

Purpose

The purpose of this quick reference guide is to step through the process of managing Employment Costs using Employment Cost Manager. The intended audience for this document is System Administrators / Standard Users.

The new Employment Cost Manager UI provides a tool to easily create, expire, clone, and validate the Employment Cost Items from one place, allowing for validation of the relationship between Employment Cost Item records and other related records.

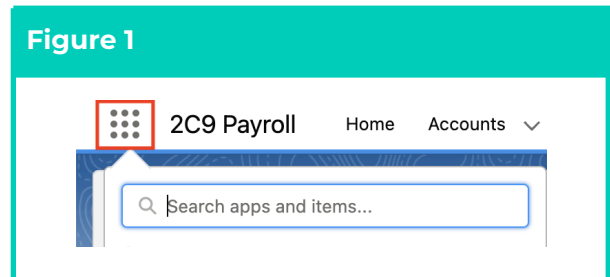

Steps

Create new Employment Cost Items using Employment Cost Manager

To create Employer Cost Item records, follow the steps below:

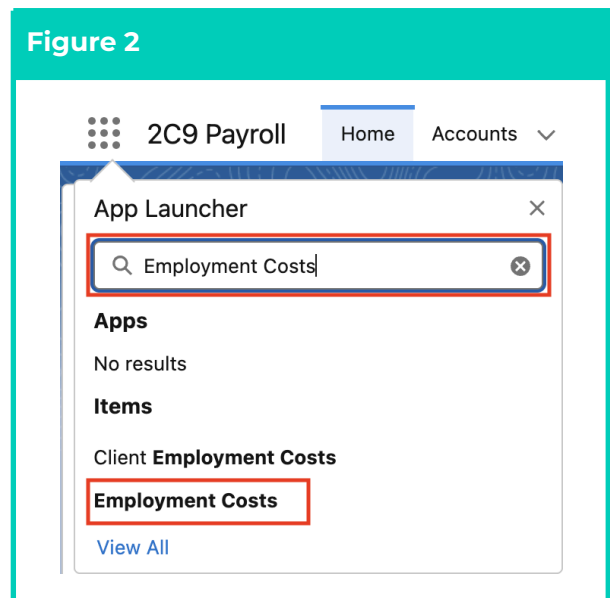

1. Click on the **App Launcher** icon (see Figure 1).

Figure 1

2. Go to the **Employment Costs** object by using the Search function (see Figure 2).

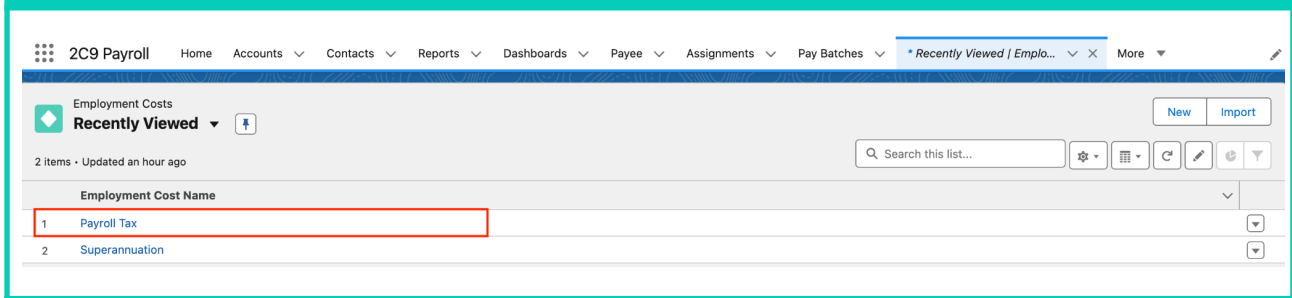

Figure 2

- Choose the required Employment Cost record (see Figure 3).

