

Purpose

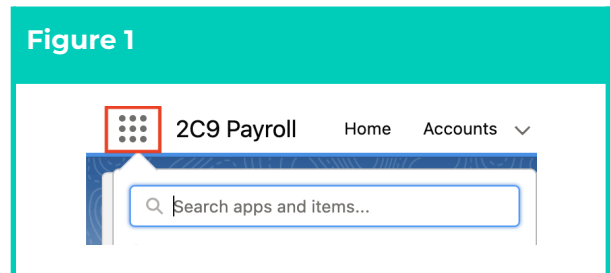

The purpose of this quick reference guide is to step through the process of creating Rate Calculator Previews, Clones, and Save as Template record updates. The intended audience for this document is System Administrators / Standard Users.

Steps

To open an existing Rate Calculator record, please follow the steps below:

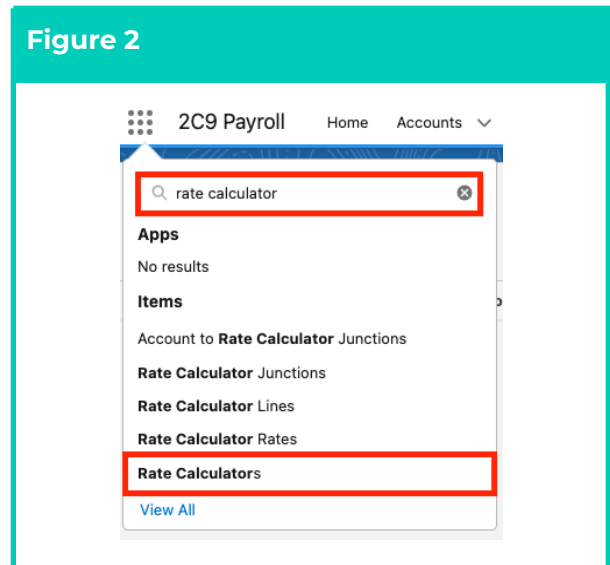

1. Click on the **App Launcher** icon (see Figure 1).

Figure 1

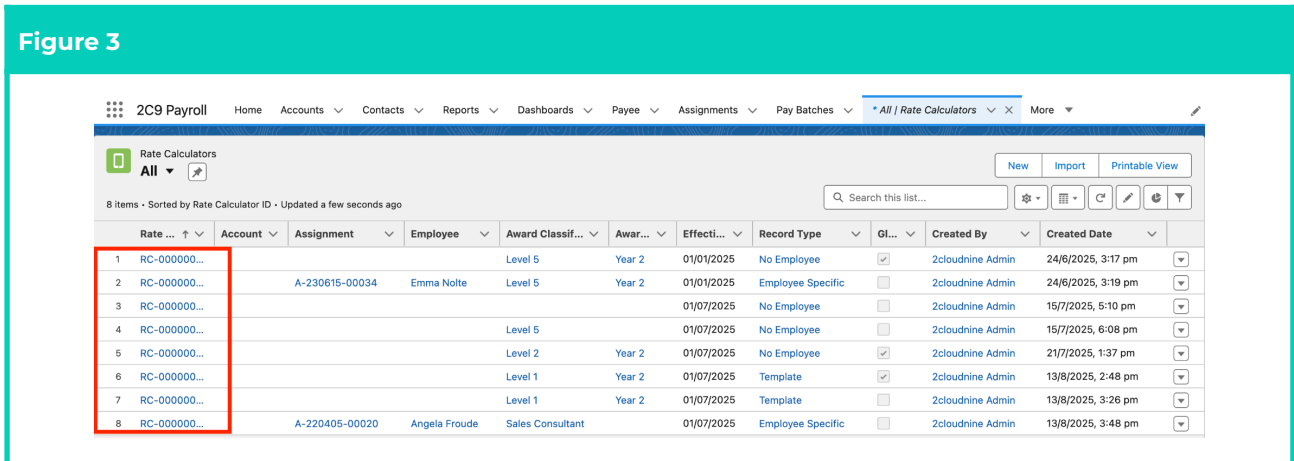

2. Go to the **Rate Calculators** object by using the Search function (see Figure 2).

Figure 2

3. Open an existing Rate Calculator record (see Figure 3).

Preview Rate Calculators

Previews allow Rate Calculators to be modified without applying changes to the active Rate Calculator or any of its related records. Changes made in Preview will be reflected in the Rate Calculator Lines displayed in the Preview, but no changes will be applied to the original record.

