

Purpose

The purpose of this Administrator Guide is to provide information about Utilities packaged Timesheet Email Approvals. The intended audience for this document is System Administrators.

Overview

Once the configuration steps are complete, Approvers will be able to directly view and approve Timesheets from their email notifications, without the need to log in to the relevant Community and identify Timesheets for approval.

Required Guest Approver Site

The 'Timesheet Email Approvals' functionality only works with a Guest User Approver Site.

To utilise this functionality, you must first configure the Guest User Approver Community as per the [2c9 - Guest User Approval Guide](#).

Sending Submitted Timesheets for Approval

As noted in the configuration, there are two available options for Timesheet Email Approvals - Single and Consolidated. The sending of Submitted Timesheets for Approval differs based on the method used.

Single Sending

The single sending will automatically send all Timesheets to the related 'Timesheet > Assignment > Timesheet Approver' that meet the criteria defined in the Custom Setting **Email Approval Field**, at the scheduled interval defined. If no **Email Approval Field** api name is defined, the Product will default to the packaged formula field **EmailApproval**, which will simply send all Timesheets with a status of 'Submitted' that have not yet been sent.

Scenario

A group of customers has requested to receive a single email for each submitted Timesheet. Another group has requested a single consolidated email for all submitted Timesheets, sent once a week. To accommodate this, the System Administrator creates a new field on the Account object called 'Email Approval Type', with the options 'Single' and 'Consolidated'.

The System Administrator then creates a custom boolean formula field on the Timesheet object. This formula field returns TRUE only if the related Account's Email Approval Type is set to 'Single' and the Timesheet's Status is 'Approved'. Afterward, the System Administrator updates the 'Email Approval Field' Custom Setting to reference the API name of this formula field.

This confirmation ensures that Timesheets linked to customers who have selected 'Single' in the Email Approval Type field are automatically sent for approval immediately upon Timesheets being Submitted and Approved, via a Scheduled job. Conversely, customers who have chosen 'Consolidated' will not receive individual Timesheet emails. Instead, they will receive a single, consolidated email summarising all Submitted Timesheets on a weekly basis.

Consolidated Sending

Consolidated sending differs from Single Sending by grouping multiple Timesheets into a single email before being sent to the Approver. Unlike single sending, which is an automated process that schedules and sends one email per Timesheet, consolidated sending is manual and must be triggered via a custom solution. While the Utilities Package does not include built-in automation for consolidated sending, customers can implement this functionality themselves by invoking the Apex Class:

tc9_util__ConsolidatedTimesheetEmailInvocable.

To use this Apex Class, simply populate the following input variables:

- approverId: the Contact ID of the Approver to send the consolidated email.
- timesheetIds: a list of Timesheet Record IDs to include in the consolidated email

This approach allows Customers to tailor the sending logic to suit their unique business requirements.

Important Notes

(Single vs Consolidated Sending Methods)

Single and Consolidated Sending Methods can be used in combination. An Org might use Single sending via a Scheduled Job for regular Timesheet submissions, while leveraging Consolidated sending for Reminders or Summary emails.

Approving Timesheets from Email

Single Approval

On submission of a Timesheet, the Timesheet Approver will be emailed the Employee Timesheet, inclusive of the day and time worked, Break Times, and Total Hours (see Figure 1).

The Approver can view the requested Timesheet by clicking on the **View/Reject Request** button, which will direct them to the Guest Approver Community. Alternatively, they can select **Approve Time**, which will instantly Approve the Timesheet (via the Guest Approver Community).

Figure 1

Approval Request

for Tony Stark

Hi Steve Rogers,

Thank you for your business.

It is now time to approve Tony Stark's time for 22 May 23 to 25 May 23.
Please note - if you reject time, any notes you record on the timesheet will be presented to the candidate.