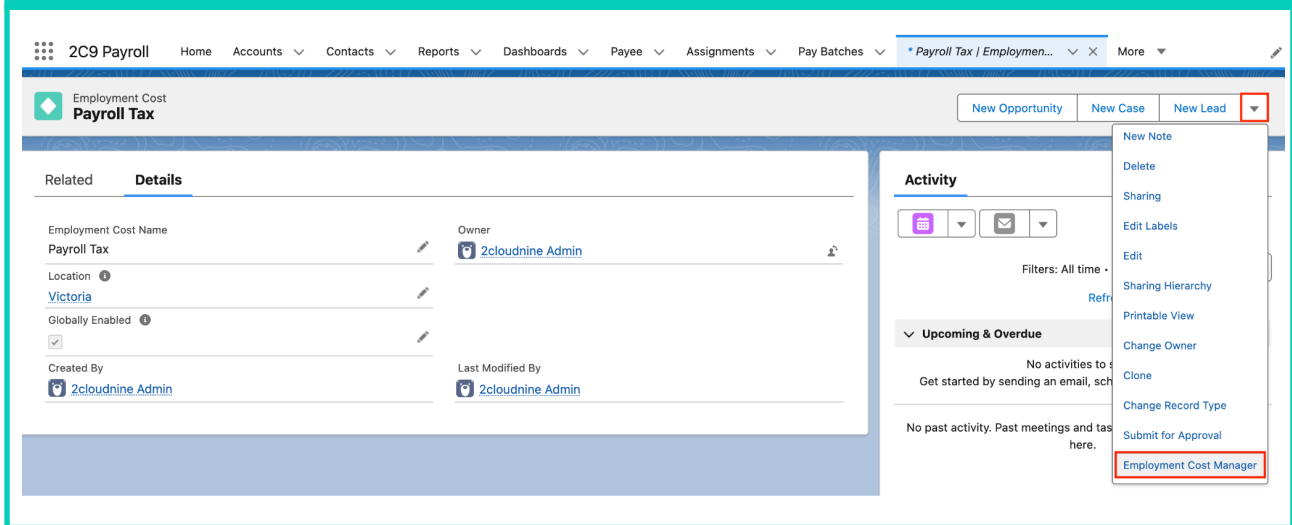

To learn more about how to create an Employment Cost record, please refer to the [QRG Create an Employment Cost record - All record types](#).

Figure 3

- On the Employment Cost record Page Layout, click on the drop-down arrow  and select **Employment Cost Manager** (see Figure 4).

Figure 4

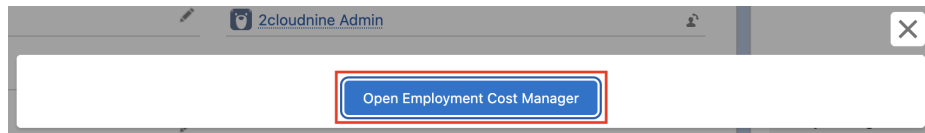

Important Notes

(Figure 4)

While one Employment Cost Item must be created for every Location record, individual (i.e. state-based) Location records should NOT be populated for the parent Employment Cost record. Instead, a single catch-all Location record, such as All Locations or Any Location, should be created to enable Rate Calculator Templates and Employee Specific Rate Calculators to be identified and related.

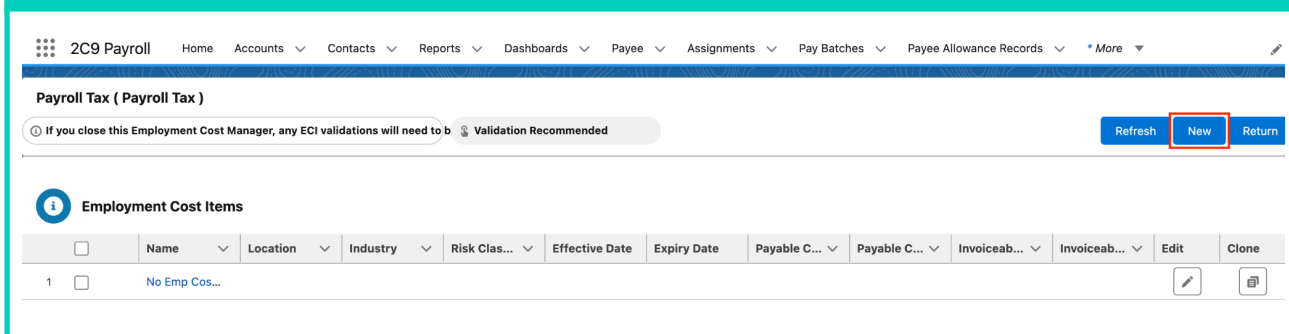

5. A pop-up will appear. On the popup, click the **Open Employment Cost Manager** button (see Figure 5).

Figure 5

6. The new Employment Cost Manager will open. Within the Employment Cost Manager, click on the **New** button (see Figure 6).