1. Click on the **Edit** button (see Figure 4).

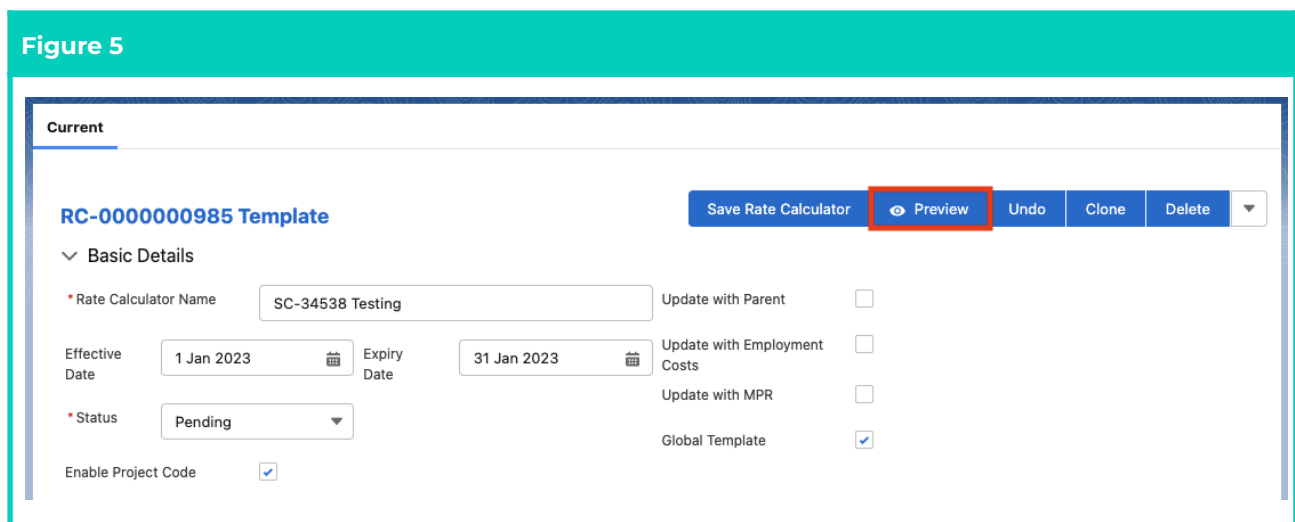

Figure 4

The screenshot shows the 'Rate Calculator' interface for 'RC-0000000016'. At the top, there is a header bar with a green icon and the text 'Rate Calculator RC-0000000016'. To the right of this header are two buttons: 'Edit' (highlighted with a red box) and 'New Opportunity'. Below the header, there is a table with the following columns: 'Rate Calculator Name', 'Record Type', 'Calculation Period Start', and 'Calculation Period End'. The table contains one row with the values: 'Template Testing', 'Template', and empty cells for the start and end dates. Below the table, there are two tabs: 'Details' (selected) and 'Related'. Under the 'Details' tab, there is a form with two fields: 'Rate Calculator ID' with the value 'RC-0000000016' and 'Record Type' with the value 'Template'.

