

Purpose

The purpose of this quick reference guide is to step through the process of defining and populating the required Breakpoints for Shift Time record types within the Interpretation Rule Builder. The intended audience for this document are system administrators / standard users.

Steps

Populate a Shift Time Interpretation Rule

Interpretation Rules determine how Pay Transactions are calculated for Timesheet Entries, according to the amount of time worked, the conditions of work, and any associated entitlements.

The Interpretation Rule Builder consists of a series of dynamic fields that differ based on record type, and are broken into several sections. Some sections (and fields) are optional, allowing specific types of working conditions to be catered to.

Shift Start Time and Shift End Time Interpretation Rules will assess Timesheet Entries based on the time of day that a work period begins and/or ends.

See below for an ordered list of the QRGs related to each section of the Interpretation Rule Builder page for Shift Time record types:

1. Populate Shift Time Interpretation Rules
2. Populate Break Loading and Minimum Rest Rules **(optional)**
3. Populate Split/Broken Shift and Sleepover Rules **(optional)**
4. Populate Allowance, Leave & Allowance Junction Rule Breakpoints **(optional)**
5. Create Breakpoints and Pay Code Caps

Populate a Shift Time Interpretation Rule using the Interpretation Rule Builder by following the below steps:

1. Click on the **App Launcher** icon (see Figure 1).
2. Go to the **Interpretation Rule** object by using the Search function (see Figure 2).