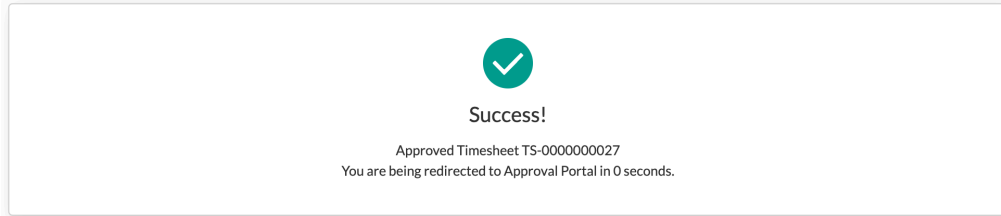

This request includes:
Hours

Mon, 22 May PO Management Test 02.00AM - 10.30AM Break Mins: 0.00	8.50 Hours
Thu, 25 May PO Management Test 09.00AM - 05.00PM Break Mins: 0.00	8.00 Hours
	16.50 Hours

Approve TimeView/Reject Request

Once approved, the User will be redirected to the Guest Approver Community as per Figure 2:

Figure 2

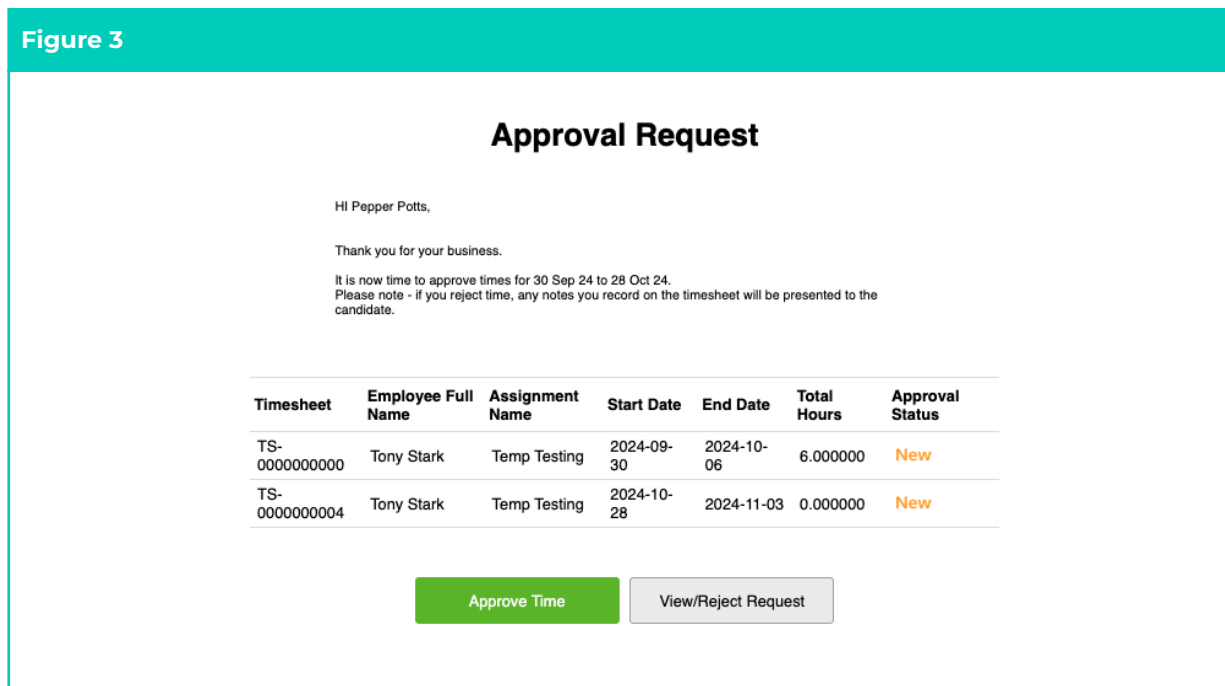

Consolidated Approval

On sending of the Consolidated Approver Email (see above), the defined Approver will receive a Single email containing a list of all Timesheets awaiting Approval. The columns displayed in the email are defined in the Field Set from the Custom Setting **Consolidated Timesheet Column Fieldset**.

The Approver can view the requested Timesheets by clicking on the **View/Reject Request** button, which will direct them to the Guest Approver Community. Alternatively, they can select **Approve Time**, which will instantly Approve the Timesheets via the Guest Approver Community (see Figure 3).

