

Overview

Release:	Bottlebrush '21/'22
Version:	v1.173.1
Release Date:	23/12/2021
Packages updated:	• 2cloudnine Payroll v1.173.1 (incorporates v1.161 to v1.173.1) • 2cloudnine Payroll Time2Pay Extension v1.123 (incorporates v1.100 to v1.123) • 2cloudnine Payroll Communities Extension v1.48 (incorporates v1.44 to v1.48) • 2cloudnine Payroll Australia Extension v1.63 (incorporates v1.61 to v1.63) • 2cloudnine Payroll Data Creation Extension v1.42 (incorporates v1.39 to v1.42)

Important Information

Only your authorised Salesforce System Administrator or Partner should be actioning any installation, configuration items and tasks.

All packages within the release must be installed. There may be compulsory and optional configuration items and tasks that need to be completed pre and post the installation of the packages. These will be highlighted in the below checklists, with further details given within this document.

The installer will be responsible for ensuring all these configuration items and tasks are completed within a reasonable timeframe of the packages being installed. Please ensure you have familiarised yourself with all of the requirements PRIOR to installing the packages and ensure you have sufficient time and resources available. Failing to do so can negatively impact the User experience and stability of 2cloudnine Payroll.

This guide should always be t and used via your web browser. This will ensure you are viewing the most recent version of the document. Further, downloading the document and opening it with desktop programs, such as Adobe, has been found to cause errors when copying and using the scripts provided for data updates. These errors do not occur when viewed through a browser.

Pre-Installation Checklist

The following items are highly recommended to be completed prior to commencing the installation and configuration of packages within this release.

Configuration Item / Task		Requirement?
New Component Review		
☐	Remove / rename duplicate objects	Optional
☐	Remove / rename duplicate record types	Optional
☐	Remove / rename duplicate fields	Optional

Installation and Configuration Checklist

The following items must be completed in the listed order to install and configure the packages within this release.

Configuration Item / Task		Requirement?
Package Installation		 
☐	Install 2cloudnine Payroll v1.173.1	Compulsory
☐	Install 2cloudnine Payroll Time2Pay Extension v1.123	Compulsory
☐	Install 2cloudnine Payroll Communities / Experience Extension v1.48	Compulsory
☐	2cloudnine Payroll Australia Extension v1.63	Compulsory
☐	2cloudnine Payroll Data Creation Extension v1.42	Compulsory
Abide by the new 2022/2023 Pay As You Go Tax Tables		 
☐	Complete the Setup Payroll Process	Compulsory
Updates to the 2022/2023 Lump Sum D and ETP Rates		 
☐	Configuration steps for Abide by the new 2022/2023 Pay As You Go Tax Tables	Compulsory

Configuration Item / Task		Requirement?
Adhere to the 2022/2023 Superannuation Changes		EOFY New
☐	Configuration steps for Abide by the new 2022/2023 Pay As You Go Tax Tables	Compulsory
2023 Public Holiday Available Via Bulk Data Creation		New
☐	Configuration steps for Abide by the new 2022/2023 Pay As You Go Tax Tables	Compulsory
Timesheet Interpretation and the Ability to Define Sleepovers		New
☐	Update Profile / Permission Sets	Compulsory
☐	Create a new picklist value for field(s)	Compulsory
☐	Update page layouts for new field(s)	Optional
☐	Update new field(s) on existing records	Optional
Introduction of Interpretation Rules Frequency Pay Code Caps		New
☐	Update new field(s) on existing records	Optional
The Ability to Define Interpretation Allowances For Payment During Leave		
☐	Update Profile / Permission Sets	Compulsory
☐	Update new field(s) on existing records	Optional
Define Interpretation Allowances For Payment Using Timesheet Activities		New
☐	Update Profile / Permission Sets	Compulsory
☐	Update page layouts for new field(s)	Optional
☐	Update new field(s) on existing records	Optional
Update to the Minimum Paid Hours When Variations Apply		New
☐	Update new field(s) on existing records	Optional

Configuration Item / Task		Requirement?
Enhancement to When Minimum Rest is Applied		New
☐	Update Profile / Permission Sets	Compulsory
☐	Update page layouts for new field(s)	Optional
☐	Update new field(s) on existing records	Optional
Enhancements to the Spilt / Broken Shifts Logic		
☐	Update profile / permission sets	Compulsory
☐	Update page layouts for new field(s) and action(s)	Optional
☐	Update new field(s) on existing records	Compulsory
Control When Broken Shift Logic Will Apply		New
☐	Update profile / permission sets	Compulsory
☐	Update page layouts for new field(s) and action(s)	Optional
☐	Update new field(s) on existing records	Optional
Save Time with the Update Rate Manager		
☐	Update page layouts for new action(s)	Optional
☐	Update list views for new button(s)	Optional
☐	Update the Time2Pay Update Rates Settings custom setting	Optional
Provide Enhancements to Rate Calculator (Beta*)		
☐	Update profile / permission sets	Optional
☐	Update page layouts for new field(s) and action(s)	Optional
☐	Update the Time2Pay Rate Calculator Configurator custom setting	Optional
Automation of Template Group Population on Assignments		
☐	Update the Time2Pay Ext Main Settings custom setting	Optional
☐	Update existing records	Optional

Configuration Item / Task		Requirement?
Define Overtime Pay Codes for Minimum Rest and Break Loading		
☐	Update profile / permission sets	Optional
☐	Update page layouts for new field(s)	Optional
☐	Update new field(s) on existing records	Optional
Improved Timesheet Interpretation for Allowances		
☐	Update profile / permission sets	Optional
☐	Update page layouts for new field(s)	Optional
☐	Create a new picklist value for field(s)	Optional
☐	Update new field(s) on existing records	Optional
Define Penalty Time Bands in Hourly Rates Timesheet Interpretation		
☐	Update profile / permission sets	Optional
☐	Update page layouts for new field(s)	Optional
☐	Create a new picklist value for field(s)	Optional
☐	Update new field(s) on existing records	Optional
Improved Superannuation Deduction Capability		
☐	Create a new picklist value for field(s)	Optional
Override Superannuation Minimum Age Requirements		
☐	Update profile / permission sets	Optional
☐	Update page layouts for new field(s)	Optional
☐	Update new field(s) on existing records	Optional
Customise What is Displayed on Pay Advice Documents		
☐	Update profile / permission sets	Optional
☐	Update page layouts for new field(s)	Optional
☐	Update new field(s) on existing records	Optional

Configuration Item / Task		Requirement?
Validating Leave Availability When Creating Payee Leave		
☐	Update profile / permission sets	Optional
☐	Update page layouts for new field(s)	Optional
☐	Update new field(s) on existing records	Optional
New Deduction Record Page Layouts		
☐	Assign page layouts to relevant record types	Optional
☐	Update picklist value available based on record types	Optional
Automated Back Pay (Pilot Program*)		
☐	Instructions for signing up to pilot program	Optional

Installation Links

The installation of the following packages must be completed as part of the Bottlebrush '21 release upgrade.

