

Purpose

The purpose of this quick reference guide is to step through the process of creating Assignment Rate Template Groups. The intended audience for this document is Standard Users / System Administrators.

The Assignment Rate Template Group is used to define a related group of Assignment Rates. When an Assignment Rate Template Group is added to an Assignment record, the related Template Group Assignment Rates will be used to automate the creation of Assignment Rate records related to an Assignment.

Assignment Rate Template Groups may be used as a stand-alone method to automate the creation of Assignment Rates.

Each Assignment Rate Template Group must contain at least one Assignment Rate for each required Pay Code, as well as for any Project Codes combinations, to ensure all necessary Pay Rates have been defined.

Steps

Create an Assignment Rate Template Group

Create an Assignment Rate Template Group by following the below steps:

1. Click on the **App Launcher** icon (see Figure 1).
2. Go to the **Template Groups** object by using the Search function (see Figure 2).

Figure 1

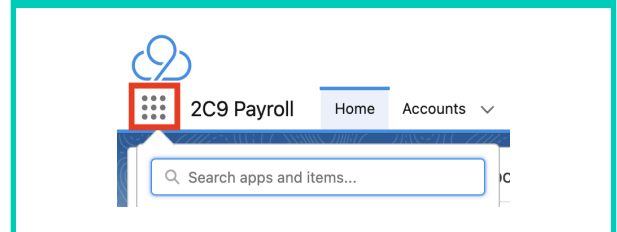

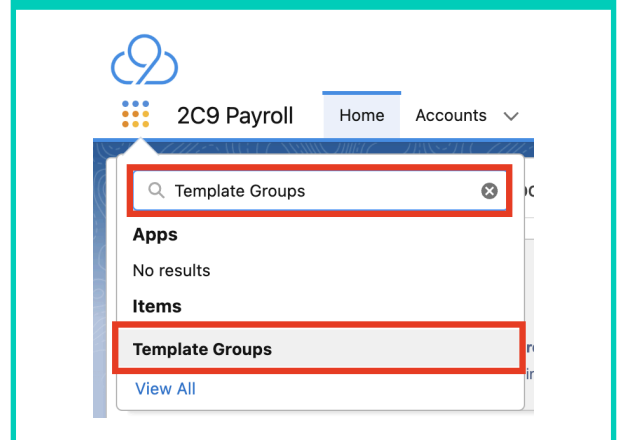

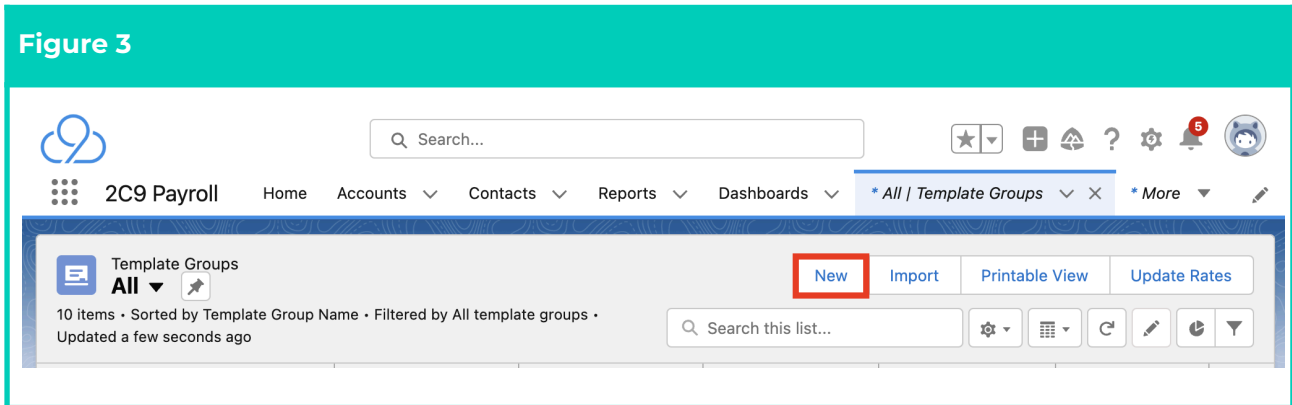

Figure 2

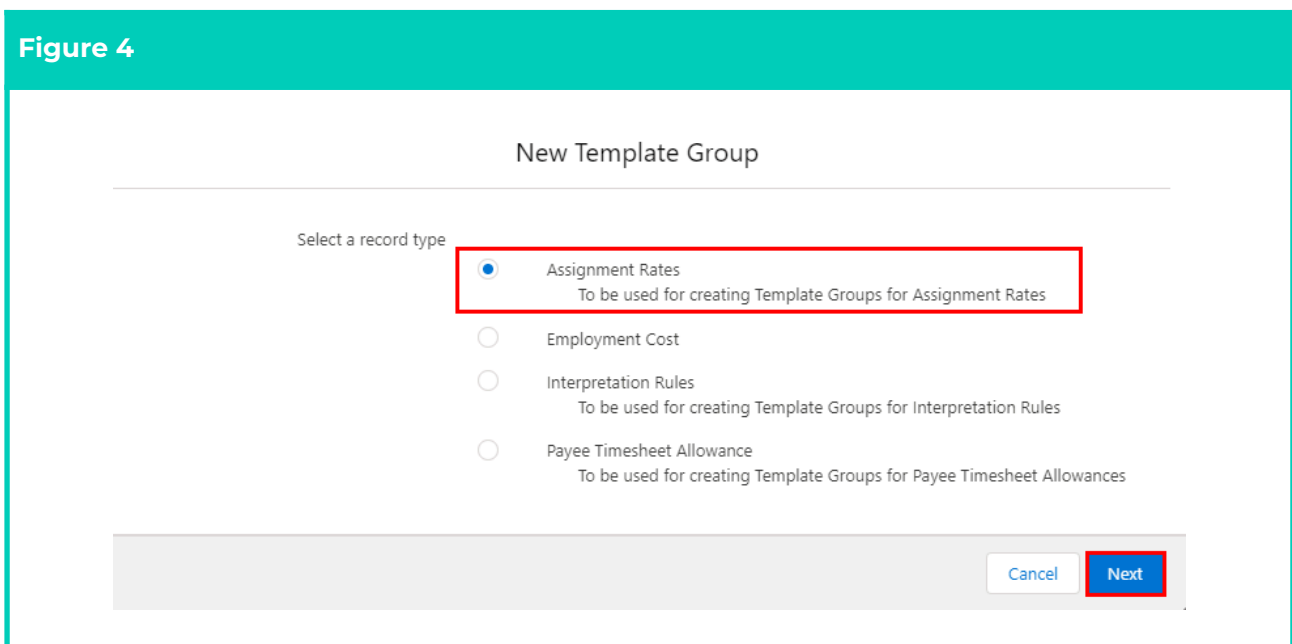

3. Click the **New** button (see Figure 3).

Figure 3

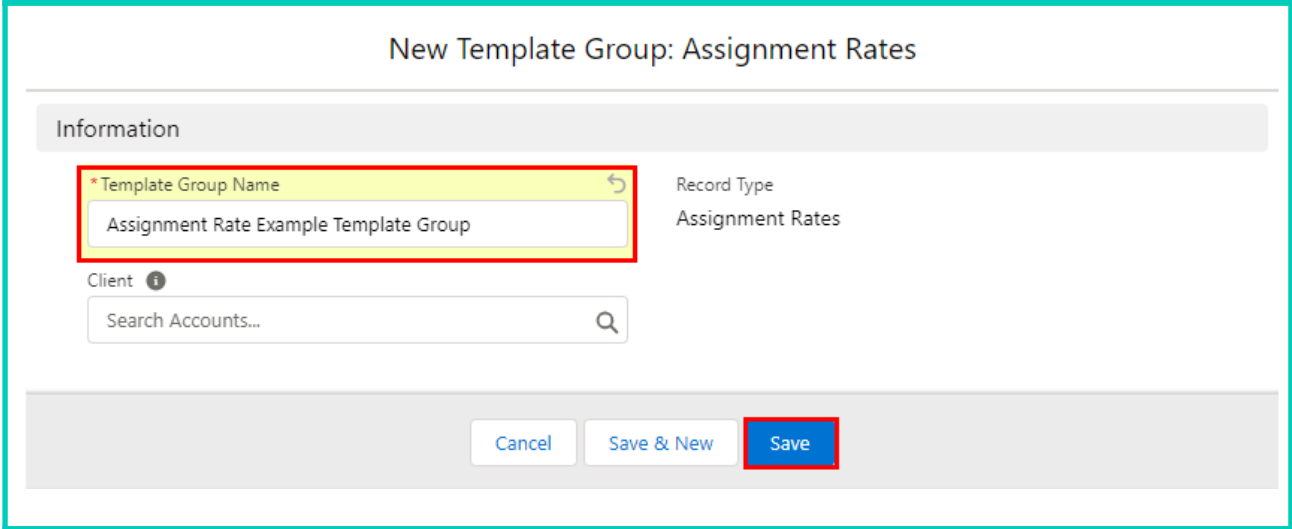

4. Select **Assignment Rates** from the available record types and click the **Next** button (see Figure 4)

Figure 4

5. Populate the following required fields to provide the base details of the Assignment Rate Template Group (see Figure 5):
 - a. **Template Group Name**
6. Populate the following optional field as required:
 - a. To configure the Template Group so it is only available for a specific Client, populate the **Client** field.
7. Click the **Save** button.

