

Purpose

The purpose of this quick reference guide is to step through the process of creating Pay Condition Allocation records for use with the Field Service Extension. The intended audience for this document are System Administrators / Payroll Users.

Steps

Create a Pay Condition Allocation

The Field Service Extension uses Pay Condition and Pay Condition Allocations to automate the creation of 2cloudnine Timesheet data.

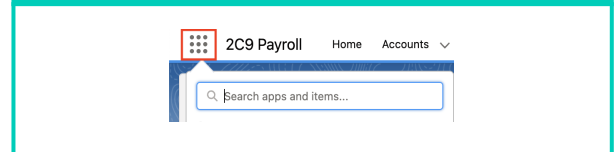

Pay Condition Allocations determine when Pay Conditions are applied during Timesheet integration. They act as the trigger for data creation by linking a specific Field Service Record (Work Order, Work Order Line Item, Expense, Service Appointment or Time Sheet Entry) with a Pay Condition.

When a Pay Condition Allocation is identified for Field Service Time Sheet data, the related Pay Condition is referenced to create and insert 2cloudnine Timesheet data.

Create a Pay Condition Allocation by following the below steps:

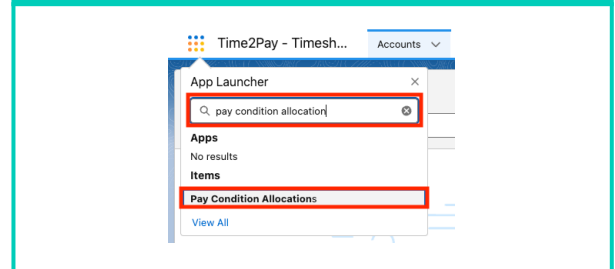

1. Click on the **App Launcher** icon (see Figure 1).

Figure 1

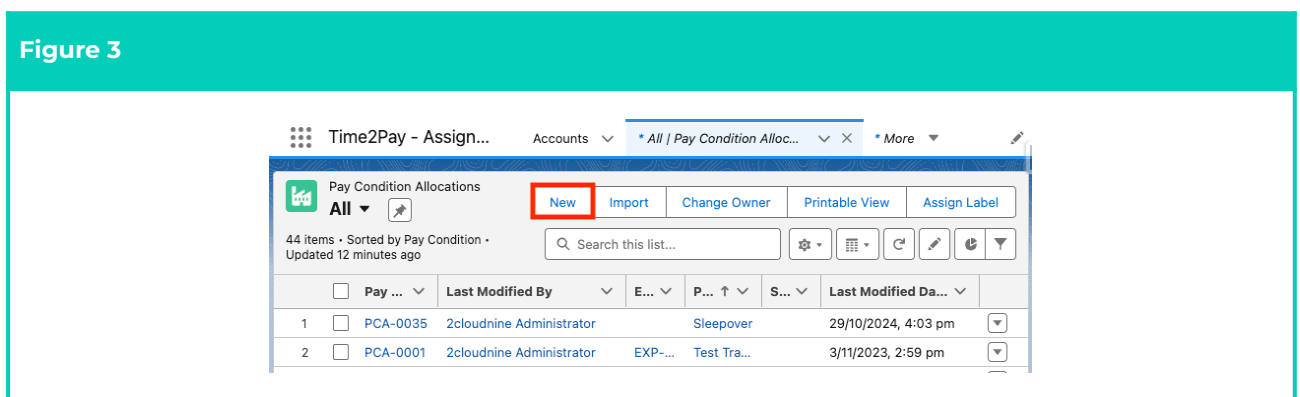

2. Go to the **Pay Condition Allocations** object by using the Search function (see Figure 2).

Figure 2