Package	Version	Install Link
2cloudnine Payroll	1.173.1 	https://login.salesforce.com/packaging/installPackage.apexp?p0=04t6F0000049A70
2cloudnine Payroll Time2Pay Extension	1.123 	https://login.salesforce.com/packaging/installPackage.apexp?p0=04t0o000002ZWts
2cloudnine Payroll Communities / Experience Extension	1.48	https://login.salesforce.com/packaging/installPackage.apexp?p0=04t2v000007XA83
2cloudnine Payroll Australia Extension	v1.63	https://login.salesforce.com/packaging/installPackage.apexp?p0=04t6F000004HDFe&isdtp=p1
2cloudnine Payroll Data Creation Extension	V1.42 	https://login.salesforce.com/packaging/installPackage.apexp?p0=04t2w0000091WCf

Pre-Installation Items

New Component Review

Update

The Bottlebrush '21 release contains a number of new components including Objects, Fields and Buttons. A review of the list of components introduced should be conducted to check for Salesforce limits and duplicates of existing custom components.

Please note for the Bottlebrush release, there have been new lookup fields introduced on multiple objects. Full details for the lookup fields included can be found in [Appendix 1](#), however, the below table provides a per object summary.

Object	Number Of New Lookup Fields
Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c)	3
Rate Calculator (tc9_et__Rate_Calculator__c)	3

Upon review of the lookups that already exist on this object in your organisation, if you find that you are going to exceed Salesforce limits, we suggest logging a case with Salesforce to have your organisation's limit increased.

In some instances, where duplicates exist, the installation / upgrade of the package will not be permitted. In these instances, the duplicates must be removed prior to attempting to install it. This could be completed through either deleting the custom component or, where possible, renaming the Name / API Name of the component.

In other instances, the package installation / upgrade will be permitted, however, the duplicates could cause user confusion and/or custom automation clashes within the org. In these instances, although it is optional, it is highly recommended to delete / rename the component.

When deleting a component, Salesforce does not permanently delete them for 15 days so although they are deleted for the user, they do still exist within the organisation. To remove the component completely, from the Object > Fields & Relationships screen, click the Deleted Fields button. The fields that have been deleted but not permanently removed will be detailed. From there they can be permanently removed by clicking on the Erase link next to the relevant field name.

A list of all the new components that should be reviewed are outlined in [Appendix 1](#)

Configuration Items

EOFY

Abide by the new 2022/2023 Pay As You Go Tax Tables

New

The update which allows users to pay PAYG employees based on the 2022/2023 tax rates is compulsory and all of the below configuration steps must be completed.

Configuration steps:

1. Complete the Setup Payroll Process (Compulsory)

Complete the Setup Payroll Process (Compulsory)

Note: This configuration also completes the configuration for the [Updates to the 2022/2023 Lump Sum D and ETP Rates](#), [Adhere to the 2022/2023 Superannuation Changes](#) and [2023 Public Holiday Available Via Bulk Data Creation](#) sections below.

1. Go to App Launcher 
2. Select the Setup Payroll item.

Based on whether the Setup Payroll Process has been completed previously, it will walk you through what needs to be done.

- o if the Setup Payroll Process has already been run in the Org, you'll be taken directly to the appropriate page for performing the update required.
 - o If the Setup Payroll Process has not previously been run in the org, it will start the whole process and the new updates will be included along with the other records created.
3. Follow the online instructions to complete the Setup Payroll Process.
 4. Once this is done, the process is complete and provides you with a summary of the changes made. Make sure 'Withholding Rules July 2022' and 'Public Holidays (2023)' are both in the included list. If they are not included, run the Setup Payroll Process again.

EOFY

Updates to the 2022/2023 Lump Sum D and ETP Rates

New

The update which allows users to access the 2022/2023 Lump Sum D and ETP rates is compulsory, however, the configuration steps that need to be completed are grouped together with the configuration steps for [Abide by the new 2022/2023 Pay As You Go Tax Tables](#). After you have completed the configuration outlined in the above section, this item is also complete.

EOFY

Adhere to the 2022/2023 Superannuation Changes

New

The update which allows users to adhere to the 2022/2023 Superannuation changes to the SGC rate and threshold amounts is compulsory however, the configuration steps that need to be completed are grouped together with the configuration steps for [Abide by the new 2022/2023 Pay As You Go Tax Tables](#). After you have completed the configuration outlined in the above section, this item is also complete.

EOFY

2023 Public Holiday Available Via Bulk Data Creation

New

The update which allows users to install the 2023 Public Holidays is compulsory, however, the configuration steps that need to be completed are grouped together with the configuration steps for [Abide by the new 2022/2023 Pay As You Go Tax Tables](#). After you have completed the configuration outlined in the above section, this item is also complete.

Timesheet Interpretation and the Ability to Define Sleepovers

The update which allows users to define Sleepover rules directly in the Interpretation Rule instead of using Variations is compulsory and all the below configuration steps marked as compulsory must be completed. The configuration steps marked as optional only need to be completed if the option to use the functionality is taken.

Configuration steps:

1. Update profile / permission sets (Compulsory)
2. Create a new picklist value for field(s) (Compulsory)
3. Update page layouts for new field(s) (Optional)
4. Update new field(s) on existing records (Optional)

Update Profile / Permission Sets (Compulsory)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 2](#) must be made available for use either via profiles or custom permission sets.

Create a New Picklist Value for Field(s) (Compulsory)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Objects and Fields > Picklist Value Sets
2. Select Interpretation Breakpoint Type (tc9_et.Interpretation_Breakpoint_Type)
3. Click the New button in the Values section
4. On the displayed page, add the new values
 - o Sleepover
 - o Allowance/Leave Junction *
 - o Allowance/Timesheet Activity Junction *
 - o Broken Shift Standard Hours *
5. Ensure the "Add new picklist value sets to all record types that use this global value set" checkbox is NOT checked
6. Click Save
7. Go to Setup > Object Manager
8. Select Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c) > Record Types
9. Click on the Sleepover Record Type
10. In the Picklist Available for Editing section, locate the Breakpoint Type picklist and select edit
11. Move the Sleepover value onto the Selected Values list
12. Click Save

13. Return to the Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c) > Record Types
14. Click on the Interpretation Breakpoint Junction Record Type
15. In the Picklist Available for Editing section, locate the Breakpoint Type picklist and select edit
16. Move the Allowance/Leave Junction and Allowance/Timesheet Activity Junction values onto the Selected Values list
17. Click Save

18. Return to the Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c) > Record Types
19. Click on the Split/Broken Shift Record Type
20. In the Picklist Available for Editing section, locate the Breakpoint Type picklist and select edit
21. Move the Broken Shift Standard Hours value onto the Selected Values list
22. Click Save

23. Return to the Object Manager
24. Select Project Code (tc9_pr_Project_Code __c) > Record Types
25. Click on the Timesheet Activity - Assignment Level Record Type
26. In the Picklist Available for Editing section, locate the Interpretation Breakpoint Type picklist and select edit
27. Move the Sleepover value onto the Selected Values list
28. Click Save

29. Return to the Project Code (tc9_pr_Project_Code __c) > Record Types
30. Click on the Timesheet Activity - Client Level Record Type
31. In the Picklist Available for Editing section, locate the Interpretation Breakpoint Type picklist and select edit
32. Move the Sleepover value onto the Selected Values list
33. Click Save

34. Return to the Project Code (tc9_pr_Project_Code __c) > Record Types
35. Click on the Timesheet Activity - Template Level Record Type
36. In the Picklist Available for Editing section, locate the Interpretation Breakpoint Type picklist and select edit
37. Move the Sleepover value onto the Selected Values list
38. Click Save

* To save configuration time, the Interpretation Breakpoint Type global picklist has been set for all items requiring a change.

