

Purpose

The purpose of this quick reference guide is to step through the process of updating Assignment Rate Template Groups and the related Assignment Rates as required using the Update Rates Automation. The intended audience for this document is System Administrators / Standard Users.

The Assignment Rate Template Group defines a group of Assignment Rates detailing both Pay Rate and Invoice Rate, to automate the creation of Assignment Rate records.

The Update Rates functionality allows users to update the Assignment Rate records within an Assignment Rate Template Group in bulk, creating new records with newly entered Rates and expiring the existing Assignment Rate records. The Effective Date of the new record starts from the day after the previous Expiry Date.

The functionality allows users to enter an increase in percentage, dollar figure, or individual revised rates for each record selected when the UI is launched. The entered rates can then be calculated, reviewed, and confirmed as required. Once confirmed, automation will create new Assignment Rate records and expire the old records.

Steps

Update Assignment Rate Template Groups

Update Assignment Rate Template Groups by following the below steps:

1. Click on the **App Launcher** icon (see Figure 1).
2. Go to the **Template Groups** object by using the Search function (see Figure 2).

Figure 1

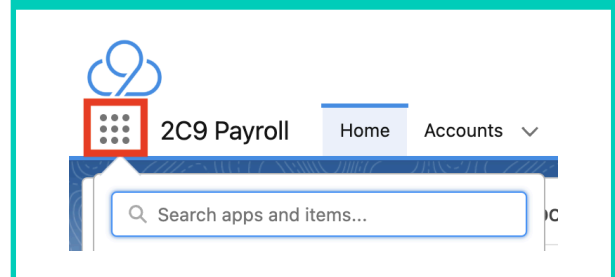

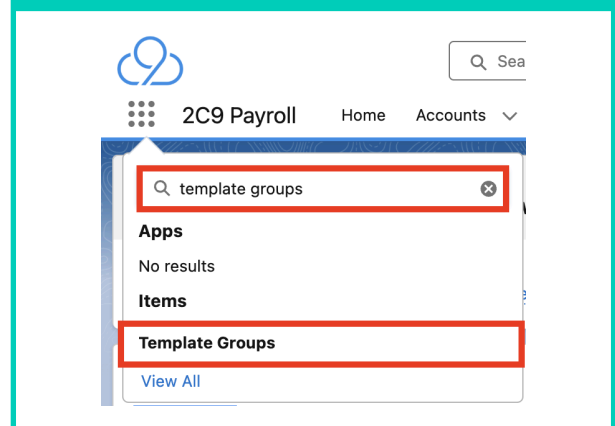

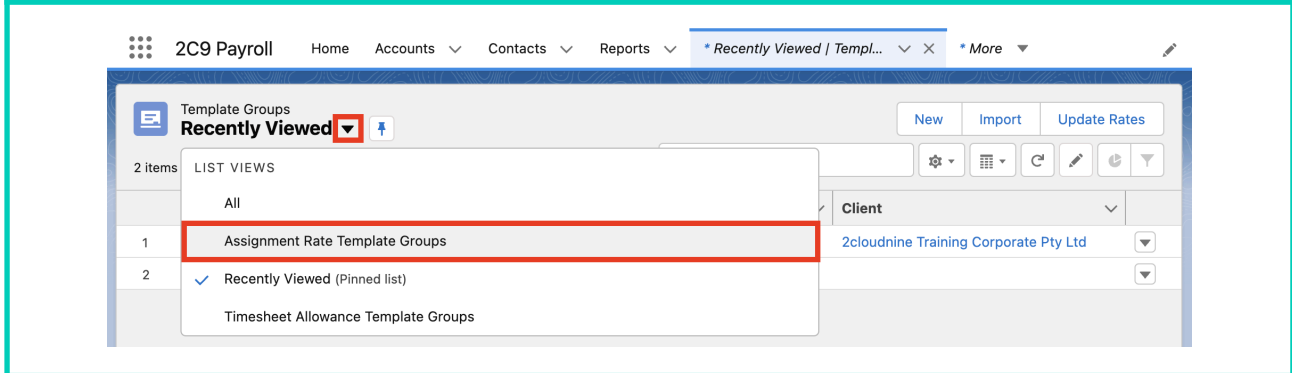

Figure 2

- From List View, click the arrow beside the current List View presented, and select **Assignment Rate Template Groups** (see Figure 3).

