

Overview

Release:	Lilly Pilly '21
Version:	v1.144
Release Date:	29/03/2021
Packages updated:	• 2cloudnine Payroll v1.144 (incorporates v1.134 to v1.144) • 2cloudnine Payroll Time2Pay Extension v1.89 (incorporates v1.82 to v1.89) • 2cloudnine Payroll Communities Extension v1.36 (incorporates v1.32 to v1.36) • 2cloudnine Payroll Base General Ledger Extension v1.48 (incorporates v1.47 to v1.48) • 2cloudnine Payroll Australia Extension v1.47 (incorporates v1.46 to v1.47)

Important Information

This guide is intended for certified Salesforce System Administrators and/or suitably trained 2cloudnine Payroll Partners and System Administrators. Only these people should be actioning any installation, configuration items and tasks.

Any configuration undertaken without 2cloudnine guidance that interferes with the performance of 2cloudnine Payroll will be addressed on a time and materials basis. Resources for these fixes cannot be guaranteed and will be allocated in the next available time slot.

All packages within the release must be installed. There may be compulsory and optional configuration items and tasks that need to be completed prior to and post the installation of the packages. These will be highlighted in the below checklists with further details given within this document.

The installer will be responsible for ensuring all these configuration items and tasks are completed within a reasonable timeframe of the packages being installed. Please ensure you have familiarised yourself with all the requirements PRIOR to installing the packages and ensure you have sufficient time and resources available. Failing to do so can negatively impact the user experience and stability of 2cloudnine Payroll.

Pre-Installation Checklist

The following items must be completed prior to commencing the installation and configuration of packages within this release.

Configuration Item / Task		Requirement?
New Component Review		
☐	Remove / rename duplicate objects	Optional
☐	Remove / rename duplicate tabs	Compulsory
☐	Remove / rename duplicate record types	Optional
☐	Remove / rename duplicate fields	Optional
Custom Automation Review (Workflows, Process Builders, Flows, Triggers etc)		
☐	Deactivate / amend any required custom automation	Optional

Installation and Configuration Checklist

The following items must be completed in the listed order to install and configure the packages within this release.

Configuration Item / Task		Requirement?
Package Installation		Update
☐	Install 2cloudnine Payroll v1.144	Compulsory Update
☐	Install 2cloudnine Payroll Time2Pay Extension v1.89	Compulsory Update
☐	Install 2cloudnine Payroll Communities/Experience Extension v1.36	Compulsory Update
☐	Install 2cloudnine Payroll Base General Ledger Extension v1.48	Compulsory Update
☐	Install 2cloudnine Payroll Australia Extension v1.47	Conditionally Compulsory Update Employers who extract data using SAFF Format when using 2cloudnine Payroll Australia SuperStream functionality must have the 2cloudnine Payroll Australia Extension package updated.
Pay Employee Leave in Advance		
☐	Update profile/permission sets	Compulsory
☐	Update page layouts for new fields	Compulsory
☐	Update new fields on existing records	Compulsory
☐	Make the new field available in Communities/Experience	Optional
Indicate the Rate Leave Will Be Paid		
☐	Update profile/permission sets	Compulsory
☐	Update page layouts for new fields	Compulsory
☐	Update new fields on existing records	Compulsory
☐	Make the new field available in Communities/Experience	Optional
Update Leave functionality in Communities/Experience		
☐	Configure the Communities/Experience Leave tab	Optional

Configuration Item / Task		Requirement?
Define Dual Leave Loading Interpretation Rules		
☐	Update profile/permission sets	Compulsory
☐	Update page layouts for new fields	Optional
☐	Update new fields on existing records	Optional
Apply for Time off In Lieu Credit in Communities/Experience		
☐	Update profile/permission sets	Optional
☐	Update page layouts for new fields	Optional
☐	Update new fields on existing records	Optional
☐	Make the new field available in Communities/Experience	Optional
Perform Streamlined Payee Exit Tasks		
☐	Update page layouts	Optional
Automate Payee Allowance Records and Assignment Creation		
☐	Update profile/permission sets	Optional
☐	Update page layouts for new fields	Optional
☐	Update new fields on existing records	Optional
Define and Use of Minimum Pay Rates		
☐	Update profile/permission sets	Optional
☐	Update page layouts for new fields	Optional
☐	Create a new picklist value for fields	Optional
☐	Update new fields on existing records	Optional
Create and Allocate Work Schedules Efficiently		
☐	Update profile/permission sets	Optional

Configuration Item / Task		Requirement?
Apply Work Schedule Information to Payroll		
☐	Update profile/permission sets	Optional
☐	Update page layouts for new fields	Optional
☐	Create a new picklist value for fields	Optional
Extend Minimum Rest or Break Loading Interpretation		
☐	Update profile/permission sets	Compulsory
☐	Update page layouts for new fields	Compulsory
☐	Update new fields on existing records	Compulsory
☐	Populate different Pay Codes for Sundays and Public Holidays	Optional
Utilise Daily Interpretation Rules for Partial Days		
☐	Update profile/permission sets	Optional
☐	Update page layouts for new fields	Optional
☐	Update new fields on existing records	Optional
Pay Partial Allowances		
☐	Update profile/permission sets	Optional
☐	Update page layouts for new fields	Optional
☐	Update new fields on existing records	Optional
Provide Greater Detail on Pay Advice documents		
☐	Update profile/permission sets	Compulsory
☐	Update page layouts for new fields	Optional
☐	Create a new picklist value for fields	Optional
☐	Update new fields on existing records	Optional
☐	Update the Pay Advice Detail Level on Pay Schedules	Optional

Configuration Item / Task		Requirement?
Set a Custom Pay Advice Footer		
☐	Update profile/permission sets	Optional
☐	Update page layouts for new fields	Optional
☐	Update new fields on existing records	Optional
Define a Default Pay Advice Message		
☐	Update profile/permission sets	Optional
☐	Update page layouts for new fields	Optional
Mark Pay Advice Templates as Active or Inactive		
☐	Update profile/permission sets	Compulsory
☐	Update page layouts for new fields	Compulsory
☐	Update new fields on existing records	Compulsory
Consolidate Multiple Pay Advice Amounts in a Payment File		
☐	Update profile/permission sets	Optional
☐	Update page layouts for new fields	Optional
☐	Update new fields on existing records	Optional
Automatically Assign Defined Permission Sets to Community Users		
☐	Populate the Time2pay Portal Permission Sets Configuration custom setting	Optional
Customised Invoice Grouping		
☐	Update profile/permission sets	Optional
☐	Update page layouts for new fields	Optional
☐	Create a new Picklist Value for fields	Optional 

Configuration Item / Task		Requirement?
Include Expense Receipts/Evidences as Attachments with Invoice emails		
☐	Update profile/permission sets	Optional
☐	Update page layouts for new fields	Optional
☐	Update new fields on existing records	Optional
Make Funding Requirement Mandatory		
☐	Turn on functionality via custom setting	Optional
Adhere to SuperStream Requirements		
☐	Check and update data on existing records	Compulsory
Customise Community/Experience Terminology		
☐	Override/translate custom labels	Optional 

Installation Links

The installation of the following packages must be completed as part of the Lilly Pilly '21 release upgrade

Package	Version	Install Link
2cloudnine Payroll	1.144 	https://login.salesforce.com/packaging/installPackage.apexp?p0=04t6F000004HC8N
2cloudnine Payroll Time2Pay Extension	1.89 	https://login.salesforce.com/packaging/installPackage.apexp?p0=04t0o000003bS68
2cloudnine Payroll Communities/Experience Extension	1.36 	https://login.salesforce.com/packaging/installPackage.apexp?p0=04t2v0000079C8B
2cloudnine Payroll Base General Ledger Extension	1.48 	https://login.salesforce.com/packaging/installPackage.apexp?p0=04t2v000007X8Ah&isdtp=p1
2cloudnine Payroll Australia Extension	V1.47 	https://login.salesforce.com/packaging/installPackage.apexp?p0=04t6F000000chLg

Pre-Installation Items

New Component Review

The Lilly Pilly '21 Release contains a number of new components including Objects, Fields and Tabs. A review of the list of components introduced should be conducted to check for duplicates to existing custom components.

In some instances, where duplicates exist, the installation/upgrade of the package will not be permitted. The creation of duplicate tabs is an example of this. In these instances the duplicate must be removed prior to attempting to install. This could be completed through either deleting the custom component or, where possible, renaming the Name/API Name of the component.

