

Purpose

The purpose of this quick reference guide is to step through the process of creating Pay Conditions for use with the Field Service Extension. The intended audience for this document is System Administrators / Payroll Users.

Steps

Create a new Pay Condition

The Field Service Extension uses Pay Condition and Pay Condition Allocations to automate the creation of 2cloudnine Timesheet data.

Pay Conditions define the specific 2cloudnine records to be created, when related Pay Condition Allocations are identified during Field Service Time Sheet integration.

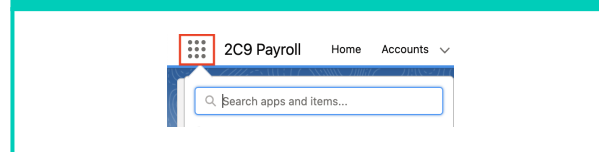

Pay Conditions may be created to capture Payee Allowances, Timesheet Activities or Project Codes, along with any associated conditions.

- To define more than one 2cloudnine record for a Pay Condition (i.e. Payee Allowance and Project Code), use the Combination Record Type.

Create a Pay Condition by following the below steps:

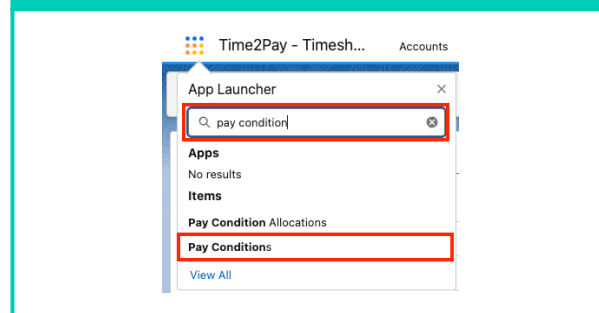

- Click on the **App Launcher** icon (see Figure 1).

Figure 1

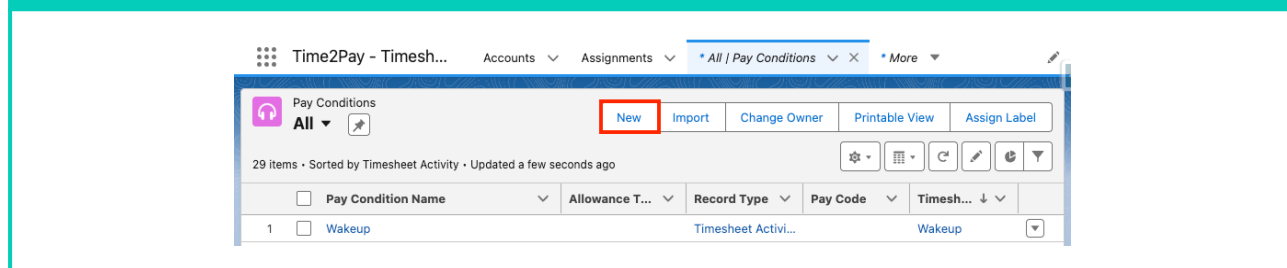

- Go to the **Pay Condition** object by using the Search function (see Figure 2).

Figure 2

- Click on the **New** button (see Figure 3).