Figure 1

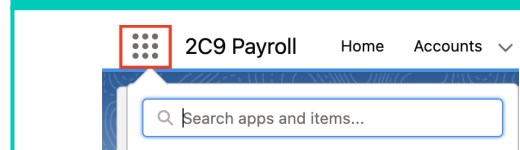

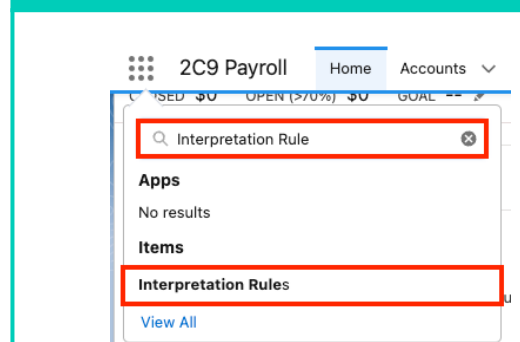

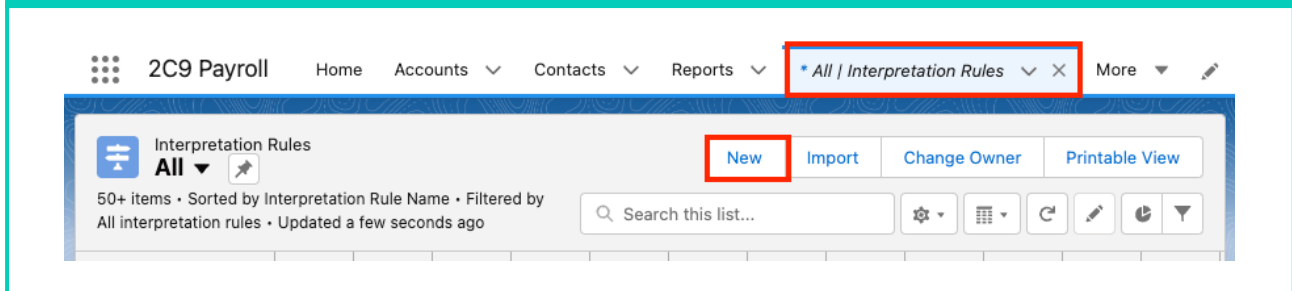

Figure 2

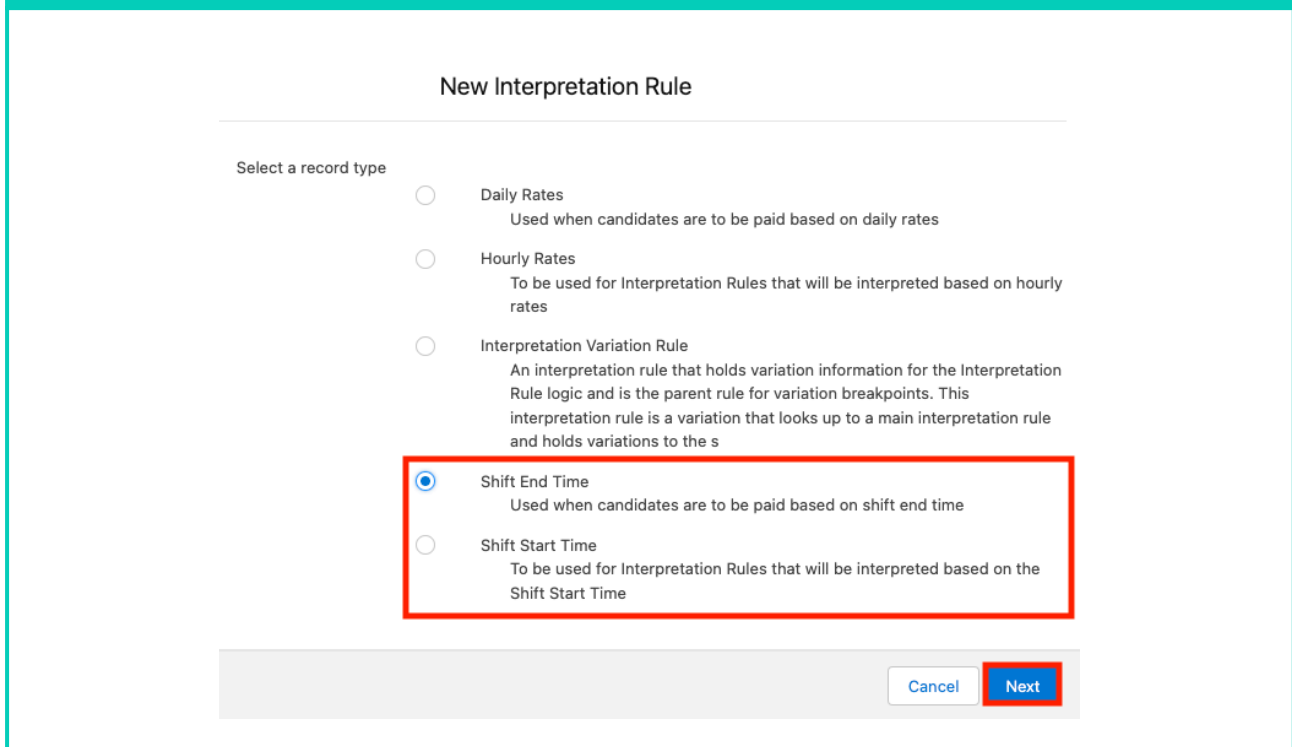

3. Click on the **New** button (see Figure 3).

Figure 3

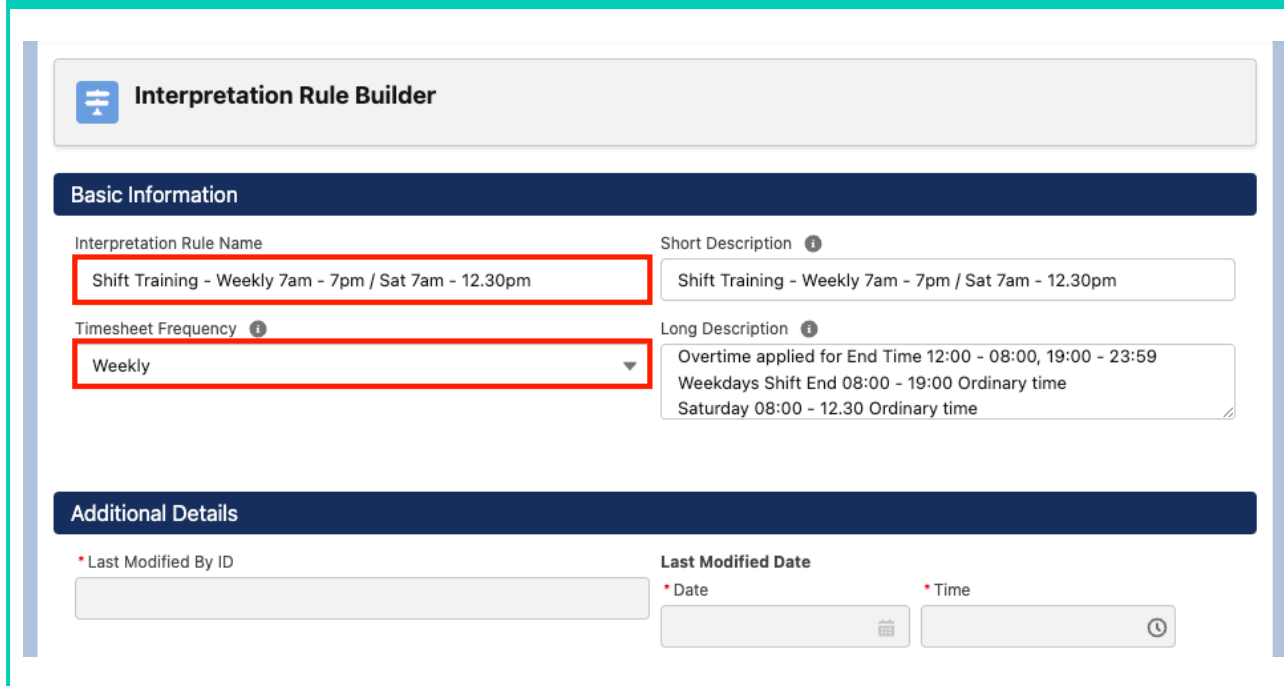

4. Select either **Shift End Time** or **Shift Start Time** and click on the **Next** button (see Figure 4).

Figure 4

5. To complete Basic Information for the Interpretation Rule, follow this step in the sequence given below:
 - a. Populate the following required fields to provide the base details of the Interpretation Rule (see Figure 5):
 - i. **Interpretation Rule Name**
 - ii. **Timesheet Frequency**
 - b. Populate the following optional fields as needed (see Figure 5):
 - i. To provide a description used to identify the Interpretation Rule, populate the **Short Description** field.
 - ii. To provide a description used to identify the configuration of the Interpretation Rule, populate the **Long Description** field.

Figure 5

The screenshot shows the 'Interpretation Rule Builder' interface. It has a header bar with a menu icon and the title 'Interpretation Rule Builder'. Below this is a 'Basic Information' section with two columns. The left column contains 'Interpretation Rule Name' with a text box containing 'Shift Training - Weekly 7am - 7pm / Sat 7am - 12.30pm' and 'Timesheet Frequency' with a dropdown menu set to 'Weekly'. The right column contains 'Short Description' with a text box containing 'Shift Training - Weekly 7am - 7pm / Sat 7am - 12.30pm' and 'Long Description' with a text box containing 'Overtime applied for End Time 12:00 - 08:00, 19:00 - 23:59', 'Weekdays Shift End 08:00 - 19:00 Ordinary time', and 'Saturday 08:00 - 12.30 Ordinary time'. Below the 'Basic Information' section is an 'Additional Details' section. It contains three fields: 'Last Modified By ID' (a text box), 'Last Modified Date' (a date picker), and 'Time' (a time picker).

Important Notes

(Figure 5)

Timesheet Frequency CANNOT be updated once Pay Transactions have been generated using the Interpretation Rule.

The fields within the Additional Details section require no input, and will be automatically populated once updates and/or changes to the Interpretation Rule have been saved.

General Rule Settings

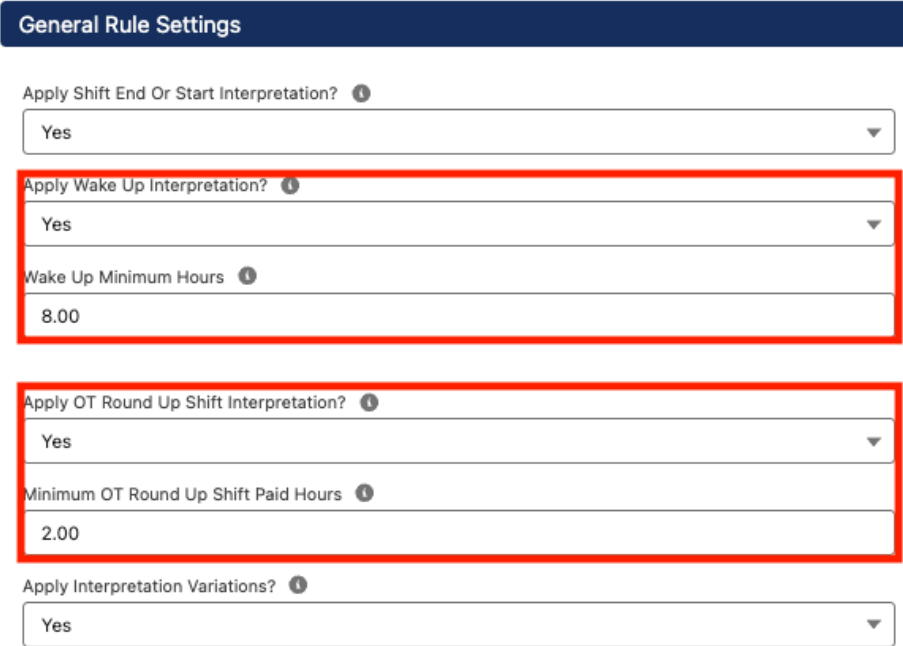

This section of the Interpretation Rule Builder defines general conditions applied to Interpretation logic. Some of the selections made in this section of the Builder will impact the fields available in later sections (including Breakpoint fields) due to the dynamic nature of the Interpretation Builder.

Populate General Rule Settings for the Interpretation Rule by following the below steps (see Figure 6):

6. To enter Breakpoints using both Shift Start Times and Shift End Times, select **Yes** in the **Apply Shift End or Shift Start Interpretation** field.
7. For Wake Up Interpretation:
 - a. Apply Overtime Breakpoints to Timesheet Entries with a Wake Up Timesheet Activity by selecting **Yes** in the **Apply Wake Up Interpretation** field.
 - b. Define the accumulative minimum payable hours for Wake Up Timesheet Activities that occur within the Sleepover Period by populating the **Wake Up Minimum Hours** field.
8. For Overtime rounding:
 - a. Round up Overtime to the nearest whole hour for Timesheet Entries with a Timesheet Activity by selecting **Yes** in the **Apply OT Round Up Shift Interpretation?** field.

- b. Define the minimum amount of hours payable for OT Round Up Shift Interpretation by populating the **Minimum OT Round Up Shift Paid Hours** field.
9. To enable Interpretation Variations records to be applied, select **Yes** in the **Apply Interpretation Variations?** field.