In other instances, the package installation/upgrade will be permitted however the duplicates could cause user confusion and/or custom automation clashes within the org. In these instances, although it is optional, it is highly recommended to delete/rename the component.

A list of the new components that should be reviewed are outlined on [Appendix 1](#)

Custom Automation Review

This release includes new functionality and improvements which may perform duplicate tasks to those configured as custom automations (workflows, process builders, flows, triggers etc) in the organisation. A review of existing custom automation against the functionality outlined on the Release Notes should be completed.

Where duplication is identified, it is highly suggested that the custom automation be deactivated or amended. This will assist in preventing processing lag and data corruption as well as prevent things such as notification emails being sent out a number of times.

Configuration Items

Pay Employee Leave In Advance

The functionality to allow leave to be paid in advance is optional, however there is required configuration that must be completed regardless of if the function is used. The below configuration steps should be completed:

1. Update profile/permission sets (Compulsory)
2. Update page layouts for new fields (Compulsory)
3. Update new fields on existing records (Compulsory)
4. Make the new field available in Communities/Experience (Optional)

Update Profile/Permission Sets (Compulsory)

The below fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned:

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 2](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Compulsory)

This requirement needs to be completed regardless of if the option to use the functionality is taken.

Note: The update of Community/Experience page layouts is outlined in the *Make the New Field Available in Communities/Experience* section below.

1. Go to Setup > Object Manager
2. Select Leave Rule (tc9_pr__Leave_Rule__c) > Page Layouts
3. Select a page layout that is used for Leave Rule record type
4. Add the following fields to the layout
 - o Allow Pay In Advance (tc9_pr__Allow_Pay_in_Advance__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used on the Leave Rule object
7. Return to the Object Manager
8. Select Payee Leave Event (tc9_pr__Payee_Leave_Event__c) > Page Layouts
9. Select a page layout that is used for the Leave Take record type
10. Add the following fields to the layout
 - o Pay In Advance (tc9_pr__Pay_in_Advance__c)
 - o Advance Pay Start Calendar Period (tc9_pr__Advance_Pay_Start_Calendar_Period__c)
 - o Advance Pay End Calendar Period (tc9_pr__Advance_Pay_End_Calendar_Period__c)
 - o Advance Pay Payment Calendar Period (tc9_pr__Advance_Pay_Payment_Calendar_Period__c)
11. Click Save
12. Repeat steps 9 to 11 for all page layouts that are used for the Leave Take record type

Update New Fields on Existing Records (Compulsory)

To prevent validation errors while processing leave requests and payroll, the new Allow Pay In Advance field (tc9_pr__Allow_Pay_in_Advance__c) must be populated on all current leave rules.

To update the field the following steps should be followed:

1. Run Script 1 defined below through dev console to automatically populate the Allow Pay in Advance field on all Leave Rules with the value of 'No'
2. Manually edit any Leave Rules that require different values than those set by the script

Script 1

```
//Payroll post-install script for Lilly Pilly 2021 Release - Leave Rules - Allow Pay In Advance

List<tc9_pr__Override_TC9P_Validation__c> overrides = [Select Id, tc9_pr__OV_Leave_Rule__c from
tc9_pr__Override_TC9P_Validation__c];

for(tc9_pr__Override_TC9P_Validation__c override1 : overrides){
    override1.tc9_pr__OV_Leave_Rule__c = true;
}
update overrides;

List<tc9_pr__Leave_Rule__c> rules = [Select Id, tc9_pr__Allow_Pay_in_Advance__c from
tc9_pr__Leave_Rule__c];

for(tc9_pr__Leave_Rule__c rule : rules){
    if(rule.tc9_pr__Allow_Pay_in_Advance__c == null){
        rule.tc9_pr__Allow_Pay_in_Advance__c = 'No';}
}
update rules;

List<tc9_pr__Override_TC9P_Validation__c> overrides2 = [Select Id, tc9_pr__OV_Leave_Rule__c from
tc9_pr__Override_TC9P_Validation__c];

for(tc9_pr__Override_TC9P_Validation__c override2 : overrides2){
    override2.tc9_pr__OV_Leave_Rule__c = false;
}
update overrides2;
```

Make the New Field Available in Communities/Experience (Optional)

This requirement only needs to be completed if the option to make the functionality available for employee/approver use within Communities/Experience is taken. If not, this item can be skipped.

By default, this field is included on both the Employee Community Permission Set and the Approver User Permission Set. Provided these permission sets are applied to the employee Community/Experience users and the approver Community/Experience guest users respectively, the correct permissions to enable the fields use will be automatically provisioned.

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 3](#) must be made available for use either via profiles or custom permission sets.

Indicate the Rate that Leave Will Be Paid

The functionality to allow users to indicate the rate at which leave will be paid is optional, however there is required configuration that must be completed regardless of if the function is used. The below configuration steps should be completed:

1. Update profile/permission sets (Compulsory)
2. Update page layouts for new fields (Compulsory)
3. Update new fields on existing records (Compulsory)
4. Make the new field available in Communities/Experience (Optional)

Update Profile/Permission Sets (Compulsory)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 4](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Compulsory)

This requirement needs to be completed regardless of if the option to use the functionality is taken.

Note: The update of Community/Experience page layouts is outlined in the *Make the New Field Available in Communities/Experience* section below.

1. Go to Setup > Object Manager
2. Select Leave Rule (tc9_pr__Leave_Rule__c) > Page Layouts
3. Select a page layout that is used for any Leave Rule record type
4. Add the following field to the layout
 - Available Pay Rates (tc9_pr__Available_Pay_Rates__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used on the Leave Rule object
7. Return to the Object Manager
8. Select Payee Leave Event (tc9_pr__Payee_Leave_Event__c) > Page Layouts
9. Select a page layout that is used for any Leave Take record type
10. Add the following field to the layout
 - Selected Pay Rate (tc9_pr__Selected_Pay_Rate__c)
11. Click Save
12. Repeat steps 9 to 11 for all page layouts that are used for the Leave Take record type
13. Return to the Object Manager
14. Select Pay Advice Line (tc9_pr__Pay_Advice_Line__c) > Page Layouts
15. Select a page layout that is used for any Pay Advice Line record type
16. Add the following fields to the layout
 - Leave Rate Multiplier (tc9_pr__Leave_Rate_Multiplier__c)
17. Click Save
18. Repeat steps 15 to 17 for all page layouts that are used for the Leave Take record type
19. Return to the Object Manager
20. Select Pay Transaction (tc9_pr__Pay_Transaction__c) > Page Layouts
21. Select a page layout that is used for the Payment record type
22. Add the following fields to the layout
 - Leave Rate Multiplier (tc9_pr__Leave_Rate_Multiplier__c)
 - Quantity by Leave Multiplier (tc9_pr__Quantity_by_Leave_Multiplier__c)
23. Click Save
24. Repeat steps 21 to 23 for all page layouts that are used for the Leave Take record type

Update New Fields on Existing Records (Compulsory)

To prevent validation errors while processing leave requests and payroll, the new Available Pay Rates field (tc9_pr__Available_Pay_Rates__c) must be populated on all the current Leave Rules.

To update the fields the following steps should be followed:

1. Run Script 1 defined below through dev console to automatically populate the Available Pay Rates field on all Leave Rules with the value of "Standard Pay"
2. Manually edit any Leave Rules that require different values than those set by the script
3. Run Script 2 defined below through dev console to automatically populate the Selected Pay Rate field on all Leave Take Payee Leave Event records, that do not have the field populated, with the value of "Standard Pay"
4. Manually edit any Payee Leave Events that require different values than those set by the script

Script 1

```
//Payroll post-install script for Lilly Pilly 2021 Release - Leave Rules - Available Pay Rates

List<tc9_pr__Override_TC9P_Validation__c> overrides = [Select Id, tc9_pr__OV_Leave_Rule__c from
tc9_pr__Override_TC9P_Validation__c];

for(tc9_pr__Override_TC9P_Validation__c override1 : overrides){
    override1.tc9_pr__OV_Leave_Rule__c = true;
}
update overrides;

List<tc9_pr__Leave_Rule__c> rules = [Select Id, tc9_pr__Available_Pay_Rates__c from
tc9_pr__Leave_Rule__c];

for(tc9_pr__Leave_Rule__c rule : rules){
    if(rule.tc9_pr__Available_Pay_Rates__c == null){
        rule.tc9_pr__Available_Pay_Rates__c = 'Standard Pay';
    }
}
update rules;

List<tc9_pr__Override_TC9P_Validation__c> overrides2 = [Select Id, tc9_pr__OV_Leave_Rule__c from
tc9_pr__Override_TC9P_Validation__c];

for(tc9_pr__Override_TC9P_Validation__c override2 : overrides2){
    override2.tc9_pr__OV_Leave_Rule__c = false;
}
update overrides2;
```

