Batches, and a dropdown for 'Recently Viewed / Minim...'. The main content area is titled 'Minimum Pay Rates' and shows a 'Recently Viewed' tab. A red box highlights the 'New' button in the top right corner of the main content area.

4. Populate the following fields according to the instructions provided:

- a. Create a unique identifier for the record by populating the **Minimum Pay Rate Name** field (see Figure 4).
- b. Populate an **Assignment Rate Template Group** using the lookup options available.

This record is only used as a filter condition for MPRs, and **MUST NOT** contain individual Assignment Rates when populated on an MPR.

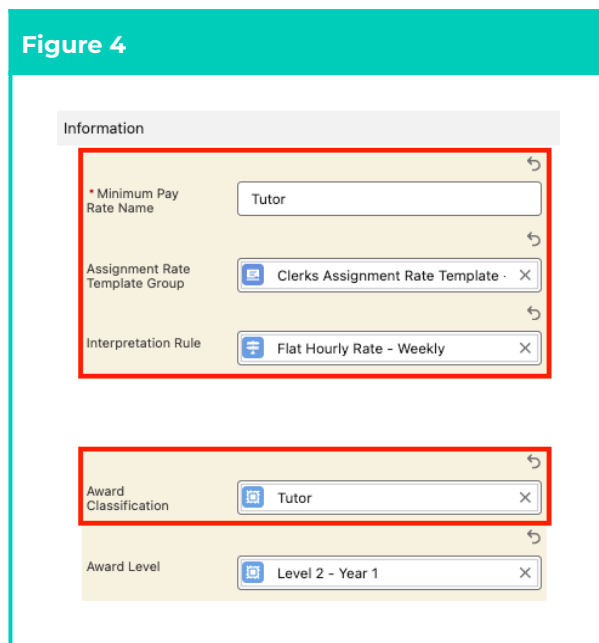

- c. Specify the Timesheet Interpretation associated with MPR records by populating the **Interpretation Rule** field using the lookup options available.
- d. Select the applicable **Award Classification** using the lookup options available
- e. To define a specific level for Award Classification, populate the **Award Level** field using the lookup options available.

The **Status** field is updated via system automation, and should not be manually populated.

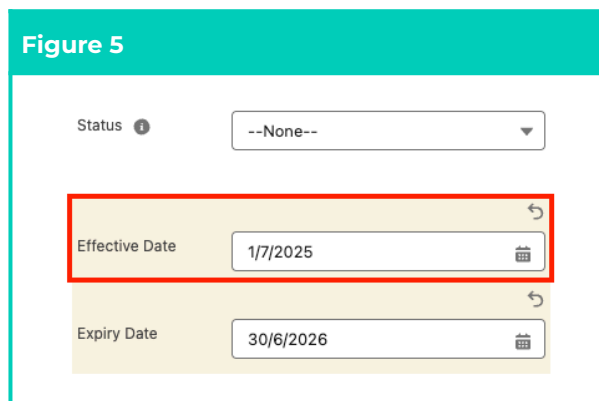

- f. Define a date for the Pay Rate to come into effect by populating the **Effective Date** field (see Figure 5).
- g. If the Pay Rate is only valid up to a specific date, populate the **Expiry Date** field.

Figure 4

The screenshot shows the 'Information' section of the Minimum Pay Rate form. The fields 'Minimum Pay Rate Name' (with value 'Tutor'), 'Assignment Rate Template Group' (with value 'Clerks Assignment Rate Template'), and 'Interpretation Rule' (with value 'Flat Hourly Rate - Weekly') are highlighted with a red box.

Figure 5

The screenshot shows the 'Effective Date' and 'Expiry Date' fields of the Minimum Pay Rate form. The 'Effective Date' field (with value '1/7/2025') and the 'Expiry Date' field (with value '30/6/2026') are highlighted with a red box.

- h. Populate the **Pay Rate** field with the value to be used during Assignment Rate creation for related Pay Codes (see Figure 7).

The Annual Rate Change field is updated via system automation, and should not be manually populated.

- i. To relate a Project Code with the Pay Rate entered, populate the **Project Code** field using the lookup options available.

- j. To relate a Timesheet Activity with the Pay Rate entered, populate the **Timesheet Activity** field using the lookup options available.

Assignment Level and Client Level records will not be available for selection from the Project Code or Timesheet Activity lookup fields.

- k. If Project Code or Timesheet Activity fields were populated, you MUST establish this record as a Child MPR by populating the **Parent Minimum Pay Rate** lookup field (see Figure 8).