The Allowance/Leave Junction value is the [The Ability to Define Interpretation Allowances For Payment During Leave](#) item.

The Allowance/Timesheet Activity Junction value is the [Define Interpretation Allowances For Payment Using Timesheet Activities](#) item.

The Broken Shift Standard Hours value is the [Enhancements to the Split / Broken Shifts Logic](#) item.

Update Page Layouts for New Field(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Interpretation Rule (tc9_et__Interpretation_Rule__c) > Page Layouts
3. Select any page layout that is used for the Interpretation Rule object excluding those used for the Daily Rates and Interpretation Variation Rules record types*
4. Add the following field(s) to the layout
 - o Apply Sleepover Interpretation? (tc9_et__Apply_Sleepover_Interpretation__c)
 - o Sleepover Breakpoint Application (tc9_et__Sleepover_Breakpoint_Application__c)
 - o Sleepover Minimum Rest Hours (tc9_et__Sleepover_Minimum_Rest_Hours__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Interpretation Rule object excluding those used for the Daily Rates and Interpretation Variation Rules record types

* Page layouts used by external users, such as those used for Employee Experience (Communities) and Approver (Communities) do not need to be included in the above update. If a change to one of these layouts is required, it will be listed as a separate configuration item.

Update New Field(s) on Existing Records (Optional)

To utilise the update which allows users to define Sleepover rules directly in the Interpretation Rule instead of using Variations for existing Interpretation Rules, they will need to be updated, via the Interpretation Builder, to provide the Sleepovers setting.

Introduction of Interpretation Rules Frequency Pay Code Caps

New

The update for users to set Frequency Pay Code Caps through the Interpretation Rules is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped.

Configuration steps:

1. Update new field(s) on existing records (Optional)

Update New Field(s) on Existing Records (Optional)

To utilise the update for users to set Frequency Pay Code Caps through the existing Interpretation Rules, they will need to be updated, via the Interpretation Builder, to provide the Frequency Pay Code Caps information.

The Ability to Define Interpretation Allowances For Payment During Leave

The update to allow users the ability to define Interpretation Allowances for payment during Leave is compulsory and all the below configuration steps marked as compulsory must be completed. The configuration steps marked as optional only need to be completed if the option to use the functionality is taken.

Configuration steps:

1. Update profile / permission sets (Compulsory)
2. Update new field(s) on existing records (Optional)

Note: The configuration of the Interpretation Breakpoint Type global picklist, which is also required for this item, has been outlined on the [Timesheet Interpretation and the Ability to Define Sleepovers](#) item - Create a New Picklist Value for Field(s) task. This task must also be completed.

Update Profile / Permission Sets (Compulsory)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 3](#) must be made available for use either via profiles or custom permission sets.

Update New Field(s) on Existing Records (Optional)

To utilise the update to allow users the ability to define Interpretation Allowances for payment during Leave for existing Interpretation Rules, they will need to be updated, via the Interpretation Builder, to provide the Allowance Rules and the Leave Breakpoints (if they haven't already been defined). Then use the Allowance Junction Rules Allowance/Leave Junction tab to form a connection between the Allowance and the Leave Breakpoint.

Define Interpretation Allowances For Payment Using Timesheet Activities

The update which allows users to define Interpretation Allowances for payment using Timesheet Activities is compulsory and all the below configuration steps marked as compulsory must be completed. The configuration steps marked as optional only need to be completed if the option to use the functionality is taken.

Configuration steps:

1. Update profile / permission sets (Compulsory)
2. Update new field(s) on existing records (Optional)

Note: The configuration of the Interpretation Breakpoint Type global picklist which is also required for this item, has been outlined on the [Timesheet Interpretation and the Ability to Define Sleepovers](#) item - Create a New Picklist Value for Field(s) task. This task must also be completed.

Update Profile / Permission Sets (Compulsory)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation (ie. a different or custom profile or permission set is used), the access outlined in [Appendix 4](#) must be made available for use either via profiles or custom permission sets.

Update New Field(s) on Existing Records (Optional)

To utilise the update which allows users to define Interpretation Allowances for payment using Timesheet Activities for existing Interpretation Rules, they will need to be updated, via the Interpretation Builder, to provide the Allowance Rules (if they haven't already been defined). Then use the Allowance Junction Rules Allowance/Timesheet Activity Junction tab to form a connection between the Allowance and the Timesheet Activity Types.

Update to the Minimum Paid Hours When Variations Apply

New

The update to Time Interpretation functionality so that when a Variation applies, it will always use the Minimum Paid Hours value on the Variation instead of the Interpretation Rule will apply on installation of the latest Bottlebrush packages. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped.

Configuration steps:

1. Check existing records (Optional)

Check Existing Records (Optional)

It is recommended that any existing Variations are checked to make sure the Minimum Paid Hours defined is correct to prevent there being an issue when Timesheet Interpretation occurs.

Enhancement to When Minimum Rest is Applied

New

The update to provide improvements to the Minimum Rest logic in the Time Interpretation functionality is compulsory and all the below configuration steps marked as compulsory must be completed. The configuration steps marked as optional only need to be completed if the option to use the functionality is taken.

Configuration steps:

1. Update profile / permission sets (Compulsory)
2. Update page layouts for new field(s) (Optional)
3. Update new field(s) on existing records (Optional)

Update Profile / Permission Sets (Compulsory)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 5](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Field(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Interpretation Rule (tc9_et__Interpretation_Rule__c) > Page Layouts
3. Select any page layout that is used for the Interpretation Rule object excluding those used for the Daily Rates and Interpretation Variation Rules record types*
4. Add the following field(s) to the layout
 - Apply Minimum Rest on Overtime
(tc9_et__tc9_et__Apply_Minimum_Rest_on_Overtime__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Interpretation Rule object excluding those used for the Daily Rates and Interpretation Variation Rules record types

Update New Field(s) on Existing Records (Optional)

To utilise the update to provide improvements to the Minimum Rest logic for existing Interpretation Rules, they will need to be updated, via the Interpretation Builder, to provide the Apply Minimum Rest on Overtime setting.

Enhancements to the Spilt / Broken Shifts Logic

New

The update to provide improved Timesheet Interpretation logic is compulsory and all the below configuration steps marked as compulsory must be completed. The configuration steps marked as optional only need to be completed if the option to use the functionality is taken.

Configuration steps:

1. Update profile / permission sets (Compulsory)
2. Update page layouts for new field(s) (Optional)
3. Update new field(s) on existing records (Compulsory)

Note: The configuration of the Interpretation Breakpoint Type global picklist which is also required for this item, has been outlined on the [Timesheet Interpretation and the Ability to Define Sleepovers](#) item - Create a New Picklist Value for Field(s) task. This task must also be completed.

Update Profile / Permission Sets (Compulsory)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 6](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Field(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Interpretation Rule (tc9_et__Interpretation_Rule__c) > Page Layouts
3. Select any page layout that is used for the Interpretation Rule object excluding those used for the Daily Rates and Interpretation Variation Rules record types*
4. Add the following field(s) to the layout:
 - Broken Shift Breakpoint Application (tc9_et__Broken_Shift_Breakpoint_Application__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Interpretation Rule object excluding those used for the Daily Rates and Interpretation Variation Rules record types

Update New Field(s) on Existing Records (Compulsory)

It is essential to the continued use of existing Interpretation Rules that the Broken Shift Breakpoint Application field is populated. It is recommended that you run the below script to populate the picklist field with the Standard Interpretation value. This will ensure the current logic continues to apply when performing Time Interpretation.