Figure 6

Wake Up Minimum Hours ⓘ
8.00

Apply OT Round Up Shift Interpretation? ⓘ
Yes ▼

Minimum OT Round Up Shift Paid Hours ⓘ
2.00

Apply Interpretation Variations? ⓘ
Yes ▼

Important Notes

(Figure 6)

Shift Start or Shift End Interpretation is used to cater to conditions such as paying night shift for all shifts ending before 8am, or starting before 6am.

If Shift Start and Shift End Interpretation is NOT applied, only Shift Start OR Shift End Breakpoints will be available, depending on the Record Type selected.

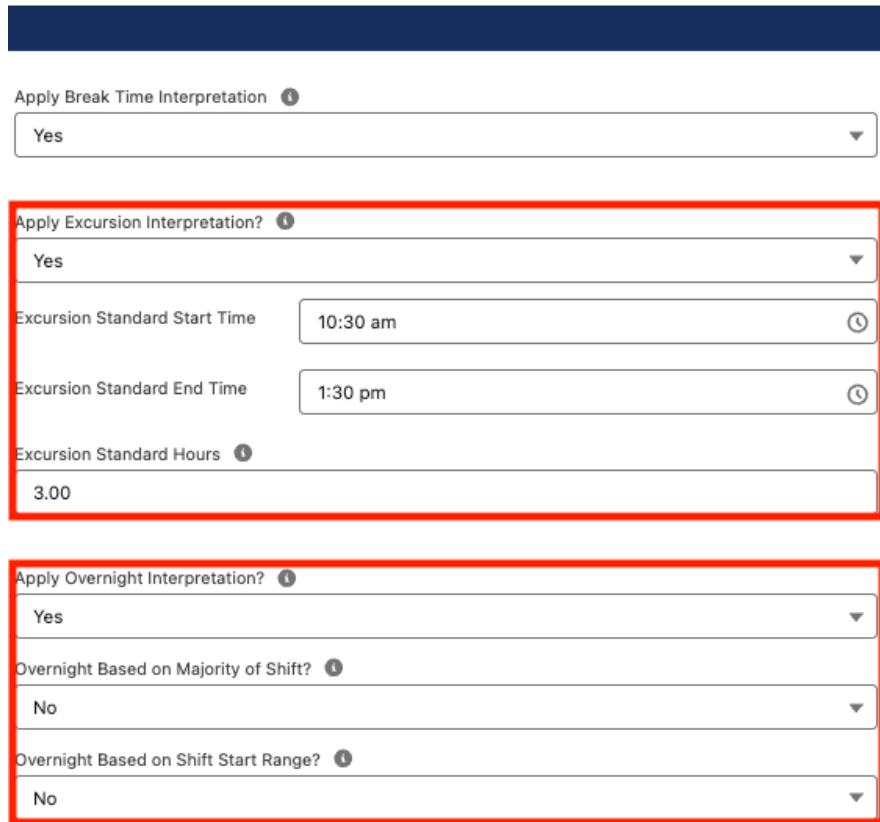

Interpretation will only apply Wake Up, OT Round Up or Excursion logic when the corresponding Timesheet Activity Project Code has been populated.

Overtime related to the OT Round Up or Wake Up Timesheet Activities will be calculated using Weekday, Weekend or Public Holiday Overtime Breakpoints.

10. For Break Time considerations (see Figure 7):
 - a. To ensure Break Time Interpretation is applied to all applicable Breakpoint types, select **Yes** in the **Apply Break Time Interpretation** field.
11. If Excursions are required:
 - a. Include Excursion Timesheet Activities in ordinary time calculations by selecting **Yes** in the **Apply Excursion Interpretation?** field.
 - b. Define when Excursions should begin and cease being Interpreted with ordinary time Pay Codes by populating the **Excursion Standard Start Time** and **Excursion Standard**

- End Time** fields.
- c. Define the amount of hours each day that Excursions can be Interpreted with ordinary time Pay Codes by populating the **Excursion Standard Hours** field.
12. For Overnight Interpretation:
- a. Apply Overnight Interpretation to breakpoints when Timesheet Entries cross midnight by selecting **Yes** in the **Apply Overnight Interpretation?** field.
 - b. To interpret Overnight Timesheet Entries based on the Breakpoint that applies to the majority of the time entered for the day, select **Yes** in the **Overnight Based on Majority of Shift?** field
- OR**
- c. To interpret Overnight Timesheet Entries based on the Breakpoint that applies to the beginning of the Timesheets Entry, select **Yes** in the **Overnight Based on Shift Start Range?** field.

Figure 7

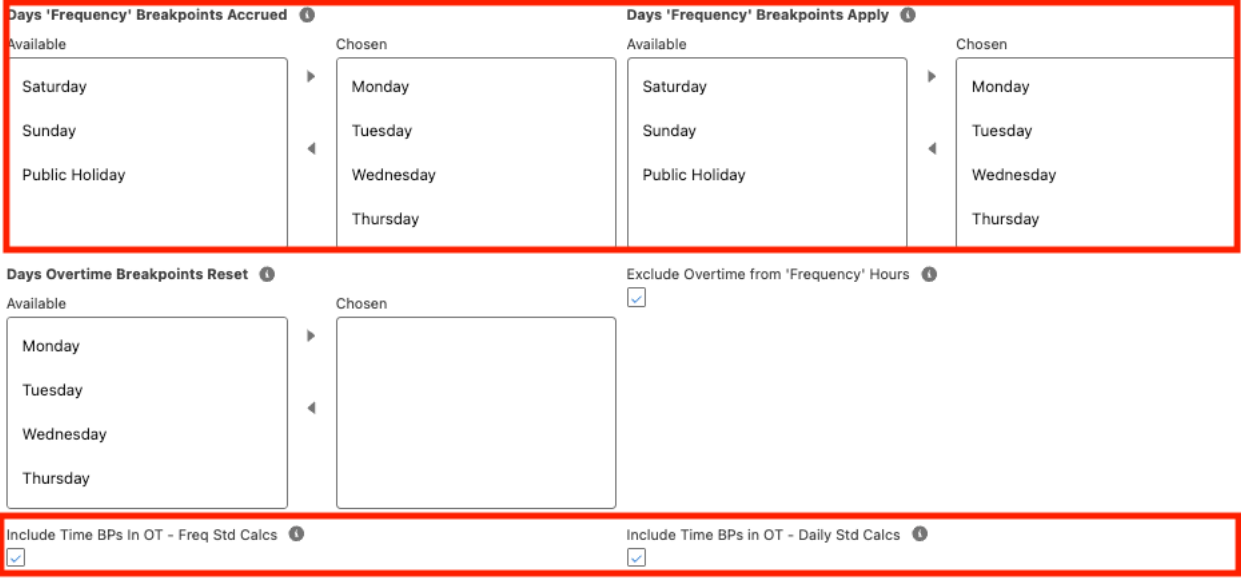

The screenshot shows a web form for configuring interpretation rules. It is divided into three main sections, each with a red border:

- Apply Break Time Interpretation:** A dropdown menu set to "Yes".
- Apply Excursion Interpretation:** A dropdown menu set to "Yes". Below it are three input fields:
 - Excursion Standard Start Time:** 10:30 am
 - Excursion Standard End Time:** 1:30 pm
 - Excursion Standard Hours:** 3.00
- Apply Overnight Interpretation:** A dropdown menu set to "Yes". Below it are two more dropdown menus:
 - Overnight Based on Majority of Shift?:** No
 - Overnight Based on Shift Start Range?:** No

13. Define Frequency Breakpoint calculations (see Figure 8):
- a. To populate the following fields, use the arrow buttons provided to move days from the **Available** to **Chosen** columns.
 - i. Select days where time contributes to Frequency Standard Hours using the **Days 'Frequency' Breakpoints Accrued** field.
 - ii. Select days where time contributes to Frequency Overtime Breakpoints once the count of Frequency Standard Hours is exceeded using the **Days 'Frequency' Breakpoints Accrued** field.