Figure 6

7. Populate the following required fields to provide the base details of the Employment Cost Item record (see Figure 7):
 - a. **Effective Date**
 - b. **Location**
 - c. **Industry**
 - d. **Risk Classification**
 - e. **Payable Calculated Based On**
 - f. **Payable Calculation Rate**
 - g. **Invoiceable Calculated Based On**
 - h. **Invoiceable Calculation Rate**
 - i. **Status**
8. Click **Save**.

1	ECI-000000...	Victoria	WIC Code 1	All	12/06/2025		% of Total P...	12	% of Loade...	12		

Employment Cost Items CAN NOT be deleted or modified if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

Create additional Employment Cost Items using the Clone function

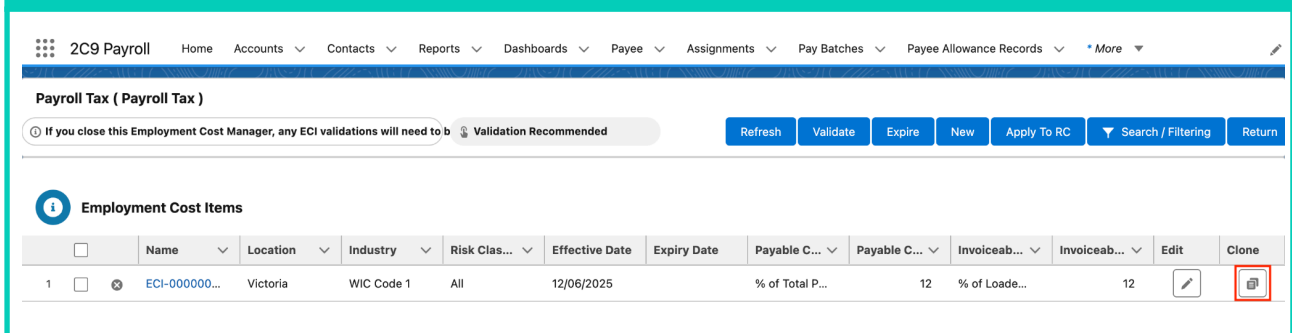

Once an Employment Cost Item record has been created, more Employment Cost Item records can be created using the Clone feature available within the Employment Cost Manager.

It is important to ensure all Locations have an individual Employment Cost Item Record. The system doesn't allow using the same Location on more than one Employment Cost Item Record.

To clone an existing Employment Cost Item record to create a new one, follow these steps:

1. In the Employment Cost Manager, click the Clone  button next to the Employment Cost Item record, as shown in the screenshot below (see Figure 10).

Figure 10

3. A new **Employment Cost Item** record has been created (see Figure 12).

Figure 12

The screenshot shows the 'Employment Cost Manager' interface. At the top, there's a navigation bar with '2C9 Payroll' and various menu items. Below it, a 'Payroll Tax (Payroll Tax)' section contains a warning message: 'If you close this Employment Cost Manager, any ECI validations will need to be performed. Validation Recommended'. There are buttons for 'Refresh', 'Validate', 'Expire', 'New', 'Apply To RC', 'Search / Filtering', and 'Return'.

The main section is titled 'Employment Cost Items' and contains a table with the following columns: Name, Location, Industry, Risk Clas..., Effective Date, Expiry Date, Payable C..., Payable C..., Invoiceab..., Invoiceab..., Edit, and Clone. Two records are listed:

	Name	Location	Industry	Risk Clas...	Effective Date	Expiry Date	Payable C...	Payable C...	Invoiceab...	Invoiceab...	Edit	Clone
1	ECI-000000...	New South ...	WIC Code 1	All	16/06/2025		% of Total P...	11	% of Loade...	11	[Edit]	[Clone]
2	ECI-000000...	Victoria	WIC Code 1	All	12/06/2025		% of Total P...	12	% of Loade...	12	[Edit]	[Clone]