Script 2

```
//Payroll post-install script for Lilly Pilly 2021 Release - Payee Leave Event - blank Selected Pay Rate

List<tc9_pr__Override_TC9P_Validation__c> overrides = [Select Id, tc9_pr__OV_Payee_Leave_Event__c
from tc9_pr__Override_TC9P_Validation__c];

for(tc9_pr__Override_TC9P_Validation__c override1 : overrides){
    override1.tc9_pr__OV_Payee_Leave_Event__c = true;
}
update overrides;

List<tc9_pr__Payee_Leave_Event__c> events = [Select Id, tc9_pr__Selected_Pay_Rate__c,
tc9_pr__Processing_Status__c from tc9_pr__Payee_Leave_Event__c where
tc9_pr__Selected_Pay_Rate__c = null and RecordType.DeveloperName = 'Leave_Take'];

for(tc9_pr__Payee_Leave_Event__c event : events){
    Event.tc9_pr__Selected_Pay_Rate__c = 'Standard Pay';
}
update events;

List<tc9_pr__Override_TC9P_Validation__c> overrides2 = [Select Id, tc9_pr__OV_Payee_Leave_Event__c
from tc9_pr__Override_TC9P_Validation__c];

for(tc9_pr__Override_TC9P_Validation__c override2 : overrides2){
    override2.tc9_pr__OV_Payee_Leave_Event__c = false;
}
update overrides2;
```

Make the New Field Available in Communities/Experience (Optional)

This requirement only needs to be completed if the option to make the functionality available for employee/approver use within Communities/Experience is taken. If not, this item can be skipped.

By default, this field is included on both the Employee Community Permission Set and the Approver User Permission Set. Provided these permission sets are applied to the employee Community/Experience users and the approver Community/Experience guest users respectively, the correct permissions to enable the fields use will be automatically provisioned.

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 5](#) must be made available for use either via profiles or custom permission sets.

Update Leave Functionality In Communities/Experience

The functionality to turn Leave sub-tabs on and off within the Employee Community/Experience is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped. The below configuration steps should be completed if the functionality is required:

1. Configure the Communities/Experience Leave tab (Optional)

Note: By default, if this item is skipped, all Leave sub-tabs are turned on.

Configure the Communities/Experience Leave Tab (Optional)

1. Go to Setup > Feature Settings > Digital Experiences > All Sites
2. Locate the Employee Community/Experience within the All Sites list shown and click on the Builder link alongside it
3. Use the Pages drop down to navigate to the page where the Community holds the Emp_Comm_Leave component
4. Click on the Emp_Comm_Leave component. The Emp Comm Leave configuration window will appear.
5. Use the yes/no picklists within the configuration window to turn the sub-tabs on and off as required
6. Close the configuration window
7. Click the Preview button to view the page to ensure it is correct and fix any issues required
8. Repeat steps 5-7 for all pages where the Emp_Comm_Leave component is used (if any others)
9. Click the Publish button to make the changes live

Define Dual Leave Loading Interpretation Rules

The functionality to define and use dual leave loading calculations during Timesheet Interpretation is optional, however there is required configuration that must be completed regardless of if the function is used. The below configuration steps should be completed:

1. Update profiles/permission sets (Compulsory)
2. Update page layouts for new fields (Optional)
3. Update new fields on existing records (Optional)

Update Profile/Permission Sets (Compulsory)

The below detailed fields have had read/edit access added to the following Permission Sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 6](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Interpretation Rule (tc9_et__Interpretation_Rule_c) > Page Layouts
3. Select a page layout that is used for the Shift End Time or Shift Start Time record types
4. Add the following field to the layout
 - Apply Dual Leave Loading (tc9_et__Apply_Dual_Leave_Loading_Calculations__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used on the Shift End Time and Shift Start Time record types
7. Return to the Object Manager
8. Select Leave Rule (tc9_pr__Leave_Rule__c) > Page Layouts
9. Select a page layout that is used for any Leave Rule object
10. Add the following field to the layout
 - Apply Dual Leave Loading (tc9_pr__Apply_Dual_Leave_Loading_Calculations__c)
11. Click Save
12. Repeat steps 9 to 11 for all page layouts that are used for the Leave Rule object

Update New Fields on Existing Records (Optional)

By default, when the Apply Dual Leave Loading field on the Leave Rule and Interpretation Rule records is not populated, they will be treated as if the value selected is "No". This means that data on existing interpretation rules does not need to be updated to ensure they continue to perform timesheet interpretation with the same logic.

If there are existing Leave Rules and Interpretation Rules where the functionality is required, these should be edited via the Interpretation Builder..

Apply For Time Off In Lieu Credit in Communities/Experience

The functionality to allow users to submit, approve or reject leave requests for time off in lieu credits through Communities/Experience is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped. The below configuration steps should be completed if the functionality is required:

1. Update profile/permission sets (Optional)
2. Update page layouts for new fields (Optional)
3. Update new fields on existing records (Optional)
4. Make the new functionality available in Communities/Experience (Optional)

Update Profile/Permission Sets (Optional)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 7](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Leave Rule (tc9_pr__Leave_Rule__c) > Page Layouts
3. Select a page layout that is used for the Time off In Lieu record type
4. Add the following field to the layout
 - o Credit Available In Portal (tc9_pr__Credit_Available_in_Portal__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for Time off In Lieu record type.

Update New Fields on Existing Records (Optional)

By default, where the value of the Credit Available In Portal field is not populated, it will be treated as if the value is “No” and therefore access to the functionality will not be granted to employees and approvers via Communities/Experience.

However, if there are existing leave rules where the functionality is required, these should be edited via the standard Salesforce page..

Make the New Functionality Available in Communities/Experience (Optional)

By default, this record type is included on both the Employee Community Permission Set and the Approver User Permission Set and, provided these permission sets are applied to the Employee Community Users and the Approver Community Guest Users respectively, the correct permissions to enable the fields use will be automatically provisioned.

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 8](#) must be made available for use either via profiles or custom permission sets.

Perform Streamlined Payee Exit Tasks

The new streamlined Payee Exit functionality does not require any configuration and will become available on installation of the package.

That said, there have been significant changes to the previous versions of the standard page layouts provided within the package. Below are the details of the suggested changes that could be made to the page layouts used within your organisation.

Update Page Layouts(Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Select Payee Exit Calculation (tc9_pr__Payee_Exit_Calculation__c) > Page Layouts
2. Select a page layout that is used for the Australia record type
3. Add the following fields to the layout

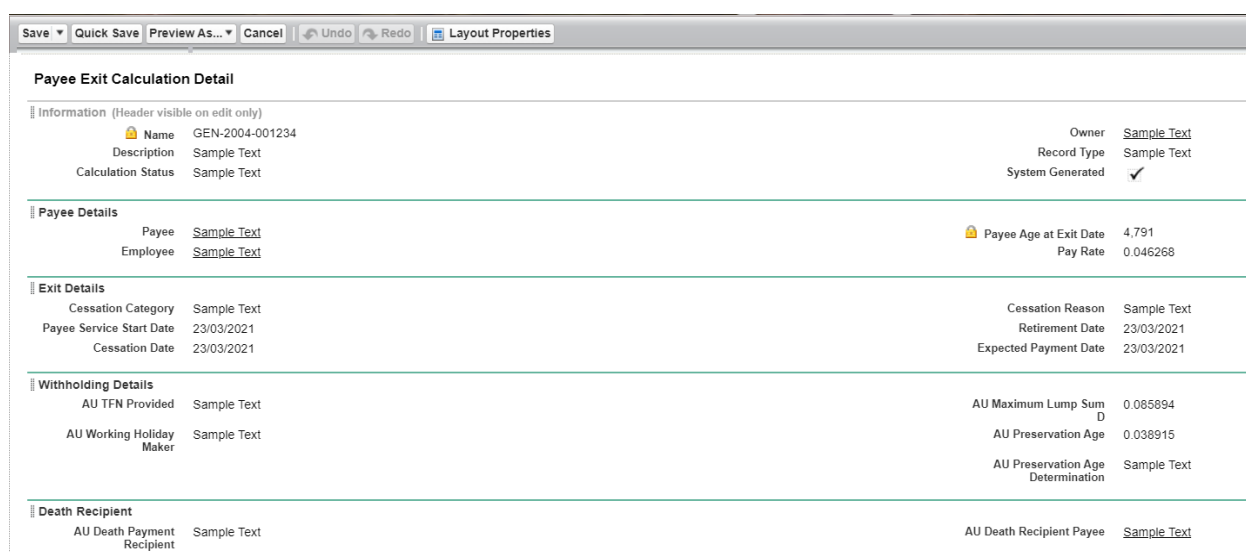

- AU Working Holiday Maker (tc9_pr__AU_Working_Holiday_Maker__c)
 - AU Death Recipient Payee (tc9_pr__AU_Death_Recipient_Payee__c)
- 4. Arrange the sections/fields within the layout as required (See Figure 1 below for the suggested format)
- 5. Click Save
- 6. Repeat steps 3-5 for all page layouts used for the Australia record type

