

Interpretation Rule Builder - Create Daily Rates Interpretation Rules

Purpose

The purpose of this quick reference guide is to step through the process of creating a Daily Rates Interpretation Rule using the Interpretation Rule Builder. The intended audience for this document are system administrators / standard users.

Steps

Create a Daily Rate Interpretation Rule

Interpretation Rules are used to convert Timesheet Entries into Pay Transactions for payment of wages to Payees, taking into account various calculations for the amount of time worked.

Interpretation Rules are created using the Interpretation Rule Builder, which consists of a series of dynamic fields that differ based on the record type selected. These fields are broken into several sections, some of which are optional, to allow for interpretation of various Award types.

See below for an ordered list of the QRGs related to each section of the Interpretation Rule Builder page for Daily Rate record types:

1. Create Daily Rate Interpretation Rules
2. Create Allowance, Leave & Allowance Junction Rule Breakpoints (**optional**)

Daily Rate Interpretation Rules allow for Timesheet Entries to be calculated based on the amount of time worked each day.

Create a Daily Rate Interpretation Rule using the Interpretation Rule Builder by following the below steps:

1. Click on the **App Launcher** icon (see Figure 1).
2. Go to the **Interpretation Rule** object by using the Search function (see Figure 2).

Figure 1

Figure 2

Interpretation Rule Builder - Create Daily Rates Interpretation Rules

- Click on the **New** button (see Figure 3).

Figure 3

- Select **Daily Rates** from the available record types and click on the **Next** button (see Figure 4).

Figure 4

The screenshot shows the 'New Interpretation Rule' form. The title 'New Interpretation Rule' is at the top. Below it, the 'Select a record type' section is visible. The 'Daily Rates' option is selected (indicated by a blue dot) and highlighted with a red box. The description for 'Daily Rates' is 'Used when candidates are to be paid based on daily rates'. Other options include 'Hourly Rates', 'Interpretation Variation Rule', 'Shift End Time', and 'Shift Start Time'. At the bottom right, there are 'Cancel' and 'Next' buttons, with the 'Next' button highlighted with a red box.

5. Follow this step in the sequence given below:
 - a. Populate the following required fields to provide the base details of the Interpretation Rule (see Figure 5):
 - i. **Interpretation Rule Name**
 - ii. **Timesheet Frequency**
 - b. Populate the following optional fields as required (see Figure 5):
 - i. To provide a description that can be used to quickly identify the Interpretation Rule, populate the **Short Description** field.
 - ii. To provide a description that can be used to quickly identify the configuration of the Interpretation Rule, populate the **Long Description** field.
 - iii. To define the Pay Code to be used when creating Pay Transactions in relation with this Interpretation Rule, populate the **Pay Code** field using the lookup options available.
 - iv. To determine whether Employees may be paid partial Rates according to the amount of hours worked each day, select from the available picklist options in the **Apply Partial Daily Rates** field.

Figure 5

The screenshot shows the 'Interpretation Rule Builder' interface. The 'Basic Information' section is active, displaying several input fields. The 'Interpretation Rule Name' field contains 'Daily Training - Wk 3/6/9'. The 'Timesheet Frequency' dropdown is set to 'Weekly'. The 'Short Description' field contains 'Daily Training - Weekly 3hrs 0.5 / 6hrs 1 / 9hrs 1.5'. The 'Long Description' field contains '0.5 day = 3 - 6 hours', '1 day = 6 - 9 hours', and '1.5 day = 9 - 24 hours (Maximum)'. The 'Pay Code' field shows a lookup icon and 'Daily Rate'. The 'Apply Partial Daily Rates' dropdown is set to 'Yes'. The 'Additional Details' section is partially visible at the bottom, showing fields for 'Last Modified By ID', 'Last Modified Date' (with Date and Time sub-fields), and a 'Time' field.

The fields within the Additional Details section require no input and will be automatically populated once updates and/or changes to the Interpretation Rule have been saved.

For successful Pay Transaction creation, Assignment Rate records related to Assignments referencing this Interpretation Rule must use the same Pay Code as the Interpretation Rule.

6. If the Apply Partial Daily Rates field was populated Yes in Step 5b., follow this step in the sequence given below (see Figure 6):
 - a. To define Partial Daily Rate Breakpoints, populate the following required fields:
 - i. Click on the **+ Add** button and a new Daily Hours Breakpoint line will be added.
 - ii. To define the amount of hours for the first Daily Hours Breakpoint, populate the **End** field.
 - iii. To define the amount of Pay Code units to be applied to related Pay Transactions, populate the **Daily Quantity** field with a decimal percentage.
 - b. Repeat Step 6a. until a full 24 hours of Partial Rate Breakpoints have been accounted for.

Figure 6

Apply Daily Partial Rates

+ Add

Name	Start	End	Daily Quantity	
Daily Hours Breakpoint 1	0	3	0.25	
Daily Hours Breakpoint 2	3	6	0.5	
Daily Hours Breakpoint 3	6	9	1	
Daily Hours Breakpoint 4	9	24	1.5	

Daily Hours Breakpoints must begin at 0. The End Time field within each Breakpoint will be automatically populated with a value of 24, which can be overridden. Every additional Breakpoint is automatically populated with Start Times that correspond with the End Time populated in the previous line, negating the need for manual entry of the Start field.

If Breakpoints are added to a Daily Rates Interpretation Rule, they must account for the full 24 hours of a shift before the record can be saved.

To remove a Breakpoint, click on the Trash Can icon next to the corresponding line.

If Allowance Rules are required for the Interpretation Rule, follow the instructions provided in the Allowance, Leave and Allowance Junction Rules QRG.

- Click on the **Save** button (see Figure 8).

Figure 8

Basic Information

Interpretation Rule Name

Daily Training - Wk 3/6/9

Short Description

Daily Training - Weekly 3hrs 0.5 / 6hrs 1 / 9hrs 1.5

Timesheet Frequency

Weekly

Long Description

0.5 day = 3 - 6 hours
1 day = 6 - 9 hours
1.5 day = 9 - 24 hours (Maximum)

Pay Code

Daily Allowance 1	10.00	Hours	Meal Allowance	Yes

Unfinalise

Cancel

If multiple Timesheet Frequencies are applicable for this Interpretation, separate Interpretation Rules will need to be created for each Timesheet Frequency required.

Once an Interpretation Rule has been Finalised and related to another record, it **CANNOT** be deleted from the system. Once no longer required, Interpretation Rules are unable to be expired/end dated, so it may be preferred to rename this Interpretation Rule with a name to easily identify it is a retired Interpretation Rule

Field Descriptions

Apply Partial Daily Rates defines whether partial daily rates are to be interpreted.

Daily Quantity is the portion of the Daily Rate Pay Code to be applied to a Pay Transaction when a Partial Rate Breakpoint is applied during Timesheet Interpretation.

Interpretation Rule Name defines the name for the Interpretation Rule which will be referenced in Assignment Records.

Long Description is the description outlining the Interpretation Rules purpose.

Pay Code defines the Pay Code that applies to all Pay Transactions for this Daily Rates Interpretation Rule.

Short Description is the description that can be displayed in the lookup search to assist users in selecting the correct award.

Start / End is the amount of hours that must be worked for a Partial Rate Breakpoint to be applied to a Pay Transaction created during Timesheet Interpretation.

Timesheet Frequency defines the Timesheet Frequency for which the Interpretation Rule will be exclusively applicable to.