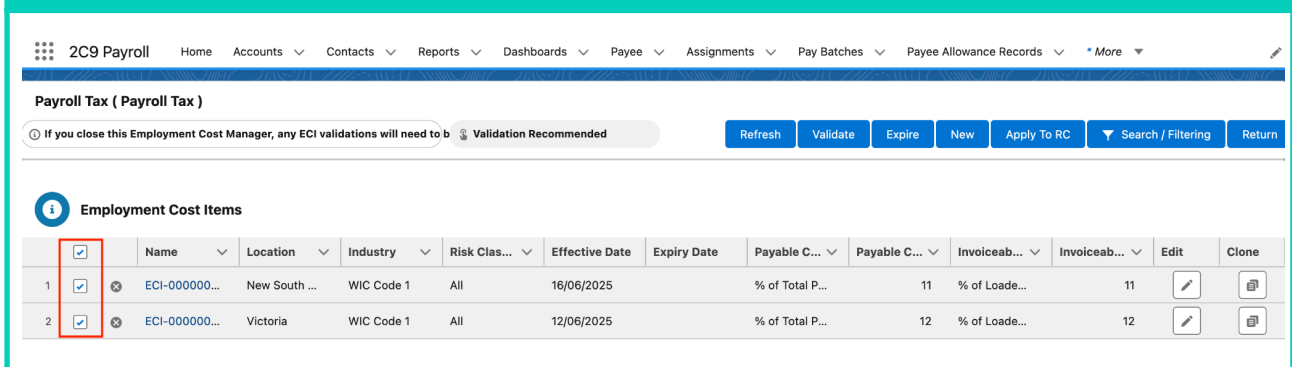

Employment Cost Item records CAN NOT be deleted or modified if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

Validate Employment Cost Items and apply to the Rate Calculator

Once all the required Employment Cost Item records have been created, and before they can be used in Rate Calculators, the next step is to validate the Employment Cost Items. To do this, follow these steps:

1. In the Employment Cost Manager, select the record that you would like to validate by ticking the checkbox and click **Validate** (see Figure 13).

Figure 13

This screenshot is similar to Figure 12, but the checkboxes in the first column of the 'Employment Cost Items' table are now checked for both records. The first record (ECI-000000... New South ...) and the second record (ECI-000000... Victoria) both have their checkboxes selected.

2. A pop-up will appear with further instructions about the validation process. By default, the Exclude Pay Transaction Toggle will be disabled. Click on the **Validate** button (see Figure 14).

Figure 14

Validate ECI Records

This process reviews selected Employment Cost Items for associated Pay Transactions to confirm edit ability and recommended expiry dates. Based on volume, this check may take some time to complete. We recommend validating only the records you intend to update.

The validation will run only on the selected records for this Employment Cost.

Exclude Pay Transaction ☐

Inactive

Enabling this will skip validation of related Pay Transactions. This may lead to data inconsistencies and should be used with discretion.

Cancel Validate

Important Notes

(Figure 14)

If the Exclude Pay Transaction Toggle is enabled, this will skip the validation of related Pay Transactions and validate only the Employment Cost Item records. This is not recommended and must be used with discretion.

Please remember that the processing time will vary depending on the underlying Pay Transactions data. Records related to many Pay Transactions can take a considerable amount of time to validate, so please be patient and ensure to validate only the records you need, as opposed to all records.

- You will receive a confirmation message when the validation is complete (see Figure 15).

Figure 15

Important Notes

(Figure 19)

Once you apply the Employment Cost record to a Rate Calculator record, the field Last Calculator Line Update Date will be set to Now, and the recalculation will be performed by the next Scheduled Batch Job or by manually going into a Rate Calculator and selecting Calculate.