- iii. If required, define days where Frequency Overtime Breakpoints will reset to the first Breakpoint, instead of continuing to apply as Overtime from the previous day using the **Days Overtime Breakpoints Reset** field.
 - b. To exclude time associated with Overtime Breakpoints from Frequency Standard Hours calculations, select the **Exclude Overtime from 'Frequency' Hours** checkbox.
- 14. If using Standard Time with Time Breakpoints:
 - a. Enable Frequency Breakpoints to be interpreted using Overtime logic by selecting the **Include Time BPs in OT - Freq Std Calcs** checkbox.
 - i. If **Yes**, enable Overtime to be included in Daily Standard Hours assessments by selecting the **Include Time BPs in OT - Daily Std Calcs** checkbox.

Figure 8

The screenshot shows the 'Interpretation Rule Builder' interface with the following configuration:

- Days 'Frequency' Breakpoints Accrued**: Available list contains Saturday, Sunday, and Public Holiday. Chosen list contains Monday, Tuesday, Wednesday, and Thursday.
- Days 'Frequency' Breakpoints Apply**: Available list contains Saturday, Sunday, and Public Holiday. Chosen list contains Monday, Tuesday, Wednesday, and Thursday.
- Days Overtime Breakpoints Reset**: Available list contains Monday, Tuesday, Wednesday, and Thursday. Chosen list is empty.
- Exclude Overtime from 'Frequency' Hours**: Checkbox is checked.
- Include Time BPs in OT - Freq Std Calcs**: Checkbox is checked.
- Include Time BPs in OT - Daily Std Calcs**: Checkbox is checked.

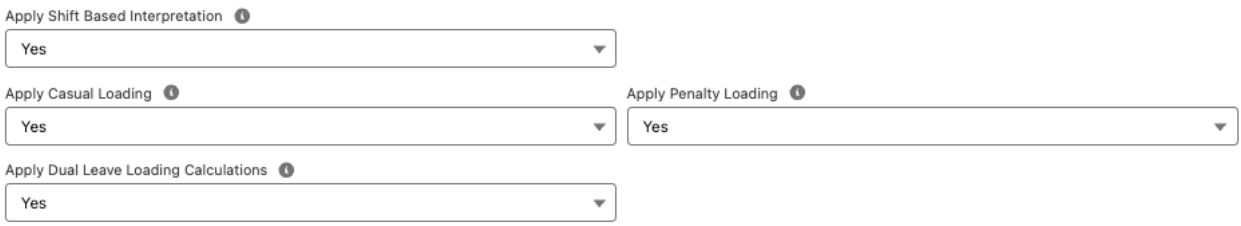

Important Notes

(Figure 8)

Standard Time with Time Breakpoints may only be selected within Saturday, Sunday and Public Holiday Rules when using the Shift Start or Shift End Record Type. For more information on Time Breakpoints, please refer to the Populate Hourly Rate Breakpoints QRC.

- 15. Apply Shift Logic to Overtime and Minimum Hour calculations by selecting **Yes** in the **Apply Shift Based Interpretation** field (see Figure 9).
- 16. To calculate Loadings:
 - a. If separate Pay Transactions should be created when Casual Loading Pay Codes apply, select **Yes** in the **Apply Casual Loading** field.
 - b. If separate Pay Transactions should be created when Penalty Loading Pay Codes apply, select **Yes** in the **Apply Penalty Loading** field.
 - c. If Dual Leave Loading calculations need to be applied to Leave Breakpoints, select **Yes** in the **Apply Dual Leave Loading Calculations** field.

Figure 9

Apply Shift Based Interpretation ⓘ
Yes ▼

Apply Casual Loading ⓘ
Yes ▼

Apply Dual Leave Loading Calculations ⓘ
Yes ▼

Apply Penalty Loading ⓘ
Yes ▼

Important Notes

(Figure 9)

If Apply Shift Based Interpretation is No or blank, Daily Logic will be used to interpret Overtime and Minimum Hours calculations.

If Shift Logic is applied, Split/Broken Shift settings will be used to populate the Shift Start Time, Shift Start Date, Shift End Time and Shift End Date fields on Timesheet Entries, enabling interpretation to assess multiple Timesheet Entries as a group. To group shifts according to custom settings or integrations, rather Broken Shift Rules, please speak to your system Administrator.

If Yes is selected in the Apply Dual Leave Loading Calculations field, related Payee Leave Rules must also be configured to enable Leave Loading to avoid validation errors during Interpretation.

Break Loading and Minimum Rest Rules

17. To define any Break Loading or Minimum Rest logic, follow the instructions provided in the Populate Break Loading & Minimum Rest Rules QRG.

Split/Broken Shift and Sleepover Rules

18. To define any Split/Broken Shift or Sleepover logic, follow the instructions provided in the Populate Split/Broken Shift & Sleepover Rules QRG.

Weekday (Monday to Friday) Rules

This section of the Interpretation Rule Builder defines Interpretation logic for Weekday Timesheet Entries. Standard Hours and Minimum Paid Hours MUST be populated for Weekday, Saturday, Sunday and Public Holiday Rules.

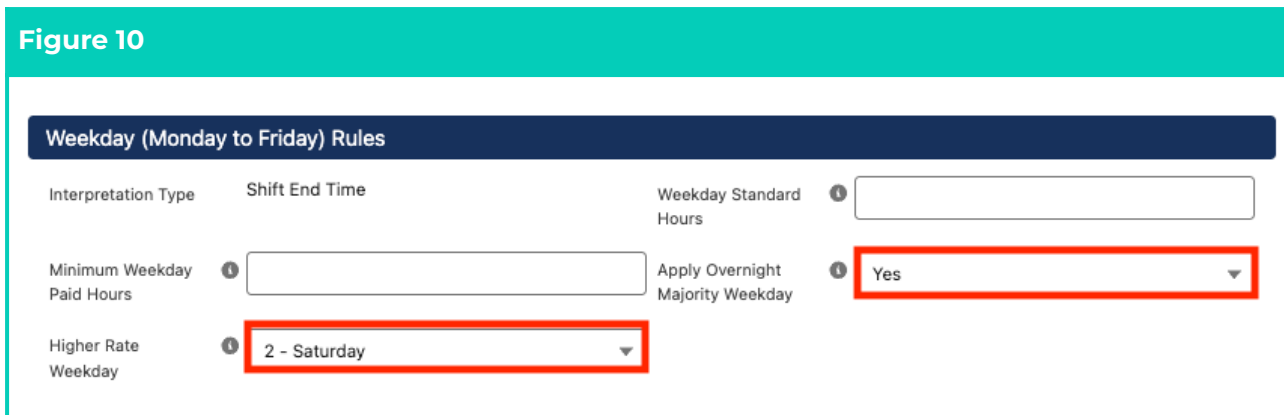

The fields displayed for Weekday Rules will differ depending on whether Overnight Interpretation was applied in General Rule Settings, and if so, which option was selected.

If Overnight Interpretation does not apply, please skip to step 21.

19. For **Overnight Based on Majority of Shift**, populate the following two fields (see Figure 10):
 - a. Define the highest available rate for Timesheet Entries split equally across a Weekday and another day by selecting from the available picklist options in the **Higher Rate Weekday** field:
 - i. **1 - Weekday** - lowest available rate
 - ii. **2 - Saturday** - second available rate
 - iii. **3 - Sunday** - third available rate
 - iv. **4 - Public Holiday** - highest available rate

- b. If Overnight Timesheet Entries should be paid according to the Breakpoint applied to the majority of hours on a Timesheet Entry, select **Yes** in the **Apply Overnight Majority Weekday** field.

