

Purpose

The purpose of this quick reference guide is to step through the process of creating Award Classifications and Levels. The intended audience for this document is System Administrators/Standard users.

The Award Classification and Levels record is used to define various classifications for Minimum Pay Rates and if required, the levels within each classification.

Award Classifications are mandatory for creating Minimum Pay Rates, and Award Levels may optionally be created to further refine pay tiers within a Classification.

These records must be created before the creation of Minimum Pay Rates and Assignment Rate Template Groups, as they will be used by automation to categorise and identify the Minimum Pay Rate record that should be applied when creating Assignment Rates for an Assignment.

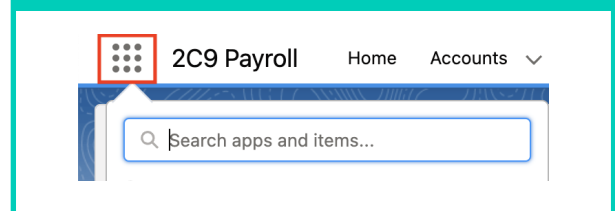

Steps

Create an Award Classification record

To create a new Award Classification record, please follow the steps below:

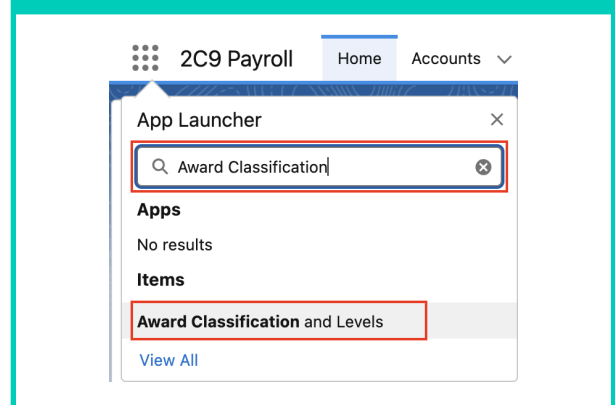

1. Click on the **App Launcher** icon (see Figure 1).

Figure 1

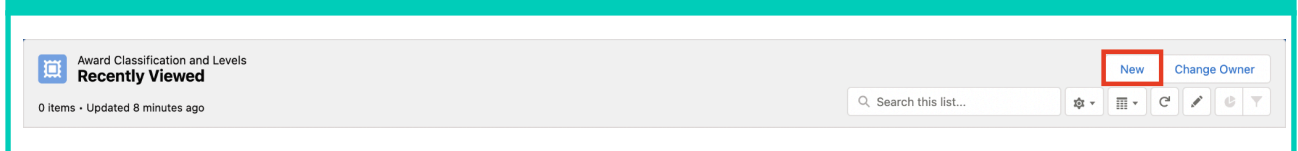

2. Go to the **Award Classification and Levels** object by using the Search function (see Figure 2).

Figure 2

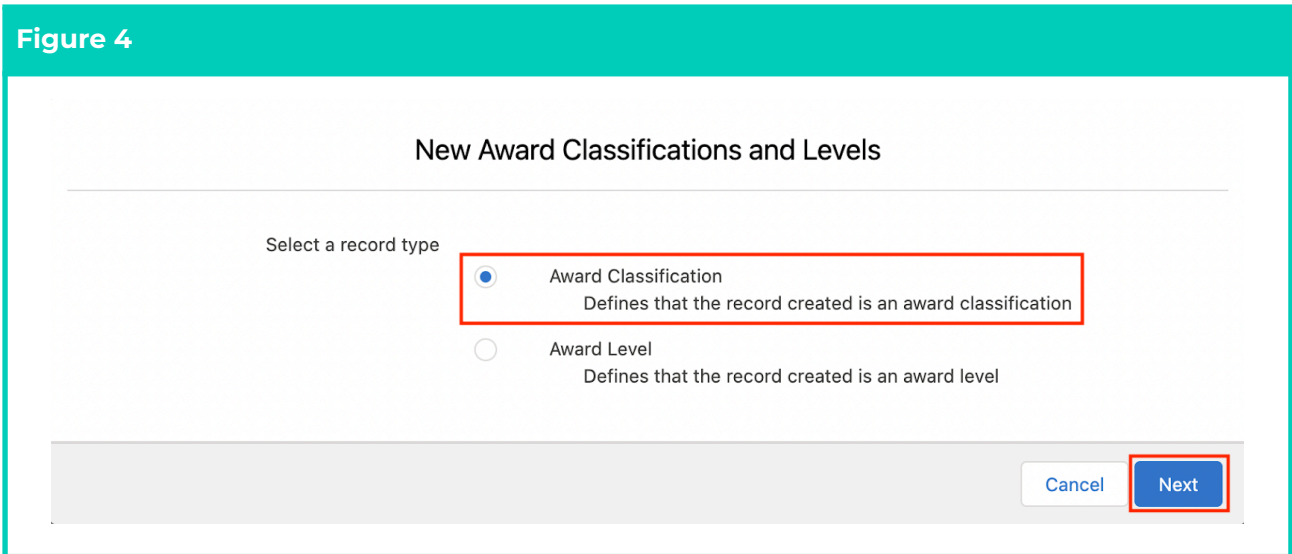

3. Click the **New** button (see Figure 3).

Figure 3

4. Choose the record type **Award Classification** and click **Next** (see Figure 4).

Figure 4

New Award Classifications and Levels

Select a record type

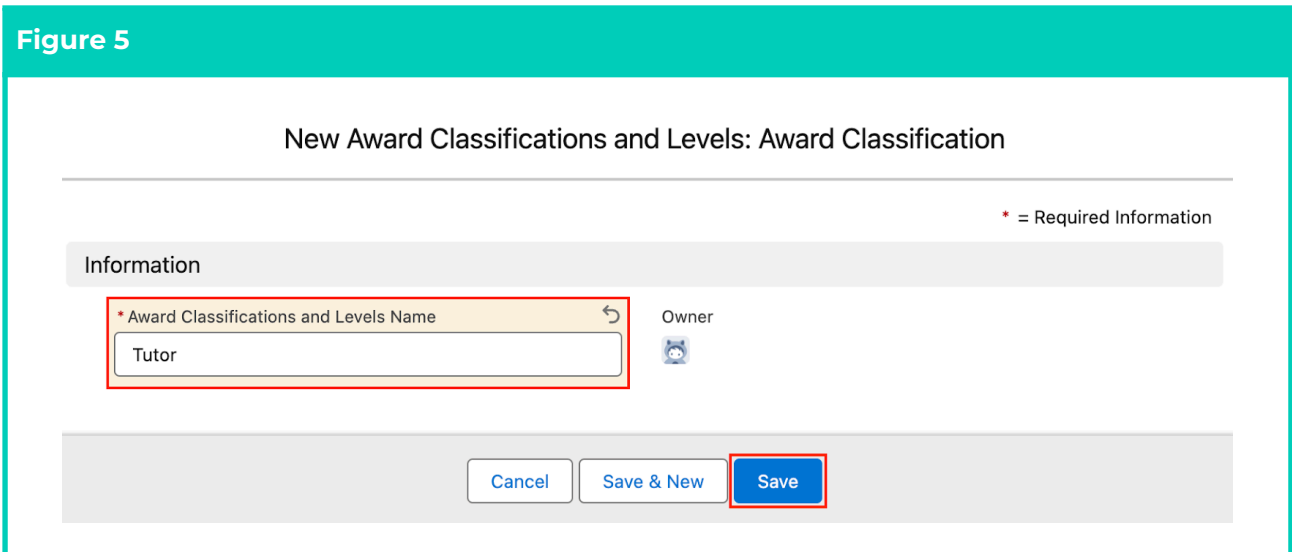

☒ Award Classification
Defines that the record created is an award classification

☐ Award Level
Defines that the record created is an award level

Cancel Next

5. Populate the following required field to provide the base details of the Award Classification record (see Figure 5):
 - a. **Award Classification and Levels Name**
6. Click the **Save** button

Users are encouraged to complete all required combinations of Classifications and Levels in advance before the Minimum Pay Rates are created. This is to ensure that when the resulting Assignment Rates are generated, the system can identify the required combinations that are needed.

Users are encouraged to follow a clear naming convention, and all Award Classifications and Award Levels must be unique. If you create duplicate names in the same Record Type, you will experience issues with the functionality.

7. A new Award Classification record has been created (see Figure 6).

Figure 6

8. To modify an existing **Award Classification** record, open the required record and select the **Edit** button available on the top right side of the page. You can also double-click in any of the fields that need editing or just click on the pencil icon  that appears within fields when you move your cursor over the field.
9. When complete, click on the **Save** button.

Create an Award Level record

To create a new Award Level record, please follow the steps below:

1. Go to the **Award Classification and Levels** object by using the Search function (see Figure 7).
2. Go to the **Award Classification and Levels** object by using the Search function (see Figure 8).