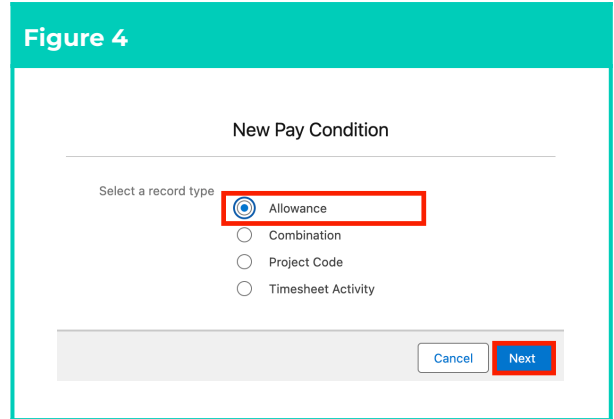

Figure 3

Allowance Pay Condition

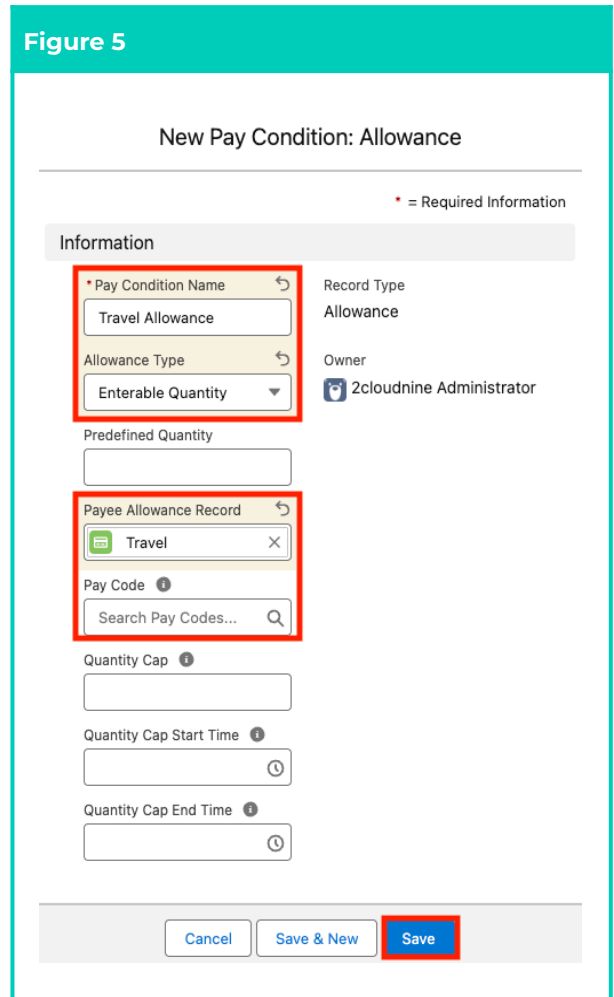

4. Select the **Allowance** Record Type and click the **Next** button (see Figure 4).
5. Enter an identifier for the record in the **Pay Condition Name** field (see Figure 5).
6. Define the method used to calculate the quantity of Allowance Timesheet Items created for linked Field Service Time Sheet data by selecting from the following picklist values in the **Allowance Type** field:
 - a. **Enterable Quantity** If selected, the Allowance quantity will be determined by the Quantity amount defined on the linked Field Service record.
 - b. **Predefined Quantity** If selected, define the Allowance quantity amount by populating the **Predefined Quantity** field.
7. To relate a Payee Allowance, populate the **Payee Allowance Record** field using the lookup options available.
 - a. If the required record cannot be identified from the Payee Allowance Record lookup results, populate the **Pay Code** field to relate the applicable record.
8. Limit the amount of times the related Allowance may be applied within a specific period each day by populating the following fields:
 - a. Enter the quantity cap for the related Allowance by populating the **Quantity Cap** field.
 - b. Define the time period applicable to the Quantity Cap entered above by populating the **Quantity Cap Start Time** and **Quantity Cap End Time** fields.
9. Click on the **Save** button.

Figure 4

The screenshot shows the 'New Pay Condition' form. Under the heading 'Select a record type', there are four radio button options: 'Allowance' (which is selected and highlighted with a red box), 'Combination', 'Project Code', and 'Timesheet Activity'. At the bottom right of the form, there are two buttons: 'Cancel' and 'Next' (which is highlighted with a red box).

Figure 5

The screenshot shows the 'New Pay Condition: Allowance' form. It includes a legend indicating that a red asterisk (*) denotes required information. The form is divided into several sections:

- Information:** Contains the 'Pay Condition Name' field (with 'Travel Allowance' entered and highlighted by a red box), the 'Allowance Type' picklist (with 'Enterable Quantity' selected and highlighted by a red box), and the 'Owner' field (showing '2cloudnine Administrator').
- Predefined Quantity:** A text input field.
- Payee Allowance Record:** A lookup field showing 'Travel' (highlighted by a red box).
- Pay Code:** A search field with the placeholder 'Search Pay Codes...' (highlighted by a red box).
- Quantity Cap:** A text input field.
- Quantity Cap Start Time:** A time selection field.
- Quantity Cap End Time:** A time selection field.

 At the bottom right, there are three buttons: 'Cancel', 'Save & New', and 'Save' (which is highlighted with a red box).