Figure 10

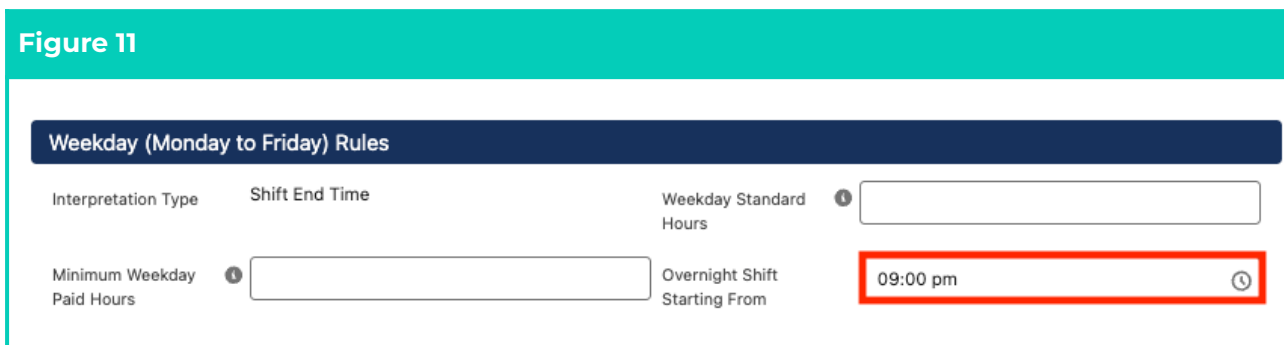

Weekday (Monday to Friday) Rules

Interpretation Type	Shift End Time	Weekday Standard Hours	
Minimum Weekday Paid Hours		Apply Overnight Majority Weekday	Yes
Higher Rate Weekday	2 - Saturday		

20. For **Overnight Based on Shift Start Range**, define the time that Overnight shifts should begin being interpreted using the next day's Breakpoint by populating the **Overnight Shift Starting From** field (see Figure 11).

Figure 11

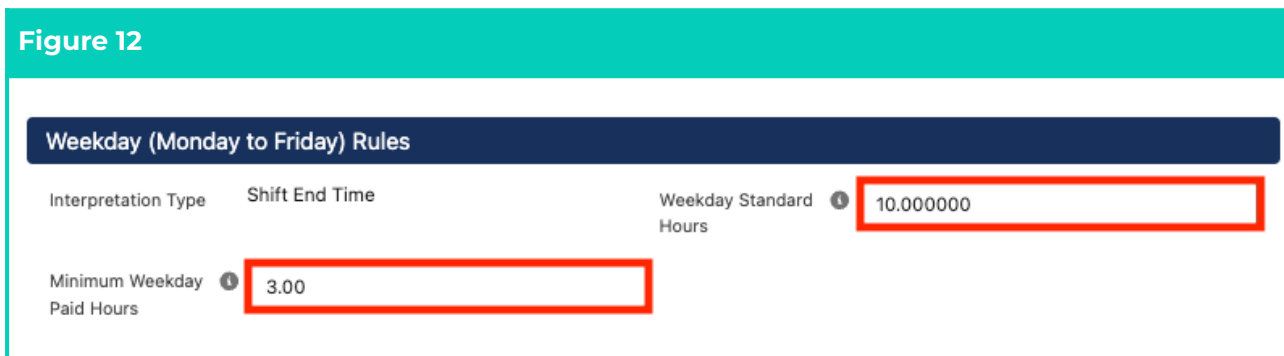

Weekday (Monday to Friday) Rules

Interpretation Type	Shift End Time	Weekday Standard Hours	
Minimum Weekday Paid Hours		Overnight Shift Starting From	09:00 pm

21. The **Interpretation Type** field may not be edited for Shift Time Weekday Rules (see Figure 12).
22. To define the minimum hours payable each Weekday, regardless of actual hours populated for Timesheet Entries, populate the **Minimum Weekday Paid Hours** field.
23. To define the maximum hours payable for ordinary time Pay Codes in a single shift (if Shift Logic is applied) or day (if Daily Logic is applied) before Overtime Pay Codes are applied, populate the **Weekday Standard Hours** field.

Figure 12

Weekday (Monday to Friday) Rules

Interpretation Type	Shift End Time	Weekday Standard Hours	10.000000
Minimum Weekday Paid Hours	3.00		

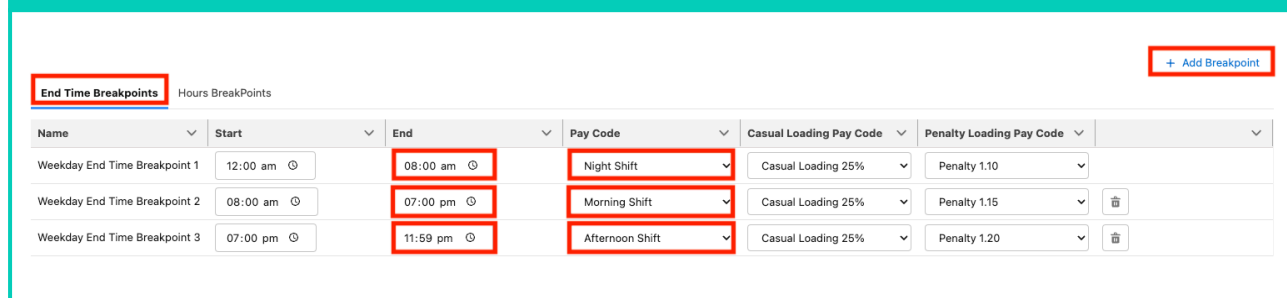

End Time Breakpoints

These Breakpoints are mandatory for Weekday Rules in Shift End Time Record Types, unless the Apply Shift End or Start Interpretation field is selected in General Rule Settings.

The same applies for Saturday, Sunday and Public Holiday Rules, unless a different kind of Breakpoint is selected from the Interpretation Type field. To populate other Breakpoint types, follow the instructions in Populate Hourly Rate Interpretation Rules QRG.

24. Follow this step to populate End Time Breakpoints (see Figure 13):
 - a. Click on the **End Time Breakpoints** tab.
 - b. As the **Start** field defaults to 12:00am, and does not need to be populated, define the first End Time Breakpoint that occurs during Weekdays from 12:00am by populating the **End** field.
 - c. Select a Pay Code for the first Shift End Time Breakpoint by populating the **Pay Code** field using the lookup options available.
 - d. If Loadings were enabled in General Rule Settings:
 - i. Use the available picklist options to populate the **Casual Loading Pay Code** and/or **Penalty Loading Pay Code** fields.
 - e. To add another End Time Breakpoint, click on the **+ Add Breakpoint** button.
 - f. Populate the **End** and **Pay Code** fields within the new Breakpoint to define the next Weekday Shift End Time Breakpoint.
 - g. To remove a Breakpoint, click on the **Trash Can** icon next to the corresponding line.
25. Repeat until a full 24 hours of End Time Breakpoints have been populated.