2. Click on the **Preview** button located at the top of the Rate Calculator (see Figure 5).

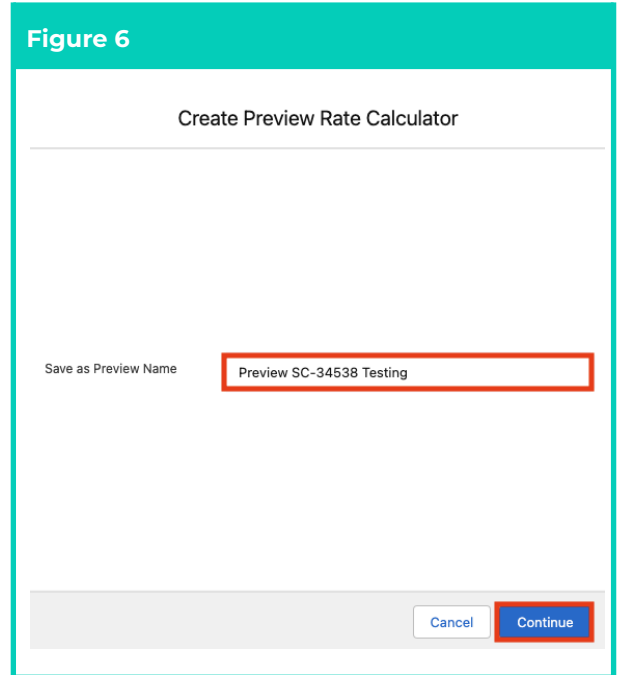

Figure 5

The screenshot shows the 'Rate Calculator' interface for 'RC-0000000985 Template'. At the top, there is a header bar with the text 'RC-0000000985 Template'. To the right of this header are five buttons: 'Save Rate Calculator', 'Preview' (highlighted with a red box), 'Undo', 'Clone', and 'Delete'. Below the header, there is a section titled 'Basic Details' with a dropdown arrow. Under this section, there are several fields and checkboxes: 'Rate Calculator Name' with the value 'SC-34538 Testing', 'Effective Date' with the value '1 Jan 2023', 'Expiry Date' with the value '31 Jan 2023', 'Status' with the value 'Pending', and 'Enable Project Code' with a checked checkbox. To the right of these fields are four checkboxes: 'Update with Parent', 'Update with Employment Costs', 'Update with MPR', and 'Global Template' (which is checked).

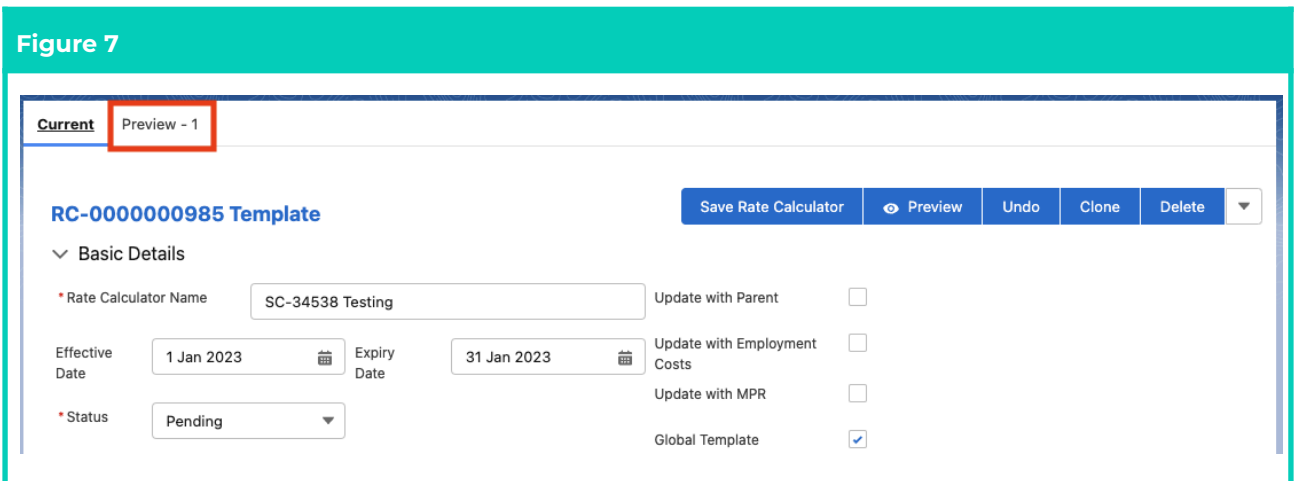

3. In the window that appears, ensure the **Save as Preview Name** field is populated with a unique identifier for the Preview, and click on the **Continue** button (see Figure 6).