Figure 7

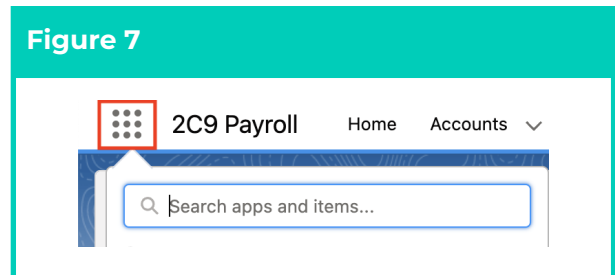

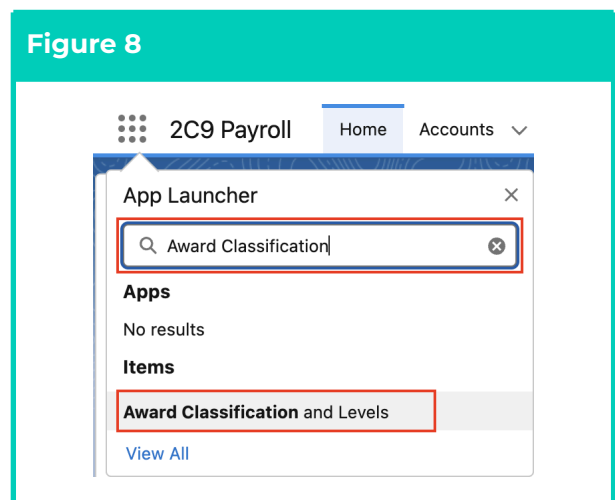

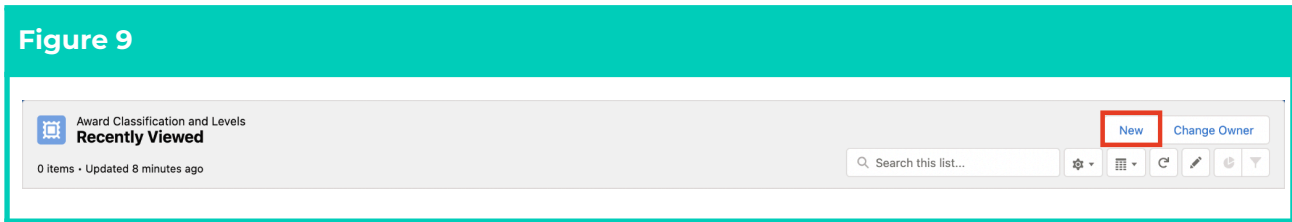

Figure 8

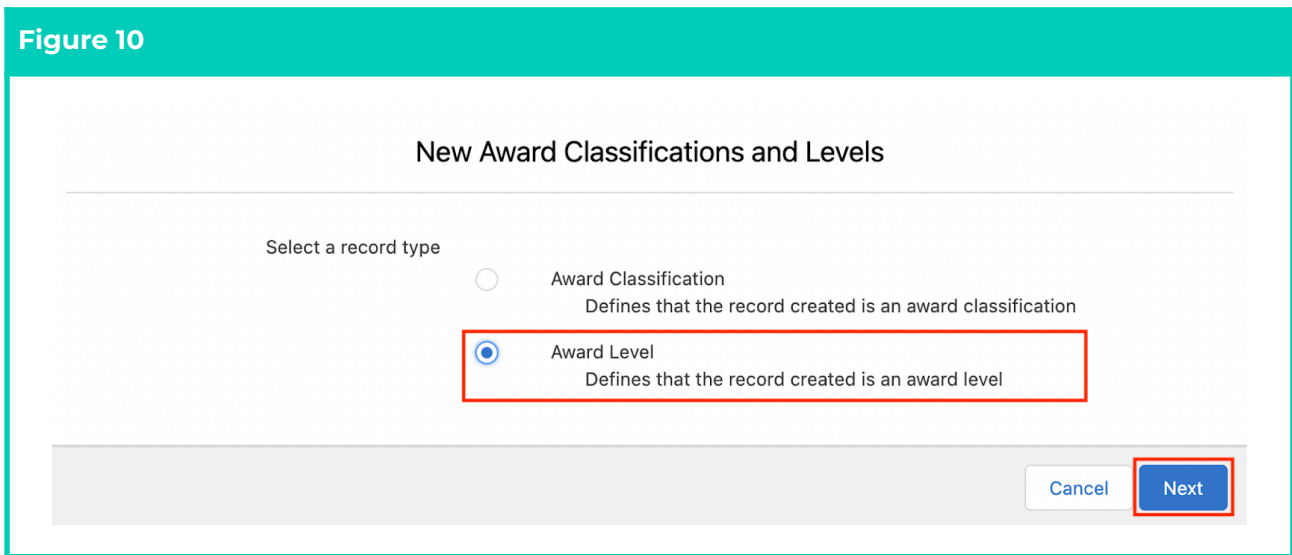

- Click **New** (See Figure 9).