3. Click on the **New** button (see Figure 3).

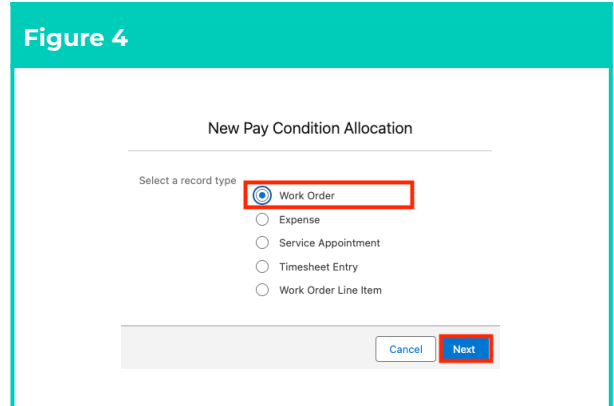

Figure 3

Work Order Pay Condition Allocation

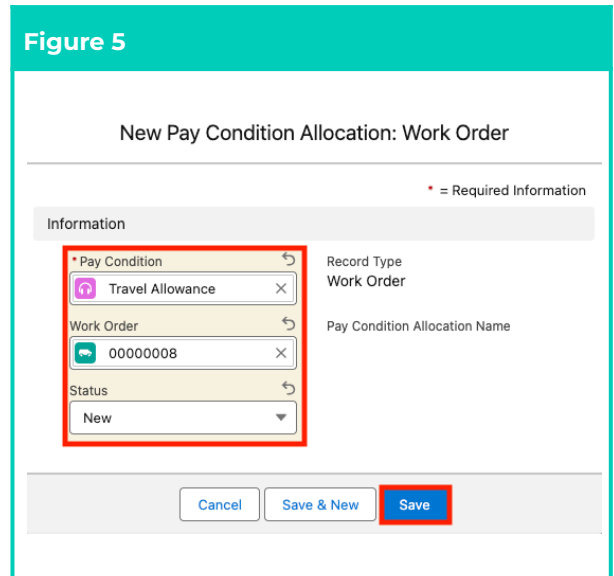

4. Select the **Work Order** Record Type and click the **Next** button (see Figure 4).

Figure 4

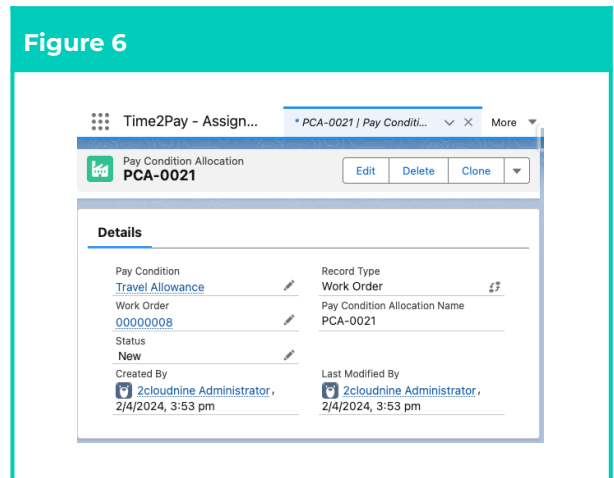

5. Follow this step in the sequence provided (see Figure 5):
 - a. To establish a relationship between a Field Service record and the corresponding 2cloudnine data, populate the **Pay Condition** field using the lookup options available.
 - b. Define the related Field Service record by populating the **Work Order** field using the lookup options available.
 - c. To indicate data is ready for integration, select **New** from the available picklist options in the **Status** field.
6. Click on the **Save** button (see Figure 5).

Figure 5

7. A new Work Order Pay Condition Allocation has been created (see Figure 6).

Figure 6

Important Notes

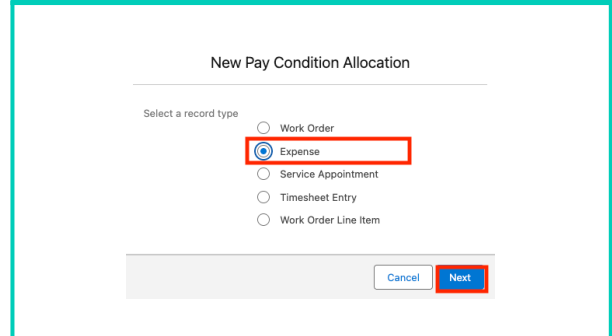

(Figure 6)

The Field Service Extension will not attempt to process the Pay Condition Allocation until the Status is updated to New.
Once data integration is complete, the Field Service Extension will update the Status to Processed.

