

Purpose

The purpose of this quick reference guide is to step through the process of creating ETP Pay Codes. The intended audience for this document are system administrators / standard users.

Steps

Create a new ETP Pay Code record

Pay Codes are applied to Pay Transactions processed for an Employee.

The ETP Pay Code record is used to define the Pay Codes used for Employee Termination Payments (ETP) made to a Payee. The record holds General Information and Pay Code Setup details.

Create a ETP Pay Code by following the below steps:

1. Click on the **App Launcher** icon. (See Figure 1)
2. Go to the **Pay Codes** object by using the Search function. (See Figure 2)

A new **ETP Pay Code** is now created (see Figure 7).

Figure 7

ETP Pay Codes CAN NOT be deleted if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

A Pay Code can only be edited if it has not already been referenced within Pay Transactions, Interpretation Rules or Payee Allowance records. A new Pay Code will need to be created if updates are required after this point.

1. To modify an existing **ETP Pay Code** record, open the required record and select the **Edit** button available on the top right side of the page. You can also double click within fields that need editing or just click on the pencil icon  that appears within fields when hovering with your cursor.
2. When complete, click on the **Save** button.
