

Purpose

The purpose of this quick reference guide is to step through the process of creating Employee Specific Rate Calculators. The intended audience for this document is System Administrators / Standard Users.

There are two methods available to create Employee Specific Rate Calculators:

1. Create Employee Specific Rate Calculators via Rate Calculator Manager
2. Create Employee Specific Rate Calculators via an Assignment

Steps

Create Employee Specific Rate Calculators via Rate Calculator Manager

To create an Employee Specific Rate Calculator from the Manager page, follow the steps below:

1. Open the Rate Calculator Template and click on the **Edit** button to launch the Rate Calculator Manager (see Figure 1).
2. Click on the drop-down arrow and select **Apply to Assignment** (see Figure 2).
3. To filter the records available through the Assignment lookup field by related Client and/or Employee record, follow this step in the sequence provided:
 - a. Click on the **Apply Assignment Filtering** button (see Figure 3).

Figure 1

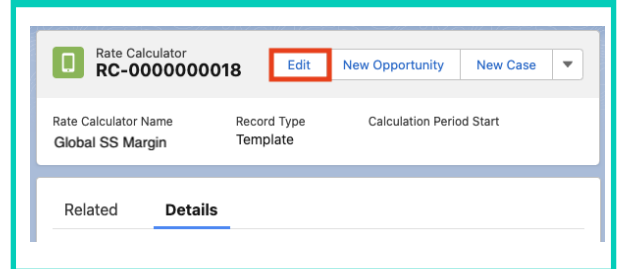

Figure 2

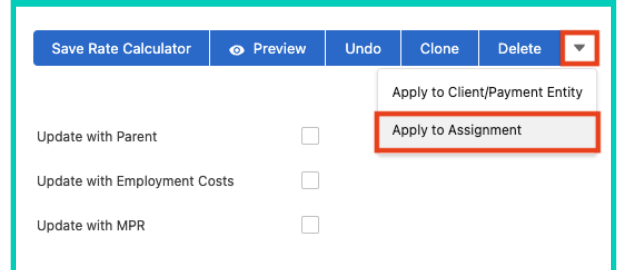

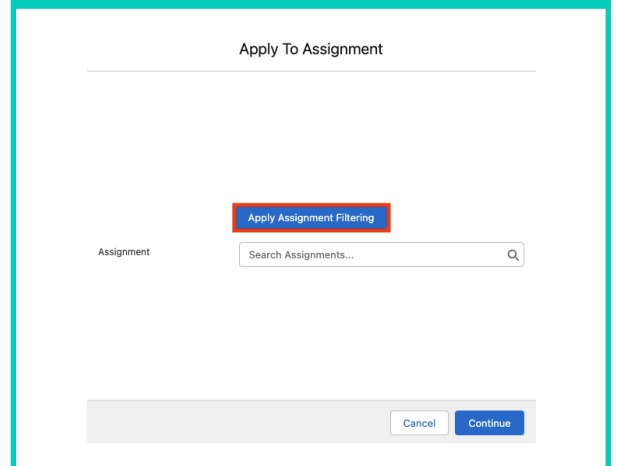

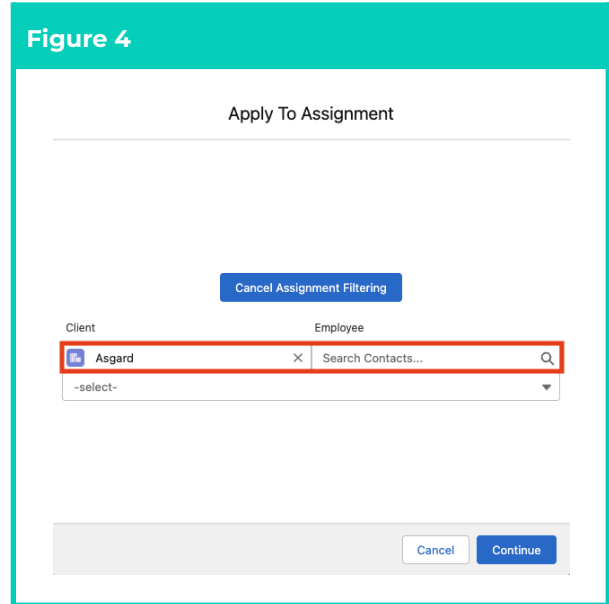

Figure 3

- b. Populate the **Client** and/or **Employee** fields using the lookup options available to provide matching Assignments (see Figure 4).

