

Purpose

The purpose of this Administrator Guide is to provide information about the Utilities package Reminder Notifications. The content in this guide is optional, and may be utilised during implementation, or after a Project has gone live. The intended audience for this document is System Administrators.

Overview

Reminder Notifications automate the sending of Reminder Approval Emails for Timesheets, Expense Claims, and Leave Events, to both Employees and Approvers.

This feature uses flexible and customisable logic that allows System Administrators to define when and to whom Reminders are sent. It supports Custom Email Templates, consolidated Approval Notifications (so Approvers receive a single summary of pending items), and the ability to approve directly from the email — streamlining the Approval process.

Assignment Reminder Settings

To determine if Reminder Notifications should be sent, to whom, and how, there are fields on the Assignment record to define this.

Reminder Notification Method

The Reminder Notification Method picklist determines the type of Approver Reminder that will be sent for Timesheets, Expense Claims, and Leave Events related to the Assignment.

If the Single option is selected, a Reminder will be sent for each record related to that Assignment. For Timesheets, as this is a single Timesheet, the Email Template is able to provide more granular Timesheet-related data, such as a daily breakdown. These records will not be considered for other Assignments that have the Consolidated sending option. Refer to Figure 1 for an example of a single Email Template.

Figure 1

If the Consolidated option is selected, all records that meet the criteria will be included in a single reminder email to the Approver with a list of the related records.
As the Consolidated Reminder can contain many Timesheets, the email is a summarised table of all submitted Timesheets.

Please refer to Figure 2 for an example of a Consolidated Email Template showing multiple Timesheets in a single email.

Send Employee Timesheet Reminders

This Yes/No picklist controls whether Reminder emails are sent to the Employee for Timesheets with a Status of 'New' from prior weeks.

If set to Yes, the Flow automatically sends Reminders for Submitted Timesheets. If set to No or left blank, no Reminders will be sent for this Assignment.

Send Approver Reminders

To determine which Approver will receive Reminder Notifications, the following fields have been included on the Assignment:

- Send Timesheet Reminders To
- Send Expense Claim Reminders To
- Send Leave Reminders To

Each of these picklist fields contain the values and related action:

- Notify Primary Approver - Reminder will be sent to the Timesheet > Assignment > Timesheet Approver only.
- Notify Alternative Approver - Reminder will be sent to the Timesheet > Assignment > Alternative Timesheet Approver only.
- Notify Primary and Alternative Approver - Reminder will be sent to the Timesheet > Assignment > Timesheet Approver and the Timesheet > Assignment > Alternative Timesheet Approver.

If these fields are left blank, no Reminder Notifications will be sent for any Timesheets, Expense Claims, or Leave records related to the Assignment.

Example

A Contact is a 'Timesheet Approver' on 10 Assignments.

On 9 of the Assignments, the 'Reminder Notification Method' is set to 'Consolidated', whilst on one of the Assignments, they request reminders to be sent individually to pay more attention to this specific Employee.

On Monday, the Scheduled Job runs and sends 2 reminders to the Approver.

The first contains all Submitted Timesheets from the 9 Assignments with a summary of those Timesheet hours, including the option to approve them in bulk.

A second email is sent containing only the Timesheet from the Assignment, with Reminder Notification Method set to Consolidated, and provides a detailed breakdown of hours worked, providing the approver with clear segmentation between the types.

Flagging Records for Reminders

As outlined in the Configuration Guide to 2cloudnine Utilities, the flagging of Timesheets, Expense Claims and Leave records utilises a custom checkbox formula field for each respective record. This provides customers with a greater level of flexibility in determining when reminders are sent to both Employees and Approvers.

Whilst this document provides a default baseline recommendation, this formula can be updated to meet varying needs.

Sending Reminders

Once the Assignment has been configured to send Reminders, and the records meet the criteria to send Reminders (see above), the Scheduled Job will automatically send emails to Employees and Approvers on the defined intervals of the batch job.

The Contact's email address for notifications will be determined based on the following picklist fields:

- Timesheet Notification Email
- Expense Claim Notification Email
- Leave Notification Email

If the value is set to Primary, the email will be sent to the Email field.

If set to Alternative, it will be sent to the Alternative Email field.

If the Scheduled Job is set to run hourly and the default logic has been configured, both Employees and Approvers will receive an automated reminder at 12am local time (see above Default Time Zone section) to submit Timesheets for last week.

