- ❑ [Troubleshooting Error Messages](#)

Overview

2cloudnine Payroll has a standard import visualforce page for interpreted and uninterpreted timesheet data using the Timesheet Import Tool Package that can be installed into any salesforce org with 2cloudnine Payroll and Time2Pay packages.

The purpose of this package is to assist our clients that use 3rd party VMS systems that provide outputs of both interpreted and uninterpreted time can be uploaded using a csv file format into the Payroll system for interpretation and payment, or for payment only. Examples of providers include Comensura, Fieldglass, Timetarget and Beeline.

Prerequisites

Before proceeding with Importing Data please ensure that:

1. 2cloudnine Payroll users must be in the 'Salesforce Lightning Experience' and not in the Salesforce Classic view mode.
2. Have enabled a custom domain (My Domain) in order to see the Lightning Web Components (LWC) on the Page Layouts.
3. Have installed the Timesheet Import Tool Package v1.15 or higher
4. Apply the '2cloudnine Timesheet Import' Permission set to relevant users

Configuration Changes in v1.14 and v.1.15

New Import Status colour status field

Uplift to Import UI look and feel with a processing status bar

Cost Center details can be Imported via the Timesheet Import Tool

New Assignment Import Tool

Optional Column headings should remain and not be removed from the import file but can still be left blank

Configuration Instructions:

- Navigate to Settings
- Select the Object Manger Tab
- In the Quick Find Search box search and select Imported Record
- On the Left hand panel choose Page Layout
- Select the TC9IMP Timesheet Import Layout
- Remove the Status field from the layout and replace this with the Import Status field
- Click on the App manager and search for Imported Records
- Change the List View to All
- Amend the List View to show the Import Status field instead of the Status field

For the Assignment Import Tool:

1. External IDs have to be setup on the Contact, Account (Client Record Type), and the Payment Entity to reference in the csv import file
2. Salesforce IDs for the Pay Schedule, Public Holiday Calendar, Timesheet Calendar, Invoice Schedule, Invoice Tax ID records are also required to be referenced in the relevant columns for Assignments to be successfully created
3. [Assignment Import Guide can be found here](#)
4. [Assignment CSV Import File can be found here](#)

For the Timesheet Import Tool:

1. External IDs have to be setup on the Contact and Assignment records to reference in the csv import file
2. For importing Timesheet Leave entries you can either reference the External ID on the Payee Leave Rule or the Payee Leave Rule Name in the import file
3. Ensure that the Payees, the Assignments and all of their associated records are complete to avoid intrusive errors
4. Timesheets have been generated for the related Assignments
5. [Timesheet Import Guide can be found here](#)

6. [Timesheet CSV Import File can be found here](#)

For the Pay Transaction Import Tool

1. External IDs have to be setup in the Contact, Assignment, Payment Entity, Pay Code and the Pay Schedule Records to reference in the csv import file and for Transactions to be successfully processed in a Pay Batch
2. External IDs additionally will have to be setup in the Invoice Tax Id and Invoice Schedule to be successfully processed in the Invoice Generation Manager
3. Ensure that the Payee, the Assignment and all of their associated records are complete to avoid intrusive errors
4. [Pay Transaction Import Guide can be found here](#)
5. [Pay Transactions CSV Import File can be found here](#)

Assignment Import Template

Information			Screen Shots					
1. The Assignment Import Columns								
Column Headings	*Mandatory / Optional	Notes for Importing						
Record Type	Mandatory	Enter the Assignment Record Type Employee, Temp						
External ID	Mandatory	External ID for referencing purposes this can be for e.g. ABC701128						
Client	Mandatory	External ID of the Client's						
Payment Entity	Mandatory	External ID of the Payment Entity's						
Name	Mandatory	Free Text - The name of the Assignment						
Client Hiring Manager	Optional but Mandatory when Record Type = Temp	Enter the External ID of the Client Hiring Manager from their Contact (Candidate/Employee Record Type) Record						
Employee	Mandatory	External ID of the Employee's						
Start Date	Mandatory	Date format is dd/mm/yyyy						
End Date	Mandatory	Date format is dd/mm/yyyy						
Purchase Order Number	Optional	Free Text - Enter a Purchase Order Number						
Timesheet Approver	Optional but	Enter the External ID of the Timesheet						

A	B	C	D	E	F
Record Type	External ID	Client	Payment Entity	Name	Client Hiring Manager

G	H	I	J	K
Employee	Start Date	End Date	Purchase Order Number	Timesheet Approver

L	M	N
Alternative Timesheet Approver	Expense Claim Approver	Alternative Expense Claim Approver