Once the script has completed running, any Interpretation Rules that require a different value of the Broken Shift Breakpoint Application field than the Standard Interpretation, will need to be updated via the Interpretation Builders.

Alternatively, you can choose not to run the script and instead, update the field on an individual basis through the Interpretation Builder.

To update the field, the following steps should be followed:

1. Run Script 1 defined below through the Developer Console Execute Anonymous Window to automatically update the Broken Shift Breakpoint Application field on the Interpretation Rule to be set the Standard Interpretation

Script 1

```
//Payroll post-install script for Bottlebrush Release - Interpretation Rule - Broken Shift Breakpoint Application

List<tc9_et__Interpretation_Rule__c> interpretationrules = [Select Id,
tc9_et__Broken_Shift_Breakpoint_Application__c from tc9_et__Interpretation_Rule__c Where
tc9_et__Broken_Shift_Breakpoint_Application__c = null];

for(tc9_et__Interpretation_Rule__c Interpretationrule : interpretationrules){

String theValue = 'Standard Interpretation';

Interpretationrule.tc9_et__Broken_Shift_Breakpoint_Application__c = theValue;

}

update interpretationrules;
```

Control When Broken Shift Logic Will Apply

New

The update to provide user control when Split / Broken Shift logic will apply through Timesheet Activities is compulsory and all the below configuration steps marked as compulsory must be completed. The configuration steps marked as optional only need to be completed if the option to use the functionality is taken.

Configuration steps:

1. Update profile / permission sets (Compulsory)
2. Update page layouts for new field(s) (Optional)
3. Update new field(s) on existing records (Optional)

Update Profile / Permission Sets (Compulsory)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 7](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Field(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Interpretation Rule (tc9_et__Interpretation_Rule__c) > Page Layouts
3. Select any page layout that is used for the Interpretation Rule object excluding those used for the Daily Rates and Interpretation Variation Rules record types*
4. Add the following field(s) to the layout
 - o Broken Shift Timesheet Activity Required (tc9_et__Broken_Shift_Timesheet_Activity_Required__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Interpretation Rule object excluding those used for the Daily Rates and Interpretation Variation Rules record types

Update New Field(s) on Existing Records (Optional)

To utilise the update to provide user control when Split / Broken Shift logic will apply through Timesheet Activities for existing Interpretation Rules, they will need to be updated, via the Interpretation Builder, to provide the Broken Shift Timesheet Activity Required setting.

Save Time with the Update Rate Manager

The below configuration steps should be completed if the functionality is required:

1. Update page layouts for new action(s) (Optional)
2. Update list views for new button(s) (Optional)
3. Update the Time2Pay Update Rates Settings custom setting (Optional)

Update Page Layouts for New Action(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Minimum Pay Rate (tc9_et__Minimum_Pay_Rate__c) > Page Layouts
3. Select any page layout that is used for the Minimum Pay Rate object*
4. Add the following Action (under the Mobile & Lightning Action options) to the layout
 - o Update Rates (tc9_et.Update_Rates)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Assignment Rate or Payee Timesheet Allowance record types
7. Return to the Object Manager
8. Select Template Group (tc9_pr__Template_Group__c) > Page Layouts
9. Select any page layout that is used for the Assignment Rate or Payee Timesheet Allowance record types*
10. Add the following Action (under the Mobile & Lightning Action options) to the layout
 - o Update Rates (tc9_et.Update_Rates)
11. Click Save
12. Repeat steps 9 to 11 for all page layouts that are used for the Assignment Rate or Payee Timesheet Allowance record types

*Page layouts used by external users, such as those used for Employee Experience (Communities) and Approver (Communities) do not need to be included in the above update. If a change to one of these layouts is required, it will be listed as a separate configuration item.

Update List Views for New Button(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Minimum Pay Rate (tc9_et__Minimum_Pay_Rate__c) > Search Layouts
3. Select the Edit option next to the Default Layout value
4. In the Custom Buttons section, move the Update Rates button to the Selected Buttons list
5. Click Save
6. Select Minimum Pay Rate (tc9_et__Minimum_Pay_Rate__c) > Search Layouts for Salesforce Classic
7. Select the Edit option next to the List View layout
8. In the Custom Buttons section, move the Update Rates button to the Selected Buttons list
9. Click Save
10. Return to the Object Manager
11. Select Template Group (tc9_pr__Template_Group__c) > Search Layouts
12. Select the Edit option next to the Default Layout value
13. In the Custom Buttons section, move the Update Rates button to the Selected Buttons list
14. Click Save
15. Select Template Group (tc9_pr__Template_Group__c) > Search Layouts for Salesforce Classic
16. Select the Edit option next to the List View layout
17. In the Custom Buttons section, move the Update Rates button to the Selected Buttons list
18. Click Save

Update the Time2Pay Update Rates Settings Custom Setting (Optional)

This requirement only needs to be completed if the option to lock and disable the Invoice Rates fields so users cannot edit them via the Update Rates functionality is taken. If not, this item can be skipped.

1. Go to Setup > Custom Setting
2. Locate the Time2Pay Update Rates Settings custom setting (tc9_et__Time2Pay_Update_Rates_Setting__c) and click on the Manage link alongside it
3. Click the Edit button
4. Check (tick) the Disable Invoice Rates (tc9_et__Disable_Invoice_Rates__c) checkbox
5. Click Save

Provide Enhancements to Rate Calculator (Beta*)

The Rate Calculator functionality is optional and is a beta version. Further updates and improvements will be included in future releases. These configuration requirements only need to be completed if the option to use the beta functionality is taken. If not, these items can be skipped. An updated version of these configuration steps will be included in the next release for those who wish to wait for the non-beta version.

The below configuration steps should be completed if opting to trial the beta version:

1. Update profile / permission sets (Optional)
2. Update page layouts for new field(s) and action(s) (Optional)
3. Update the Time2Pay Rate Calculator Configurator custom setting (Optional)