Figure 6

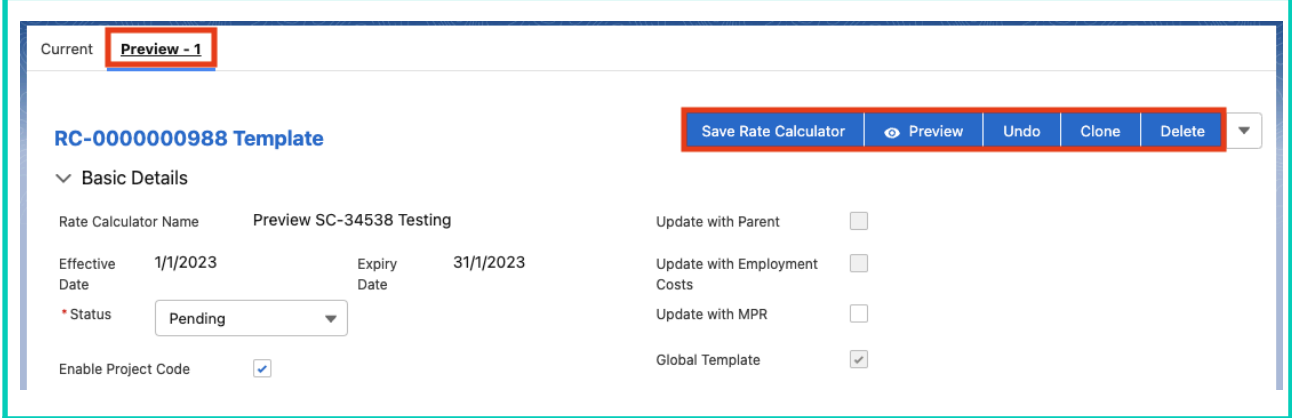

4. Click on the new **Preview** tab along the top of the screen and make the necessary changes to the record (see Figure 7).

Figure 7

5. Once all the necessary updates have been made to the Preview, select one of the following actions available (see Figure 8):
 - a. Click on the **Save Rate Calculator** button to transfer the changes made in the Preview tab.
 - b. Click on the **Preview** button to create a new Preview which will be populated with the values of the current Preview.
 - c. Click on the **Undo** button to undo the most recent change made in the Preview tab.
 - d. Click on the **Clone** button to create a new Rate Calculator record populated with the values of the current Preview.
 - e. Click on the **Delete** button to discard the Preview and all changes made.

Figure 8

Current **Preview - 1**

RC-0000000988 Template

Save Rate Calculator Preview Undo Clone Delete

Basic Details

Rate Calculator Name Preview SC-34538 Testing Update with Parent ☐

Effective Date 1/1/2023 Expiry Date 31/1/2023 Update with Employment Costs ☐

* Status Pending Update with MPR ☐

Enable Project Code ☒ Global Template ☒

Important Notes

(Figure 4)

There are no restrictions on the number of Previews that can be created, but Previews should be deleted once they are no longer required, to avoid consuming too much data space.

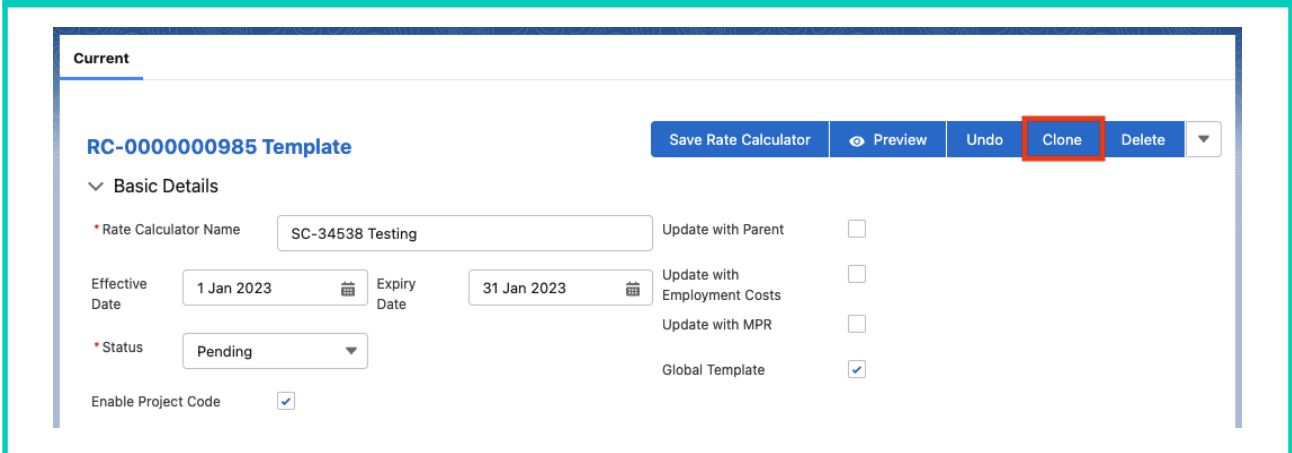

Clone Rate Calculator

Unlike the Preview or Save as Template functionality, Cloning is used to make an exact copy of the Rate Calculator and all related records with the exception of the Rate Calculator Lines and Account to Rate Calculator Junctions.