Create Timesheet Template Assignment Rate records

Timesheet Template Assignment Rate Records are required to be created and related to the Assignment Rate Template Group.

To create the Timesheet Template Assignment Rate records for the Assignment Rate Template Group, follow the steps below:

1. Go to the **Related** tab of the Assignment Rate Template Group and click on the **New** button next to Assignment Rates (see Figure 7).

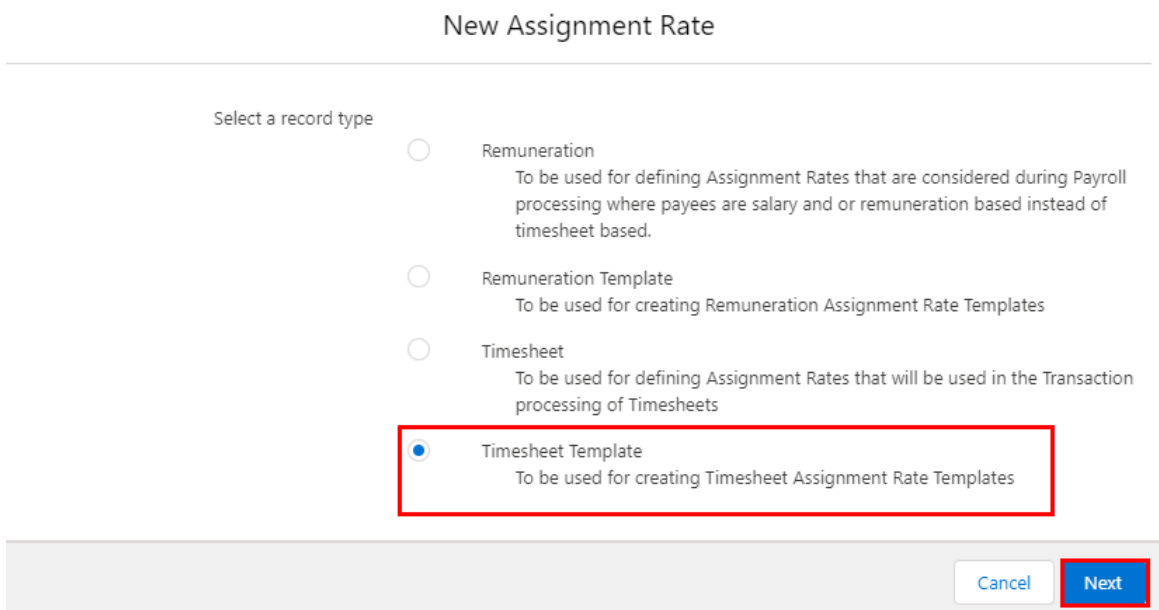

Figure 7

The screenshot shows the 'Assignment Rate Template Group' interface. At the top, there's a header bar with a 'Template Group' icon and the text 'Assignment Rate Template Group'. Below this, there are two tabs: 'Record Type' (with 'Assignment Rates' selected) and 'Client' (with 'Rio Tinto' selected). Under the 'Record Type' tab, there's a 'Related' tab (highlighted with a red box) and a 'Details' tab. Below the 'Related' tab, there's a section titled 'Assignment Rates (0)' with a 'New' button (highlighted with a red box) to its right.

2. Select **Timesheet Template** from the available record types and click on the **Next** button (see Figure 8).

Figure 8

The screenshot shows the 'New Assignment Rate' form. At the top, there's a title 'New Assignment Rate'. Below the title, there's a section titled 'Select a record type' with four radio button options: 'Remuneration' (To be used for defining Assignment Rates that are considered during Payroll processing where payees are salary and or remuneration based instead of timesheet based.), 'Remuneration Template' (To be used for creating Remuneration Assignment Rate Templates), 'Timesheet' (To be used for defining Assignment Rates that will be used in the Transaction processing of Timesheets), and 'Timesheet Template' (To be used for creating Timesheet Assignment Rate Templates). The 'Timesheet Template' option is selected (highlighted with a red box). At the bottom right, there are two buttons: 'Cancel' and 'Next' (highlighted with a red box).