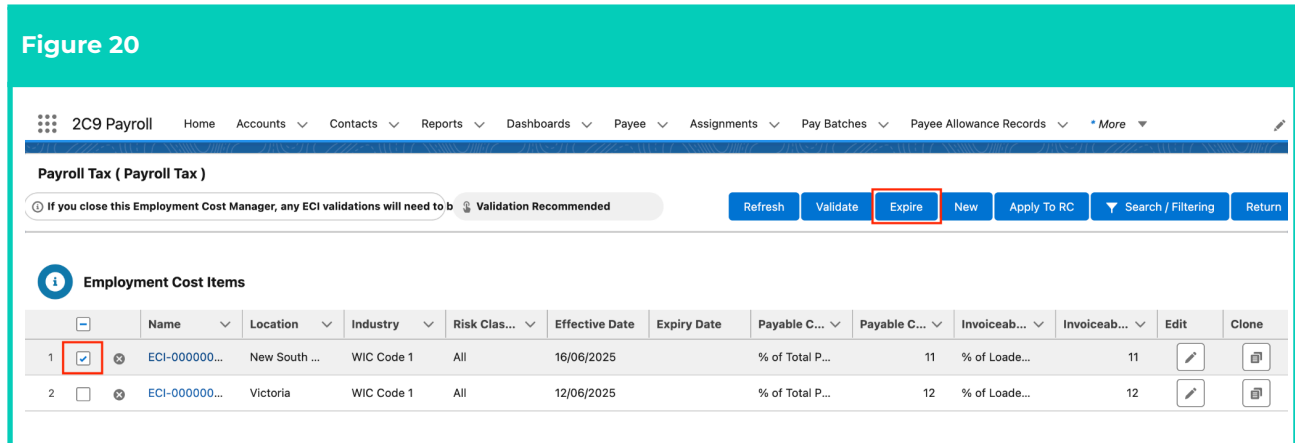

Update existing Employment Cost Items

As mentioned earlier, the existing Employment Cost Item records can not be modified or deleted from the Employment Cost Manager, unless they have been validated and there are NO related Pay Transactions. The option to update an existing record is only suitable when an Employment Cost Item record has been created incorrectly and doesn't have related Pay Transactions. In all other scenarios, whenever an existing Employment Cost Item record needs to be modified, it must be expired from within the Employment Cost Manager, and then the expired record can be cloned to enter the new details.

To expire an existing Employment Cost Item record and create a new clone of the expired record, follow these steps:

1. In the Employment Cost Manager, select the record that you would like to expire by ticking the checkbox next to it and then click **Expire** (see Figure 20).

Figure 20

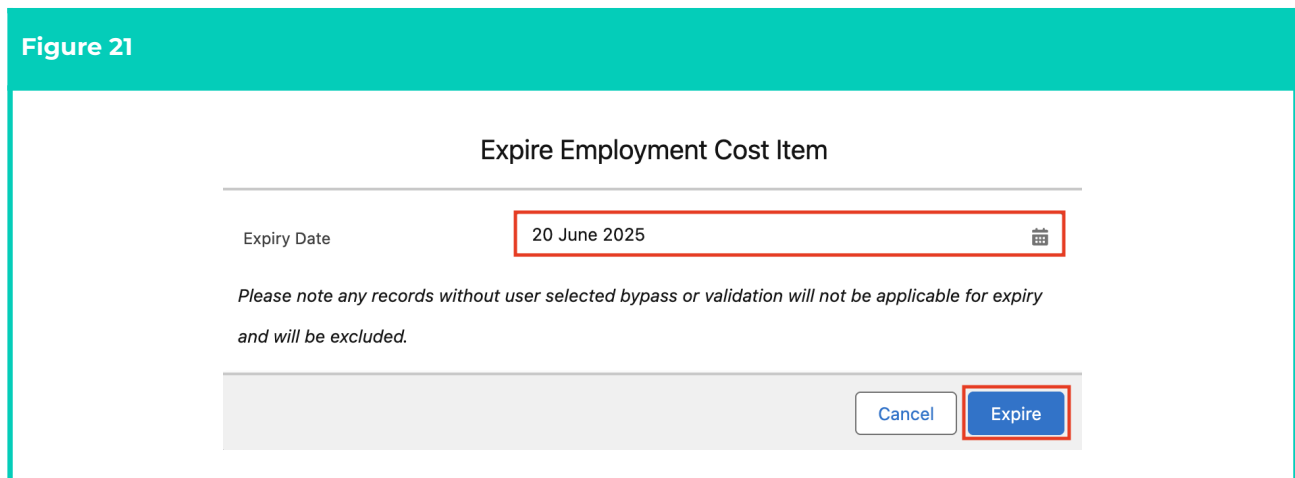

The screenshot shows the 'Payroll Tax (Payroll Tax)' section of the 2C9 Payroll system. A table titled 'Employment Cost Items' lists two records. The first record, 'ECI-000000...', is selected with a checkbox. The 'Expire' button in the top navigation bar is highlighted with a red box.