Important Notes

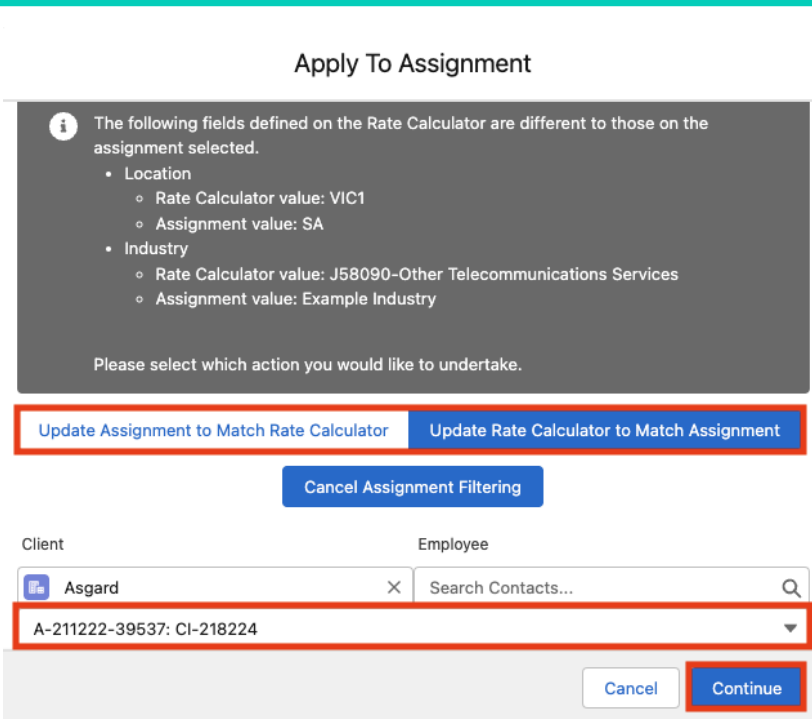

(Figures 1 to 5)

It is not recommended to apply Rate Calculators to Assignments that use Template Groups to create Assignment Rates, as additional Assignment Rates may create and complicate the automation processes. This restriction only applies to Template Groups and not Minimum Pay Rates.

If the Assignment and Rate Calculator Template contains different Interpretation Rules, the new Rate Calculator will inherit both Interpretation Rules. HOWEVER, Pay Codes inherited from the Assignment's Interpretation Rule will be blank on the Rate Calculator, and must be manually populated following creation.

5. If prompted, select from the following options to resolve any conflicting Risk Classification, Location, Industry, Award Classification, and Award Level between the Rate Calculator Template and the Assignment (see Figure 6):
 - a. **Update Assignment to Match Rate Calculator**
OR
 - b. **Update Rate Calculator to Match Assignment**
OR
 - c. Select another **Assignment** using the lookup options available, and click on the **Continue** button to re-validate the Risk Classification, Location, Industry, Award Classification and Award Level fields between the two records.

Figure 6

Apply To Assignment

i The following fields defined on the Rate Calculator are different to those on the assignment selected.

- Location
 - Rate Calculator value: VIC1
 - Assignment value: SA
- Industry
 - Rate Calculator value: J58090-Other Telecommunications Services
 - Assignment value: Example Industry

Please select which action you would like to undertake.

The Rate Calculator Template is now related to the Assignment record, and automatically creates an **Employee Specific Rate Calculator** related to the Assignment.

Important Notes

(Figures 1 to 6)

The Pay Rates, Mark Up / Margin Rates, Location, Industry, and Risk Classification fields are required to apply Employment Cost Items and generate Rate Calculator Lines.

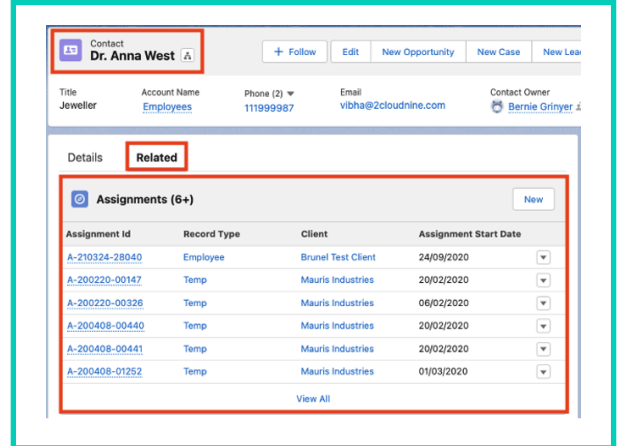

No new Rate Calculator Rate records will be created if the new Minimum Pay Rate amount is lower than the current Rate Calculator Pay Rate.

Create Employee Specific Rate Calculators via the Assignment

To create an Employee Specific Rate Calculator from the Assignment, follow the steps below:

1. Navigate to the **Temp Assignment** record that you want to create the Employee Specific Rate Calculator for (see Figure 7):
 - a. Open the **Related** tab.
 - b. Select the **Temp Assignment** to associate the Rate Calculator with it.