Figure 13

Name	Start	End	Pay Code	Casual Loading Pay Code	Penalty Loading Pay Code
Weekday End Time Breakpoint 1	12:00 am	08:00 am	Night Shift	Casual Loading 25%	Penalty 1.10
Weekday End Time Breakpoint 2	08:00 am	07:00 pm	Morning Shift	Casual Loading 25%	Penalty 1.15
Weekday End Time Breakpoint 3	07:00 pm	11:59 pm	Afternoon Shift	Casual Loading 25%	Penalty 1.20

Start Time Breakpoints

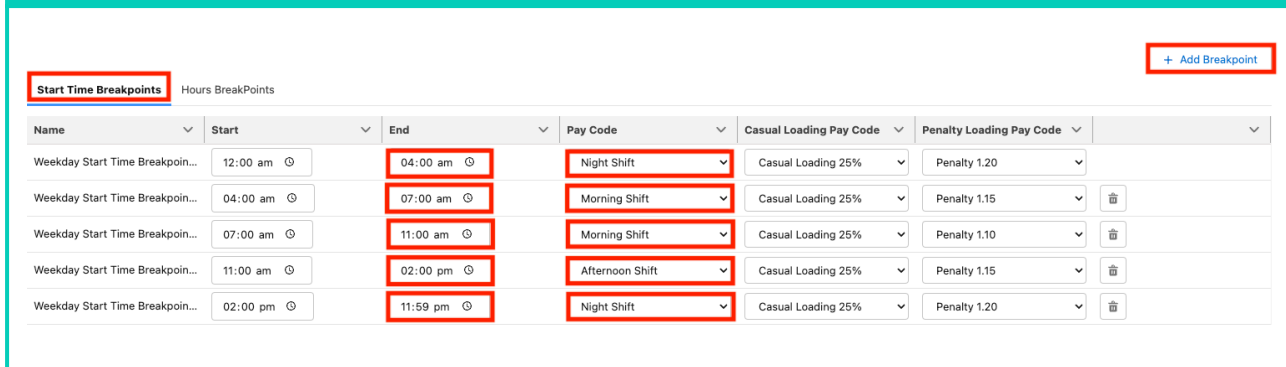

These Breakpoints are mandatory for Weekday Rules in Shift Start Time Record Types, unless the Apply Shift End or Start Interpretation field is selected in General Rule Settings.

The same applies for Saturday, Sunday and Public Holiday Rules, unless a different kind of Breakpoint is selected from the Interpretation Type field. To populate other Breakpoint types, follow the instructions in Populate Hourly Rate Interpretation Rules QRG.

26. Follow this step to populate Start Time Breakpoints (see Figure 14):
 - a. Click on the **Start Time Breakpoints** tab.
 - b. As the **Start** field defaults to 12:00am, and does not need to be populated, define the first Start Time Breakpoint that occurs during Weekdays from 12:00am by populating the **End** field.
 - c. Select a Pay Code for the first Shift Start Time Breakpoint by populating the **Pay Code** field using the lookup options available.
 - d. If Loadings were enabled in General Rule Settings:
 - i. Use the available picklist options to populate the **Casual Loading Pay Code** and/or **Penalty Loading Pay Code** fields.

- e. To add another Start Time Breakpoint, click on the **+ Add Breakpoint** button.
 - f. Populate the **End** and **Pay Code** fields within the new Breakpoint to define the next Weekday Shift Start Time Breakpoint.
 - g. To remove a Breakpoint, click on the **Trash Can** icon next to the corresponding line.
27. Repeat until a full 24 hours of Start Time Breakpoints have been populated.

Figure 14

Start Time Breakpoints Hours BreakPoints + Add Breakpoint

Name	Start	End	Pay Code	Casual Loading Pay Code	Penalty Loading Pay Code	
Weekday Start Time Breakpoint...	12:00 am	04:00 am	Night Shift	Casual Loading 25%	Penalty 1.20	
Weekday Start Time Breakpoint...	04:00 am	07:00 am	Morning Shift	Casual Loading 25%	Penalty 1.15	
Weekday Start Time Breakpoint...	07:00 am	11:00 am	Morning Shift	Casual Loading 25%	Penalty 1.10	
Weekday Start Time Breakpoint...	11:00 am	02:00 pm	Afternoon Shift	Casual Loading 25%	Penalty 1.15	
Weekday Start Time Breakpoint...	02:00 pm	11:59 pm	Night Shift	Casual Loading 25%	Penalty 1.20	

End Time and Start Time Breakpoints

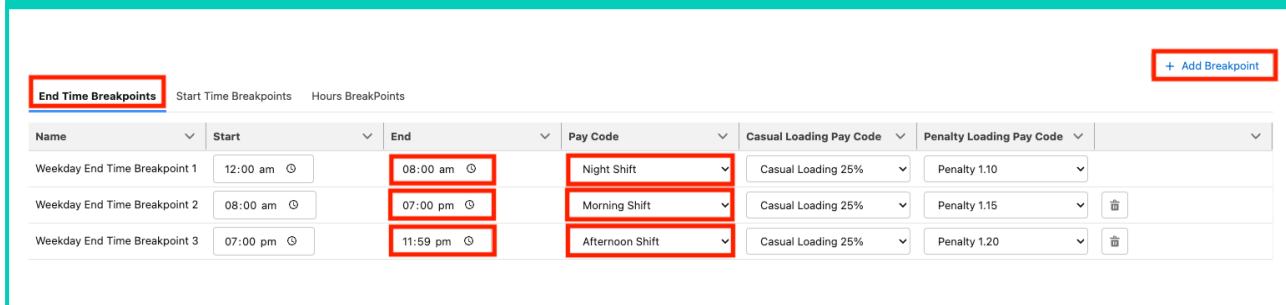

If the Apply Shift End or Start Interpretation field is selected in General Rule Settings, it is mandatory to populate 24 hours of Breakpoints in EITHER the End Time or Start Time Breakpoint tab for Weekday Rules. Additional Breakpoints may be defined in the remaining Time Breakpoint tab.

The same applies for Saturday, Sunday and Public Holiday Rules, unless a different kind of Breakpoint is selected from the Interpretation Type field. To populate other Breakpoint types, follow the instructions in Populate Hourly Rate Interpretation Rules QRG.

To define End Time and Start Time Breakpoints:

28. Create Breakpoints for the primary Interpretation Type (see Figure 15):
 - a. Select either **End Time Breakpoints** or **Start Time Breakpoints** tab.
 - b. Define the first Breakpoint that occurs from 12:00am by populating the **End** field.
 - c. Populate **Pay Codes** for the Breakpoint using the available picklist fields.
 - d. Repeat until a full 24 hours of Breakpoints have been populated.

Figure 15

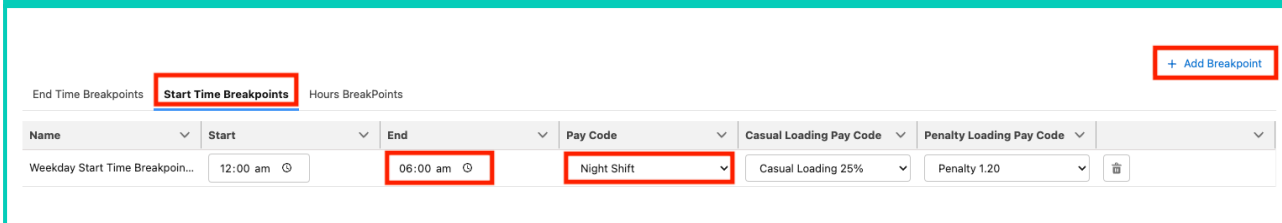

End Time Breakpoints Start Time Breakpoints Hours BreakPoints + Add Breakpoint

Name	Start	End	Pay Code	Casual Loading Pay Code	Penalty Loading Pay Code	
Weekday End Time Breakpoint 1	12:00 am	08:00 am	Night Shift	Casual Loading 25%	Penalty 1.10	
Weekday End Time Breakpoint 2	08:00 am	07:00 pm	Morning Shift	Casual Loading 25%	Penalty 1.15	
Weekday End Time Breakpoint 3	07:00 pm	11:59 pm	Afternoon Shift	Casual Loading 25%	Penalty 1.20	

29. Create Breakpoints for the secondary Interpretation Type (see Figure 16):
 - a. Select the remaining **Time Breakpoints** tab.
 - b. Define the first Breakpoint by populating the **Start** and **End** fields using 24 hour format.
 - c. Select **Pay Codes** for the Breakpoint using the available picklist fields.
 - d. Repeat for any additional Breakpoints required for the secondary Interpretation Type.