- 7. Select a page layout that is used for the Australia Item record type
- 8. Add the following fields to the layout
 - User Comments (tc9_pr__User_Comments__c)
 - AU Contributes to OTE (tc9_pr__AU_Contributes_to_OTE__c)
- 9. Arrange the sections/fields within the layout as required (See Figure 2 below for the suggested format)
- 10. Click Save
- 11. Repeat steps 8-10 for all page layouts used for the Australia Item record type

- 12. Select a page layout that is used for the Australia Mapping record type
- 13. Add the following fields to the layout
 - Mapping Component Type (tc9_pr__Mapping_Component_Type__c)
 - Mapping Status (tc9_pr__Mapping_Status__c)
- 14. Arrange the sections/fields within the layout as required (See Figure 3 below for the suggested format)
- 15. Click Save
- 16. Repeat steps 13-15 for all page layouts used for the Australia Mapping record type

- 17. Select a page layout that is used for the Australia Results record type
- 18. Arrange the sections/fields within the layout as required (See Figure 4 for the suggested format)
- 19. Click Save
- 20. Repeat steps 18-19 for all page layouts used for the Australia record type

Automate Payee Allowance Records and Assignment Rate Creation

The functionality to automate the creation of Payee Allowance Records and Assignment Rates is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped. The below configuration steps should be completed if the functionality is required:

1. Update profile/permission sets (Optional)
2. Update page layouts for new fields (Optional)
3. Update new fields on existing records (Optional)

Update Profile/Permission Sets (Optional)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 10](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Assignment (tc9_pr__Assignment__c) > Page Layouts
3. Select a page layout that is used for any Assignment record type excluding the Perm and Temp to Perm record types

4. Add the following fields to the layout
 - Assignment Rate Template Group (tc9_pr__Assignment_Rate_Template_Group__c)
 - Assignment Rate Template Group Pay Rate (tc9_et__Assignment_Rate_Template_Group_Pay_Rate__c)
 - Assignment Rate Template Group Invoice Rate (tc9_et__Assignment_Rate_Template_Group_Inv_Rate__c)
 - Payee Timesheet Allowance Template Group (tc9_et__Payee_Timesheet_Allowance_Template_Group__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used on the Assignment object excluding those used for the Perm and Temp to Perm record types
7. Return to the Object Manager
8. Select Pay Code (tc9_pr__Pay_Code__c) > Page Layouts
9. Select a page layout that is used for the Payment or Allowance record types
10. Add the following field to the layout
 - Invoice Rate Multiplier (tc9_et__Invoice_Rate_Multiplier__c)
11. Click Save
12. Repeat steps 8 to 11 for all page layouts that are used for the Payment and Allowance record types

Update New Fields on Existing Records (Optional)

When the Assignment Rate Template Group that is related to an Assignment has the Invoice Rate field populated, the Invoice Rate Multiplier field (tc9_et__Invoice_Rate_Multiplier__c) on the Pay Code is used to calculate default values for the Assignment Rates/Payee Allowance Records created. Existing Payment and Allowance Pay Codes should be updated to populate the Invoice Rate Multiplier otherwise, when the new records are created, the calculated Invoice Rate will be set to be the same as the Pay Rate.

Define and Use of Minimum Pay Rates

The functionality to define and use minimum pay rates is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped. The below configuration steps should be completed if the functionality is required:

1. Update profile/permission sets (Optional)
2. Update page layouts for new fields (Optional)
3. Create a new picklist value for fields (Optional)
4. Update new fields on existing records (Optional)

Update Profile/Permission Sets (Optional)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 11](#) must be made available for use either via profiles or custom permission sets.

Note: This functionality builds on the [Automate Payee Allowance Records and Assignment Rate Creation](#) item. To function correctly, the Update Profile/Permission Sets items within that section must also be completed.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

Note: This functionality builds on the [Automate Payee Allowance Records and Assignment Rate Creation](#) item. To function correctly, the Update Page Layouts for New Fields items within that section must also be completed. Further, the new Minimum Pay Rate object has been packaged with a standard page layout containing all required fields, so no updates are necessary in relation to this page layout.

1. Select Assignment (tc9_pr__Assignment_c) > Page Layouts
2. Select a page layout that is used for any Assignment record type excluding the Perm and Temp to Perm record types
3. Add the following fields to the layout
 - o Award Classification (tc9_et__Award_Classification__c)
 - o Award Level (tc9_et__Award_Level__c)
4. Click Save
5. Repeat steps 2 to 4 for all page layouts that are used on the Assignment object excluding those used for the Perm and Temp to Perm record types

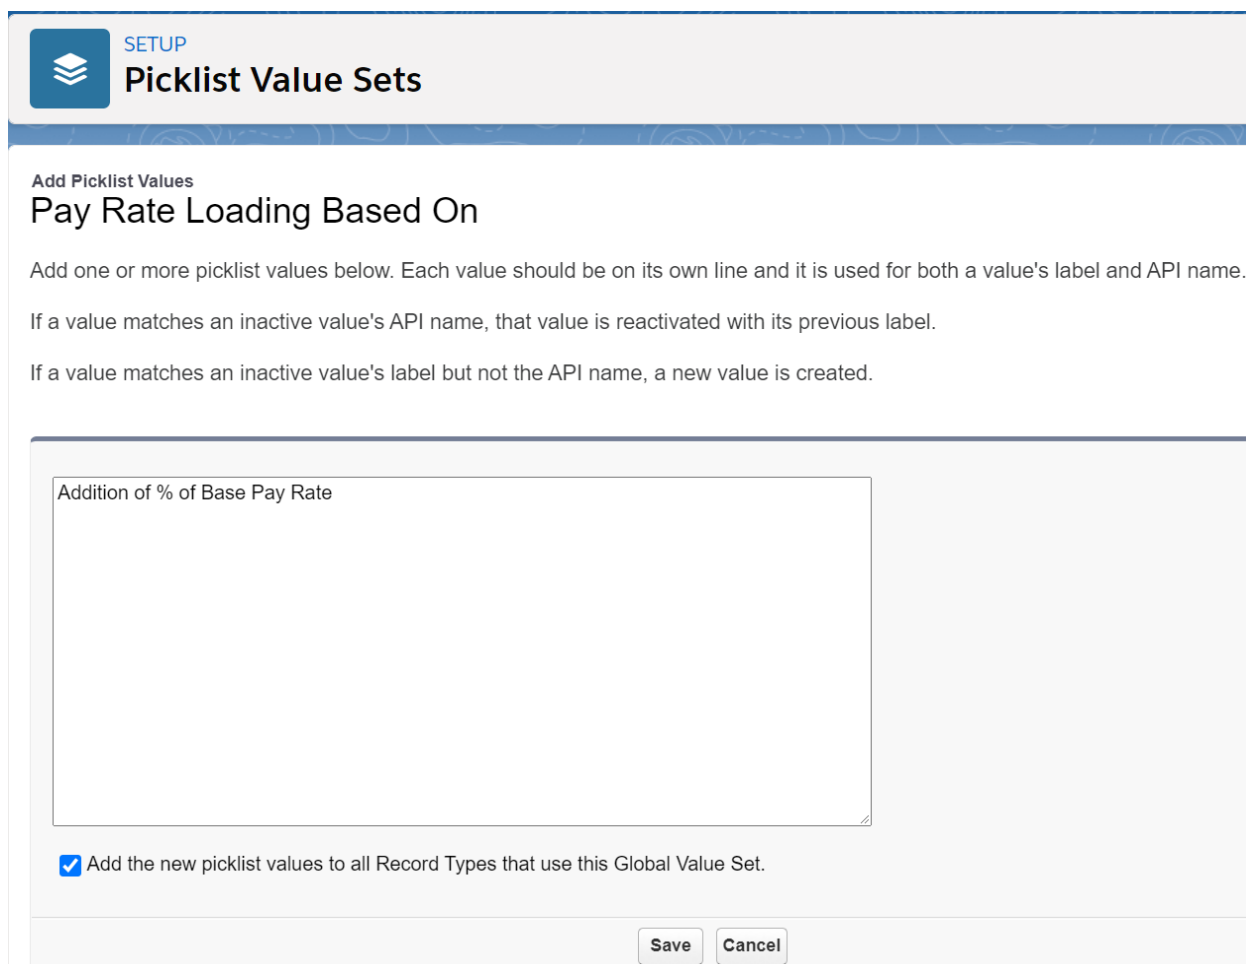

Note: the functionality includes the creation of 1 new Award Classifications and Levels object (tc9_et__Award_Classification_and_Levels__c) which has been packaged with a standard page layout containing all required fields. No updates are necessary in relation to this page layout.