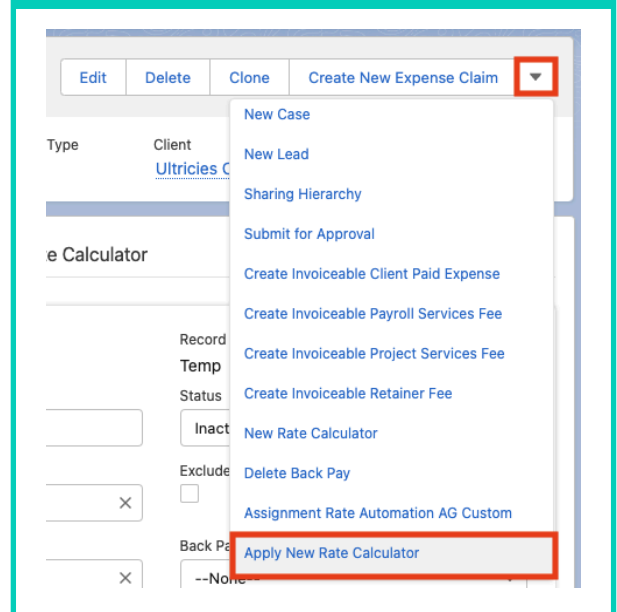

Figure 7

Assignment Id	Record Type	Client	Assignment Start Date
A-210324-28040	Employee	Brunel Test Client	24/09/2020
A-200220-00147	Temp	Mauris Industries	20/02/2020
A-200220-00326	Temp	Mauris Industries	06/02/2020
A-200408-00440	Temp	Mauris Industries	20/02/2020
A-200408-00441	Temp	Mauris Industries	20/02/2020
A-200408-01252	Temp	Mauris Industries	01/03/2020

2. Click on the drop-down menu from the Assignment record and select **Apply New Rate Calculator** (see Figure 8). If the Apply New Rate Calculator button is not listed, review whether the selected Temp Assignment is Active.

Figure 8

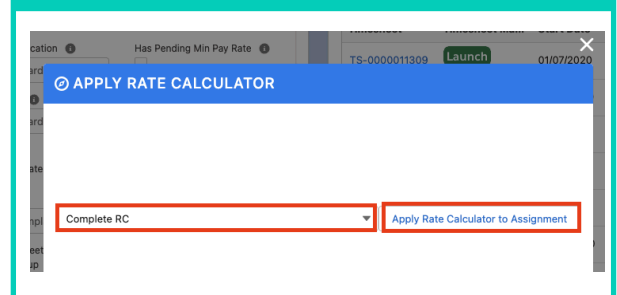

Buttons: Edit, Delete, Clone, Create New Expense Claim (dropdown)

Dropdown Menu Options:

- New Case
- New Lead
- Sharing Hierarchy
- Submit for Approval
- Create Invoiceable Client Paid Expense
- Create Invoiceable Payroll Services Fee
- Create Invoiceable Project Services Fee
- Create Invoiceable Retainer Fee
- New Rate Calculator
- Delete Back Pay
- Assignment Rate Automation AG Custom
- Apply New Rate Calculator** (highlighted)

3. Select a Template from the picklist options and click on the **Apply Rate Calculator to Assignment** button (see Figure 9). The lookup will only display Globally Enabled Rate Calculator Templates.