Figure 3

Update Rates Automation is not available for Payee Allowance Template Groups. If selected, Users will be presented with an error message detailing 'At least one valid Template Group record has to be selected for rates update!'

- Select the Assignment Rate Template Groups to update:
 - Select the checkbox next to the name of each Template Group record that you would like to update (see Figure 4).

OR

- Select the checkbox next to the Template Group Name heading to select all Template Group records displayed in the current List View (see Figure 5).

Figure 4

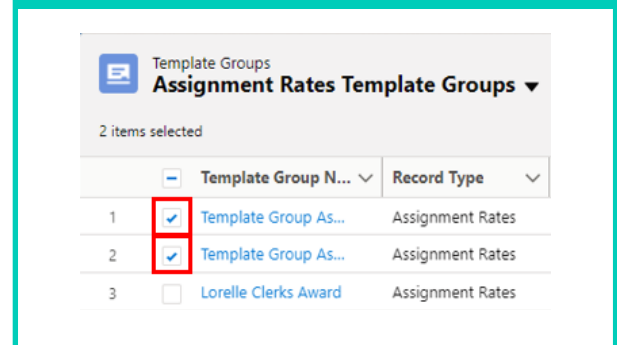

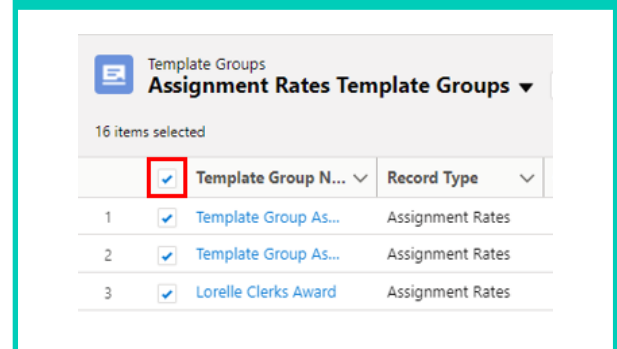

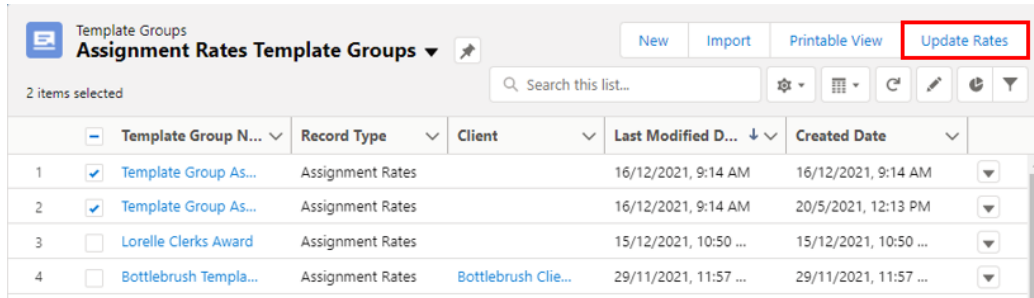

Figure 5

You can select a maximum of 200 records in a single batch. If you need to update more than 200 records, you are recommended to split the process into smaller batches as suitable.

- Once your selection is made, click on the **Update Rates** button in the top right corner to open the Updates Rates Automation (see Figure 6).

Buttons: Return, Confirm New Rates

Assignment Rate records that have expired but not Archived will still be included in the Updates Rates Automation process. If you have a very high volume of Assignment Rates, it is recommended that expired Assignment Rates have their Archiving Status field updated to Archived, so the Update Rates Automation process ignores them.

Field Descriptions

Increase % will apply a percentage increase to all the selected Assignment Rate records.

Increase \$ will apply a fixed \$ increase to all the selected Assignment Rate records.

To enter the Assignment Rates, new pay rates & Invoice Rate Changes en masse will allow individual rates to be entered which aren't a global increase across all records.

New Pay Rate is the Pay Rate that will be applied to the new Timesheet Template Assignment Rates and any associated Assignment Rates when the automation is completed.

New Invoice Rate is the Invoice Rate that will be applied to the new Timesheet Template Assignment Rates and any associated Assignment Rates when the automation is completed.