Create a New Picklist Value for Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Objects and Fields > Picklist Value Sets
2. Select Pay Rate Loading Based On Picklists
3. Click the New button in the Values section
4. On the displayed page, add the new value Addition of % of Base Pay Rate
5. Check the "Add new picklist value sets to all record types that use this global value set" checkbox (See Figure 1)
6. Click Save

Figure 1

SETUP
Picklist Value Sets

Add Picklist Values
Pay Rate Loading Based On

Add one or more picklist values below. Each value should be on its own line and it is used for both a value's label and API name.

If a value matches an inactive value's API name, that value is reactivated with its previous label.

If a value matches an inactive value's label but not the API name, a new value is created.

Addition of % of Base Pay Rate

☒ Add the new picklist values to all Record Types that use this Global Value Set.

Save **Cancel**

Update New Fields on Existing Records (Optional)

Note: This functionality builds on the [Automate Payee Allowance Records and Assignment Rate Creation](#) item. To function correctly, the *Update New Fields on Existing Records* items within that section must also be completed.

Alternatively, existing Assignments can be updated to have an Award Classification and Award Level applied, however this is not essential and can be completed if/when a user assigns an Assignment Rate Template that contains minimum rates.

Create and Allocate Work Schedules Efficiently

The functionality to create and allocate work schedules is optional and is a beta version. Further updates and improvements will be included in the next release.

This requirement only needs to be completed if the option to use the beta functionality is taken. If not, these items can be skipped. An updated version of these configuration steps will be included in the next release for those who wish to wait for the non-beta version. The below configuration steps should be completed if opting to trial the beta version:

1. Update profile/permission sets (Optional)

Note: The functionality includes the creation of objects and record types which have all been packaged with a standard page layout containing all required fields, so no updates are necessary in respect to these page layouts.

Update Profile/Permission Sets (Optional)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 11](#) must be made available for use either via profiles or custom permission sets.

Apply Work Schedule Information to Payroll

The functionality to apply work schedule information to payroll is optional and is a beta version. Further updates and improvements will be included in the next release. This requirement only needs to be complete if the option to use the beta functionality is taken. If not, these items can be skipped. An updated version of these configuration steps will be included in the next release for those who wish to wait for the non-beta version.

The below configuration steps should be completed if the functionality is required:

1. Update profile/permission sets (Optional)
2. Update page layouts for new fields (Optional)
3. Create a new picklist value for fields (Optional)

Update Profile/Permission Sets (Optional)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 12](#) must be made available for use either via profiles or custom permission sets.

Note: This functionality builds on the [Create and Allocate Work Schedules Efficiently](#). To function correctly, the Update Profile/Permission Sets items within that section must also be completed.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Assignment Rate (tc9_pr__Assignment_Rate__c) > Page Layouts
3. Select a page layout that is used for the Remuneration record type
4. Add the following field to the layout
 - Auto Pay Calculation Basis (tc9_pr__Auto_Pay_Calculation_Basis__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Remuneration record type
7. Return to the Object Manager
8. Select Pay Transaction (tc9_pr__Pay_Transaction__c) > Page Layouts
9. Select a page layout that is used for the Payment or Allowance record types
10. Add the following field to the layout
 - Assignment Schedule (tc9_pr__Assignment_Schedule__c)
11. Click Save
12. Repeat steps 8 to 11 for all page layouts that are used for the Payment and Allowance record types
13. Return to the Object Manager
14. Select Timesheet Entry (tc9_et__Timesheet_Entry__c) > Page Layouts
15. Select a page layout that is used for Timesheet Entry record type
16. Add the following field to the layout
 - Work Schedule Item (tc9_pr__Work_Schedule_Item__c)
17. Click Save
18. Repeat steps 14 to 17 for all page layouts that are used on the Timesheet Entry object

Create a New Picklist Value for Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Assignment Rate (tc9_pr__Assignment_Rate__c) > Fields & Relationships
3. Select the Pro Rata Method field (tc9_pr__Pro_Rata_Method__c)
4. In the values section, click the New button
5. On the displayed page add the new value 'Work Schedule' and apply it only for the Remuneration record type (See Figure 1)
6. Click Save

Figure 1

Add Picklist Values

Pro Rata Method

Add one or more picklist values below. Each value should be on its own line and it is used for both a value's label and API name.

If a value matches an inactive value's API name, that value is reactivated with its previous label.

If a value matches an inactive value's label but not the API name, a new value is created.

Work Schedules

To add the new value to the picklist values for a particular Record Type, check the appropriate boxes below.

☐ Record Type Name	Description
☒ Remuneration	To be used for defining Assignment Rates that are considered during Payroll processing where payees are salary and or remuneration based instead of timesheet based.
☐ Remuneration Template	To be used for creating Remuneration Assignment Rate Templates
☐ Timesheet	To be used for defining Assignment Rates that will be used in the Transaction processing of Timesheets
☐ Timesheet Template	To be used for creating Timesheet Assignment Rate Templates

Save Cancel

Extend Minimum Rest or Break Loading Interpretation

The functionality to define separate Pay Codes for Sunday and Public Holiday breakpoints while accessing Minimum Rest or Break Loading Interpretation is optional, however there is required configuration that must be completed regardless of if the function is used. The below configuration steps should be completed:

1. Update profile/permission set (Compulsory)
2. Update page layouts for new fields (Compulsory)
3. Update new fields on existing records (Compulsory)
4. Populate different Pay Codes for Sundays and Public Holidays (Optional)

Update Profile/Permission Sets (Compulsory)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 13](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts For New Fields (Compulsory)

This requirement needs to be completed regardless of if the option to use the functionality is taken.

1. Go to Setup > Object Manager
2. Select Interpretation Rule (tc9_et__Interpretation_Rule__c) > Page Layouts
3. Select a page layout that is used for any Interpretation Rule record type excluding the Daily Rates record type
4. Add the following fields to the page layout
 - Days Minimum Rest Hours Apply (tc9_et__Days_Minimum_Rest_Hours_Apply2__c)
 - Days Total Span Hours Apply (tc9_et__Days_Total_Span_Hours_Apply2__c)
5. Delete the following fields from the page layout
 - DO NOT USE (tc9_et__Days_Minimum_Rest_Hours_Apply__c)
 - DO NOT USE (tc9_et__Days_Total_Span_Hours_Apply__c)
6. Click Save
7. Repeat steps 3 to 5 for all page layouts that are used on the Interpretation Rule object excluding those used for the Daily Rates record type

Update New Fields on Existing Records (Compulsory)

To prevent validation errors while performing Timesheet Interpretation, the new Days Minimum Rest Hours Apply and Days Total Span Hours Apply and fields (tc9_et__Days_Minimum_Rest_Hours_Apply2__c and tc9_et__Days_Total_Span_Hours_Apply2__c respectively) must be populated on all Interpretation Rules.

To update the fields, the following steps should be followed:

1. Run a script through the dev console to automatically populate the Days Minimum Rest Hours Apply field (tc9_et__Days_Minimum_Rest_Hours_Apply2__c). See more details regarding options available below
2. Run a script through the dev console to automatically populate the Days Total Span Hours Apply field (tc9_et__Days_Total_Span_Hours_Apply2__c). See more details regarding options available below.
3. Manually edit, via the Interpretation Builder, any Interpretation Rules that require different values than those set by the script

There are 2 options for how the Days Minimum Rest Hours Apply field should be populated via the scripts.