Figure 9

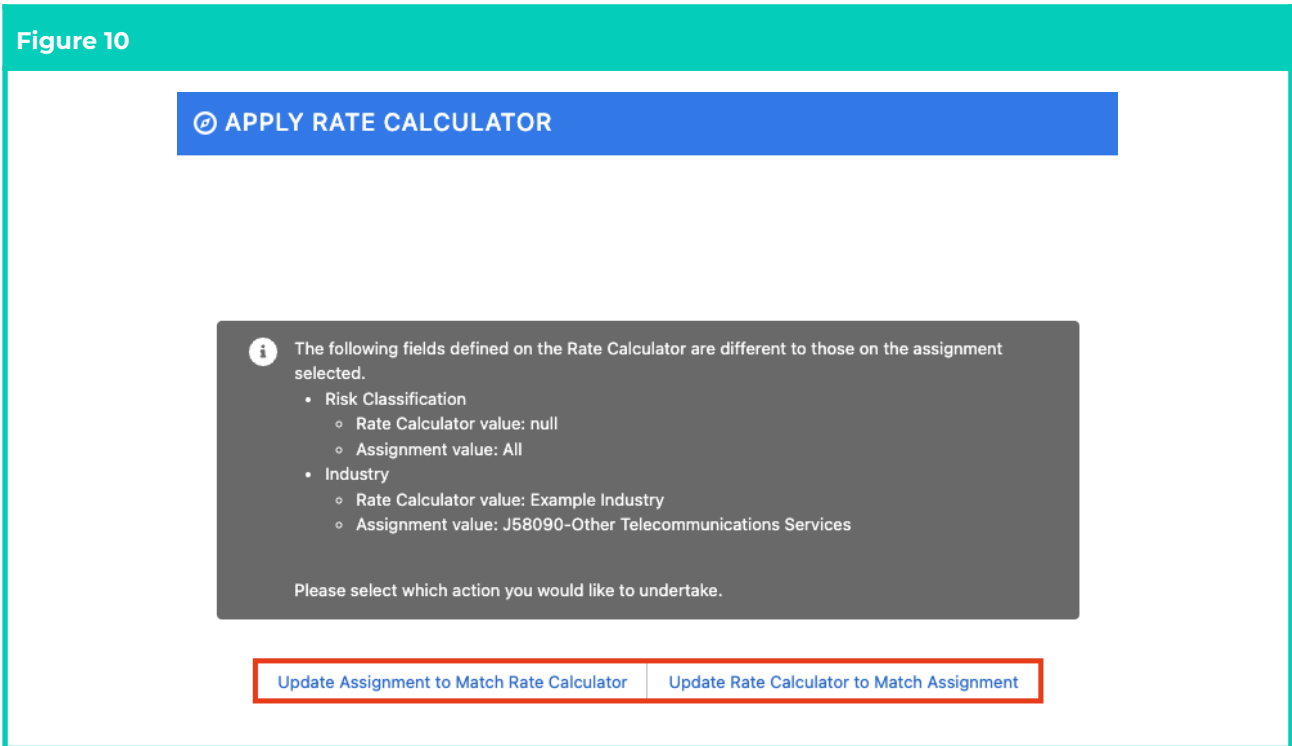

Dialog Title: APPLY RATE CALCULATOR

Picklist: Complete RC (highlighted)

Button: Apply Rate Calculator to Assignment (highlighted)

4. A validation will occur to determine whether there are any conflicts between the Assignment and Rate Calculator Template records for the following fields:
 - Location
 - Industry
 - Risk Classification
 - Award Classification
 - Award Level
5. If conflicts are identified, the User will be provided an overview of the discrepancies so corrective action can be taken. Please select one of the following:
 - a. **Update Assignment to Match Rate Calculator**
 - OR**
 - b. **Update Rate Calculator to Match Assignment**

Figure 10

The screenshot shows a blue button labeled "APPLY RATE CALCULATOR" with a checkmark icon. Below it is a grey information box with a white 'i' icon. The text inside the box states: "The following fields defined on the Rate Calculator are different to those on the assignment selected." It lists two categories: "Risk Classification" (Rate Calculator value: null, Assignment value: All) and "Industry" (Rate Calculator value: Example Industry, Assignment value: J58090-Other Telecommunications Services). At the bottom of the box, it says "Please select which action you would like to undertake." Below the box are two buttons: "Update Assignment to Match Rate Calculator" and "Update Rate Calculator to Match Assignment", both highlighted with a red border.

**Important Notes***(Figures 7 to 10)*

If Pay Rates, Mark Up / Margin Rates, Industry and Risk Classification were not previously defined for the Rate Calculator Template, they must be defined in the Employee Specific Rate Calculator, or inherited from related Assignment records where applicable.

Changing values on the Award Classification and Award Level fields will affect MPR automation, which may impact Assignment Rates.

Update Employee Specific Rate Calculator

Once a Rate Calculator Template has been applied to an Assignment and the new Employee Specific Rate Calculator has been created, the Rate Calculator field on the Assignment will be automatically populated with the new Employee Specific Rate Calculator.

To provide a direct method to update an Employee Specific Rate Calculator, the Assignment includes a Rate Calculator tab. This tab provides Users access to all components needed to update the Employee Specific Rate Calculator (see Figure 11):

- Employment Costs Setup
- Margin/Markup Rates
- Rate Calculator Rates
- Rate Calculator Lines

