

The Bottlebrush '21 release for 2cloudnine Payroll delivers a number of exciting enhancements designed to provide improved capability and efficiency in your workplace. Below are just some of the improvements and updates that will have you looking forward to the release on the **23rd December 2021***.

Save time updating rates with the **Update Rate Manager**

- Enhance your experience when updating pay rates through the introduction of an Update Rate Manager that will allow you to easily perform tasks related to updating Minimum Pay Rates / Assignment Rates
- Completing rate changes in bulk by increasing the defined Pay Rate on Minimum Pay Rates based on a percentage (%), dollar value (\$) or entering a new rate
- Completing rate changes in bulk by increasing the defined Pay Rates and Invoice Rates on Assignment Rates and Template Groups based on a percentage (%), dollar value (\$) or entering a new rate
- Opt to lock invoice rates so they can not be automatically updated via the Update Rate Manager

Provide enhancements to **Rate Calculation**

- For Staffing organisations, improve your Rate Calculator capabilities through enhancements to the Rate Calculator Builder that will provide further ease in setting up rate calculators ready for use
- Save time by applying Rate Calculator (no employee) and Rate Calculator Templates either directly though the Rate Calculator Builder or from an Assignment
- Increase your calculation power through the incorporation of Minimum Pay Rates into Rate Calculator functionality
- Take advantage of the ability to create a Rate Calculator Template without the need to define Margin / Mark Up records

Enhance your **Time and Interpretation** processing

- Benefit from updates that consider leave taken throughout the period when calculating Frequency Overtime payable
- Extended functionality within the Hourly Rates interpretation rules will enable you to define different penalty rates based on the time of day your Employee has worked
- Improve your interpretation rule based allowance capability with the new functionality to define weekly allowances that can have daily thresholds via the interpretation builders
- Make use of the ability to define overtime pay codes to be paid on break loading and minimum rest breakpoints when they fall within time breakpoints considered as overtime.

Provide additional **Superannuation** capability

- Provide your Employees the ability to direct their deduction superannuation contributions to a different fund than their employer contributions
- Override minimum age requirements for when calculating Superannuation to calculate contributions for Employees that are under 18 years of age and would otherwise not meet the minimum working hours requirement

Improve your **Pay Advice** documents

- Provide more refined Pay Advice documents to your Employees with the ability to hide irrelevant sections so only selection relevant to the Employee are displayed
- Further customise the information provided on Pay Advice documents with the ability to exclude selected Pay Codes from displaying within the document

Improve your *Employees Experience*

- Improve your Employees capability to accurately forecast their leave balance via Employee Experience

Save time with new *Automated Back Pay* functionality (Pilot Program **)

- Take advantage of new functionality to automatically calculate back pay for Timesheet based Employees
- Easily identify Assignment Rates that are related to a back pay
- Maintain the accuracy of statutory calculations with updates to the Pay Batch Manager which will allocate / calculate back Pay Transactions to the historic periods that they belonged to

* The information provided within this document relating to the release date and major content items is accurate at the time of publishing. While the team at 2cloudnine work diligently to ensure we meet our commitments, there may be circumstances where the release date and/or product content will be changed prior to the product release. Where possible, updates regarding changes will be provided; however, this is not guaranteed.
Up to date details of the release date will be available via 2cloudnine Communities.
Absolute details on the final content of the release will be made available in the release notes published at the time of the product release.

** The Automated Back Pay functionality will be released as part of a pilot program for selected organisations to trial and test the functionality against their needs. During the pilot program, additional updates and improvements will be introduced. If you would like your organisation to take part in the pilot program, and have resources available that can be dedicated to testing and providing feedback, please contact your Project Manager .