1. Populate the new Days Minimum Rest Hours Apply field (tc9_et__Days_Minimum_Rest_Hours_Apply2__c) with the value of the old depreciated fields (tc9_et__Days_Minimum_Rest_Hours_Apply__c). To take this option use Script 1 below.
2. Populate the Days Minimum Rest Hours Apply field (tc9_et__Days_Minimum_Rest_Hours_Apply2__c) on all Interpretation Rules with the values of 'Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday and Public Holiday' (ignoring the values in the old fields). To take this option use Script 2 below.

Likewise, there are 2 options for how the Days Total Span Hours Apply field should be populated via the scripts.

1. Populate the new Days Total Span Hours Apply field (tc9_et__Days_Total_Span_Hours_Apply2__c) with the value of the old depreciated fields (tc9_et__Days_Total_Span_Hours_Apply2__c). To take this option use Script 3 below.
2. Populate the Days Total Span Hours Apply fields (tc9_et__Days_Total_Span_Hours_Apply2__c) on all Interpretation Rules with the values of 'Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday and Public Holiday' (ignoring the values in the old fields). To take this option use Script 4 below.

Script 1

```
//Payroll post-install script for Lilly Pilly 2021 Release - Interpretation Rules - Days Minimum Rest Applies  
//from depreciated fields to new fields
```

```
List<tc9_et__Interpretation_Rule__c> interpretationrules = [Select Id,  
tc9_et__Days_Minimum_Rest_Hours_Apply__c, tc9_et__Days_Minimum_Rest_Hours_Apply2__c from  
tc9_et__Interpretation_Rule__c Where tc9_et__Days_Minimum_Rest_Hours_Apply__c != null];  
for(tc9_et__Interpretation_Rule__c Interpretationrule : interpretationrules){
```

```
Interpretationrule.tc9_et__Days_Minimum_Rest_Hours_Apply2__c =  
Interpretationrule.tc9_et__Days_Minimum_Rest_Hours_Apply__c;  
}
```

```
update interpretationrules;
```

Script 2

```
//Payroll post-install script for Lilly Pilly 2021 Release - Interpretation Rules - Days Minimum Rest Applies  
// to add all days including Public Holidays
```

```
List<tc9_et__Interpretation_Rule__c> interpretationrules = [Select Id,  
tc9_et__Days_Minimum_Rest_Hours_Apply__c, tc9_et__Days_Minimum_Rest_Hours_Apply2__c from  
tc9_et__Interpretation_Rule__c Where tc9_et__Days_Minimum_Rest_Hours_Apply__c != null];  
for(tc9_et__Interpretation_Rule__c Interpretationrule : interpretationrules){
```

```
Interpretationrule.tc9_et__Days_Minimum_Rest_Hours_Apply2__c =  
'Monday;Tuesday;Wednesday;Thursday;Friday;Saturday;Sunday;Public Holiday';  
}
```

```
update interpretationrules;
```

Script 3

```
//Payroll post-install script for Lilly Pilly 2021 Release - Interpretation Rules - Days Total Span Apply from  
//depreciated fields to new fields
```

```
List<tc9_et__Interpretation_Rule__c> interpretationrules = [Select Id,  
tc9_et__Days_Total_Span_Hours_Apply__c, tc9_et__Days_Total_Span_Hours_Apply2__c from  
tc9_et__Interpretation_Rule__c Where tc9_et__Days_Total_Span_Hours_Apply__c != null];  
for(tc9_et__Interpretation_Rule__c Interpretationrule : interpretationrules){
```

```
Interpretationrule.tc9_et__Days_Total_Span_Hours_Apply2__c =  
Interpretationrule.tc9_et__Days_Total_Span_Hours_Apply__c;  
}
```

```
update interpretationrules;
```

Script 4

```
//Payroll post-install script for Lilly Pilly 2021 Release - Interpretation Rules - Days Total Span Applies to  
//add all days including Public Holidays
```

```
List<tc9_et__Interpretation_Rule__c> interpretationrules = [Select Id,  
tc9_et__Days_Total_Span_Hours_Apply__c, tc9_et__Days_Total_Span_Hours_Apply2__c from  
tc9_et__Interpretation_Rule__c Where tc9_et__Days_Total_Span_Hours_Apply__c != null];
```

```
for(tc9_et__Interpretation_Rule__c Interpretationrule : interpretationrules){
```

```
    Interpretationrule.tc9_et__Days_Total_Span_Hours_Apply2__c =  
'Monday;Tuesday;Wednesday;Thursday;Friday;Saturday;Sunday;Public Holiday';  
}
```

```
update interpretationrules;
```

Populate Different Pay Codes for Sundays and Public Holidays (Optional)

By default, the main pay code defined on each Interpretation Breakpoint will be used for all days/public holidays relating to that breakpoint. If you wish to utilise the new functionality and define a different Pay Code for Sundays and/or Public Holidays, you will need to update the breakpoints to set the optional pay codes.

Utilise Daily Interpretation Rules for Partial Days

The functionality to define partial day breakpoints in daily Interpretation Rules is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped. The below configuration steps should be completed if the functionality is required:

1. Update profile/permission sets (Optional)
2. Update page layouts for new fields (Optional)
3. Update new fields on existing records (Optional)

Update Profile/Permission Sets (Optional)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 14](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Interpretation Rule (tc9_et__Interpretation_Rule__c) > Page Layouts
3. Select a page layout that is used for the Daily Rates record type
4. Add the following field to the layout
 - Apply Partial Daily Rates field (tc9_et__Apply_Partial_Daily_Rates__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Daily Rates record type
7. Return to the Object Manager
8. Select Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c) > Page Layouts
9. Select a page layout that is used for the Daily Rate record type
10. Add the following field to the layout
 - Daily Quantity (tc9_et__Daily_Quantity__c)
11. Click Save
12. Repeat steps 9 to 11 for all page layouts that are used for the Daily Rate record type

Update New Fields on Existing Records (Optional)

By default, daily interpretation rules will continue to operate on the day, or part thereof basis. If you wish to utilise the new functionality to define partial breakpoints for any of your existing daily interpretation rules, you will need to update them via the Interpretation Builder.

Pay Partial Allowances

The functionality to define partial allowance breakpoints in Interpretation Rules is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped. The below configuration steps should be completed if the functionality is required:

1. Update profile/permission sets (Optional)
2. Update page layouts for new fields (Optional)
3. Update new fields on existing records (Optional)

Update Profile/Permission Sets (Optional)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 15](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Interpretation Breakpoint (tc9_et__Interpretation_Breakpoint__c) > Page Layouts
3. Select a page layout that is used for any Allowance record type
4. Add the following field to the layout
 - o Pay Partial Quantity (tc9_et__Pay_Partial_Quantity__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used for the Allowance record type

Update New Fields on Existing Records (Optional)

By default, allowances will continue to be interpreted on a whole period (hours, days, frequency) basis only. If you wish to utilise the new functionality to pay allowances for partial periods, you will need to update them via the Interpretation Builder

Provide Greater Detail on Pay Advice Documents

The functionality that allows users to choose what level of detail is to be provided on Pay Advice documents is optional, however there is required configuration that must be completed regardless of if the function is used. The below configuration steps should be completed:

1. Update profile/permission set (Compulsory)
2. Update page layouts for new fields (Optional)
3. Create a new picklist value for fields (Optional)
4. Update new fields on existing records (Optional)
5. Update the Pay Advice Detail Level on Pay Schedules (Optional)

Update Profile/Permission Sets (Compulsory)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 16](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Pay Advice Line (tc9_pr__Pay_Advice_Line__c) > Page Layouts
3. Select a page layout that is used for any Pay Advice Line record type
4. Add the following fields to the layout
 - o Project Code (tc9_pr__Project_Code__c)

5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used on the Pay Advice Line object
7. Return to the Object Manager
8. Select Project Code > Page Layouts
9. Select a page layout that is used for any Assignment Project Code record type
10. Add the following field to the layout
 - o Pay Advice Description (tc9_pr__Pay_Advice_Description__c)
11. Click Save
12. Repeat steps 9 to 11 for all page layouts that are used on the Assignment Project Code record type

Create a New Picklist Value for Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Objects Manager
2. Select Schedule (tc9_pr__Schedule__c) > Fields & Relationships
3. Select the Pay Advice Detail Level field (tc9_pr__Pay_Advice_Detail_Level__c)
4. In the values section, click the New button
5. On the displayed page, add the new value Project Code and apply it only for the Pay Schedule record type (See Figure 1)
6. Click Save

Figure 1

Add Picklist Values

Pay Advice Detail Level

Add one or more picklist values below. Each value should be on its own line and it is used for both a value's label and API name.

