When the Leave Template is populated and the Payee is saved, the Leave Rules associated with the Leave Template (listed as Leave Template Items) are automatically created as Payee Leave Rules.

Leave Template records CAN NOT be deleted if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

If edits are made to the associated Leave Template Items, then this doesn't flow through to existing Payee Leave Rules already referencing this Leave Template, it only applies to new Payees referencing the Leave Template.

14. To modify an existing **Leave Template** record, open the required record and select the **Edit** button available on the top right side of the page. You can also double click in any of the fields that need editing or just click on the pencil icon  that appears within fields when you move your cursor over the field.
15. When complete, click on the **Save** button.