Figure 16

Important Notes

(Figures 15 & 16)

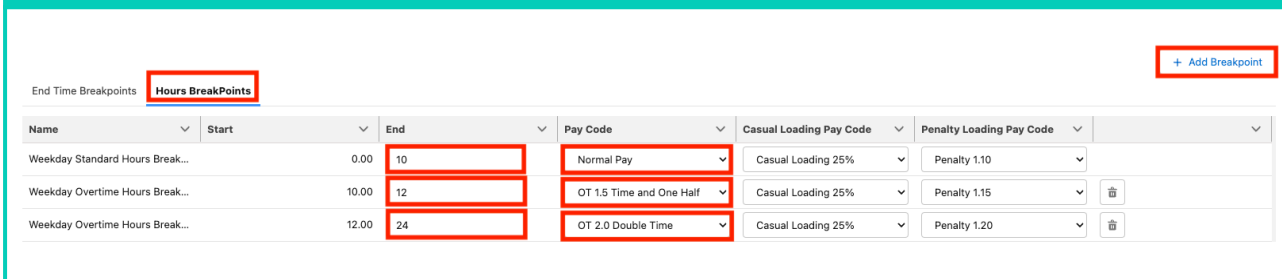

Refer to the instructions provided in *End Time Breakpoints* and *Start Time Breakpoints* for more detailed guidance on how to populate each *End Time* and *Start Time Breakpoint* field.

Hours Breakpoints

These Breakpoints are mandatory for Weekday, Saturday, Sunday and Public Holiday Rules. A full 24 hours must be populated, and every Breakpoint after the first will represent Overtime.

30. Follow this step to populate Hours Breakpoints (see Figure 17):
 - a. Click on the **Hours Breakpoints** tab.
 - b. As the **Start** field defaults to 0, and does not need to be populated, define the hours associated with ordinary time Pay Codes by populating the **End** field.
 - i. Users must remember that Hours Breakpoints will be overridden by Start Time and / or End Time Breakpoints, so this amount is the defined maximum payable with ordinary time Pay Codes.
 - c. Select a Pay Code for the ordinary time Breakpoint by populating the **Pay Code** field using the lookup options available.
 - d. If Loadings were enabled in General Rule Settings:
 - i. Use the available picklist options to populate the **Casual Loading Pay Code** and/or **Penalty Loading Pay Code** fields.
 - e. To add the first Overtime Hours Breakpoint, click on the **+ Add Breakpoint** button.
 - f. Populate the **End** and **Pay Code** fields within the new Breakpoint to define the first Overtime Hours Breakpoint.
 - g. To remove a Breakpoint, click on the **Trash Can** icon next to the corresponding line.
31. Repeat until a full 24 hours of Hours Breakpoints have been populated.

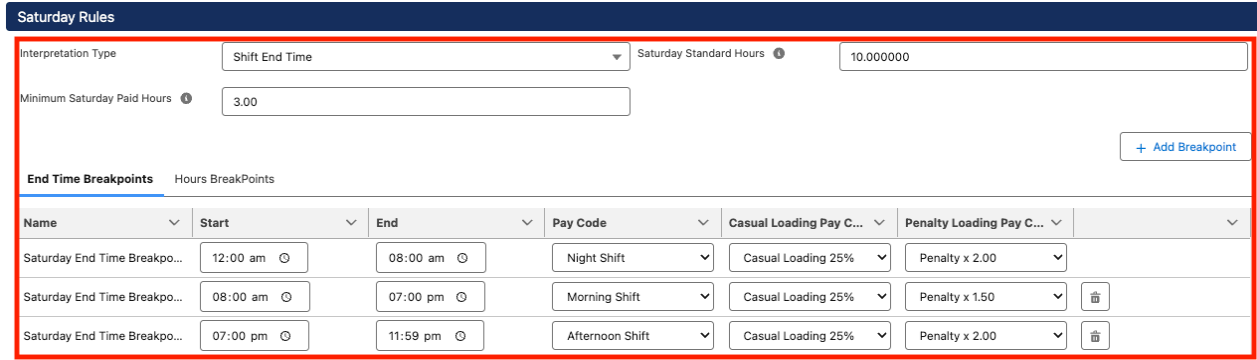

Figure 17

Saturday Rules, Sunday Rules & Public Holiday Rules

32. Follow the instructions for Weekday (Monday to Friday) Rules for Saturday, Sunday and Public Holiday sections (see Figure 18).
33. Follow the instructions for Shift End Breakpoints and/or Shift Start Breakpoints, as well as Hours Breakpoints, for Saturday, Sunday and Public Holiday sections.

Figure 18

Saturday Rules

Interpretation Type: Shift End Time | Saturday Standard Hours: 10.000000 | Minimum Saturday Paid Hours: 3.00

End Time Breakpoints

Name	Start	End	Pay Code	Casual Loading Pay C...	Penalty Loading Pay C...
Saturday End Time Breakpo...	12:00 am	08:00 am	Night Shift	Casual Loading 25%	Penalty x 2.00
Saturday End Time Breakpo...	08:00 am	07:00 pm	Morning Shift	Casual Loading 25%	Penalty x 1.50
Saturday End Time Breakpo...	07:00 pm	11:59 pm	Afternoon Shift	Casual Loading 25%	Penalty x 2.00

Important Notes

(Figure 18)

Saturday, Sunday and Public Holiday Rules allow for the selection of different types of Interpretation Breakpoints. Follow the instructions provided in the Populate Hourly Rate Breakpoints QRG if completing Standard Time with Time Breakpoints or Standard Time with Time of Day Breakpoints.

Required fields MUST be populated for Weekday, Saturday, Sunday and Public Holiday Rules, regardless of whether regular shifts occur on these days. Breakpoints MUST also be populated to cover a full 24 hours (i.e. 12:00AM - 11:59PM) for Weekdays, Saturdays, Sundays and Public Holidays, and with at least one Pay Code populated for the period.

Breakpoints for Public Holiday Rules should reflect the hours an Employee would work if the Public Holiday fell on a day where regular Timesheet Entries were expected, BUT must be associated with the applicable Penalty Pay Code for Public Holiday work.

Frequency Breakpoints

34. Follow this step to populate Frequency Hours Rules (see Figure 19):
 - a. To define the maximum amount of Ordinary Hours payable within the Timesheet Period before Overtime must be paid, populate the **Frequency' Standard Hours** field.

Figure 19

Frequency Hours Rules

Frequency' Standard Hours: 38.000000

Important Notes

(Figure 19)

The Interpretation Rule cannot be saved or finalised until Breakpoint & Pay Code Cap creation has been completed.