Update Profile / Permission Sets (Optional)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 8](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Field(s) and Action(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Rate Calculator (tc9_et__Rate_Calculator__c) > Page Layouts
3. Select any page layout that is used for the Employee Specific or No Employee record types*
4. Add the following field(s) to the layout
 - o Account (tc9_et__Account__c)
 - o Assignments Require Industry? (tc9_et__Assignments_Require_Industry__c)
 - o Assignments Require Location? (tc9_et__Assignments_Require_Location__c)
 - o Assignments Require Risk Classification? (tc9_et__Assignments_Require_Risk_Classification__c)
 - o Award Classification (tc9_et__Award_Classification__c)
 - o Award Level (tc9_et__Award_Level__c)
 - o Previous Assignment Award Classification (tc9_et__Previous_Assignment_Award_Classification__c)
 - o Previous Assignment Award Level (tc9_et__Previous_Assignment_Award_Level__c)
 - o Previous Assignment Industry (tc9_et__Previous_Assignment_Industry__c)
 - o Previous Assignment Location (tc9_et__Previous_Assignment_Location__c)
 - o Previous Assignment Rate Calculator ID (tc9_et__Previous_Assignment_RC_Id__c)
 - o Previous Assignment Risk Classification (tc9_et__Previous_Assignment_Risk_Classification__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Employee Specific or No Employee record types.
7. Go to Setup > Object Manager
8. Select Rate Calculator Rate (tc9_et__Rate_Calculator_Rate__c) > Page Layouts
9. Select any page layout that is used for the Employee Specific or No Employee record types*
10. Add the following field(s) to the layout
 - o Minimum Pay Rate ID (tc9_et__Minimum_Pay_Rate_ID__c)
 - o Primary Rate Calculator Rate (tc9_et__Primary_Rate_Calculator_Rate__c)
11. Click Save
12. Repeat steps 9 to 11 for all page layouts that are used for the Employee Specific or No Employee record types
13. Return to the Object Manager
14. Select Mark Up / Margin Rate Record (tc9_et__Mark_Up_Margin_Rate_Record__c) > Page Layouts
15. Select any page layout that is used for the Employee Specific or No Employee record types*
16. Add the following field(s) to the layout
 - o Primary Margin/Markup Rate (tc9_et__Primary_Margin_Markup_Rate__c)
17. Click Save
18. Repeat steps 15 to 17 for all page layouts that are used for the Employee Specific or No Employee record types

19. Return to the Object Manager
20. Select Assignment (tc9_pr__Assignment__c) > Page Layouts
21. Select any page layout that is used for the Temp record type*
22. Add the following Action (under the Mobile & Lightning Action options) to the layout
 - Apply New Rate Calculator (tc9_et.Apply_New_Rate_Calculator)
23. Click Save
24. Repeat steps 21 to 23 for all page layouts that are used for the Temp record type

25. Return to the Object Manager
26. Select Account (Account) > Page Layouts
27. Select any page layout that is used for the Client record type*
28. Add the following field(s) to the layout
 - Exclude Global Rate Calc Templates? (tc9_et__Exclude_Global_Rate_Calc_Templates__c)
29. Click Save
30. Repeat steps 27 to 29 for all page layouts that are used for the Client record type

*Page layouts used by external users, such as those used for Employee Experience (Communities) and Approver (Communities) do not need to be included in the above update. If a change to one of these layouts is required, it will be listed as a separate configuration item.

Update the Time2Pay Rate Calculator Configurator Custom Setting (Optional)

This requirement only needs to be completed if the option to incorporate Award Classification and Award Level information into the Rate Calculator is taken. If not, this item can be skipped.

1. Go to Setup > Custom Setting
2. Locate the Time2Pay Rate Calculator Configurator custom setting (tc9_et__Rate_Calculator_Configurator__c) and click on the Manage link alongside it
3. Click the Edit button
4. Check (tick) the Enable Award Classification and Levels (tc9_et__Enable_Award_Classification_and_Levels__c) checkbox
5. Click Save

Automation of Template Group Population on Assignments

The functionality to automatically assess and, where appropriate, populate the Assignment Rate and/or Payee Timesheet Allowance Template Group fields on the Assignment is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped.

The below configuration steps should be completed if the functionality is required:

1. Update the Time2Pay Ext Main Settings custom setting (Optional)
2. Update existing records (Optional)

Update the Time2Pay Ext Main Settings Custom Setting (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Custom Setting
6. Locate the Time2Pay Ext Main Settings custom setting (tc9_et__T2Pext_mainSettings__c) and click on the Manage link alongside it
7. Click the Edit button
8. Check (tick) the Default Template Groups MPR (tc9_et__Default_Template_Groups_MPR__c) checkbox
9. Click Save

Update Existing Records (Optional)

When in use, this functionality will determine the Assignment Rate and/or Payee Timesheet Allowance Template Group records that need to be populated onto the Assignment based on them having exactly the same name as the Interpretation Rule that is also allocated to the Assignment. For example, if the Interpretation Rule allocated to the Assignment is 'Rule ABC', the system will determine if there are any Assignment Rate or Payee Timesheet Allowance Template Group which also have the name 'Rule ABC'. If there are, these records will be populated into the relevant lookup fields on the Assignment. To ensure this functionality will be able to match records, the names of existing Interpretation Rules, Assignment Rate and Payee Timesheet Allowance Template Group will need to be updated so their names align.

Define Overtime Pay Codes for Minimum Rest and Break Loading

The functionality to allow improved interpretation logic for minimum rest and break loading overtime is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped.

The below configuration steps should be completed if the functionality is required:

1. Update profile / permission sets (Optional)
2. Update page layouts for new field(s) (Optional)
3. Update new field(s) on existing records (Optional)

Update Profile / Permission Sets (Optional)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

To use this optional functionality, if the packaged permission sets are not used within the organisation, the access outlined in [Appendix 9](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Field(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

7. Go to Setup > Object Manager
8. Select Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c) > Page Layouts
9. Select any page layout that is used for the Interpretation Breakpoint object excluding those used for the Allowance Breakpoint and Pay Code Cap record types*
10. Add the following field(s) to the layout
 - Overtime Pay Code (tc9_et__Overtime_Pay_Code__c)
11. Click Save
12. Repeat steps 3 to 5 for all page layouts that are used for the Interpretation Breakpoint object excluding those used for the Allowance Breakpoint and Pay Code Cap record types

*Page layouts used by external users, such as those used for Employee Experience (Communities) and Approver (Communities) do not need to be included in the above update. If a change to one of these layouts is required, it will be listed as a separate configuration item.

Update New Field(s) on Existing Records (Optional)

To utilise the improved timesheet interpretation functionality for minimum rest and break loading overtime, any existing Interpretation Rules that the new improvements will apply to will need to be updated, via the Interpretation Builder, to provide the necessary overtime breakpoint information.

Improved Timesheet Interpretation for Allowances

The functionality to allow improved interpretation logic for Interpretation Rule defined Allowances is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped.

The below configuration steps should be completed if the functionality is required:

1. Update profile / permission sets (Optional)
2. Update page layouts for new field(s) (Optional)
3. Create a new picklist value for field(s) (Optional)
4. Update new field(s) on existing records (Optional)

Update Profile / Permission Sets (Optional)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

To use this optional functionality, if the packaged permission sets are not used within the organisation, the access outlined in [Appendix 10](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Field(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Timesheet Entry (tc9_et__Timesheet_Entry) > Page Layouts
3. Select any page layout that is used for the Timesheet Entry object*
4. Add the following field(s) to the layout
 - o Weekly Number (tc9_et__Weekly_Number__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Timesheet Entry object

*Page layouts used by external users, such as those used for Employee Experience (Communities) and Approver (Communities) do not need to be included in the above update. If a change to one of these layouts is required, it will be listed as a separate configuration item.

Create a New Picklist Value for Field(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

19. Go to Setup > Objects and Fields > Picklist Value Sets
20. Select Interpretation Breakpoint Type (tc9_et.Interpretation_Breakpoint_Type)
21. Click the New button in the Values section
22. On the displayed page, add the new value 'Weekly Allowance'
23. Ensure the "Add new picklist value sets to all record types that use this global value set" checkbox is NOT checked
24. Click Save
25. Go to Setup > Object Manager
26. Select Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c) > Record Types
27. Click on the Allowance Breakpoint Record Type
28. In the Picklist Available for Editing section, locate the Breakpoint Type picklist and select edit
29. Move the Weekly Allowance value onto the Selected Values list
30. Click Save

Update New Field(s) on Existing Records (Optional)

To utilise the new weekly allowance functionality for existing Interpretation Rules, they will need to be updated, via the Interpretation Builder, to provide the required weekly allowance breakpoint information.