	Name	Location	Industry	Risk Clas...	Effective Date	Expiry Date	Payable C...	Payable C...	Invoiceab...	Invoiceab...	Edit	Clone
1	☒ ECI-000000...	New South ...	WIC Code 1	All	16/06/2025		% of Total P...	11	% of Loade...	11		
2	☐ ECI-000000...	Victoria	WIC Code 1	All	12/06/2025		% of Total P...	12	% of Loade...	12		

2. Populate the **Expiry Date** field and click **Expire** (see Figure 21).

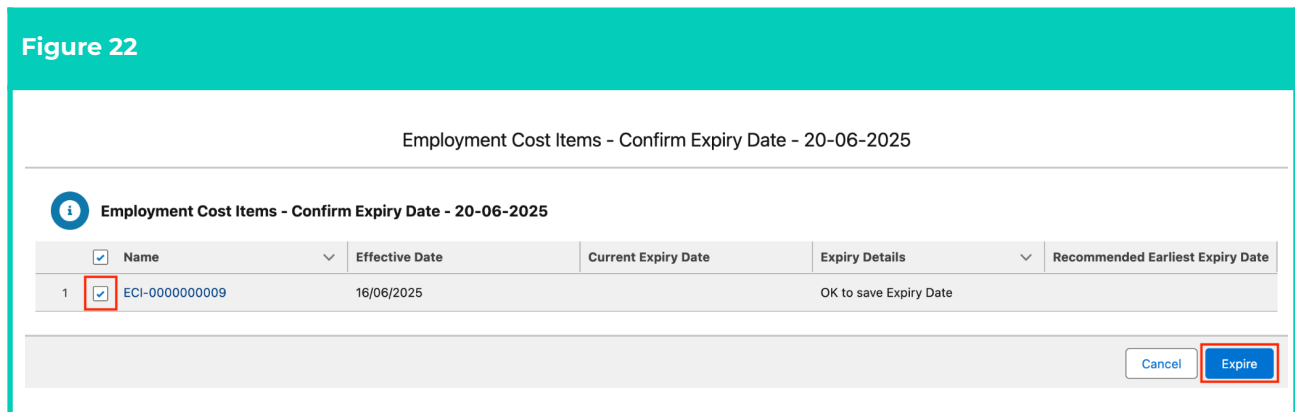

Figure 21

The screenshot shows the 'Expire Employment Cost Item' dialog box. The 'Expiry Date' field is populated with '20 June 2025'. Below the field, a note states: 'Please note any records without user selected bypass or validation will not be applicable for expiry and will be excluded.' The 'Expire' button is highlighted with a red box.

3. On the next screen, tick the required record and click **Expire** to proceed (see Figure 22).

Figure 22

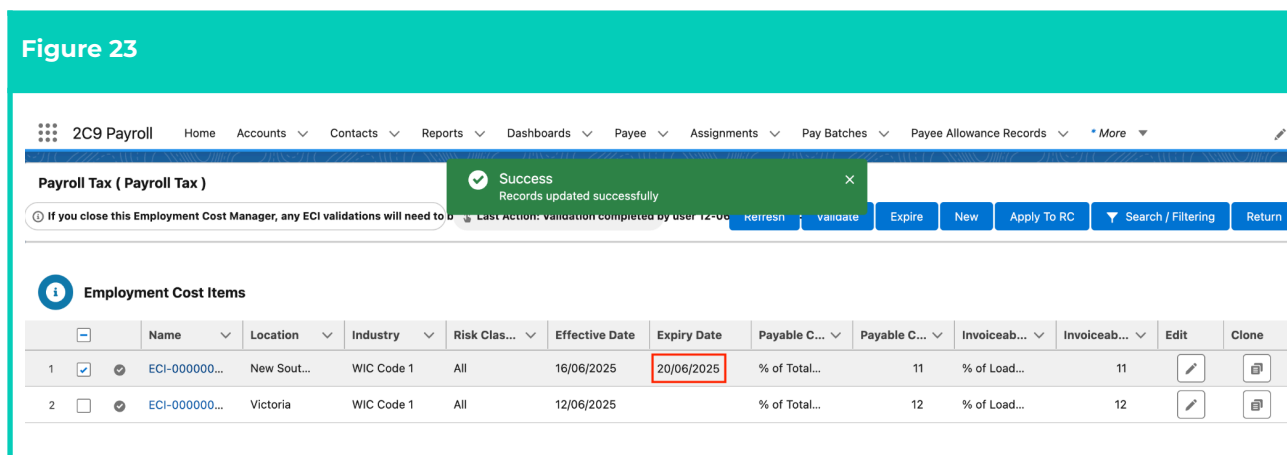

The screenshot shows the 'Employment Cost Items - Confirm Expiry Date - 20-06-2025' dialog box. A table lists the records to be expired. The first record, 'ECI-0000000009', is selected with a checkbox. The 'Expire' button is highlighted with a red box.

