

Create an Assignment - Temp to Perm

Purpose

The purpose of this quick reference guide is to step through the process of creating a Temp to Perm Assignment. The intended audience for this document is System Administrators / Standard Users. This record type of Assignment holds the general information, Role details, Remuneration Information, Invoiceable Temp to Perm Fee, and Invoice Settings for an Employee's placement.

Steps

Create a new Assignment record - Temp to Perm

Create an Assignment record by following the below steps:

1. Go to the **Assignments** tab. (See Figure 1)
2. Click the **New** button.

Figure 1

3. Select the **Temp to Perm** Record Type from the picklist options. (See Figure 2)
4. Click the **Next** button.

Figure 2

A screenshot of the 'New Assignment' form in the 2C9 Payroll application. The form title is 'New Assignment'. Below the title, there is a section 'Select a record type' with four radio button options: 'Employee', 'Perm' (To be used for Assignments relating to Permanent Placements), 'Temp' (To be used for Assignments relating to Temporary Placements), and 'Temp To Perm' (To be used for Assignments relating to Temp To Perm Placements). The 'Temp To Perm' option is selected and highlighted with a red box. At the bottom right of the form, there are 'Cancel' and 'Next' buttons, with the 'Next' button highlighted by a red box.

5. Follow this step in the sequence given below:
 - a. Populate the following required fields to provide the base details of the Assignment: (See Figure 3)
 - i. **Assignment Name**
 - ii. **Client**
 - iii. **Client Hiring Manager**

- iv. **Employee**
- v. **Assignment Start Date**
- b. Populate the following optional fields as needed: (See Figure 3)
 - i. To apply a Purchase Order Number to the invoices for this Assignment, populate the **Purchase Order Number** field.
 - ii. To prevent the Status of the Assignment record from being automatically updated by the Automatic Status Update scheduled job, tick the **Exclude From Auto Update** checkbox.

Assignment records **CANNOT** be deleted if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

- To modify an existing **Assignment** record, open the required record and select the **Edit** button available on the top right side of the page. You can also double click in any of the fields that need editing or just click on the pencil icon  that appears within fields when you move your cursor over the field.
- When complete, click on the **Save** button.

Field Descriptions

Assignment Name is the name of the role of this Assignment.

Assignment Start Date is the start date of the Assignment.

Base Salary Defines the Base Salary the Employee will receive when placed in the Assignment.

Base Salary Superannable? indicates if the Base Salary will attract Superannuation as part of the Salary Package.

Car Allowance defines the rate of any Car Allowance the Employee will receive in the Assignment.

Car Allowance Superannable? indicates if the Car Allowance will attract Superannuation as part of the Salary Package.

Client is the Client related to the Assignment. This record cannot be a Payment Entity or Invoice Entity.

Client Hiring Manager defines the Client contact who hired the Employee. They will be the Invoice Contact detailed on Invoices when the Invoice Group By of 'Hiring Manager (Invoice Hiring Manager)' is used.

Custom Package Component 1 Defines the Custom Salary Component 1 the Employee will receive when placed in the Assignment. This field can be relabelled and help text updated to cater for common salary component types within the Org.

Custom Package Component 1 Superannable? indicates if the Custom Salary Component 1 will attract Superannuation as part of the Salary Package. This field can be renamed and help text updated to cater for common salary component types within the Org.

Custom Package Component 2 Defines the Custom Salary Component 2 the Employee will receive when placed in the Assignment. This field can be relabelled and help text updated to cater for common salary component types within the Org.

Custom Package Component 2 Superannable? indicates if the Custom Salary Component 2 will attract Superannuation as part of the Salary Package. This field can be renamed and help text updated to cater for common salary component types within the Org.

Custom Package Component 3 Defines the Custom Salary Component 3 the Employee will receive when placed in the Assignment. This field can be relabelled and help text updated to cater for common salary component types within the Org.

Custom Package Component 3 Superannable? Indicates if the Custom Salary Component 3 will attract Superannuation as part of the Salary Package. This field can be renamed and help text updated to cater for common salary component types within the Org.

Employee is the Employee for this Assignment.

Exclude From Auto Update When this box is checked, the record will be skipped by the Automatic Status Update scheduled job.

Invoice Email CC is used to define additional email addresses the invoice will be emailed too.

Invoice Tax ID defines the Invoice Tax ID that applies to the Assignment.

Invoice Taxable is used to set a default for Assignment Rate and Invoiceable Fees created using this Assignment to determine if the item will be Taxable.

Invoice Schedule defines the Invoice Schedule that applies to the Assignment.

Invoice To Account defines the Bill To Account that will be detailed on invoices when the Invoice Group By of 'Invoice To Account', 'Invoice To Contact' or 'Assignment' are used.

Invoice To Contact defines the Invoice Contact that will be detailed on invoices when the Invoice Group By of 'Assignment' and 'Invoice To Contact' are used.

Other Non-Superannable Components indicates the total of other Salary Components that will not attract Superannuation that are not already included. This field can be used for ad-hoc salary components instead of requiring an individual field.

Other Non-Superannable Components Desc allows for a description of the package components that make up the amount defined in the Other Non-Superable Salary Package Components field.

Other Superannable Components indicates the total of other Salary Components that will incur Superannuation that are not already included. This field can be used for ad-hoc salary components instead of requiring an individual field.

Other Superannable Component Description allows for a description of the package components that make up the amount defined in the Other Superable Package Components field.

Package Superannuation Rate defines the Superannuation Rate that will apply to the Salary Package.

Payment Entity is the related Payment Entity record.