Important Notes

(Figure 5)

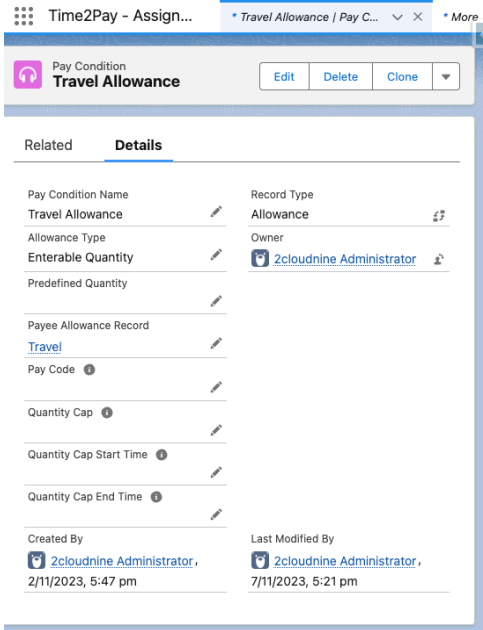

Please ensure the Payee Allowance Template Record Type is used when populating this field, so that the Pay Condition is not restricted to a single Payee.

Either the Payee Allowance Record field OR the Pay Code field MUST be populated.

For non-shift based Allowances, where the entered Quantity Cap should be applied to the entire day (rather than a specific overnight or other shift-based window), populate 12:00 am as the Quantity Cap Start Time, and 11:59 pm as the Quantity Can End Time.

10. A new Allowance Pay Condition has been created (see Figure 7).

Figure 7

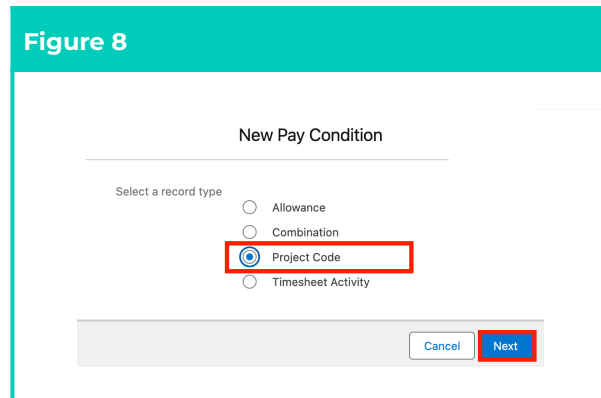

The screenshot shows the 'Time2Pay - Assign...' window with a tab for 'Travel Allowance | Pay C...'. The 'Pay Condition' section is active, showing 'Travel Allowance' with options to Edit, Delete, or Clone. Below this, the 'Details' tab is selected, displaying the following information:

Related	Details
Pay Condition Name	Travel Allowance
Allowance Type	Travel
Enterable Quantity	1
Predefined Quantity	
Payee Allowance Record	
Pay Code	
Quantity Cap	1
Quantity Cap Start Time	
Quantity Cap End Time

Project Code Pay Condition

11. Select the **Project Code Record Type** and click the **Next** button (see Figure 8).

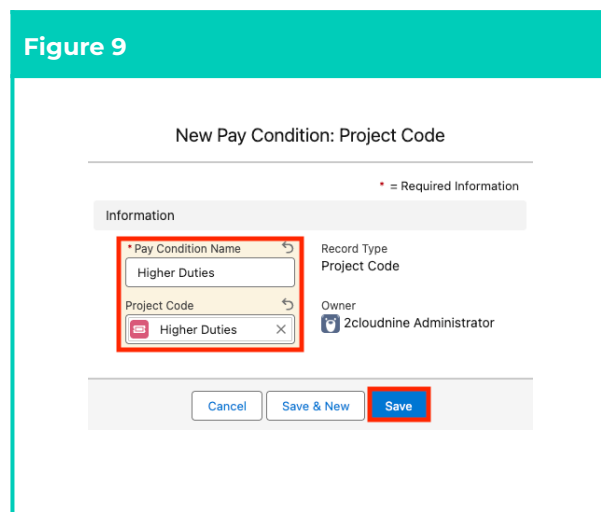

Figure 8

The screenshot shows the 'New Pay Condition' form. Under the heading 'Select a record type', there are four radio button options: 'Allowance', 'Combination', 'Project Code', and 'Timesheet Activity'. The 'Project Code' option is selected and highlighted with a red rectangle. At the bottom right of the form, there are 'Cancel' and 'Next' buttons, with the 'Next' button also highlighted with a red rectangle.