Once the reminder email has been sent, the following reminder fields are updated on the respective objects with the date and time the email reminder was sent.

Object	Field
Timesheet	Last Employee Reminder Sent
Timesheet	Last Primary Approver Reminder Sent
Timesheet	Last Alternative Approver Reminder Sent

Expense Claim	Last Employee Reminder Sent
Expense Claim	Last Primary Approver Reminder Sent
Expense Claim	Last Alternative Approver Reminder Sent
Payee Leave Event	Last Employee Reminder Sent
Payee Leave Event	Last Primary Approver Reminder Sent
Payee Leave Event	Last Alternative Approver Reminder Sent

Once these fields are updated, the checkbox on the respective record will be unchecked, meaning another reminder will not be sent the same day.

Approving Records

Once reminder notifications have been sent, record approval depends on your Site configuration. For Guest Approvers, once the email approval is configured, they can approve directly by selecting the 'Approve' button within the email, or select 'View/Reject Request' to be redirected to the Guest Approver Site. For Authenticated Approvers, you must configure the Custom Setting as detailed in the Utilities Configuration Guide with the Authenticated Approver Site. Enabling this will update the email buttons to direct Approvers to the Authenticated User Site, where they can log in and approve Submitted records.

Exclude from Reminders

Whilst reminder notifications are a great way to ensure records are submitted and approved prior to payroll processing deadlines, there are scenarios where reminders may need to be disabled for specific Contacts, Timesheets, Expense Claims, or Leave.

Exclude Contacts (Employee and Approvers)

Some Contacts may need to be removed from receiving Reminders, for example, if they are going on leave. You will find the following fields located on the Contact record:

- Timesheet Reminder Notification Opt Out
- Exp Claim Reminder Notification Opt Out
- Leave Reminder Notification Opt Out

If checked, reminder Notifications will not be sent to the Contact for the related records.

Exclude Records (Timesheets, Expense Claims, Leave Events)

Like Contacts, there may be scenarios where a specific record needs to be excluded from being included in Reminder emails. A common example of this is Timesheets, where an Employee was on leave for the entire Timesheet Period.

To ensure Reminders are not sent, the following checkbox fields are located on the Timesheet, Expense Claim, and Leave records:

- Exclude From Employee Reminder List
- Exclude From Primary Approver Remin List
- Exclude From Alternative Appr Remin List

If checked, Reminders will not be sent to the respective Contact for that specific record.

Create Custom Settings

The Reminder Notification process utilises a Custom Setting for determining the configuration of Notification Reminders. To populate the Custom Settings:

Go to **Setup > Custom Settings > 2c9 - Utility Notifications > Manage**

1. Select the **New** button.
 2. Click **Manage** in the Header and update as per the list below.
 3. Click **Save**.
- **Sender from Email**
 - The Org wide email address you want the emails to be sent from.
 - Go to **Setup > Organization-Wide Addresses** and copy the 'Email' from the email and paste into this field.
 - **TS Employee Reminder Notification Indic.**
 - Enter the API name of the Employee TS Reminder formula field.
 - If using the default Employee TS reminder, enter **tc9_util__Employee_TS_Reminder__c**. If using custom logic, enter the field created in the previous section Create Custom Fields.
 - **TS Employee Reminder Notification Body**
 - Enter the API name of the Timesheet email template that will be sent to the employee.
 - If using the default reminder Template enter **Standard_Email_Timesheet_Employee_Reminder**
 - **TS Approver Notification Indicator**
 - Enter the API name of the Approver TS Reminder formula field.
 - If using the default Approver TS reminder enter **tc9_util__Approver_TS_Reminder__c**. If using custom logic, enter the field created in the previous section Create Custom Fields.
 - **TS Approver Notification Cons Body**
 - Enter the API name of the consolidated Timesheet email template that will be sent to the approver.
 - If using the default reminder Template enter **Consolidated_Timesheet_Approver_Reminder**.
 - **TS Approver Notification Sgl Body**
 - Enter the API name of the single Timesheet email template that will be sent to approvers.
 - If using the default reminder Template enter **Single_Timesheet_Approver_Reminder**.
 - **Expense Approver Notification Indicator**
 - Enter the API name of the Approver Expense Claim Reminder formula field.
 - If using the default Approver Expense Claim reminder enter **tc9_util__Approver_Expense_Reminder__c**. If using custom logic, enter the field created in the previous section Create Custom Fields.
 - **Expense Approver Notification Cons Body**
 - Enter the API name of the consolidated Expense Claim email Template that will be sent to the approver.
 - If using the default reminder Template enter **Consolidated_Expense_Approver_Reminder**.
 - **Expense Approver Notification Sgl Body**
 - Enter the API name of the single Expense Claim email Template that will be sent to the approvers.
 - If using the default reminder Template enter **Single_Expense_Approver_Reminder**
 - **Leave Approver Notification Indicator**
 - Enter the API name of the Approver Leave Reminder formula field.
 - If using the default Approver Leave reminder enter **tc9_util__Approver_Leave_Reminder__c**. If using custom logic, enter the field created in the previous section Create Custom Fields.