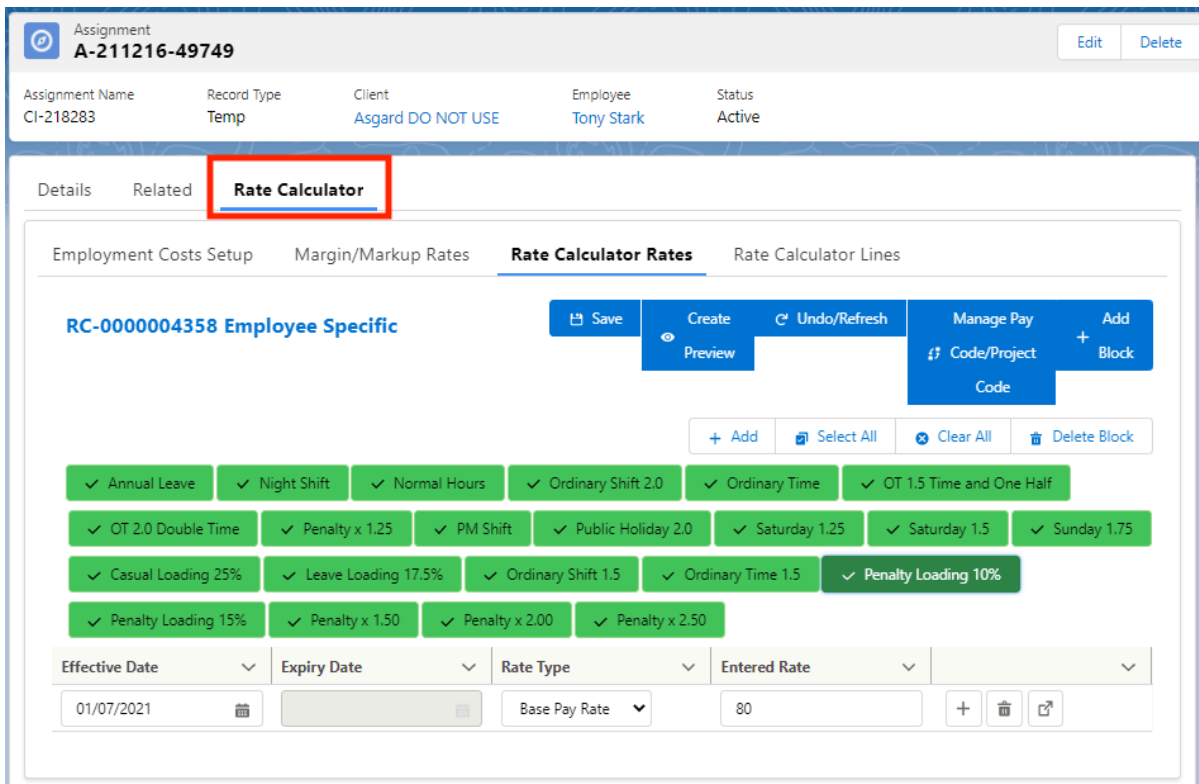

Important Notes

(Figure 11)

As of the current Rate Calculator release, it is strongly recommended the Employee Specific Rate Calculator be accessed from the Rate Calculator record by selecting the record on the Assignment and clicking Edit.

Whilst most functionality is supported from the Assignment, Pay Rate Loadings, and some record update features have been disabled.

Employment Costs Setup

Whilst all Employee Specific Rate Calculators are created from a Template, the Employment Costs can still be modified to add or remove Employment Costs at the Employee Specific Rate Calculator level. As an example, a Template may contain a Superannuation Oncost, but the Employee Specific Rate Calculator is applied to an Assignment with a Contractor that does not attract Superannuation.

To add an Employment Cost from an Employee Specific Rate Calculator:

1. Select the **Rate Calculator** tab on the Assignment and then **Employment Costs Setup**.
2. Locate the Employment Cost lookup and select the **+** button.
3. In the pop-up window, click **Select** on the Employment Cost to be added (See Figure 12.)
4. Select the **Save** button.
5. Wait for the Scheduled Jo, or click the **Rate Calculator Lines** tab and select the **Calculate Lines** button to generate the Rate Calculator Lines with the new oncost.

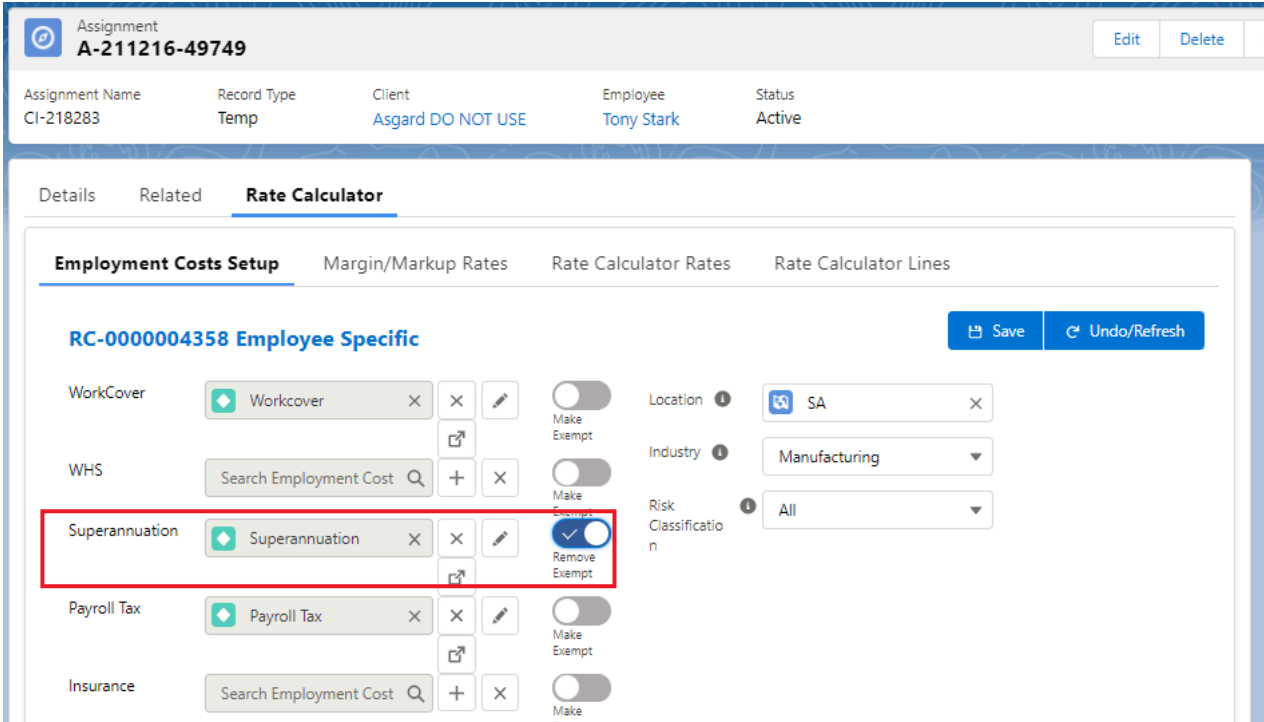

Figure 12

To exempt an Employment Cost from an Employee Specific Rate Calculator:

1. Select the **Rate Calculator** tab on the Assignment and then **Employment Costs Setup**.
2. Locate the Employment Cost to Exempt and click the **Make Exempt** toggle (See Figure 13).
3. Click **Save**.
4. Wait for the Scheduled Job, or click the **Rate Calculator Lines** tab and select the **Calculate Lines** button, to generate the new Rate Calculator Lines exempt of the oncost.