Allowance Rules, Allowance Junction Rules & Leave Breakpoints

35. To define any Allowance Rules or Leave Breakpoints, follow the instructions provided in the Populate Allowance, Leave & Allowance Junction Rule Breakpoints QRG.
36. To define Allowances applied in conjunction with certain Payee Leave Rules or Timesheet Activities:
 - a. Populate the Allowance and / or Leave Breakpoints according to the instructions provided in the Populate Allowance, Leave & Allowance Junction Rule Breakpoints QRG.
 - b. Create Breakpoints according to the instructions provided in the Create Breakpoints & Pay Code Caps QRG.
 - c. Populate Allowance Junction Rule Breakpoints according to the instructions provided in the Populate Allowance, Leave & Allowance Junction Rule Breakpoints QRG.

Create Breakpoints & Pay Code Caps

37. To complete Frequency Breakpoints and finalise Interpretation Rule creation, follow the instructions provided in the Create Breakpoints & Pay Code Caps QRG.

Field Descriptions

Field Name	Description
Apply Break Time Interpretation	Indicates whether the Interpretation Rule will apply Break Time logic to all relevant Breakpoint types within the Interpretation.
Apply Casual Loading	Indicates the requirement for a separate Pay Code for Casual Loading to be applied during Interpretation and detailed as individual Pay Transactions in addition to the standard Pay Transactions for the same quantity of time.
Apply Dual Leave Loading Calculations	Indicates whether Dual Leave Loading Calculations should be applied to the Leave Timesheet Entries related to Payee Leave Rules when processing Leave Breakpoints.
Apply Excursion Interpretation?	Indicates whether Excursion Shift logic will be applied to this Interpretation Rule. Excursion Standard End Time indicates the time that Timesheet Entries with the Excursion Timesheet Activity should cease being interpreted using ordinary time Pay Codes. Excursion Standard Hours indicates the total time that Timesheet Entries with the Excursion Timesheet Activity should be interpreted using ordinary Time Pay Codes. Excursion Standard Start Time indicates the time that Timesheet Entries with the Excursion Timesheet Activity should start being interpreted using ordinary time Pay Codes.
Apply Interpretation Variations?	Indicates whether Interpretation Variations are required for the Interpretation Rule.
Apply OT Round Up Shift Interpretation?	Indicates whether the Interpretation Rule requires Overtime Round Up Timesheet Entries to be calculated. Minimum OT Round Up Shift Paid Hours indicates the minimum hours that must be paid for OT Round Up Shift Interpretation.
Apply Overnight Interpretation?	Indicates whether the Interpretation Rule requires Overnight logic to be applied during Interpretation for Timesheet Entries that occur across midnight. Overnight Based on Majority of Shift? determines that Overnight Timesheet Entries for Weekday, Weekend or Public Holiday Breakpoints where Apply Overnight Majority has been set to Yes will be paid according to the Breakpoint applicable to the majority of time entered for the day. Overnight Based on Shift Start Range? determines whether the Start threshold may be used to pay the entire Timesheet Entry according to the Breakpoints that are applicable for the previous day.
Apply Overnight Majority Weekday (also Apply Overnight Majority Saturday, Apply Overnight Majority Sunday and Apply Overnight Majority Public Holiday)	Defines that overnight logic for this day will be paid at the breakpoint where the majority of the Timesheet Entry falls. May be applied for Weekday, Saturday, Sunday and Public Holiday Rules.
Apply Penalty Loading	Indicates the requirement for Interpretation to apply a separate Penalty Loading Pay Code, which is payable in addition to other Pay Codes for time entered.
Apply Shift Based Interpretation	Determines whether Overtime and (optionally) Minimum Hours should be Interpreted using Shift Logic or Daily Logic. - If Shift Logic is applied, Split/Broken Shift settings (or other custom integrations) will be used to populate the following fields for each Timesheet Entry: Shift Start Date Shift Start Time Shift End Date Shift End Time - The values of these fields will determine whether Timesheet Entries are assessed individually, or as part of a Shift. If blank, the Timesheet Entry will be assessed individually.
Apply Shift End or Start Interpretation?	Indicates both Shift Start and Shift End Breakpoints should be defined for the Interpretation Rule.
Apply Wake Up Interpretation?	Indicates whether Wake Up Shift Logic will be applied to this Interpretation Rule.
Casual Loading Pay Code	Defines the Pay Code that applies for Casual Loading Breakpoints.
Days 'Frequency' Breakpoints Accrued	Defines the specific days where the hours recorded in Timesheet Entries are included in the count of hours when assessing 'Frequency' Breakpoints.
Days 'Frequency' Breakpoints	When 'Frequency' Breakpoint Overtime is reached for selected days, 'Frequency' Breakpoints will

Apply	override all other Breakpoints that apply to the day selected.
Days Overtime Breakpoints Reset	Defines the days where 'Frequency' Overtime Breakpoints are reset back to the first Frequency Overtime Breakpoint.
End	Defines the end of the Breakpoint.
Exclude Overtime from 'Frequency' Hours	Defines if Breakpoints considered as Overtime hours will be excluded in the count of hours worked during the period and assessed against 'Frequency' breakpoints.
'Frequency' Standard Hours	Defines the maximum time payable with ordinary time Pay Codes on each Timesheet before Overtime Pay Codes should be applied to the remaining time (as determined by the Timesheet Frequency).
Overnight Shift Starting From	Defines the time Overnight shifts should begin being interpreted using the next day's Breakpoint.
Higher Rate Weekday (also Higher Rate Saturday, Higher Rate Sunday and Higher Rate Public Holiday)	Determines the highest applicable rate will be applied when a Timesheet Entry is split equally across two days. Different Breakpoint rates are associated with each day. May be defined for Weekday, Saturday, Sunday and Public Holiday Rules.
Include Time BPs in OT - Freq Std Calcs	Determines whether Timesheet Entries for Standard Time with Time Breakpoints will be treated as Overtime for Frequency Breakpoints. • Include Time BTs in OT - Daily Standard Calcs - If Time Breakpoints have been included in Overtime, this field defines whether Overtime Hours should be included when assessing Daily Standard Hours. Only applicable to Standard Time with Time Breakpoints.
Interpretation Rule Name	Defines the name for the Interpretation Rule.
Long Description	Is the description outlining the Interpretation Rules purpose. Users are encouraged to detail here the brief snapshot of how this Interpretation Rule is configured, to assist with identifying differences between various Interpretation Rules with similar conditions and/or names.
Minimum Weekday Paid Hours (also Minimum Saturday Paid Hours, Minimum Sunday Paid Hours and Minimum Public Holiday Paid Hours)	Defines the minimum hours payable when assessing total Timesheet Entries for each day. This field must be defined within Weekday, Saturday, Sunday and Public Holiday Rules.
Pay Code	Defines the Pay Code that applies to the Breakpoint.
Penalty Loading Pay Code	Defines the Pay Code that applies to Penalty Loading Breakpoints.
Short Description	Is the description displayed in a lookup search to assist users in selecting the correct Interpretation.
Start	Defines the start of the Breakpoint.
Timesheet Frequency	Defines the Timesheet Frequency for the Interpretation Rule. If the Timesheet Frequency on the Timesheet and the Interpretation Rule do not match, Interpretation will fail.
Wake Up Minimum Hours	Defines the accumulative minimum payable hours for Wake Up Timesheet Activities occurring during Sleepover period.
Weekday Standard Hours (also Saturday Standard Hours, Sunday Standard Hours and Public Holiday Standard Hours)	Defines the maximum hours payable using ordinary time Pay Codes before overtime Pay Codes are applied for Weekday, Saturday, Sunday and Public Holiday Rules.

Further Information