Figure 3

Approver Actions

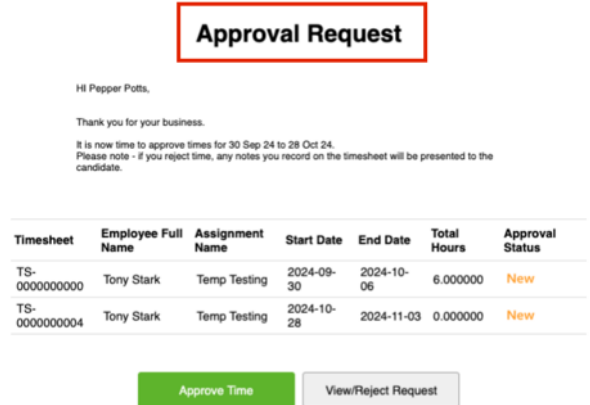

Timesheet Email Approval requires the configuration of the Guest Approver Community to successfully work. Approval of Timesheets from email utilises the same Guest Approver functionality of 'Approver Actions' to bypass restrictions set by Salesforce on Guest Users. If a Timesheet Status does not change after email approval, please ensure you troubleshoot by referring to the Approver Actions.

Update Custom Settings

The Timesheet Email Approval process uses Custom Settings to define details across both the Single and Consolidated Approver Email options. The configuration differs based upon the Email Approval Type, but it is highly recommended both are configured. To configure the Custom Settings:

Go to **Setup > Custom Settings > Manage** (next to 2c9 - Approver Portal)

1. Click **Edit** in the Header and update the required Custom Settings as per the table below.
2. Click **Save**.

Custom Setting	Status	Type	Details
Org Wide Sender Name	Required	Both	The org wide email address > Display Name you want the emails to be sent from. Go to Setup > Organization-Wide Addresses and copy the 'Display Name' from the email and paste into this field.
Email Approval Field	Optional	Single	Defines a Custom Boolean Field on the Timesheet object to control Approval Email sending. If blank, defaults to tc9_util_EmailApproval_c , which auto-sends to submitted Timesheets.
Approve Timesheet Path	Required	Single	If using the recommended naming, this would be /approve-timesheets as per step 2.
Consolidated Approve Timesheet Path	Required	Consolidated	If using the recommended naming, this would be /approve-consolidated-timesheets as per step 2.
Consolidated Timesheet Column Fieldset	Optional	Consolidated	API name of the fieldset on the Timesheets object used to control the columns in the Approval List. You can use tc9_util_Consolidated_Email_Timesheet_Columns which is an existing Field Set provided in the Package.
Consolidated Timesheet Email Header	Optional	Consolidated	Can be used to change the header in the consolidated Timesheet email. If left BLANK, this will default to 'Approval Request' 
Consolidated Timesheet	Optional	Consolidated	Can be used to change the body in the

Script

```
//script for timesheet email approval batch

System.schedule('TimesheetEmailApprovalBatch 05', '0 05 * * * ?', new
tc9_util.TimesheetEmailApprovalBatch());
System.schedule('TimesheetEmailApprovalBatch 10', '0 10 * * * ?', new
tc9_util.TimesheetEmailApprovalBatch());
System.schedule('TimesheetEmailApprovalBatch 15', '0 15 * * * ?', new
tc9_util.TimesheetEmailApprovalBatch());
System.schedule('TimesheetEmailApprovalBatch 20', '0 20 * * * ?', new
tc9_util.TimesheetEmailApprovalBatch());
System.schedule('TimesheetEmailApprovalBatch 25', '0 25 * * * ?', new
tc9_util.TimesheetEmailApprovalBatch());
System.schedule('TimesheetEmailApprovalBatch 30', '0 30 * * * ?', new
tc9_util.TimesheetEmailApprovalBatch());
System.schedule('TimesheetEmailApprovalBatch 35', '0 35 * * * ?', new
tc9_util.TimesheetEmailApprovalBatch());
System.schedule('TimesheetEmailApprovalBatch 40', '0 40 * * * ?', new
tc9_util.TimesheetEmailApprovalBatch());
System.schedule('TimesheetEmailApprovalBatch 45', '0 45 * * * ?', new
tc9_util.TimesheetEmailApprovalBatch());
System.schedule('TimesheetEmailApprovalBatch 50', '0 50 * * * ?', new
tc9_util.TimesheetEmailApprovalBatch());
System.schedule('TimesheetEmailApprovalBatch 55', '0 55 * * * ?', new
tc9_util.TimesheetEmailApprovalBatch());
System.schedule('TimesheetEmailApprovalBatch 00', '0 00 * * * ?', new
tc9_util.TimesheetEmailApprovalBatch());
```

The Apex Jobs will now be scheduled. Please confirm they are set up correctly by going to **Setup > Scheduled Jobs**.