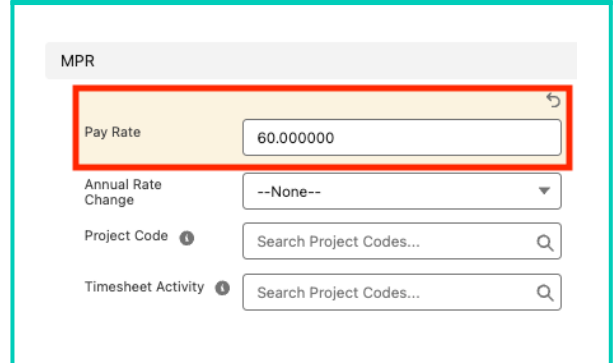

Please ensure the values populated for the fields in the Information section match those of the Parent MPR populated. The Pay Rate field may be left blank on Child MPRs, if the value should be inherited from the Parent MPR.

- l. To associate the Pay Rate with a specific Pay Code, populate the **Pay Code** field using the picklist options available.
- m. To apply additional casual loading to the MPR, populate the **Casual Loading Record** field using the lookup options available.

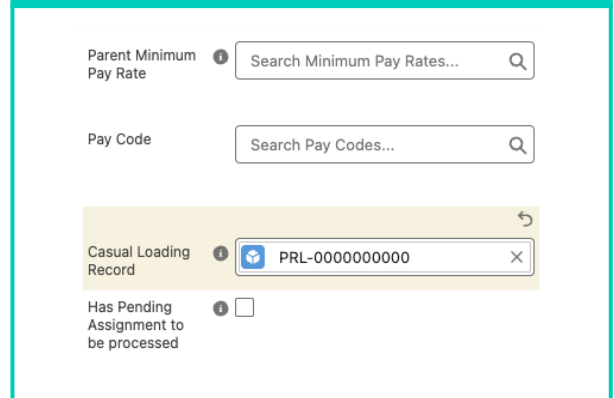

The Has Pending Assignment field is updated via system automation, and should not be manually populated.

Figure 7

The screenshot shows the 'MPR' form. The 'Pay Rate' field is highlighted with a red box and contains the value '60.000000'. Other fields include 'Annual Rate Change' (set to '--None--'), 'Project Code' (with a search field 'Search Project Codes...'), and 'Timesheet Activity' (with a search field 'Search Project Codes...').

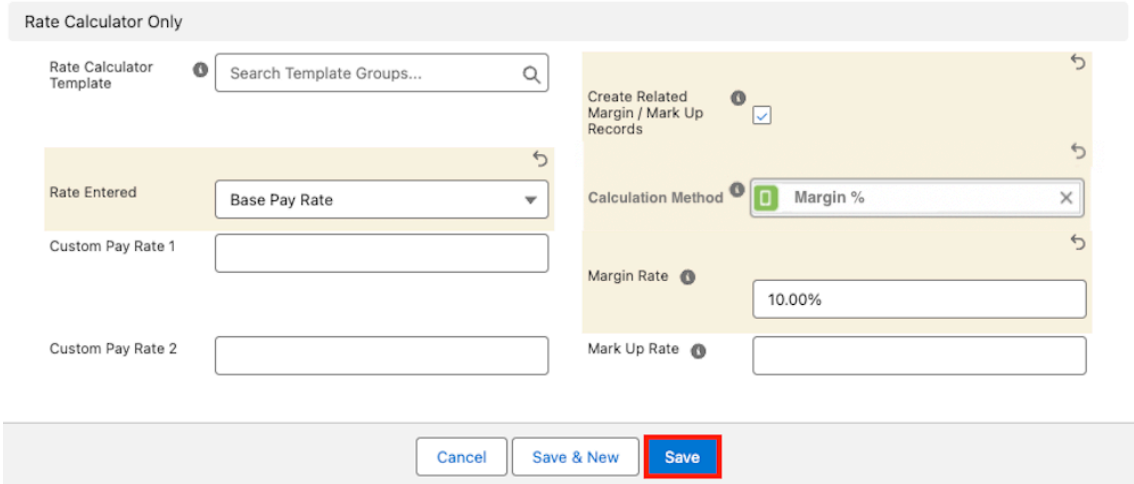

Figure 8

The screenshot shows the 'MPR' form with the 'Parent Minimum Pay Rate' field (search field 'Search Minimum Pay Rates...') and the 'Pay Code' field (search field 'Search Pay Codes...'). The 'Casual Loading Record' field is highlighted with a yellow box and contains the value 'PRL-0000000000'. The 'Has Pending Assignment to be processed' checkbox is unchecked.