Expense Pay Condition Allocation

8. Select the **Expense** Record Type and click the **Next** button (see Figure 7).
9. Follow this step in the sequence provided (see Figure 8):
 - a. To establish a relationship between a Field Service record and the corresponding 2cloudnine data, populate the **Pay Condition** field using the lookup options available.
 - b. Define the related Field Service record by populating the **Expense** field using the lookup options available.
 - c. To indicate data is ready for integration, select **New** from the available picklist options in the **Status** field.
10. Click on the **Save** button.
11. A new Expense Pay Condition Allocation has been created (see Figure 9).

Work Order Line Item Pay Condition Allocation

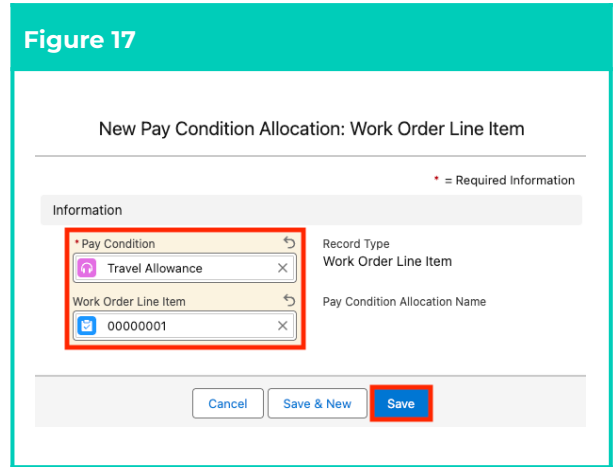

20. Select the **Work Order Line Item** Record Type and click the **Next** button (see Figure 16).

Figure 16

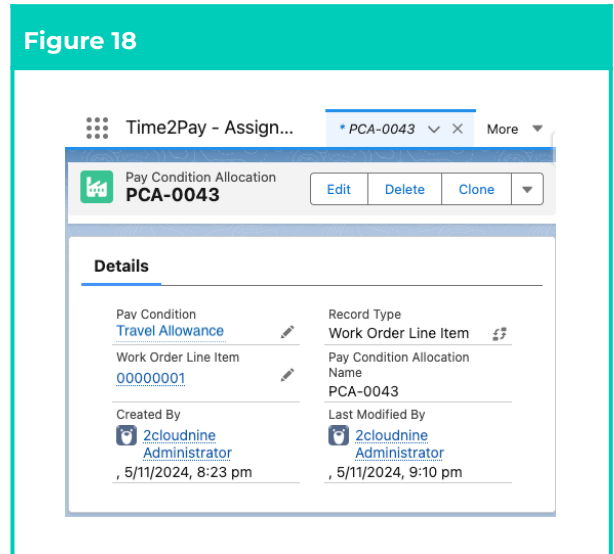

21. Follow this step in the sequence provided (see Figure 17):
 - a. To establish a relationship between a Field Service record and the corresponding 2cloudnine data, populate the **Pay Condition** field using the lookup options available.
 - b. Define the related Field Service record by populating the **Work Order Line Item** field using the lookup options available.
22. Click on the **Save** button (see Figure 17).

Figure 17

23. A new Work Order Line Item Pay Condition Allocation has been created (see Figure 18).

Figure 18

Modify a Pay Condition Allocation

24. To modify an existing **Pay Condition Allocation** record, open the required record and select the **Edit** button available on the top right side of the page. You can also double click in any of the fields that need editing or just click on the pencil icon  that appears within fields when you move your cursor over the field.
25. When complete, click on the **Save** button.

Field Descriptions

Field Name	Description
Expense	The Field Service Expense associated with the 2cloudnine data defined in the related Pay Condition.
Pay Condition	A look up to the Pay Condition Object that captures the record specifying the 2cloudnine data to be created when integrating the Field Service data into 2cloudnine timesheets.
Service Appointment	The Service Appointment record to be related with the Pay Condition Allocation. When the Pay Condition utilises the Allowance type Enterable Quantity, the Quantity from the Service Appointment will be used.
Status	Indicates whether the Field Service Extension has integrated the Field Service data related to the record: • Null/Blank: No data integration action pending • New: Pending data integration • Processed: Field Service data integration complete
Time sheet Entry	The Time sheet Entry record to be related with the Pay Condition Allocation is being attached to.
Work Order	The Work Order the Pay Condition Allocation is being attached to.
Work Order Line Item	The Work Order Line Item the Pay Condition Allocation is being attached to.