To Clone an existing Rate Calculator record:

1. Click on the **Clone** button located at the top of the Rate Calculator (see Figure9).

Figure 9

Current

RC-0000000985 Template

Save Rate Calculator Preview Undo Clone Delete

Basic Details

* Rate Calculator Name SC-34538 Testing Update with Parent ☐

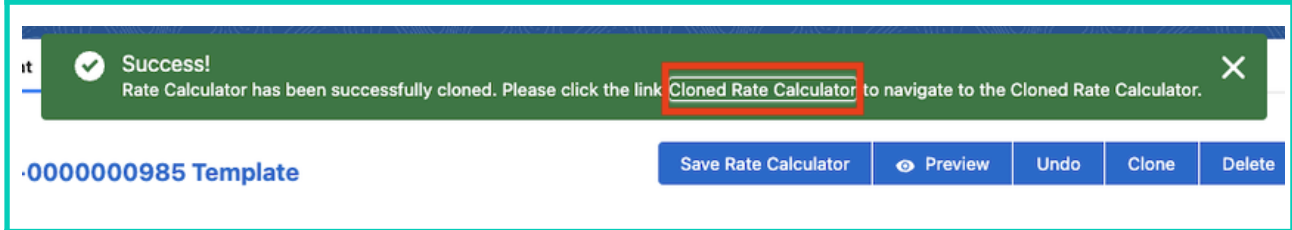

Effective Date 1 Jan 2023 Expiry Date 31 Jan 2023 Update with Employment Costs ☐

* Status Pending Update with MPR ☐

Enable Project Code ☒ Global Template ☒

2. To access the new cloned Rate Calculator, click on the **Cloned Rate Calculator** link that is displayed in the notification banner (see Figure 10).

Figure 10

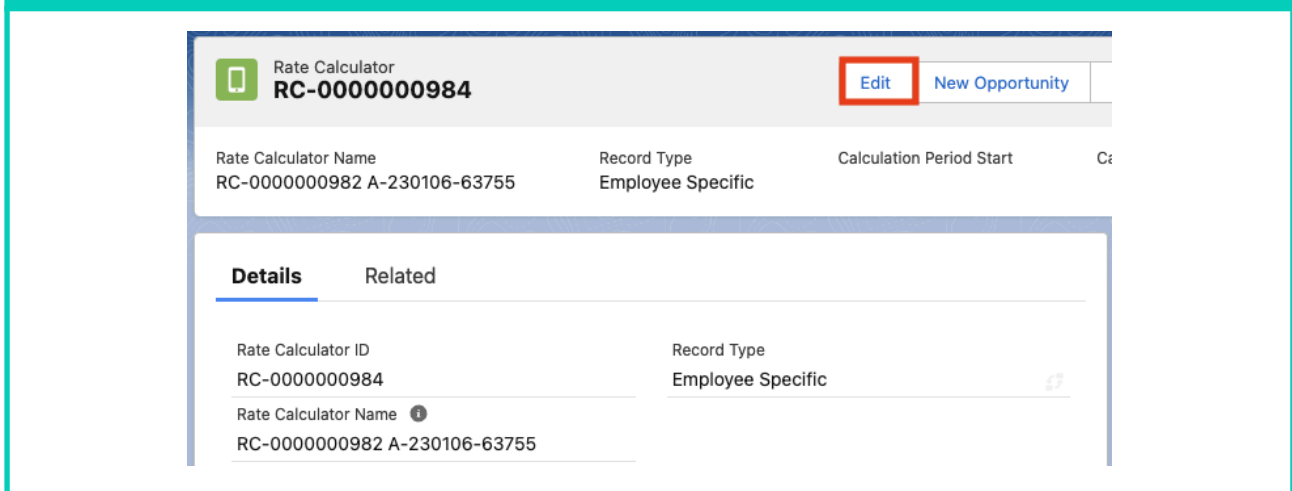

Save as Template

The Save as Template feature provides a way to clone an Employee Specific Rate Calculator as a Rate Calculator Template. This feature allows the new Template to either be applied to the same Client/Payment Entity that the original record has or to be Globally enabled.