O	P	Q
Leave Approver	Alternative Leave Approver	Interpretation Rule

R	S	T
Pay Schedule	Public Holiday Calendar	Timesheet Calendar

	Mandatory when Record Type = Temp	Approver on the Contact (Candidate/Employee Record Type) Record			
Alternative Timesheet Approver	Optional	Enter the External ID of the Alternative Timesheet Approver from their Contact (Candidate/Employee Record Type) Record	U	V	W
Expense Claim Approver	Optional	Enter the External ID of the Expense Claim Approver from their e Contact (Candidate/Employee Record Type) Record	Invoice Schedule	Invoice To Account	Invoice To Contact
Alternative Expense Claim Approver	Optional	Enter the External ID of the Alternative Expense Claim Approver from their Contact (Candidate/Employee Record Type) Record	X	Y	Z
Leave Approver	Optional	Enter the External ID of the Leave Approver from their Contact (Candidate/Employee Record Type) Record	Invoice Tax ID	Invoice Taxable	Assignment Rate Template
Alternative Leave Approver	Optional	Enter the External ID of the Alternative Leave Approver from their Contact (Candidate/Employee Record Type) Record			
Interpretation Rule	Optional	Salesforce ID is required of the Interpretation Rule			
Pay Schedule	Mandatory	Salesforce ID is required of the Pay Schedule			
Public Holiday Calendar	Mandatory	Salesforce ID is required of the Public Holiday Calendar			
Timesheet Calendar	Mandatory	Salesforce ID is required of the Timesheet Calendar			
Invoice Schedule	Mandatory	Salesforce ID is required of the Invoice Schedule			

Invoice To Account	Mandatory	Enter the External ID of the Client's Record
Invoice To Contact	Mandatory	Enter the External ID of the Invoice Contact on the Contact (Candidate/Employee Record Type) Record
Invoice Tax ID	Mandatory	Salesforce ID is required of the Invoice Tax ID
Invoice Taxable	Mandatory	Enter Yes or No
Assignment Rate Template	Optional	Salesforce ID is required of the Assignment Rate Template
* Mandatory: The column in the csv upload should be populated with relevant data corresponding to the Field Mapping Optional: These columns can be left blank.		

How to Import Assignments via the Assignment Import Tool

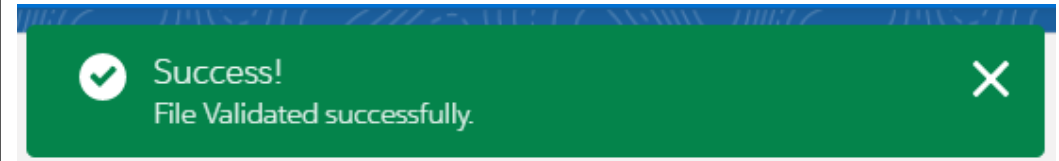

Process Steps	Screenshots
1. Navigate to the 'Assignment Import Tool' The Assignment Import Tool can be accessed by searching for Import from the App Launcher and then: • Selecting the '2C9 Timesheet Import Tool' App and then clicking on the 'Assignment Import Tool' tab • Or by selecting the 'Assignment Import Tool' Item	
2. Assignment Import Tool - Validate the File After navigating to the Assignment Import Tool: 1. Select the 'Upload Files' button or drop files; 2. A dialog box will open allowing you to choose your file which must be a Comma Separated Values file; 3. Select 'Open' once you have chosen your import file; and 4. Select 'Validate'.	

3. File Inserted Successful pop up message

After approximately 1-2 minutes if the following pop up message does not appear on the screen then reload / refresh the page.

You will be Navigated automatically to the Imported Record page.

4. Imported Record Screen

Details Tab:

Imported Record: Salesforce Record ID.

Record Type: For Assignment Imports the record type will display as 'Assignment'.

Import Status: Shows the Status of the Import. The different values are:

- *New* - Initial Status of the imported record when the batch is running;
- *Validation Failed* - Data errors exist in some rows - Download the Feed_results file and then refer to the Troubleshooting section;
- *No Validation Errors* - The Imported file contains no errors;
- *Failed* - The import has failed - refer to the Troubleshooting section.

Records Attempted: Displays the number of Data rows that the import file contains.

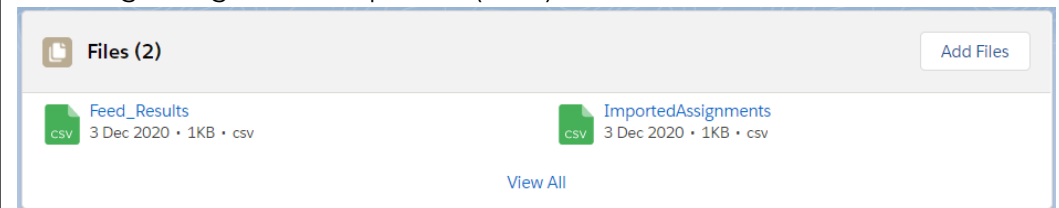

Successful Records: Displays the number of Data rows the import will import.