12. Enter a unique identifier for the record in the **Pay Condition Name** field (see Figure 9).
13. Relate a Project Code by populating the **Project Code** field using the lookup options available).
14. Click on the **Save** button.

Figure 9

The screenshot shows the 'New Pay Condition: Project Code' form. It includes a section for 'Information' with two fields: '* Pay Condition Name' and 'Project Code'. Both fields are populated with the text 'Higher Duties' and are highlighted with a red rectangle. To the right, the 'Record Type' is 'Project Code' and the 'Owner' is '2cloudnine Administrator'. At the bottom, there are 'Cancel', 'Save & New', and 'Save' buttons, with the 'Save' button highlighted with a red rectangle.

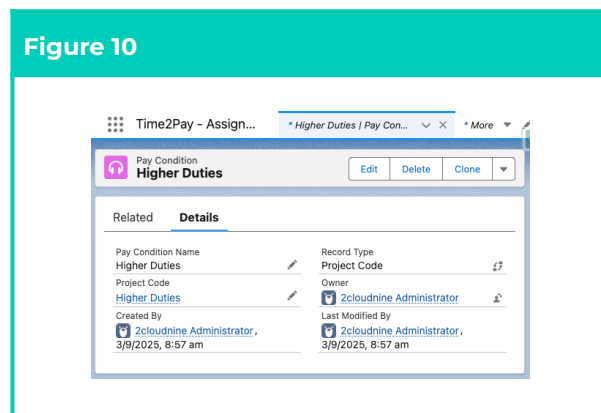

Important Notes

(Figure 9)

Only Template Level Project Code records should be populated, to ensure the Pay Condition is not restricted to a single Payee.

15. A new Project Code Pay Condition has been created (see Figure 10).

Figure 10

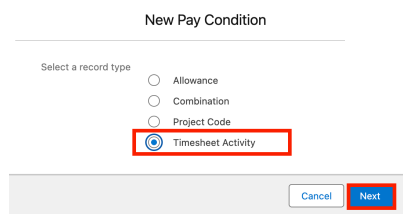

The screenshot shows the 'Time2Pay - Assign...' window. It displays the details of a newly created pay condition named 'Higher Duties'. The 'Related' tab is active, showing the 'Pay Condition Name' as 'Higher Duties' and the 'Project Code' as 'Higher Duties'. The 'Details' tab shows the 'Record Type' as 'Project Code', the 'Owner' as '2cloudnine Administrator', and the 'Created By' and 'Last Modified By' as '2cloudnine Administrator' on 3/9/2025 at 8:57 am. The 'Higher Duties' pay condition is highlighted with a red rectangle.

Timesheet Activity Pay Condition

16. Select the **Timesheet Activity** Record Type and click the **Next** button (see Figure 11).
17. Enter a unique identifier for the record in the **Pay Condition Name** field (see Figure 12).
18. Relate a Timesheet Activity by populating the **Timesheet Activity** field using the lookup options available.
19. Click on the **Save** button.