	Name	Effective Date	Current Expiry Date	Expiry Details	Recommended Earliest Expiry Date
1	☒ ECI-0000000009	16/06/2025		OK to save Expiry Date	

- The selected record will expire with the Expiry Date populated as shown in the screenshot below (see Figure 23).

Figure 23

The screenshot shows the 2C9 Payroll interface. At the top, there's a navigation bar with various menu items. Below it, a green success message states 'Success Records updated successfully'. A warning message below that says 'If you close this Employment Cost Manager, any ECI validations will need to be re-run'. The main section is titled 'Employment Cost Items' and contains a table with the following data:

	Name	Location	Industry	Risk Clas...	Effective Date	Expiry Date	Payable C...	Payable C...	Invoiceab...	Invoiceab...	Edit	Clone
1	☒ ECI-000000...	New Sout...	WIC Code 1	All	16/06/2025	20/06/2025	% of Total...	11	% of Load...	11		
2	☐ ECI-000000...	Victoria	WIC Code 1	All	12/06/2025		% of Total...	12	% of Load...	12		

- The expired record can now be cloned following the steps provided above in this document, under the section Clone Employment Cost Items.

Employment Cost Item records CAN NOT be deleted or modified if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

Field Descriptions

Field Name	Description
Effective Date	The Date the Employment Cost Item will come into effect.
Employment Cost	The Employment Cost associated with this Employment Cost Item.
Expiry Date	The Date the Employment Cost Item will expire or has expired.
Industry	The Industry that the Employment Cost Item relates to.
Invoiceable Calculated Based On	The calculation that will be used on the value entered in the Invoiceable Calculation Rate field to determine the Invoice Rate: • % of Base Pay Rate will be calculated using the value populated in the Invoiceable Calculation Rate field as a percentage of the Base Pay Rate. • % of Multiplied Pay Rate will be calculated using the value populated in the Invoiceable Calculation Rate field as a percentage of the Base Pay Rate, multiplied by the Pay Code Multiplier. • % of Total Pay Rate + Costs will be calculated using the value populated in the Invoiceable Calculation Rate field as a percentage of the Base Pay Rate, added to the Casual Loading and all other Pre-Costs. • % of Total Cost + Mark Up/Margin will be calculated using the value populated in the Invoiceable Calculation Rate field as a percentage of the Base Pay Rate, added to the Casual Loading rate along with all Pre-Costs, with Margin/ Markup/Margin values also added. • Fixed Amount will be calculated using the value populated in the Invoiceable Calculation Rate field as a fixed amount. • % of Pay Rate will be calculated using the value populated in the Invoiceable Calculation Rate field as a percentage of the Pay Rate. • % of Loaded Pay Rate will be calculated using the value populated in the Invoiceable Calculation Rate field as a percentage of the Base Pay Rate, multiplied by the Pay Code Multiplier, and added to the Casual Loading rate.
Invoiceable Calculation Rate	Defines what rate will be used in calculating the amount Invoiceable.
Location	The Location associated with this Employment Cost Item.
Matching Criteria	These are three checkboxes for Location, Industry, and Risk Classification. They can be used to filter the Rate Calculator records. You will need to select the different filters, based on which Record Types of Employment Costs you are applying to Rate Calculators. 1. When validating the Superannuation or Payroll Tax Record Types, check the Location filter, whereas Industry and Risk Classification filters can remain unchecked. 2. When validating the Workcover Record Types, all three filters should be checked.
Payable Calculated Based On	Defines what value the amount payable will be based on: • % of Pay Rate will be calculated using the value populated in the Payable Calculation Rate field as a percentage of the Pay Rate. • % of Total Pay Rate will be calculated using the value populated in the Payable Calculation field as a percentage of the Base Pay Rate, multiplied by the Pay Code Multiplier, added to Casual Loading and Superannuation. • Fixed Amount will be calculated using the value populated in the Payable Calculation field as fixed amount.
Payable Calculation Rate	Defines the rate that will be used in calculating the Pay Rate.
RCL Line Update Date	This is an optional pre-filter to only retrieve Rate Calculators where the Last RC Line Update Date is before the entered date. Leave Blank to ignore this filter.
Risk Classification	The Risk Classification that the Employment Cost Item relates to applies.
Status	The Status of the Employment Cost Item.