Message: A message may appear "There were errors in the file . Kindly look at the debug header for more details" if the Import Status is Failed.

Timesheet Import Template

Information			Screen Shots					
1. The Timesheet Import Columns								
Column Headings	*Mandatory / Optional / Validation Controlled	Notes for Importing						
Employee External ID	Mandatory	External ID is to be populated on the Contact (Candidate/Employee Record Type) Record						
Assignment External ID	Mandatory	External ID is to be populated on the Assignment Record						
Payee External ID	Optional	External ID is to be populated on the Payee Record						
Timesheet External ID	Optional	External ID is to be populated on the Timesheet Record						
Project Code External ID	Optional	External ID is to be populated on the Project Code record						
Payee Leave Rule	Optional but Mandatory if importing Leave	External ID is to be populated on the Payee Leave Rule OR use the Payee Leave Rule name e.g. "Annual Leave"						
Start Date	Mandatory	Date format is dd/mm/yyyy						
End Date	Mandatory	Date format is dd/mm/yyyy						
Start Time	Validation Controlled	Enter Time in either 00:00 OR 0:00 format e.g. 8:00 for 8am if the Timesheet Entry Format = Start/End Times Mandatory for Timesheet Entry Format =						

		Start/End Times (i.e. Not required when the Timesheet Entry Format = Total Hours)	
End Time	Validation Controlled	Enter Time in either 00:00 OR 0:00 format e.g. 16:00 for 4pm if the Timesheet Entry Format = Start/End Times Mandatory for Timesheet Entry Format = Start/End Times (i.e. Not required when the Timesheet Entry Format = Total Hours)	
Total Time(in hours)	Validation Controlled (Not required when start and end time is used)	Enter Amount e.g. 10 for 10 hours if the Timesheet Entry Format = Total Hours To be completed if Timesheet Entry Format = Total Hours (i.e. Not required when the Timesheet Entry Format = Start/End Times)	
Total Time(in mins)	Validation Controlled (Not required when start and end time is used)	Enter Amount e.g. 45 for 45 minutes if the Timesheet Entry Format = Total Hours Optional for Timesheet Entry Format = Total Hours (i.e. Not required when the Timesheet Entry Format = Start/End Times)	
Break 1 Start Time	Optional	Enter Time in either 00:00 OR 0:00 format e.g. 10:00 for 10am	
Break 1 End Time	Optional	Enter Time in either 00:00 OR 0:00 format e.g. 10:30 for 10:30am	
Break 2 Start Time	Optional	Enter Time in either 00:00 OR 0:00 format e.g. 14:00 for 2pm	
Break 2 End Time	Optional	Enter Time in either 00:00 OR 0:00 format e.g. 14:30 for 2:30pm	

Break 1 Total	Optional	Enter Amount e.g 15 for 15 minutes
Break 2 Total	Optional	Enter Amount e.g 30 minutes for 30 mins
Manual Adjustment	Optional	Enter 1 for Yes or 0 for no
Submitted Date	Optional	This will auto populated based on today's current data and time if this is blank. However if required to be populated based on the Employee's actual submission date then please enter in the following format DD/MM/YYYY HH:MM e.g. 10/08/2020 11:34
Approved/Rejected Date	Optional	This will auto populated based on today's current date and time if this is blank. If required to be populated based on the Approver's actual approval/rejected date then please enter in the following format DD/MM/YYYY HH:MM e.g. 10/08/2020 16:34
Approved/Rejected By	Optional	This will be auto populated with the User ID of the user importing the file. However if required to have the Approver's name recorded then the External ID is to be populated on the Contact (Client Contact/Employee Record Type) Record
Approver Notes	Optional	Free Text

* **Mandatory:** The column in the csv upload should be populated with relevant data corresponding to the Field Mapping.

Validation Controlled: These are to be populated according to the Timesheet Entry Format e.g. Start/End Times or Total Hours.

Optional: These columns can be left blank.

2. Notes and Examples that you can use on the Employee/Assignment Record 'External ID' field

- The External ID field is used to define the ID of the corresponding record in an external system that has been used to create/update the record.
- External IDs are Text fields which allows you to enter any combination of letters, numbers, or symbols.
- The maximum Field length is 50 characters.