Combination Pay Condition

21. Select the **Combination** Record Type and click the **Next** button (see Figure 14).

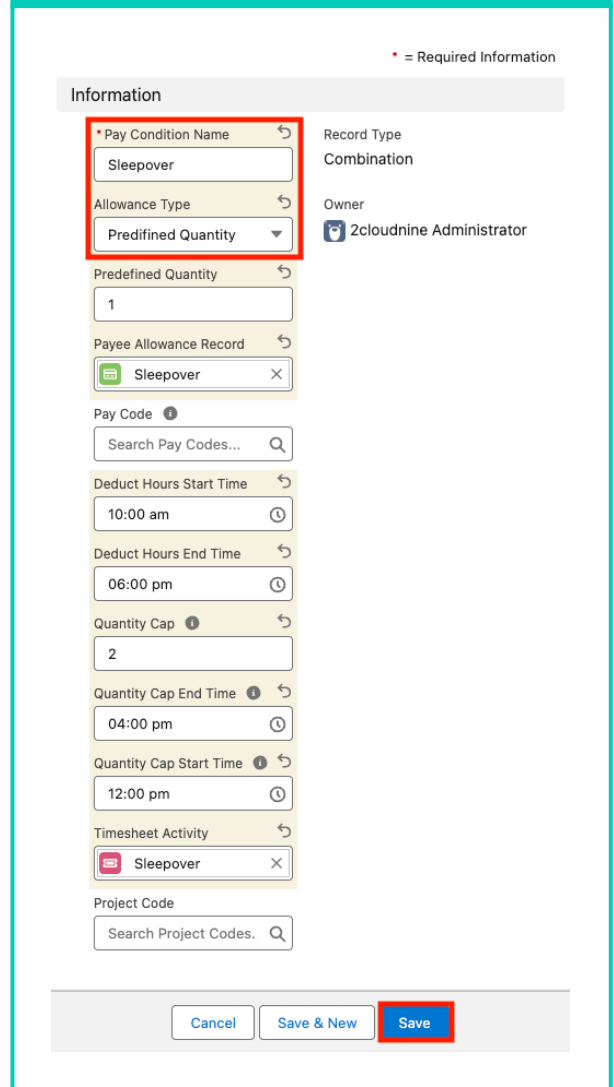

Figure 14

The screenshot shows the 'New Pay Condition' form. Under the heading 'Select a record type', there are four radio button options: 'Allowance', 'Combination', 'Project Code', and 'Timesheet Activity'. The 'Combination' option is selected and highlighted with a red rectangle. At the bottom right of the form, there are two buttons: 'Cancel' and 'Next', with the 'Next' button also highlighted with a red rectangle.

22. Enter a unique identifier for the record in the **Pay Condition Name** field (see Figure 15).
23. If relating a Payee Allowance, define the method used to calculate the quantity of Allowance Timesheet Items created for linked Field Service Time Sheet data by selecting from the following picklist values in the **Allowance Type** field.
 - a. **Enterable Quantity** If selected, the Allowance quantity will be determined by the Quantity amount defined on the linked Field Service record.
 - b. **Allowance Type** if selected, define the Allowance quantity amount by populating the **Predefined Quantity** field.
24. To relate a Payee Allowance, populate the **Payee Allowance Record** field using the lookup options available.
 - a. If the required record cannot be identified from the Payee Allowance Record lookup results, populate the **Pay Code** field to relate the applicable record.
25. If a Payee Allowance or Pay Code has been defined in relation to a Timesheet Activity that does not require actual time worked to be captured (such as for Sleepover), define the period where time is not inserted by populating the following fields:
 - a. To define the beginning of the period where integration does not capture entered time, populate the **Deduct Hours Start Time** field.
 - b. To define the beginning of the period where integration does not capture entered time, populate the **Deduct Hours End Time** field.

Figure 15

The screenshot shows the 'Information' form for a new pay condition. The form is titled 'Information' and includes a legend '* = Required Information'. The form fields are as follows:

- Pay Condition Name**: A text field containing 'Sleepover', highlighted with a red rectangle.
- Record Type**: A dropdown menu set to 'Combination'.
- Owner**: A dropdown menu set to '2cloudnine Administrator'.
- Allowance Type**: A dropdown menu set to 'Predefined Quantity'.
- Predefined Quantity**: A text field containing '1'.
- Payee Allowance Record**: A lookup field showing 'Sleepover' with a close button.
- Pay Code**: A search field with the placeholder 'Search Pay Codes...'.
- Deduct Hours Start Time**: A time picker set to '10:00 am'.
- Deduct Hours End Time**: A time picker set to '06:00 pm'.
- Quantity Cap**: A text field containing '2'.
- Quantity Cap End Time**: A time picker set to '04:00 pm'.
- Quantity Cap Start Time**: A time picker set to '12:00 pm'.
- Timesheet Activity**: A dropdown menu set to 'Sleepover'.
- Project Code**: A search field with the placeholder 'Search Project Codes...'.

 At the bottom right of the form, there are three buttons: 'Cancel', 'Save & New', and 'Save', with the 'Save' button highlighted with a red rectangle.

26. If a Payee Allowance is populated, define the quantity cap for the related Allowance by populating the following fields:
 - a. Define the Payee Allowance Quantity cap applicable during the cap times defined by populating the **Quantity Cap** field.
 - b. Define the specific time period for the entered **Quantity Cap** by populating the **Quantity Cap Start Time** and **Quantity Cap End Time** fields.
 - i. For example, a Quantity Cap spanning from 04:00 pm to 12:00 pm ensures the populated Payee Allowance may only be applied to time worked between 04:00 pm and 12:00 pm the following day.
 - ii. If the Quantity Cap applies to the whole day, populate 12:00 am as the Quantity Cap Start Time, and 11:59 pm as the Quantity Cap End Time.
27. To insert a Timesheet Activity for the Payee Allowance, populate the **Timesheet Activity** field using the lookup options available.
28. To insert a Project Code for the Payee Allowance, populate the **Project Code** field using the lookup options available.
29. Click on the **Save** button.

