

Purpose

The purpose of this quick reference guide is to step through the process of creating the Invoice Settings. The intended audience for this document is System Administrators / Standard Users.

Steps

Set up a new Invoice Settings record

The Invoice Setting records are related to the Client record and are used to describe various creation and distribution settings for Invoices.

To create an Invoice Setting record, follow the steps below:

1. Go to the **Accounts** object. (See Figure 1)

Figure 1

2. Open the required Client record and click on the **Related** tab. (See Figure 2)

Figure 2

3. Navigate to the **Account Invoice Settings** related list and click on the **New** button. (See Figure 3)

Figure 3

 Account Invoice Settings (2)		New	
Invoice Setting ID	Record Type	Invoice Record Type	Effective Date
IS-0000000003	Payroll Items	Credit_Payroll_Items	01/07/2020 
IS-0000000002	Payroll Items	Payroll_Items	01/07/2020 
View All			

4. Choose one of the following record types as required and click **Next**: (See Figure 4)
 - a. **Payroll Items**
 - b. **Invoiceable Fees**

Figure 4

5. Populate the **Invoice Record Type** field as below:
 - a. If you selected Payroll Items in the previous step, then you need to choose from the following options in the **Invoice Record Type** field:
 - i. Credit_Payroll_Items
 - ii. Payroll_Items
 - b. If you selected Invoiceable Fees in the previous step, then you need to choose from the following options in the **Invoice Record Type** field:
 - i. Credit_Invoiceable_Fees
 - ii. Invoiceable_Fees
6. Populate the following required fields to provide the base details of the Invoice Settings: (See Figure 5)
 - a. **Account**
 - b. **Invoice Record Type (step 5)**
 - c. **Effective Date**
 - d. **Invoice Entity**
 - e. **Payment Terms**
 - f. **0 & Negative Pay Transactions Invoiced**

- g. **Enable Project Codes on Invoice (Yes/No)**
 - h. **Split Invoice by Project Code (Yes/No)**
 - i. **Enable Rate Ex on Invoice (Yes/No)**
 - j. **Enable Total Ex Tax on Invoice (Yes/No)**
 - k. **Enable Total Tax on Invoice (Yes/No)**
 - l. **Enable Total Inc Tax on Invoice (Yes/No)**
 - m. **Split Expenses to Own Invoice (Yes/No)**
 - n. **Invoice Visualforce Page**
 - o. **Include Backing Sheet (Yes/No)**
 - p. **Delivery Method**
 - q. **Send Invoice Emails Setting**
 - r. **Timesheet Attachments with Invoice (Yes/No)**
 - s. **Email Template - Single PDF**
 - t. **Email Template - Online**
7. Populate the following optional fields as needed:
- a. To set an expiry date for the Invoice Settings record, populate the **Expiry Date** field. If left blank, no Expiry Date will apply. (See Figure 5)
 - b. To add a custom description on the invoice or if you would like to add any details about the Invoice, populate the **Invoice Message** field.
 - c. To display the full approval status history of the invoices, populate the **Enable Full Approval History** field.
 - d. To define if the loading pay transactions defined on the Interpretation Rule will be invoiced separately or not, populate the **Split Loading Pay Transactions** field.
 - e. To enter the email address that will be used to send Invoice emails, populate the **Send Invoice Emails from Email** field.

Alternatively, an Invoice Settings record can be created by opening the Invoice Settings object and clicking on the New button.

Invoice Settings records CANNOT be deleted if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

If the Invoice Setting for credit isn't enabled, you will possibly receive an error message preventing users from being able to proceed any further with that process saying "Apex approval lock/unlock api preference not enabled".

You cannot edit an Invoice Settings record once a related Pay Transaction has been invoiced. To make changes, you would need to enter an Expiry Date, and then create a new record for the next Effective Date with the changes required. If you are creating for Payroll Items, you will also need to create for Credit Payroll Items (Invoice Record Type) and if you are creating for Invoiceable Fees, you will also need to for Credit Invoiceable Fees.

- To modify an existing **Invoice Settings** record, open the required record and select the **Edit** button available on the top right side of the page. You can also double click in any of the fields that need editing or just click on the pencil icon  that appears within fields when you move your cursor over the field.
- When complete, click on the **Save** button.

Field Descriptions

0 & Negative Pay Transactions Invoiced defines if Pay Transactions with Invoice Total Inc. Tax of 0 or a negative amount will be included in invoices.. If No and an Invoice to be created has Pay Transactions of 0 or negative Invoice Total Inc. Tax amount, the Pay Transactions will not be included in invoice creation.

Account defines the Invoice To Account the Invoice Setting relates to.

Delivery Method defines the default method that will be used to distribute the Invoices created using this Invoice Setting. Can be overridden at the Invoice Level.

Effective Date defines the date from which the Invoice Setting is effective.

Email Template - Single PDF defines the Email Template to be used for sending the Invoices with a single PDF Invoice attached.

Email Template - Online defines the Email Template to be used for sending online Invoices.

Enable Full Approval History when enabled, the Invoices with Backing Sheets will retrieve and display the full approval status history as provided by the record history on the status field.

Enable Project Codes On Invoice defines if Project Codes will be included on Invoice PDFs.

Enable Rate Ex Tax On Invoice defines if the Rate Ex Tax column will be displayed in the Invoice PDFs. The Invoice Totals will still be shown in the header and footer of the Invoice

Enable Total Ex Tax On Invoice defines if the Total Ex Tax column will be displayed in the Invoice PDFs. This applies only to the table within the main invoice body. The invoice totals will still be shown in the header and footer of the invoice.

Enable Total Inc Tax On Invoice defines if the Total Inc Tax column will be displayed in the Invoice PDFs. This applies only to the table within the main invoice body. The invoice totals will still be shown in the header and footer of the Invoice.

Enable Total Tax On Invoice defines if the Total Tax column will be displayed in the Invoice PDFs. This applies only to the table within the main invoice body. The invoice totals will still be shown in the header and footer of the Invoice.

Expiry Date defines the date this Invoice Setting expires and is no longer used.

Include Backing Sheet defines if a Backing Sheet will be included on the PDF Invoices.

Invoice Entity defines the Invoice Entity to be used on the Invoices.

Invoice Message defines the default message that will be included on the PDF Invoices created using this Invoice Setting. If populated, this is in addition to any that are set at an Invoice Entity level, and Invoice level.

Invoice Record Type defines the Invoice Record Type that this Invoice Setting applies to.

Invoice Visualforce Page defines the Visualforce Page that will be used when rendering the Invoice PDF.

Payment Terms define the Payment Terms to be applied to the Invoices.

Split Expenses to Own Invoice defines if Expenses will be invoiced on a separate Invoice.

Split Invoice By Project Code defines if the Invoices will be split into separate Invoices per Project Code.

Send Invoice Emails From Email must be detailed as an Organisation-Wide Address. When the Invoice Setting's Send Invoice Emails Setting defines the email source as 'Invoice Setting Defined' the email address defined in this field will be used as the from / reply to email when emailing Invoices.

Send Invoice Emails Setting defines from where the email address that will be used as the from / reply to email when emailing Invoices will be taken.

Split Loading Pay Transactions defines if the loading pay transactions defined on the Interpretation Rule will be invoiced separately. If "No" then the Pay Code on the Interpretation Breakpoint will be the only pay transaction invoiced.

Timesheet Attachments with Invoice defines when Invoices are emailed the Timesheet attachments are included in the email.