Important Notes

(Figure 13)

Any changes to Employment Costs will apply to all Rate Calculator Lines. If you require a change to an Employment Cost to only be effective from a specific date, please ensure your Employment Costs and Employment Cost Items are set up to cater for this scenario.

Margin/Markup Rates

Employee Specific Rate Calculators are always created with a relationship to the Template Rate Calculator as its parent, along with the same value defined on the **Update with Parent** checkbox (see Figure 14).

When created, the Employee Specific Rate Calculator will inherit the same Employment Costs, Margin/Markup records, Pay Rate Records, and Pay Rate Loading records defined on the Parent Rate Calculator, regardless of whether the Update with Parent is checked or not.

Figure 14

RC-0000004358 Employee Specific

Basic Details

*Rate Calculator Name: RC-0000004357 A-211216-49749 [Update with Parent] ☒

Parent Rate Calculator: RC-0000004357 [Update with Employment Costs] ☐

When **Update with Parent** is checked on an Employee Specific Rate Calculator, any new or updated Margin/Markup or Pay Rate records on the Parent Rate Calculator will automatically apply to the Employee Specific Rate Calculator.

Rate Calculator Rates

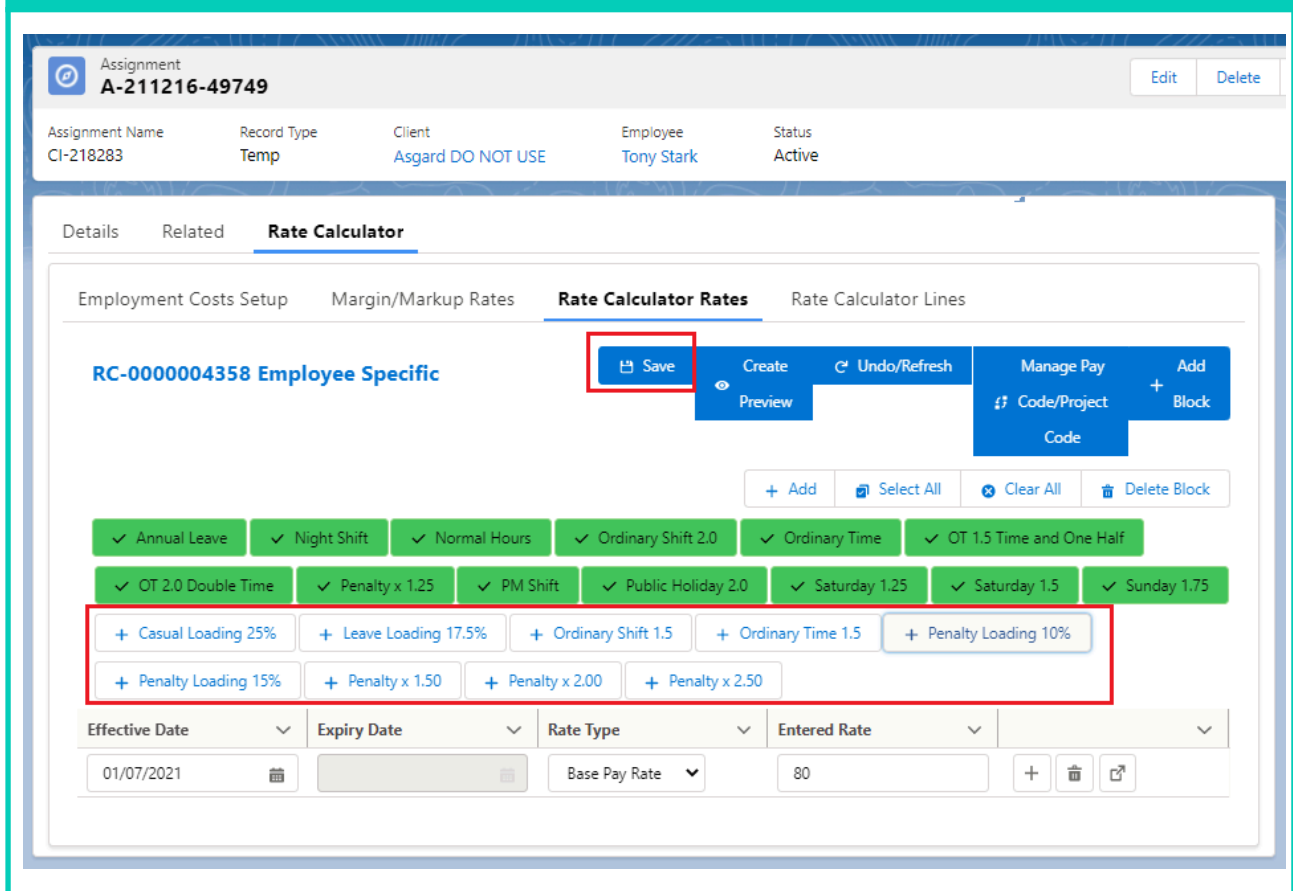

Employee Specific Rate Calculators will always inherit the Interpretation Rule defined on the Assignment. This means if a Template has no Interpretation Rule or a different Interpretation Rule, the Pay Codes on the Pay Rate and Margin/Markup (if Define Markup Margin Per Pay Code is enabled on the Template) may not yet be included.