Selecting Remuneration or Timesheet from the available record types will result in the creation of a new Assignment Rate record, which cannot be related to Template Groups, even when created from the 'Related' tab of the Template Group.

3. Follow this step in the sequence given below (see Figure 9):
 - a. Populate the following required fields to provide the base details of the Assignment Rate Timesheet Template Group:
 - i. **Template Group** (this is auto-populated)
 - ii. **Pay Code**
 - iii. **Sort Order** (pre-populated)
 - iv. **Effective Date**
 - b. Populate the following optional fields as needed:
 - i. To associate a Project Code with the Assignment Rate, populate the **Project Code** field using the lookup options provided.
 - ii. To set a fixed term for the Assignment Rate record, populate the **Expiry Date** field. If left blank, no Expiry Date will apply.
 - iii. To relate the Assignment Rate to a specific Timesheet Activity, populate the **Timesheet Activity** field.

The 'Created by AR Automation' field will be automatically populated if the record has been created by the Update Rates automation, and should not be manually checked.

- c. Populate the following required fields to provide the base details of the Assignment Rate Timesheet Template Group (see Figure 10):
 - i. **Pay Rate**
 - ii. **To Be Invoiced**
 - iii. **Invoice Rate**
 - iv. **Invoice Alone**
 - v. **Invoice Taxable**
 - vi. **Invoice Tax ID**
4. Click on the **Save** button.

5. A new Timesheet Template Assignment Rate record is now created (see Figure 11).

Figure 11

The screenshot shows the 'Assignment Rate Template Group' interface. At the top, there's a header with 'Template Group' and 'Assignment Rate Template Group'. Below this, there are filters for 'Record Type' (Assignment Rates) and 'Client' (Rio Tinto). A tab labeled 'Related' is selected, showing a table of 'Assignment Rates (2)'. The table has columns for 'Assignment Rate ID', 'Effective Date', 'Expiry Date', and 'Pay Code'. Two records are listed, both with an effective date of 17/11/2021. The first record has ID 'AR-0000000014' and 'Bonus (OTE)' pay code. The second record has ID 'AR-0000000015' and 'Normal Pay' pay code. A 'View All' link is at the bottom of the table. A 'New' button is in the top right corner of the table area.

Assignment Rate ID	Effective Date	Expiry Date	Pay Code
AR-0000000014	17/11/2021		Bonus (OTE)
AR-0000000015	17/11/2021		Normal Pay

Repeat this process to create all required Assignment Rate records for the Assignment Rate Template Group.

Assignment Rate records CAN NOT be deleted if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

6. To modify an existing Assignment Rate record, open the required record and select the Edit button available on the top right side of the page. You can also double-click within fields that need editing or just click on the pencil icon  that appears within fields when hovering with your cursor.
7. When complete, click on the **Save** button.

Any changes made to the Assignment Rate Template Group or its related records will not update Assignments already referencing the Assignment Rate Template Group.

Field Descriptions

Client defines the Client to whom the Template Group applies.

Effective Date is the effective date of the Assignment Rate.

Expiry Date is the expiry date of the Assignment Rate.

Invoice Rate is the Invoice Rate (exclusive of tax) that will be used in invoicing Pay Transactions created using this Assignment Rate.

Invoice Alone defines if Pay Transactions resulting from the Assignment Rate should be included on their own Invoice regardless of the Invoice Group By used.

Invoice Taxable indicates the Pay Transaction created using this Assignment Rate should have tax applied to the invoice.

Invoice Tax ID defines the Invoice Tax ID that applies to the Assignment Rate.

Pay Code the Pay Code to be linked to this Pay Rate on Pay Transactions.

Pay Rate is the amount to be paid per period based on the frequency.

Project Code associated with the Assignment Rate to create additional Pay Rates if required.

Sort Order is the order in which Assignment Rate records with the same effective date should be assessed during the interpretation of Timesheets for the creation of Pay Transactions.

Template Group defines the Template Group that the Assignment Rate will apply.

Template Group Name is mandatory to determine the group these records belong to.

Timesheet Activity indicates whether the Assignment Rate is also considered a specific Timesheet Activity used during interpretation, based on the Interpretation Rule.

To Be Invoiced indicates if Pay Transactions created using this Assignment Rate should be invoiced.