Important Notes

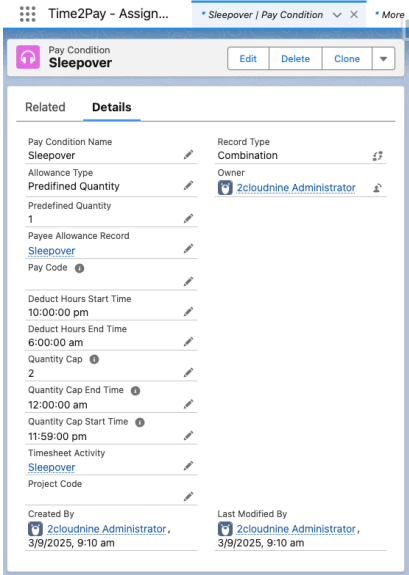

(Figure 15)

Please ensure the Payee Allowance Template Record Type is used when populating this field, so that the Pay Condition is not restricted to a single Payee.

Either the Payee Allowance Record field or the Pay Code field **MUST** be populated. If both are entered, the Field Service Extension will use the Pay Code to populate Timesheet Entries for integrated Field Service data.

30. A new Combination Pay Condition has been created (see Figure 16).

Figure 16

The screenshot shows the 'Time2Pay - Assign...' form for a 'Sleepover' Pay Condition. The form is divided into 'Related' and 'Details' tabs. The 'Details' tab is active, showing various fields for configuration. The 'Pay Condition Name' is 'Sleepover', and the 'Record Type' is 'Combination'. The 'Owner' is '2cloudnine Administrator'. The 'Predefined Quantity' is '1'. The 'Payee Allowance Record' is 'Sleepover'. The 'Pay Code' is empty. The 'Deduct Hours Start Time' is '10:00:00 pm' and the 'Deduct Hours End Time' is '6:00:00 am'. The 'Quantity Cap' is '2'. The 'Quantity Cap End Time' is '12:00:00 am' and the 'Quantity Cap Start Time' is '11:59:00 pm'. The 'Timesheet Activity' is 'Sleepover' and the 'Project Code' is empty. The 'Created By' and 'Last Modified By' are both '2cloudnine Administrator' on '3/9/2025, 9:10 am'.

Field Descriptions

Field Name	Description
Allowance Type	Defines how the related Payee Allowance should be applied during Timesheet Interpretation: • Enterable Quantity selecting this option enables the Allowance quantity to be determined according to Quantity entered on the linked Field Service record. • Predefined Quantity selecting this option allows a set quantity to be entered for the Allowance using the Predefined Quantity field.
Deduct Hours Start Time & Deduct Hours End Time	Defines the beginning and end of the period where the Field Service Extension will ONLY populate Allowance Timesheet Items, rather than inserting entered time. • For example, when Sleepover Wake Up or On Call entitlements apply, and actual time worked does not need to be captured.
Pay Code	The Pay Code used by the Field Service Extension to identify the related Payee Allowance to populate when inserting Allowance Timesheet Items.
Pay Condition Name	The identifier for the Pay Condition record.
Payee Allowance Record	The Payee Allowance Template record used by the Field Service Extension to identify the Payee Allowance for integrated Timesheet Entries .
Predefined Quantity	Defines the quantity to be applied when the Field Service Extension inserts the timesheet itemquantity.
Project Code	The Project Code populated for integrated Timesheet Entries created in relation to the Pay Condition.
Quantity Cap	Used to define the maximum units that may be inserted for integrated Timesheet Items within the period specified in the Quantity Cap Start and End Time fields.
Quantity Cap Start Time	Used to define the start time for the Quantity Cap period. • If the related Allowance is NOT shift-based, 12:00am may be populated so that the defined Quantity Cap is applied to the entire day.
Quantity Cap End Time	Used to define the end time for the Quantity Cap period. • If the related Allowance is NOT shift-based, 11:59pm may be populated so that the defined Quantity Cap is applied to the entire day.
Timesheet Activity	The Timesheet Activity populated for integrated Timesheet Entries created in relation to the Pay Condition.