- **Leave Approver Notification Cons Body**
 - Enter the API name of the consolidated Leave email template that will be sent to the Approver.
 - If using the default reminder template enter Consolidated_Leave_Approver_Reminder.
- **Leave Approver Notification Sgl Body**
 - Enter the API name of the single Leave email Template that will be sent to the Approvers.
 - If using the default reminder Template enter **Single_Leave_Approver_Reminder**.
- **Authenticated Approver**
 - Selecting this option will require all Approvers to log in with their credentials. Links to the Guest Use Site will be removed from the default email templates.
- **Authenticated Approver Site URL**
 - If the Authenticated **Approver** is TRUE, enter the full URL of the secure site where Approvers log in. This link will be used in all email notifications.

Important Notes

(Single Method)

If using the Single method, the default Reminder Email Templates are not Record-Specific by default. We recommend updating these Templates to include Record-Specific details, or alternatively, create your own Custom Email Templates by providing their API names.

Schedule Batch Job

IMPORTANT: Before scheduling the batch, please review all Assignments and ensure the following:

- Inactive Assignments are not configured to send Reminder Emails.
- For any active Assignments that will send Reminder Emails, make sure any older Timesheets with a Status of 'New' that you do not want to include, are updated to 'Exclude from Reminder Lists'.

For guidance on excluding records, see the section below: 'Exclude from Reminders'.

Failure to complete these checks before scheduling may result in a large volume of Reminder Emails being sent for outdated records.

In order to automate the sending of Email Reminder Notifications, a Scheduled Job must be configured. It is important to note that the same Scheduled Job sends both the Employees and Approver Email Reminders across all records. When Scheduling the Batch Job, there are two options:

Hourly (Recommended)

The following configuration will schedule the Notification Reminder process to automatically run every hour. This is the recommended approach for the following key reasons:

- Only a single Batch Job is required
- Reminder Email Notifications will be sent daily.
- Timing is not specific like the fixed Day & Time method (see below). This is important for Orgs that have different payroll departments processing Payrolls on different days.

The downside of this approach is that Reminder Email Notifications will go out at midnight each day which may be missed by Employees and Approvers.

Scheduled Batch Job

To run the script **hourly**:

1. Copy the block of script to be run.
2. Select **Setup > Developer Console**.
3. **Debug > Open Execute Anonymous Window**.
4. Delete or comment out any code that is in the window.
5. Paste in the copied script from below.
6. Click the **Execute** button.

```
System.schedule('SkieNotificationReminderSchedule 00', '0 00 * * * ?', new tc9_util.SkieNotificationReminderSchedule());
```

Run the Batch Job Instantly

Go to **Setup > Scheduled Jobs**

Alternatively, the Batch Job can also be run instantly by executing the following script in Dev Console:

```
new tc9_util.SkieNotificationReminderSchedule().execute(null);
```

Fixed Day & Time

Alternatively, you can configure the batch job to run on a specific day and time using the Schedule Apex UI. For example, you may only want to send Email Reminders on specific Payroll days at a certain time.

To manually schedule an Apex Job:

Go to **Setup > Scheduled Jobs > Schedule Apex button**

1. Enter required details and select **SkieNotificationReminderSchedule** Apex Class (see Figure 3).
2. Select **Save**.

Figure 3

The screenshot shows the 'Setup Apex Classes' interface in Salesforce. The page title is 'SETUP Apex Classes'. Below the title, there is a description: 'Schedule an Apex class that implements the Schedulable interface to be automatically executed on a specified interval.' The form contains the following fields and options:

- Job Name:** Reminder Notifications
- Apex Class:** SkieNotificationReminde (with a search icon)
- Schedule Using:** ☒ Schedule Builder ☐ Cron Expression
- Schedule Apex Execution:**
 - Frequency:** ☒ Weekly ☐ Monthly
 - Recurs every week on:**
 - ☐ Sunday
 - ☒ Monday
 - ☐ Tuesday
 - ☐ Wednesday
 - ☐ Thursday
 - ☐ Friday
 - ☐ Saturday
 - Start:** 9/6/2025 (13/6/2025)
 - End:** 13/7/2050 (13/6/2025)
 - Preferred Start Time:** 12:00 pm

At the bottom, a note states: 'Exact start time will depend on job queue activity.'