Examples of External IDs

External ID ⓘ	External ID ⓘ	External ID ⓘ
S-234-2345	abc123	70145

How to Import Uninterpreted Timesheet Data via the Timesheet Import Tool

When timesheet entries are imported into the system they should be loaded in with a status of “Approved” so that the transactions can be automatically created (if the scheduled job is enabled) or the user can select the ‘Process Transactions’ button.

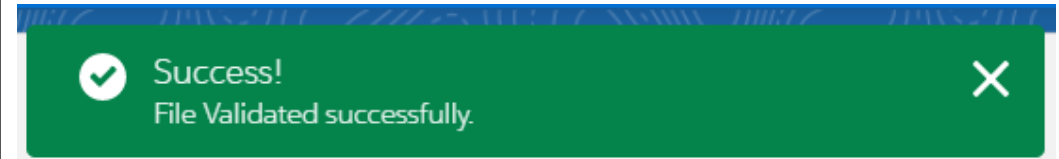

Process Steps	Screenshots
1. Navigate to the ‘Timesheet Import Tool’ The Timesheet Import Tool can be accessed by searching for Timesheet Import from the App Launcher and then: • Selecting the ‘2C9 Timesheet Import Tool’ App and then clicking on the ‘Timesheet Import Tool’ tab. • Or by selecting the ‘Timesheet Import Tool’ Item.	
2. Timesheet Import Tool - Validate the File After navigating to the Timesheet Import Tool: 1. Select the ‘Upload Files’ button or drop files; 2. A dialog box will open allowing you to choose your file which must be a Comma Separated Values file; 3. Select ‘Open’ once you have chosen your import file; and 4. Select ‘Validate’.	

3. File Inserted Successful pop up message

After approximately 1-2 minutes if the following pop up message does not appear on the screen then reload / refresh the page.

You will be Navigated automatically to the Imported Record page.

4. Imported Record Screen

Details Tab:

The total of two cost code Distribution % values must be equal or less than 100.00%	Ensure that the Cost Code 1 Distribution % and the Cost Code 2 Distribution % adds up to 100%	Mismatch error with Pay Code and	The Pay Code and the Transaction Type have a mismatch e.g. An

The Cost Code 1 Distribution % value cannot be blank or zero	Ensure that there is a Cost Code 1 Distribution % value	Transaction Type	Allowance Pay Code should have a Transaction Type = Allowance and a Payment Pay Code should have a Transaction Type = Timesheet
Cost Code 1 value cannot be blank	Ensure that there is a Cost Code 1 value and Distribution % value. You cannot upload Cost Code 2 details without Cost Code 1 details	The total of two cost code Distribution % values must be equal or less than 100.00%	Ensure that the Cost Code 1 Distribution % and the Cost Code 2 Distribution % adds up to 100%
No Matching Accounting Segment found for Cost Code 1	There is no matching Accounting Segment for the Cost Code 1	The Cost Code 1 Distribution % value cannot be blank or zero	Ensure that there is a Cost Code 1 Distribution % value
No Matching Accounting Segment found for Cost Code 2	There is no matching Accounting Segment for the Cost Code 2	Cost Code 1 value cannot be blank	Ensure that there is a Cost Code 1 value and Distribution % value. You cannot upload Cost Code 2 details without Cost Code 1 details
		No Matching Accounting Segment found for Cost Code 1	There is no matching Accounting Segment for the Cost Code 1
		No Matching Accounting Segment found for Cost Code 2	There is no matching Accounting Segment for the Cost Code 2

Debug Headers

Debug Header can be viewed from the Debug Header Tab.

Common Reasons whereby an Import will Fail and a debug will be created:

- You are trying to import a Pay Transaction file using the Timesheet Import Tool instead of the Pay Transaction Import Tool
- You are trying to import a Timesheet file using the Pay Transaction Import Tool instead of the Timesheet Import Tool
- Data entered for some columns might be in the wrong columns thus please check all the data is in the right columns
- Column Headings are the Api names instead of the field names e.g. tc9_et__Start_Date__c instead of Start Date

The screenshot displays the 2cloudnine user interface. At the top, there's a navigation bar with tabs like 'Contacts', 'Assignments', 'Timesheet Import Tool', 'Imported Records', 'Timesheets', and 'Timesheet Entries'. The 'Imported Records' tab is active, showing a record with ID 'a1a2w0000005TTZ'. The record's status is 'Failed'. A message box indicates: 'There were errors in the file. Kindly look at the debug header for more details.' A dropdown menu is open, showing options: 'Log-0131100', 'Pay Transaction Import Tool', 'Pay Transactions', and 'Debug Headers' (which is highlighted). The interface also shows a 'Files' section with one file 'ImportedPayTransaction' and a 'Pay Transactions' section with 0 items.