Figure 9

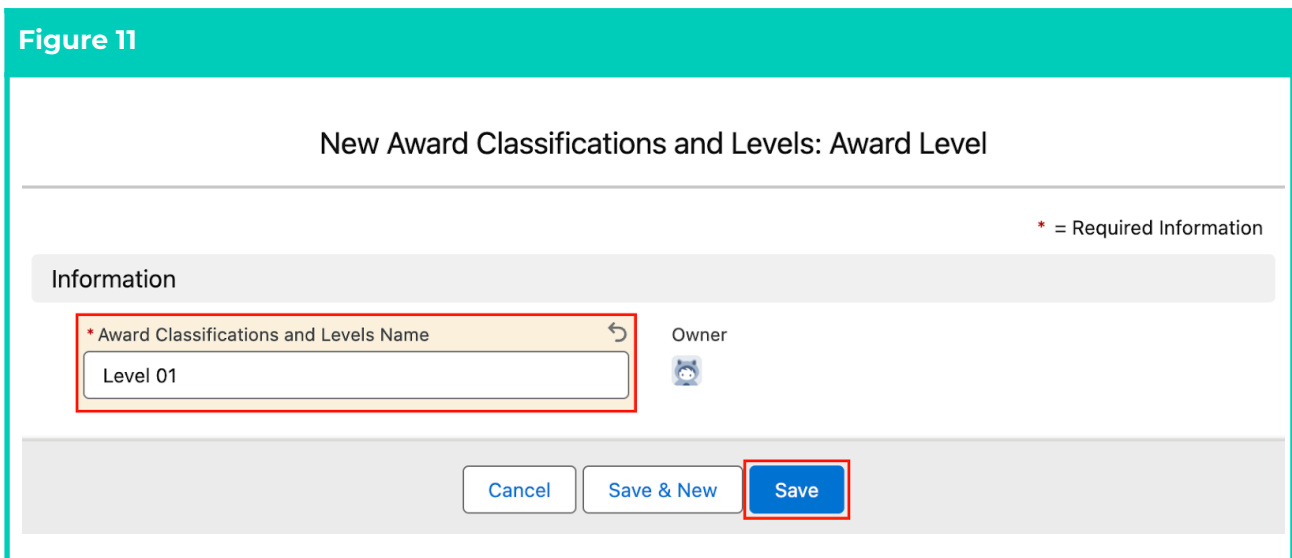

- Choose the record type **Award Level** and click **Next** (See Figure 10).

Figure 10

- Populate the following required field to provide the base details of the Award Level record (see Figure 11):
 - Award Classification and Levels Name**
- Click the **Save** button.

Figure 11

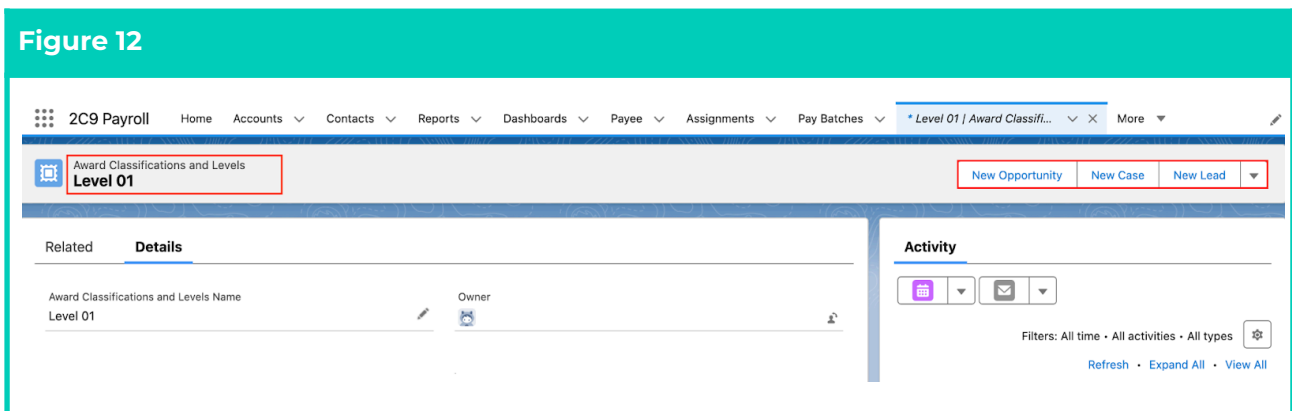

The need to create Award Level records is dependent upon the pay rate structure detailed within the Modern Award, EBA or Certified Agreement that the Interpretation Rules are based on.

Users are encouraged to follow a clear naming convention, and all Award Classifications and Award Levels must be unique. If you create duplicate names in the same Record Type, you will experience issues with the functionality.

7. A new Award Level record has been created (see Figure 12).

Figure 12

8. To modify an existing **Award Level** record, open the required record and select the **Edit** button available on the top right side of the page. You can also double-click in any of the fields that need editing or just click on the pencil icon  that appears within fields when you move your cursor over the field.
9. When complete, click on the **Save** button.

Field Descriptions

Award Classification and Levels Name is the name given to the Award Classification or the Award Level record that is being created. All Classification and Level names must be unique.