If a value matches an inactive value's API name, that value is reactivated with its previous label.

If a value matches an inactive value's label but not the API name, a new value is created.

Project Code

To add the new value to the picklist values for a particular Record Type, check the appropriate boxes below.

☐ Record Type Name	Description
☒ Pay Schedule	Used to define Pay Schedules
☐ Work Schedule	A work schedule consisting of one or more weeks.

Update New Field on Existing Records (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

When Pay Advice documents are created with the corresponding Detail Level set to be "Project Code", the value held in the Project Code's Pay Advice Description field is displayed on the Pay Advice. To ensure there is a value to be used on the Pay Advice documents the Pay Advice Description field should be populated.

To update the fields the below steps should be followed:

1. Run Script 1 defined below through dev console to automatically populate the field on all current Project Codes with the Project Code Name
2. Manually edit any Project Codes that require different values than those set by the script

Script 1

```
//Payroll post-install script for Lilly Pilly 2021 Release - Project Code - Pay Advice Description
```

```
List<tc9_pr__Project_Code__c> projects = [Select Id, Name, tc9_pr__Pay_Advice_Description__c,  
tc9_pr__Assignment__c from tc9_pr__Project_Code__c Where tc9_pr__Pay_Advice_Description__c = null  
AND tc9_pr__Assignment__c != null];
```

```
for(tc9_pr__Project_Code__c project : projects){  
    project.tc9_pr__Pay_Advice_Description__c = project.Name;  
}
```

Update the Pay Advice Detail Level on Pay Schedules (Optional)

To enable Pay Advice documents to be created at the Project Code level, the Pay Advice Detail Level must be set to the Project Code option. Any Pay Schedules that require the new level of detail should be updated directly via the standard page.

Set a Custom Pay Advice Footer

The functionality to set a custom Pay Advice Footer is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped. The below configuration steps should be completed if the functionality is required:

1. Update profile/permission Sets (Optional)
2. Update page layouts for new fields (Optional)
3. Update new fields on existing records (Optional)

Update Profile/Permission Sets (Optional)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 17](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Pay Advice Template (tc9_pr__Pay_Advice_Template__c) > Page Layouts
3. Select a page layout that is used for any Pay Advice Template record type
4. Add the following fields to the layout
 - Text Footer (tc9_pr__Text_Footer__c)
 - Position - Footer (tc9_pr__Position_Footer__c)
 - Colour Footer Text (tc9_pr__Colour_Footer_Text__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used on the Pay Advice Template object

Update New Fields on Existing Records (Optional)

By default, Pay Advice documents will continue to generate without the custom footer. If you wish to utilise the new custom footer functionality, you will need to update the relevant fields on the associated Pay Advice Templates.

Define a Default Pay Advice Message

The functionality to set a default Pay Advice message is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped. The below configuration steps should be completed if the functionality is required:

1. Update profile/permission sets (Optional)
2. Update page layouts for new fields (Optional)

Update Profile/Permission Sets (Optional)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 18](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Pay Advice Template (tc9_pr__Pay_Advice_Template__c) > Page Layouts
3. Select a page layout that is used for any Pay Advice Template record type
4. Add the following fields to the layout
 - Text Pay Advice Message (tc9_pr__Text_Pay_Advice_Message__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used on the Pay Advice Template object

Mark Pay Advice Templates as Active or Inactive

The functionality to mark Pay Advice Templates as Active or Inactive is compulsory and all the below configuration steps should be completed:

1. Update profile/permission set (Compulsory)
2. Update page layouts for new fields (Compulsory)
3. Update new fields on existing records (Compulsory)

Update Profile/Permission Sets (Compulsory)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 19](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Compulsory)

This requirement needs to be completed regardless of if the option to use the functionality is taken.

1. Go to Setup > Object Manager
2. Select Pay Advice Template (tc9_pr__Pay_Advice_Template__c) > Page Layouts
3. Select a page layout that is used for any Pay Advice Template record type
4. Add the following field to the layout
 - Available for Use (tc9_pr__Available_for_Use__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used on the Pay Advice Template object

Update New Fields on Existing Records (Compulsory)

When the Pay Advice documents are created, the Available for Use field will determine if the Pay Advice Templates can be used. To ensure Pay Advice documents can continue to generate without error, the existing Pay Advice Templates should be updated to populate the new field.

To update the fields the following steps should be followed:

1. Run Script 1 defined below through dev console to automatically set the Available For Use field to be "Yes"
2. Manually edit any Pay Advice Templates that need to be made inactive.

Script 1

```
//Payroll post-install script for Lilly Pilly 2021 Release - Pay Advice Templates - Available for Use

List<tc9_pr__Pay_Advice_Template__c> templates = [Select Id, tc9_pr__Available_For_Use__c from
tc9_pr__Pay_Advice_Template__c];

for(tc9_pr__Pay_Advice_Template__c template : templates){
  if(template.tc9_pr__Available_for_Use__c == null){
    template.tc9_pr__Available_For_Use__c = 'Yes';}
}

update templates;
```

Consolidate Multiple Pay Advice Amounts in a Payment File

The functionality to consolidate multiple Pay Advice amounts in a Payment File is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped. The below configuration steps should be completed if the functionality is required:

1. Update profile/permission set (Optional)
2. Update page layouts for new fields (Optional)
3. Update new fields on existing records (Optional)

Update Profile/Permission Sets (Optional)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 20](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Payee (tc9_pr__Payee__c) > Page Layouts
3. Select a page layout that is used for any Payee record type
4. Add the following fields to the layout
 - Payment Consolidation (tc9_pr__payment_consolidation__c) *
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used on the Payee object
7. Return to the Object Manager
8. Select Payment File Line (tc9_pr__Payment_File_Line__c) > Page Layouts
9. Select a page layout that is used for any Payment File Line record type
10. Add the following fields to the layout
 - Payment Consolidation (tc9_pr__payment_consolidation__c)
11. Click Save
12. Repeat steps 9 to 11 for all page layouts that are used on the Payment File Line object

* The Payment Consolidation field (Payment_Consolidation__c) on Payee is an existing field that was previously unused so it may not have been added to page layouts. It is detailed here to ensure the correct permission is given for the functionality.

Update New Field on Existing Records (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

By default, the Payment Consolidation will be processed as “Separated”, which is set as default option at the package level. This means that in most instances, the field will be populated and, on the occasions it is not, the Payment File functionality will continue to operate without error.

That said, if the option to use the functionality is undertaken, you may choose to ensure the field on the Payee is populated so the setting is clearer to the user. To update the field the following steps should be followed:

1. Run Script 1 defined below through dev console to automatically set the Payment Consolidation field on any Payees where it is not populated to be “Separated”
2. Manually edit any Payee records that need to be made “Consolidated”

Script 1

```
//Payroll post-install script for Lilly Pilly 2021 Release - Payee - Payment Consolidation

List<tc9_pr__Payee__c> payees = [Select Id, tc9_pr__Payment_Consolidation__c from tc9_pr__Payee__c
where tc9_pr__Payment_Consolidation__c = null];

for(tc9_pr__Payee__c payee : payees){
    payee.tc9_pr__Payment_Consolidation__c = 'Separated';
}

update payees;
```

Automatically Assign Defined Permission Sets to Community Users

The functionality to automatically assign defined permission sets to community users is optional, however if the optional functionality to auto create community users introduced in v1.84 is in use, the auto assignment to permission sets must also be set up. The below configuration steps should be completed if the functionality is required:

1. Populate the Time2pay Portal Permission Sets Configuration custom setting (Optional)

Populate the Time2pay Portal Permission Sets Configuration Custom Setting (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Custom Code > Custom Setting
2. Locate the Time2pay Portal Permission Set custom setting and click on the Manage link alongside it
3. Click the New button
4. Populate the following fields
 - o Name
Give the record a useful name that will help identify which Profile Name/Permission Set Combination is set up. This name must be unique.
 - o Portal Profile Name
Defines the Profile Name that will be used to identify which permission sets will be automatically assigned during community user creation and update. The value in this field must match an existing User Profile's Name.
 - o Permission Set API Name
Defines the Permission set that will be automatically assigned during community user creation and update. The value in this field must match the API Name of the Permission.
5. Click Save
6. Repeat steps 3 to 5 for all Profile/Permission Set combinations required.

Note: There can be multiple records created per Profile. Where there are multiple records created for a profile, it will result in multiple permission sets being assigned to Users.