Define Penalty Time Bands in Hourly Rates Timesheet Interpretation

The functionality to define penalty time bands in hourly rate timesheet interpretation is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped.

The below configuration steps should be completed if the functionality is required:

1. Update profile / permission sets (Optional)
2. Update page layouts for new field(s) (Optional)
3. Create a new picklist value for field(s) (Compulsory)
4. Update new field(s) on existing records (Optional)

Update Profile / Permission Sets (Optional)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

To use this optional functionality, if the packaged permission sets are not used within the organisation, the access outlined in [Appendix 1](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Field(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c) > Page Layouts
3. Select any page layout that is used for the Interpretation Breakpoint object excluding those used for the Allowance Breakpoint and Pay Code Cap record types*
4. Add the following field(s) to the layout
 - o Overtime Breakpoint (tc9_et__Overtime_Breakpoint__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Interpretation Breakpoint object excluding those used for the Allowance Breakpoint and Pay Code Cap record types

*Page layouts used by external users, such as those used for Employee Experience (Communities) and Approver (Communities) do not need to be included in the above update. If a change to one of these layouts is required, it will be listed as a separate configuration item.

Create a New Picklist Value for Field(s) (Compulsory)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Objects and Fields > Picklist Value Sets
2. Select Interpretation Type Picklists (tc9_et.Interpretation_Type_Picklists)
3. Click the New button in the Values section
4. On the displayed page, add the new value 'Standard Time with Time of Day Breakpoints'
5. Ensure the "Add new picklist value sets to all record types that use this global value set" checkbox is NOT checked
6. Click Save
7. Go to Setup > Object Manager
8. Select Interpretation Rule (tc9_et__Interpretation_Rule__c) > Record Types
9. Click on the Hourly Rate (tc9_et.Hourly_Rates) Record Type
10. In the Picklist Available for Editing section, locate the Friday Interpretation Type picklist and select edit
11. Move the Standard Time with Time of Day Breakpoints value onto the Selected Values list
12. Click Save
13. Repeat steps 11 - 12 for the following picklists
 - o Monday Interpretation Type
 - o Public Holiday Interpretation Type
 - o Saturday Interpretation Type
 - o Sunday Interpretation Type
 - o Thursday Interpretation Type
 - o Tuesday Interpretation Type
 - o Wednesday Interpretation Type
 - o Weekday Interpretation Type

Update Field(s) on Existing Records (Optional)

To utilise the functionality to define penalty time bands for existing Interpretation Rules, they will need to be updated, via the Interpretation Builder, to provide the required time band information.

Improved Superannuation Deduction Capability

The functionality to allow employees the option to direct their deduction to a different fund other than where their employer contributions are made is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped.

The below configuration steps should be completed if the functionality is required:

1. Create a new picklist value for field(s) (Optional)

Create a New Picklist Value for Field(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Objects and Fields > Picklist Value Sets
2. Select Superannuation Types (tc9_eau.Superannuation_Types)
3. Click the New button in the Values section
4. On the displayed page, add the new value 'Alternative Fund'
5. Ensure the "Add new picklist value sets to all record types that use this global value set" checkbox is checked
6. Click Save

Override Superannuation Minimum Age Requirements

The functionality to allow users to override the minimum age requirements for when calculating Superannuation is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped.

The below configuration steps should be completed if the functionality is required:

1. Update profile / permission sets (Optional)
2. Update page layouts for new field(s) (Optional)
3. Update new field(s) on existing records (Optional)

Update Profile / Permission Sets (Optional)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

To use this optional functionality, if the packaged permission sets are not used within the organisation, the access outlined in [Appendix 12](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Field(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Payee Withholding (tc9_pr__Payee_Withholding__c) > Page Layouts
3. Select any page layout that is used for the AU SUPER record type*
4. Add the following field(s) to the layout
 - Override Minimum Age Requirement (tc9_pr__Override_Minimum_Age_Requirement__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the AU SUPER record type

*Page layouts used by external users, such as those used for Employee Experience (Communities) and Approver (Communities) do not need to be included in the above update. If a change to one of these layouts is required, it will be listed as a separate configuration item.

Update New Field(s) on Existing Records (Optional)

If there are any Payees that need to be included in the superannuation calculation that are under 18 years of age, their AU Super Payee Withholding record should be updated to have the Override Minimum Age Requirement field set to Yes. The minimum monthly earnings requirement of \$450 (unless this is also overridden) will still apply.

Customise What is Displayed on Pay Advice Documents

The functionality to hide blank sections and selected pay codes on a Pay Advice document is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped.

The below configuration steps should be completed if the functionality is required:

1. Update profile / permission sets (Optional)
2. Update page layouts for new field(s) (Optional)
3. Update new field(s) on existing records (Optional)

Update Profile / Permission Sets (Optional)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

To use this optional functionality, if the packaged permission sets are not used within the organisation, the access outlined in [Appendix 13](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Field(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Pay Advice Template (tc9_pr__Pay_Advice_Template__c) > Page Layouts
3. Select any page layout that is used for the Pay Advice Template object*
4. Add the following field(s) to the layout
 - Hide Blank Detail Sections (tc9_pr__Hide_Blank_Detail_Sections__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Pay Advice Template object

7. Return to the Object Manager
8. Select Pay Code (tc9_pr__Pay_Code__c) > Page Layouts
9. Select any page layout that is used for the Pay Code object*
10. Add the following field(s) to the layout
 - Exclude From Pay Advice (tc9_pr__Exclude_From_Pay_Advice__c)
11. Click Save
12. Repeat steps 9 to 11 for all page layouts that are used for the Pay Code object

13. Return to the Object Manager
14. Select Pay Advice Line (tc9_pr__Pay_Advice_Line__c) > Page Layouts
15. Select any page layout that is used for the Pay Advice Line object*
16. Add the following field(s) to the layout
 - Display Pay Code (tc9_pr__Display_Pay_Code__c)
17. Click Save
18. Repeat steps 15 to 17 for all page layouts that are used for the Pay Advice Line object

*Page layouts used by external users, such as those used for Employee Experience (Communities) and Approver (Communities) do not need to be included in the above update. If a change to one of these layouts is required, it will be listed as a separate configuration item.

Update New Field(s) on Existing Records (Optional)

If the option to hide blank sections is required for an existing Pay Advice Template, the relevant Pay Advice Template should be updated to have the Hide Blank Detail Sections field set as Yes.

Likewise, if there are any existing Pay Codes that should be hidden on Pay Advice documents, the relevant Pay Code record should be updated to have the Exclude From Pay Advice field set as Yes.

Note that historic Pay Advice records and their associate documents will not be updated. Changes will only apply to newly created Pay Advice records/documents.

Validating Leave Availability When Creating Payee Leave

The functionality to validate the leave balance of employees is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped.