Default Time Zone for Scheduled Jobs

Scheduled Jobs in Salesforce run based on the **Default Time Zone** configured in Setup > Company Information. This means reminders could be received by both Employees and Approvers at different times based upon their time zones.

Example

The job is scheduled for 12:00 PM each day, and the default time zone is (GMT+10:00) Australian Eastern Standard Time. When the batch job runs, contacts in Sydney receive the reminder at 12:00 PM local time, while contacts in Perth (GMT+8:00) receive the same reminder at 10:00 AM local time.

Update Email Templates (Optional)

To give Customers more control over their Reminder Emails, the Reminder Notification functionality supports Custom Labels that allow the email body content to be customised.

The table below lists all available Email Templates along with the corresponding Custom Label names used to modify their content.

Email Template	Custom Label	Details
Standard_Email_Timesheet_Employee_Reminder	N/A	The employee reminder uses a classic email template. You can update the subject and body directly in the template.
Consolidated_Timesheet_Approver_Reminder	Timesheet_Email_Approval_Reminder_Message	Consolidated Timesheet reminder email.
Single_Timesheet_Approver_Reminder	Timesheet_Email_Approval_Reminder_Message	Single Timesheet reminder email.
Consolidated_Expense_Approver_Reminder	Expense_Email_Approval_Reminder_Message	Consolidated Expense Claim reminder email.
Single_Expense_Approver_Reminder	Expense_Email_Approval_Reminder_Message	Single Expense Claim reminder email.
Consolidated_Leave_Approver_Reminder	Leave_Email_Approval_Reminder_Message	Consolidated Leave reminder email.
Single_Leave_Approver_Reminder	Leave_Email_Approval_Reminder_Message	Single Leave reminder email.

To update the body of an email using Custom Labels:

Go to **Setup > Custom Labels**

1. Select the Custom Label you wish to update (see table above).
2. Select the **Edit** button
3. Update the value section with the new body.
4. Select **Save**.
5. Repeat for any email Templates you need updated.

**Important Notes***(Single Method)*

There are currently no Custom Labels available to update the subject of the email. You can however directly modify the subject within the Visualforce Email Template itself.

Create Custom Fields (Optional)

To provide flexibility in setting reminder logic for Employees and Approvers, System Admins can use Custom Formula Fields instead of the provided default logic. These Custom Fields can define when a Timesheet, Expense Claim, or Payee Leave Event will send a Reminder Email.

To utilise this custom logic for Reminders, you can create a Boolean Type of Custom Formula Field and define the required logic. If TRUE and defined in the Custom Setting (see step below), this will then send the Reminder against the Timesheet, Expense Claim, or Payee Leave Event.

The following outlines the required Custom Fields on each record, along with a recommended default formula that can be tailored to individual needs.

By default, the 2cloudnine Utilities Package includes the following fields for triggering Reminder Notifications:

1. Field: Employee TS Reminder
 - a. Object: Timesheet
 - b. Details: This formula field sends a Reminder if the Timesheet is still a Status of New, its End Date is in the past, not excluded from Reminders, the Employee hasn't opted out, and no Reminder has been sent Today.
2. Field: Approver TS Reminder
 - a. Object: Timesheet
 - b. Details: This formula field sends a Reminder to the Primary and/or Alternative Approver if the Timesheet is Submitted, not excluded from Reminders, and a Reminder not already sent Today, based on the Configured Notification Preference.
3. Field: Approver Expense Reminder
 - a. Object: Expense Claim
 - b. Details: This formula field sends a Reminder to the Primary and/or Alternative Approver if the Expense Claim is Submitted, not excluded from Reminders, and a Reminder not already sent Today, based on the Configured Notification Preference.
4. Field: Approver Leave Reminder
 - a. Object: Payee Leave Event
 - b. Details: This formula field sends a Reminder to the Primary and/or Alternative Approver if the Payee Leave Event is Submitted, not excluded from Reminders, and a Reminder not already sent Today, based on the Configured Notification Preference.