5. Skip this step unless Rate Calculator components are required for the MPR (see Figure 9).
 - a. To relate the MPR with a specific Rate Calculator Template Group, populate the **Rate Calculator Template** field using the lookup options available.
 - b. Define oncosts calculation using Pay Rate amount as either the Base Pay Rate, Pay Rate, Total Pay Rate or Charge Rate by selecting from the available picklist options in the **Rate Entered** field.
 - c. To define custom Pay Rates for calculation, populate the **Custom Pay Rate 1** and **Custom Pay Rate 2** fields as needed.
 - d. Select the **Create Related Margin / Mark Up Records** checkbox field to enable the creation of new Margin / Mark Up Rates for this MPR record.
 - i. This field **MUST** be selected to enable Invoice Rate Calculation for the MPR.
 - e. Specify the calculation type to use for the Rate entered by populating the **Calculation Method** field using the lookup options available.
 - f. Populate either the **Margin Rate** or **Mark Up Rate** field, as defined in the **Calculation Method** field.
 - i. The Rate entered will display as either currency or percentage, according to the **Calculation Unit** of the selected Calculation Method.
6. Click on the **Save** button.

Minimum Pay Rate records CAN NOT be deleted if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

- To modify an existing **Minimum Pay Rate** record, open the required record and select the **Edit** button available on the top right side of the page. You can also double-click in any of the fields that need editing or just click on the pencil icon ✎ that appears within fields when you move your cursor over the field.
- When complete, click on the **Save** button.

Field Descriptions

Field Name	Description
Annual Rate Change	Identifies whether this Minimum Pay Rate record is a result of an annual update completed for existing Minimum Pay Rate records. Automatically updated to Yes when an MPR is created via Update Rates, to replace an expired MPR record.
Assignment Rate Template Group	The Assignment Rate Template Group that is applicable for this MPR.
Award Classification	Defines the Award Classification applicable to the MPR.
Award Level	Defines the Award Level applicable to the MPR.
Calculation Method	Defines the related Calculation Method to be used when calculating Oncosts for the MPR.
Casual Loading Record	The Casual Loading Record that applies to the MPR.
Create Related Margin / Mark Up Records	Creates new related records to enable Margin / Mark Up Rate calculations for the MPR.
Custom Pay Rate 1	Defines a custom Pay Rate to be used when calculating Invoice Rates for the MPR.
Custom Pay Rate 2	Defines a second custom Pay Rate for MPR Invoice Rate calculations.
Effective Date	The date the MPR is effective from.
Expiry Date	The date the MPR record expires.
Has Pending Assignment to be processed	Indicates Assignment Rate creation is pending for an Assignment linked with the MPR.
Interpretation Rule	The Interpretation Rule associated with the MPR defined.
Margin Rate	The value to be used for Margin calculations related to the MPR.
Mark Up Rate	The value to be used for Mark Up calculations related to the MPR.
Minimum Pay Rate Name	The name given to the MPR record.
Parent Minimum Pay Rate	Identifies an existing MPR to be used as a Parent for this record. When populated, a Parent/Child relationship is established between the new MPR and the existing Parent record.
Pay Code	The specific Pay Code to be used with a defined Pay Rate in Assignment Rates. To be populated when the Pay Rate x Pay Rate Multiplier on the Pay Code is not to be used in the Assignment Rates
Pay Rate	The hourly base Pay Rate to be used when creating Assignment Rates.
Project Code	Defines a Project Code to be related with Assignment Rates created in relation to this MPR. This field should only be populated for Child MPRs.
Rate Calculator Template	Defines an existing Rate Calculator Template Group for the MPR record to be related to.
Rate Entered	Determines how the Pay Rate will be applied when calculating related Margin or Mark Up Rates: Base Pay Rate: The Pay Rate entered on the MPR record will be used as the Base Pay Rate for related Oncost calculations Pay Rate: The Pay Rate entered on the MPR record will be used to calculate related Oncosts. Total Pay Rate: The Pay Rate entered on the MPR record will be used as the Total Pay Rate when calculating related Oncosts. Charge Rate: The Pay Rate entered on the MPR record will be used to calculate the Charge Rates.

Status	Indicates whether the record is currently Active, Inactive, On Hold or Pending.
Timesheet Activity	Defines a Timesheet Activity to be related with Assignment Rates created in relation to this MPR. This field should only be populated for Child MPRs.