The below configuration steps should be completed if the functionality is required:

1. Update profile / permission sets (Optional)
2. Update page layouts for new field(s) (Optional)
3. Update new field(s) on existing records (Optional)

Update Profile / Permission Sets (Optional)

The fields associated with this item have had read / edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

To use this optional functionality, if the packaged permission sets are not used within the organisation, the access outlined in [Appendix 14](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Field(s) (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Leave Rule (tc9_pr__Leave_Rule__c) > Page Layouts
3. Select any page layout that is used for the Leave Rule object*
4. Add the following field(s) to the layout
 - Validate Balance on Leave Takes (tc9_pr__Validate_Balance_on_Leave_Takes__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Leave Rule object
7. Return to the Object Manager
8. Select Payee Leave Event (tc9_pr__Payee_Leave_Event__c) > Page Layouts
9. Select any page layout that is used for the Leave Take record type*
10. Add the following field(s) to the layout
 - Override Leave Balance Validation (tc9_pr__Override_Leave_Balance_Validation__c)
11. Click Save
12. Repeat steps 9 to 11 for all page layouts that are used for the Leave Take record type

*Page layouts used by external users, such as those used for Employee Experience (Communities) and Approver (Communities) do not need to be included in the above update. If a change to one of these layouts is required, it will be listed as a separate configuration item.

Update New Field(s) on Existing Records (Optional)

If the option to validate leave balances on leave take creation/update is required for an existing Leave Rule, the relevant Leave Rule should be updated to have the Validate Balance on Leave Takes field set as Yes.

Likewise, if the validation is turned on for a Leave Rule and any of the existing related Payee Leave Events (Leave Take) need to be excluded from the validation, the relevant Payee Leave Event record should be updated to have the Override Leave Balance Validation field set to Yes.

Note: Where no configuration is applied, the product will continue to operate as it currently does and the leave balance of the applicable Payee Leave Rule will not be validated when a related Payee Leave Event is created.

New Deduction Record Page Layouts

The use of the new record type based page layouts for Payee Deduction records is optional. This requirement only needs to be completed if the option to use the layouts is taken. If not, these items can be skipped.

The below configuration steps should be completed if the functionality is required:

1. Assign page layouts to relevant record types (Optional)
2. Update picklist value available based on record types (Optional)

Assign Page Layouts To Relevant Record Types (Optional)

This requirement only needs to be completed if the option to use the record type based layouts is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Payee Deduction Record (tc9_pr__Payee_Deduction_Record__c) > Record Types
3. Click on the Page Layout Assignment button
4. Click the Edit Assignment button
5. Assign the layouts as follows*
 - Layout: TC9PR General Deduction Record Layout
Record Type:
 - Master
 - General Deductions Page Layout
 - Layout: TC9PR Purchased Leave Deduction Record Layout
Record Type:
 - Purchased Leave Deductions
 - Layout: TC9PR Withholding Deduction Record Layout
Record Type:
 - PAYG Deductions
 - Superannuation Deductions
6. Click Save

*These layouts are not intended for external users and care should be taken to ensure they are not assigned to external user profiles. Likewise, care should be taken to ensure that the layouts are assigned inline with your organisation's field level security requirements. These assignments are only suggested based on the assumption all internal users will use the same layouts.

In the event that the packaged versions of the page layouts are not used, but custom versions of the page layouts need to be updated instead, the below figures show samples of the packaged versions of the layouts so they can be replicated.

- Figure 1 - TC9PR General Deduction Record Layout
- Figure 2 - TC9PR Purchased Leave Deduction Record Layout
- Figure 3 - TC9PR Withholding Deduction Record Layout

Update Picklist Value Available Based On Record Types (Optional)

This requirement only needs to be completed if the option to use the record type based layouts is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Payee Deduction Record (tc9_pr__Payee_Deduction_Record__c) > Record Types
3. Click on the General Deductions (tc9_et.General_Deductions) Record Type
4. In the Picklist Available for Editing section, locate the Pay To Type picklist and select Edit
5. Ensure that only the Account value is listed in the Selected Values list
6. Ensure that there are no Default values assigned
7. Click Save

8. Return to the Record Types page
9. Click on the Purchased Leave Deductions (tc9_et.Purchased_Leave_Deductions) Record Type
10. In the Picklist Available for Editing section, locate the Pay To Type picklist and select Edit
11. Ensure that only the Account value is listed in the Selected Values list
12. Ensure that there are no Default values assigned
13. Click Save

14. Return to the Record Types page
15. Click on the PAYG Deductions (tc9_et.PAYG_Deductions) Record Type
16. In the Picklist Available for Editing section, locate the Pay To Type picklist and select Edit
17. Ensure that only the Payee Withholding value is listed in the Selected Values list
18. Ensure that the Payee Withholding value is set as the Default
19. Click Save

20. Return to the Record Types page
21. Click on the Superannuation Deductions (tc9_et.Superannuation_Deductions) Record Type
22. In the Picklist Available for Editing section, locate the Pay To Type picklist and select Edit
23. Ensure that only the Payee Withholding value is listed in the Selected Values list
24. Ensure that the Payee Withholding value is set as the Default
25. Click Save

Automated Back Pay (Pilot Program*)

Configuration instructions for the Automated Back Pay functionality will be released upon an organisations agreement to participate in the pilot program. If you would like your organisation to take part in the pilot program, and have resources available that can be dedicated to testing and providing feedback, please contact your Project Manager.

Appendix 1

Below is a list of new components included within the Bottlebrush '21 Release

Object Record Types

Object	Label	Name
New Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c)	Interpretation Breakpoint Junction	tc9_et.Interpreation_Breakpoint_Junction
New Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c)	Sleepover	tc9_et.Sleepover

Object Fields

Object	Label	Name	Type
Account (Account)	Exclude Global Rate Calc Templates?	tc9_et__Exclude_Global_Rate_Calc_Templa tes__c	Picklist
New Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c)	Additional Interpretation BP Details	tc9_et__Additional_Interpretation_BP_Det ails__c	Picklist
New Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c)	Allowance Type	tc9_et__Allowance_Type__c	Picklist
Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c)	Overtime Breakpoint	tc9_et__Overtime_Breakpoint__c	Picklist

Object	Label	Name	Type
Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c)	Overtime Pay Code	tc9_et__Overtime_Pay_Code__c	Lookup
New Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c)	Primary Interpretation Breakpoint	tc9_et__Primary_Interpretation_Breakpoint__c	Lookup
New Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c)	Secondary Interpretation Breakpoint	tc9_et__Secondary_Interpretation_Breakpoint__c	Lookup
New Interpretation Rule (tc9_et__Interpretation_Rule__c)	Apply Minimum Rest Interpretation?	tc9_et__Apply_Minimum_Rest_Interpretation__c	Picklist
New Interpretation Rule (tc9_et__Interpretation_Rule__c)	Apply Minimum Rest on Overtime	tc9_et__Apply_Minimum_Rest_on_Overtime__c	Picklist
New Interpretation Rule (tc9_et__Interpretation_Rule__c)	Broken Shift Breakpoint Application	tc9_et__Broken_Shift_Breakpoint_Application__c	Picklist
New Interpretation Rule (tc9_et__Interpretation_Rule__c)	Broken Shift Timesheet Activity Required	tc9_et__Broken_Shift_Timesheet_Activity_Required__c	Picklist
New Interpretation Rule (tc9_et__Interpretation_Rule__c)	Sleepover Breakpoint Application	tc9_et__Sleepover_Breakpoint_Application__c	Picklist