It is important that all Pay Codes are assigned a Pay Rate and, optionally Margin/Markup record so that each has Rate Calculator Lines created, preventing issues during Timesheet Interpretation.

To include any missing Pay codes:

1. Select the **Rate Calculator** tab on the Assignment and then **Rate Calculator Rates**.
2. Select the missing Pay Codes, or create a new block if required (See Figure 15).
3. Select the **Save** button.
4. Wait for the Scheduled Job, or click the **Rate Calculator Lines** tab and select the **Calculate Lines** button to generate the new Rate Calculator Lines with the missing Pay Codes.

 ☐ Penalty x 2.00
 ☐ Penalty x 2.50

Effective Date: 01/07/2021, Expiry Date: , Rate Type: Base Pay Rate, Entered Rate: 80

Repeat this for Margin/Markup if the “Define Markup Margin Per Pay Code is enabled” is checked.

Rate Calculator Lines

Assignment Rates are only created when Rate Calculator Lines are created from Employee Specific Rate Calculators. After the Rate Calculator Lines are created or updated, the product automatically creates the required Assignment Rates, resulting in a 1-1 relationship between the Rate Calculator Line and the Assignment Rate. For more information, please refer to the [ORC Rate Calculator Functionality - Key Information](#).

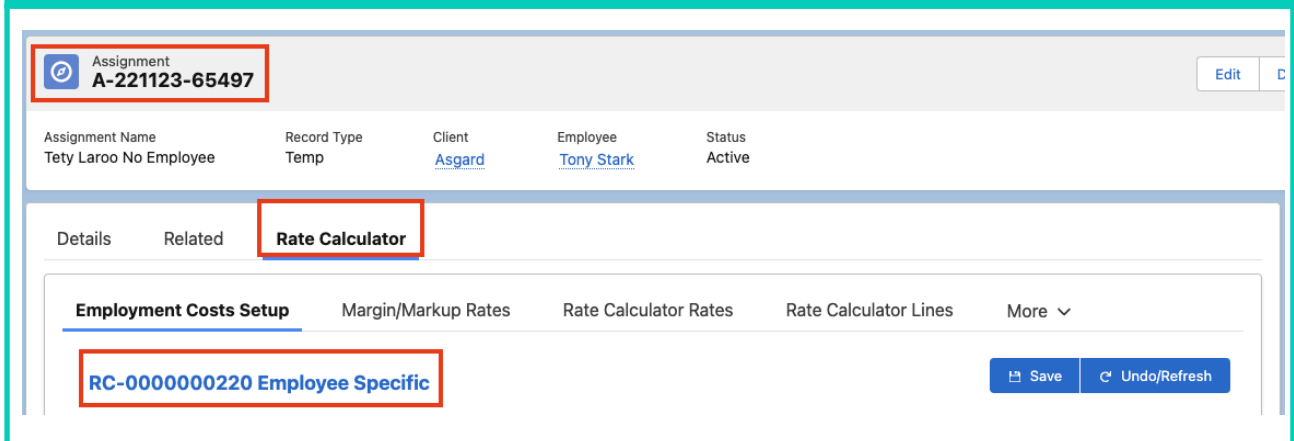

Delete an Employee Specific Rate Calculator

If an Employee Specific Rate Calculator is not required, the Delete button enables the removal of the Employee Specific Rate Calculator and all related records from the Assignment, and can reinstate the Assignment with all its original values.

To delete an Employee Specific Rate Calculator:

1. From the Assignment record, select the **Rate Calculator** tab and click on the Employee Specific Rate Calculator's name (see Figure 16).