Customised Invoice Grouping

The functionality to use Custom Invoice Group By IDs is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped. The below configuration steps should be completed if the functionality is required:

1. Update profile/permission sets (Optional)
2. Update page layouts for new fields (Optional)
3. Create a new picklist value for fields (Optional)

Update Profile/Permission Sets (Optional)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 21](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Object Manager
2. Select Assignment (tc9_pr__Assignment__c) > Page Layouts
3. Select a page layout that is used for any Assignment record type excluding the Employee record type
4. Add the following fields to the layout
 - o Custom Invoice Group by ID (tc9_et__Custom_Invoice_group_by_id__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used on the Assignment object excluding those used for the Employee record type

Create a New Picklist Value for Fields (Optional)

Update

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Objects and Fields > Picklist Value Sets
2. Select Invoice Group By Picklists
3. Click the New button in the Values section
4. On the displayed page, add the new value Custom Group By Id
5. Check the "Add new picklist value sets to all record types that use this global value set" checkbox (See Figure 1)
6. Click Save

Figure 1

Add Picklist Values

Invoice Group By Picklists

Add one or more picklist values below. Each value should be on its own line and it is used for both a value's label and API name.

If a value matches an inactive value's API name, that value is reactivated with its previous label.

If a value matches an inactive value's label but not the API name, a new value is created.

Custom Group By Id

☒ Add the new picklist values to all Record Types that use this Global Value Set.

Cancel

Include Expense Receipts/Evidences as Attachments with Invoice Emails

The functionality to include expense receipts/evidence as attachments with invoice emails is optional. This requirement only needs to be completed if the option to use the functionality is taken. If not, these items can be skipped. The below configuration steps should be completed if the functionality is required:

1. Update Profile/Permission Sets (Optional)
2. Update page layouts for new fields (Optional)
3. Update new fields on existing records (Optional)

Update Profile/Permission Sets (Optional)

The below detailed fields have had read/edit access added to the following permission sets provided with the package. Where these are in use, the permissions required will be automatically provisioned.

- 2cloudnine Payroll Admin
- 2cloudnine Time2Pay All Access

If the packaged permission sets are not used within the organisation, the access outlined in [Appendix 22](#) must be made available for use either via profiles or custom permission sets.

Update Page Layouts for New Fields (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item

can be skipped.

1. Go to Setup > Object Manager
2. Select Invoice Setting (tc9_et__Invoice_Setting__c) > Page Layouts
3. Select a page layout that is used for the Payroll Items record type
4. Add the following field to the layout
 - o Exp Claim Attachments with Invoice (tc9_et__Exp_Claim_Attachments_with_Invoice__c)
5. Click Save
6. Repeat steps 3 to 5 for all page layouts that are used on the Payroll Items record type

Update New Field on Existing Records (Optional)

To send Expense receipts/evidence with Invoice emails, the Exp Claim Attachments with Invoice field must be set to the “Yes” option in the Invoice Setting. Any Invoice Settings that require this should be updated directly via the standard page.

Make 'Funding Requirement' Mandatory

The functionality to make the Funding Requirement a mandatory field on the Create Pay Batch page is optional. The below configuration steps should be completed if the functionality is required:

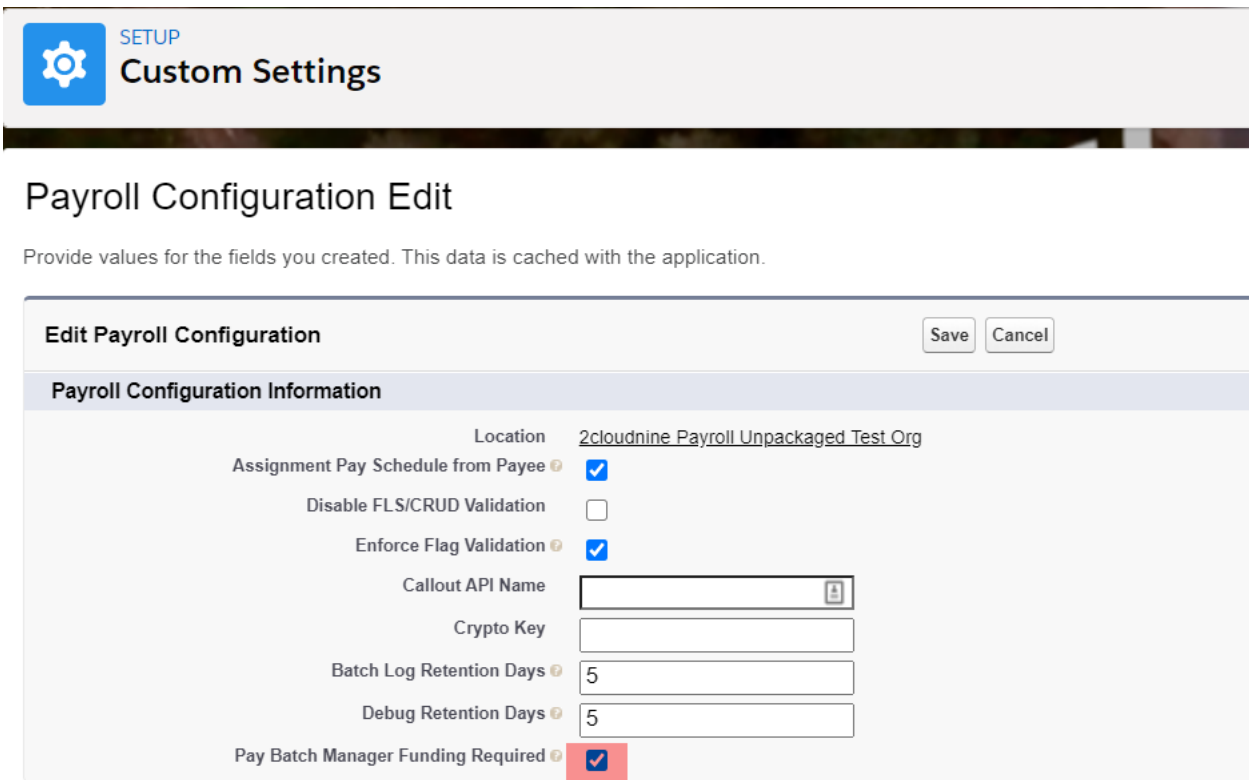

1. Turn on functionality via custom setting (Optional)

Turn On Functionality via Custom Setting (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Go to Setup > Custom Code > Custom Setting
2. Locate the Payroll Configuration custom setting and click on the Manage link alongside it
3. Click the Edit button
4. Set the Pay Batch Manager Funding Required checkbox field to be checked as “True” (See Figure 1)
5. Click Save

Pay Batch Manager Funding Required	☒

Adhere to SuperStream Requirements

The introduction of the Super Fund validation is a compulsory validation that will come into effect on installation of the package. To prevent validation errors occurring during the payroll processing, the below configuration steps should be completed:

1. Check and Update data on existing records (Compulsory)

Check and Update Data On Existing Records (Compulsory)

A check of current, existing Payee Withholding records should be completed to ensure that the Superannuation Fund is populated and, where not, corrective action should be taken.

To make this process easier, a new list view on the Payee Withholding object, No Super Fund, has been created. This will list any AU Super records that have not expired and do not have the superannuation fund populated.

From this list view the following corrective action should be taken:

- Where the Pay Batch Event Processing Status is 'New' (see column in list view), the record can be edited directly.
- Where the Pay Batch Event Processing Status is not 'New', the Payee Withholding record has already been applied to a payroll therefore can not be updated. You will need to expire the existing record and create a new one with the Superannuation Fund populated.

Customise Communities/Experience Terminology

The functionality to customise terminology used within Communities/Experience is optional. If required, system administrators can add Translations/Overrides against individual Custom Labels and the changes will be reflected within both the Employee and Approver Communities/Experience. The below configuration steps should be completed if the functionality is required:

1. Override/translate custom labels (Optional)

Override/Translate Custom Labels (Optional)

This requirement only needs to be completed if the option to use the functionality is taken. If not, this item can be skipped.

1. Use the table provided in [Appendix 23](#) to search for the out of the box terminology used within Communities/Experience and establish the custom label that needs to be updated to change it
2. Go to Setup > User Interface > Custom Labels
3. Locate the custom label you wish to override/translate and click the Name link (not the Edit link alongside it)
4. On the displayed page, scroll down to the Local Translations/Overrides section and click the New Local Transactions/Overrides button
5. Populate the required fields
6. Click Save
7. Repeat steps 1 to 6 until all overrides / translations required are completed

UPDATE: The table provided in Appendix 23 has been updated to incorporate new Custom Label information.