Object	Label	Name	Type
New Interpretation Rule (tc9_et__Interpretation_Rule__c)	Sleepover Minimum Rest Hours	tc9_et__Sleepover_Minimum_Rest_Hours__c	Number
Leave Rule (tc9_pr__Leave_Rule__c)	Validate Balance on Leave Takes	tc9_pr__Validate_Balance_on_Leave_Takes__c	Picklist
Minimum Pay Rate (tc9_ti__Minimum_Pay_Rate__c)	Minimum Pay Rate ID	tc9_et__Minimum_Pay_Rate_ID__c	Text
Mark Up / Margin Rate Record (tc9_et__Mark_Up_Margin_Rate_Record__c)	Primary Margin/Markup Rate	tc9_et__Primary_Margin_Markup_Rate__c	Text
Pay Advice Line (tc9_pr__Pay_Advice_Line__c)	Display Pay Code	tc9_pr__Display_Pay_Code__c	Picklist
Pay Code (tc9_pr__Pay_Code__c)	Exclude From Pay Advice	tc9_pr__Exclude_From_Pay_Advice__c	Checkbox
Payee Leave Event (tc9_pr__Payee_Leave_Event__c)	Override Leave Balance Validation	tc9_pr__Override_Leave_Balance_Validation__c	Picklist
Payee Withholding (tc9_pr__Payee_Withholding__c)	Override Minimum Age Requirement	tc9_pr__Override_Minimum_Age_Requirement__c	Picklist
New Project Code (tc9_pr__Project_Code__c)	Allowance Type	tc9_et__Allowance_Type__c	Picklist
Rate Calculator (tc9_et__Rate_Calculator__c)	Account	tc9_et__Account__c	Lookup

Object	Label	Name	Type
Rate Calculator (tc9_et__Rate_Calculator__c)	Assignments Require Industry?	tc9_et__Assignments_Require_Industry__c	Picklist
Rate Calculator (tc9_et__Rate_Calculator__c)	Assignments Require Location?	tc9_et__Assignments_Require_Location__c	Picklist
Rate Calculator (tc9_et__Rate_Calculator__c)	Assignments Require Risk Classification?	tc9_et__Assignments_Require_Risk_Classification__c	Picklist

Appendix 2

The below table defines the access that must be granted to Internal Users for new components introduced for the update which allows users to define Sleepover rules directly in the Interpretation Rule instead of using Variations

Users Key	Minimum Access Key
User 1 - Users who will create / update Interpretation Rules User 2 - Users who will be processing Timesheets through Interpretation Rules	R - Read C - Create E - Edit A - Assigned

Type	Name	User 1	User 2	User 3	User 4
Object	Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c)	R/C/E	R		
Record Type	Sleepovers (tc9_et.Sleepovers)	A	A		
Object	Interpretation Rule (tc9_et__Interpretation_Rule__c)	R/C/E	R		
Field	Apply Sleepover Interpretation? (tc9_et__Apply_Sleepover_Interpretation__c)	R/E	R/E		
	Sleepover Breakpoint Application (tc9_et__Sleepover_Breakpoint_Application__c)	R/E	R/E		
	Sleepover Minimum Rest Hours (tc9_et__Sleepover_Minimum_Rest_Hours__c)	R/E	R/E		

Appendix 3

The below table defines the access that must be granted to Internal Users for new components introduced for the update to allow the users the ability to define Timesheet Allowances for payment during Leave.

Users Key

User 1 - Users who will create / update Interpretation Rules
User 2 - Users who will be processing Timesheets through Interpretation Rules

Minimum Access Key

R - Read
C - Create
E - Edit
A - Assigned

Type	Name	User 1	User 2	User 3	User 4
Object	Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c)	R/C/E	R		
Record Type	Interpretation Breakpoint Junction (tc9_et.Interpretation_Breakpoint_Junction)	A	A		

Appendix 4

The below table defines the access that must be granted to internal users for the new components introduced that allows them to define Interpretation Allowances for payment using Timesheet Activities:

Users Key		Minimum Access Key			
User 1 - Users who will create / update Interpretation Rules User 2 - Users who will be processing Timesheets through Interpretation Rules		R - Read C - Create E - Edit A - Assigned			

Type	Name	User 1	User 2	User 3	User 4
Object	Interpretation Rule (tc9_et__Interpretation_Rule__c)	R/C/E	R		
Field	Allowance Type (tc9_et__Allowance_Type__c)	R/E	R/E		
Object	Project Code (tc9_pr__Project_Code__c)	R/C/E	R		
Field	Allowance Type (tc9_et__Allowance_Type__c)	R/E	R/E		

Appendix 5

The below table defines the access that must be granted to Internal Users for new components introduced for the update to provide improvements to the Minimum Rest logic in the Time Interpretation functionality

Users Key		Minimum Access Key			
User 1 - Users who will create / update Interpretation Rules User 2 - Users who will be processing Timesheets through Interpretation Rules		R - Read C - Create E - Edit A - Assigned			

Type	Name	User 1	User 2	User 3	User 4
Object	Interpretation Rule (tc9_et__Interpretation_Rule__c)	R/C/E	R		
Field	Apply Minimum Rest on Overtime (tc9_et__tc9_et__Apply_Minimum_Rest_on_Overtime__c)	R/E	R/E		

Appendix 6

The below table defines the access that must be granted to Internal Users for new components introduced for the update to provide improved Timesheet Interpretation logic.

Users Key

User 1 - Users who will create / update Interpretation Rules
User 2 - Users who will be processing Timesheets through Interpretation Rules

Minimum Access Key

R - Read
C - Create
E - Edit
A - Assigned

Type	Name	User 1	User 2	User 3	User 4
Object	Interpretation Rule (tc9_et__Interpretation_Rule__c)	R/C/E	R		
Field	Broken Shift Breakpoint Application (tc9_et__Broken_Shift_Breakpoint_Application__c)	R/E	R/E		

Appendix 7

The below table defines the access that must be granted to Internal Users for new components introduced for the update to provide user control when Split / Broken Shift logic will apply through Timesheet Activities.

Users Key

User 1 - Users who will create / update Interpretation Rules
User 2 - Users who will be processing Timesheets through Interpretation Rules

Minimum Access Key

R - Read
C - Create
E - Edit
A - Assigned

Type	Name	User 1	User 2	User 3	User 4
Object	Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c)	R/C/E	R		
Field	Additional Interpretation BP Details (tc9_et__Additional_Interpretation_BP_Details)	R/E	R/E		
	Primary Interpretation Breakpoint (tc9_et__Primary_Interpretation_Breakpoint__c)	R/E	R/E		
	Secondary Interpretation Breakpoint (tc9_et__Secondary_Interpretation_Breakpoint__c)	R/E	R/E		
Object	Interpretation Rule (tc9_et__Interpretation_Rule__c)	R/C/E	R		
Field	Broken Shift Timesheet Activity Required (tc9_et__Broken_Shift_Timesheet_Activity_Required__c)	R/E	R/E		

Appendix 8

The below table defines the access that must be granted to Internal Users for new components introduced for the beta Rate Calculator functionality.

Users Key		Minimum Access Key			
User 1 - Users who will create / edit Rate Calculator Templates User 2 - Users who will create / edit Rate Calculators		R - Read C - Create E - Edit A - Assigned