Figure 16

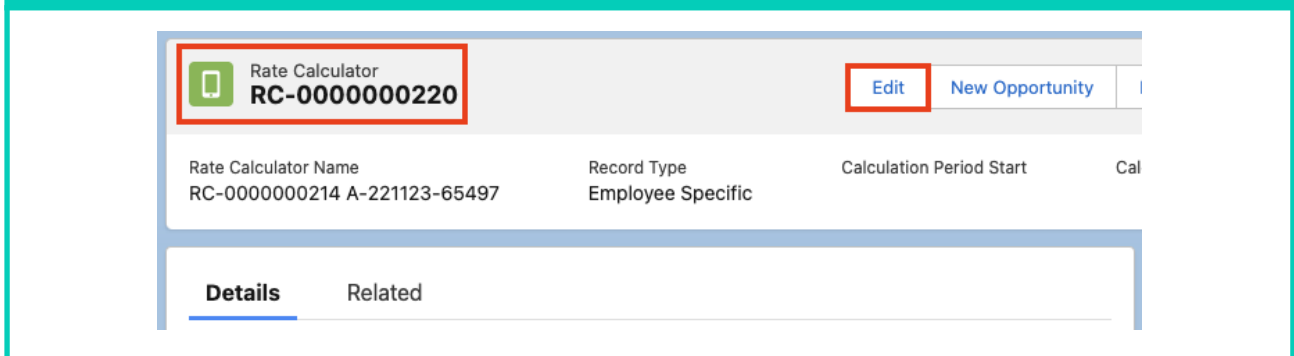

The screenshot shows the 'Assignment' record for 'A-221123-65497'. The 'Rate Calculator' tab is selected, displaying a list of rate calculators. The first entry, 'RC-0000000220 Employee Specific', is highlighted with a red box. The 'Edit' button is visible in the top right corner.

Assignment Name	Record Type	Client	Employee	Status
Tety Laroo No Employee	Temp	Asgard	Tony Stark	Active

Details	Related	Rate Calculator
Employment Costs Setup Margin/Markup Rates Rate Calculator Rates Rate Calculator Lines More ▾ RC-0000000220 Employee Specific Save Undo/Refresh		

2. Click on the **Edit** button to open the Rate Calculator Manager (see Figure 17).

Figure 17

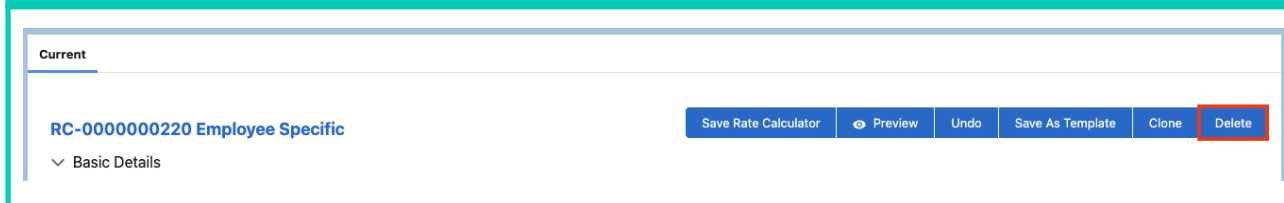

The screenshot shows the 'Rate Calculator' record for 'RC-0000000220'. The 'Edit' button is highlighted with a red box. The 'Rate Calculator Name' is 'RC-0000000214 A-221123-65497' and the 'Record Type' is 'Employee Specific'.

Rate Calculator Name	Record Type	Calculation Period Start	Cal
RC-0000000214 A-221123-65497	Employee Specific		

Details Related

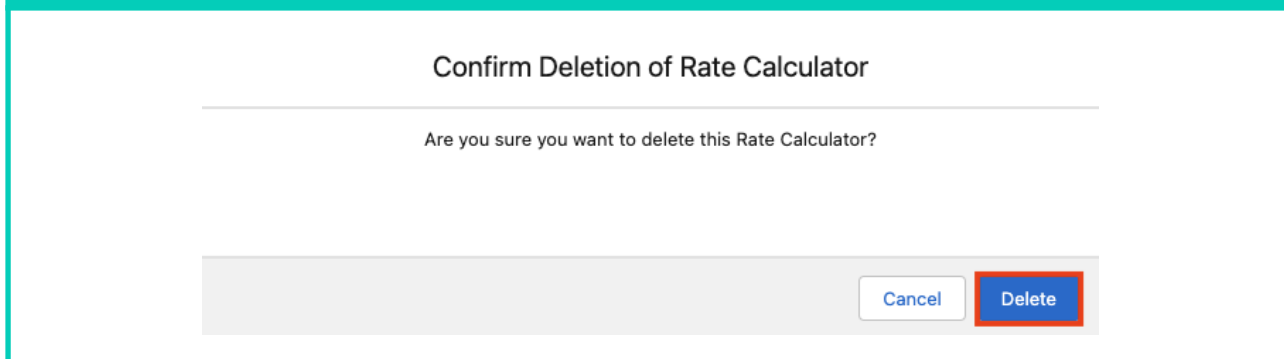

- Click on the **Delete** button (see Figure 18).

Figure 18

- Click on the **Delete** button in the pop-up window to confirm the deletion of the Rate Calculator (see Figure 19).

Figure 19

Important Notes

(Figures 16 to 19)

Any Assignment values inherited from the Rate Calculator Template in the following fields will revert to their original values if the Employee Specific Rate Calculator is deleted: Location, Industry, Risk Classification, Award Classification, and Award Level.

Employee Specific Rate Calculator records CANNOT be deleted if they have been related to Pay Transactions. Deleting records is not recommended unless absolutely essential.
