(Updating fields post sending an Invoice)

Some fields can be updated after the creation and sending of an Invoice to a Client. These fields include Invoice Date, Due Date, Invoice Email CC, Invoice Setting, Delivery Method, and Invoice Message. If these fields are changed, Users will be required to select the Create Invoice PDF button to create a new PDF and will be required to manually send the Invoice to the Client again.

Delete Invoices

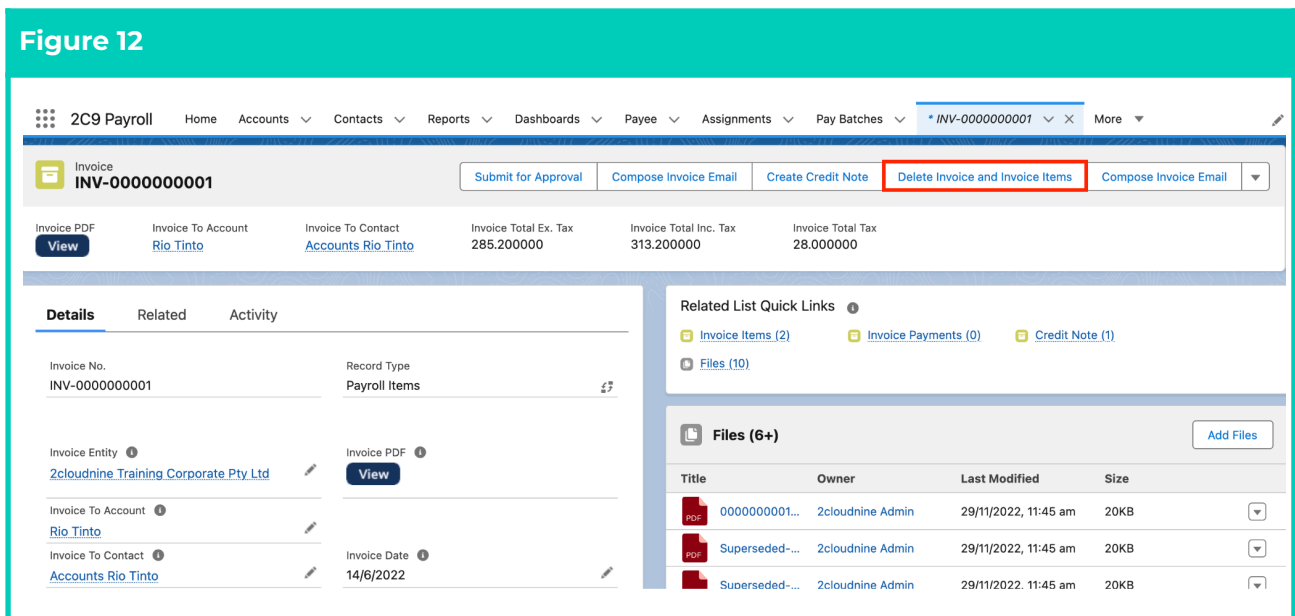

In some circumstances, the need to delete an Invoice is required, but this is only possible if the following criteria are met:

- The Invoice has not been sent to the Client; and
- The Invoice field 'Invoice Payments Total' remains blank; and
- The Invoice has not been reflected in the General Ledger Accounting Invoices.

If the above are all true, follow the steps below to delete an Invoice:

- Select the **Delete Invoice and Invoice Items** button on the individual Invoice (see Figure 12).