To save a Rate Calculator as a Template:

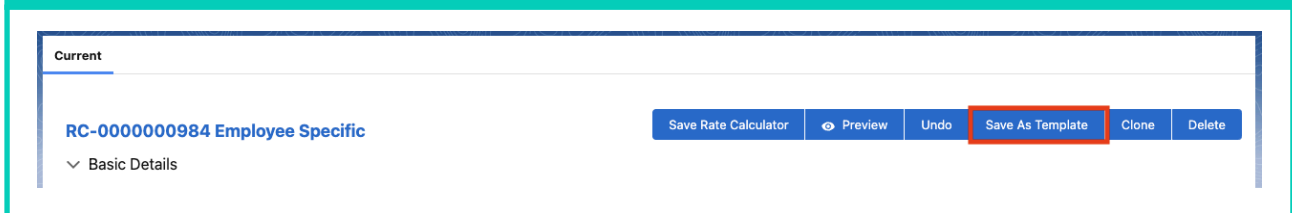

1. Click on the **Edit** button available on the top right side of the page (see Figure 11).

Figure 11

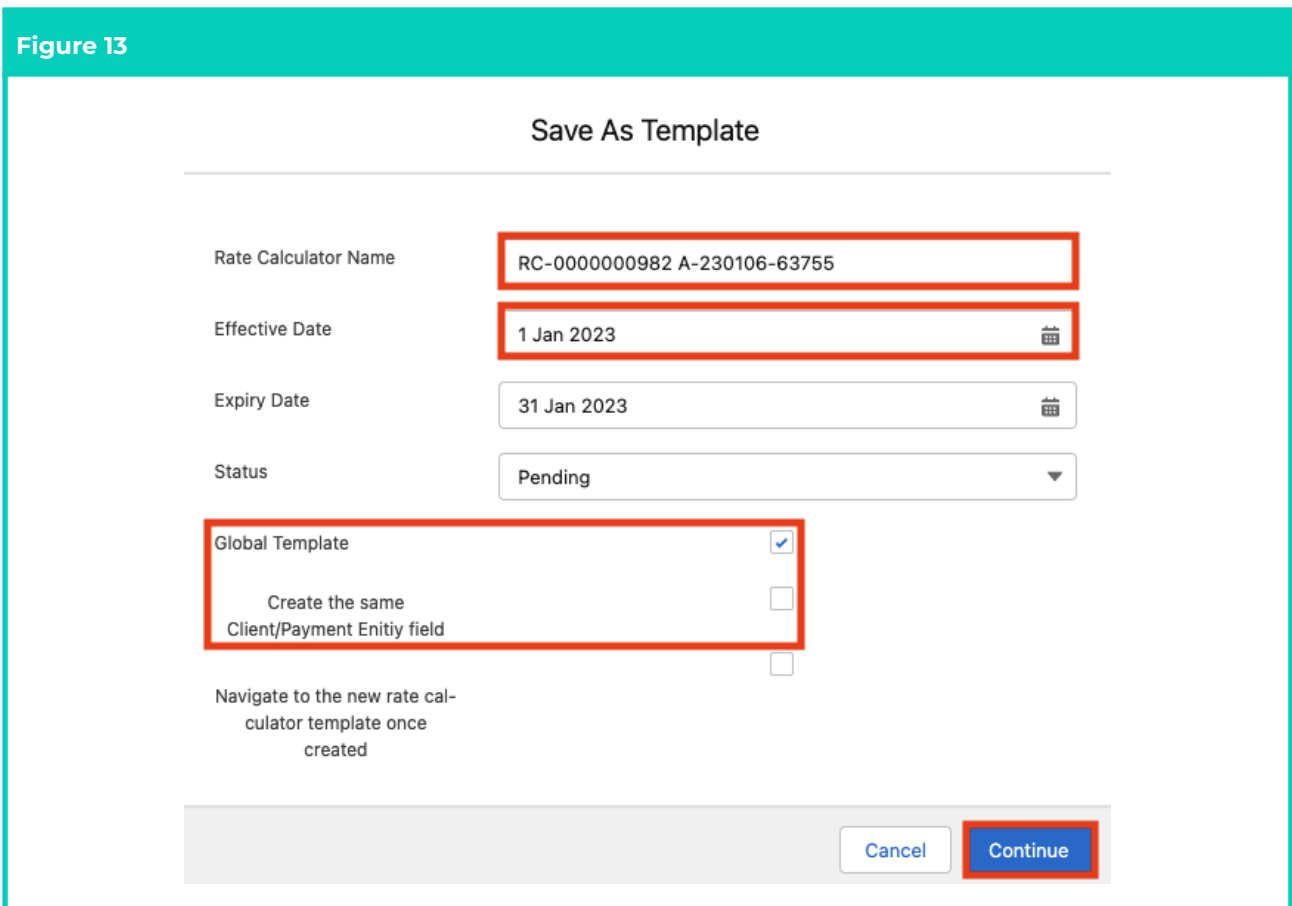

2. Click on the **Save as Template** button (see Figure 12).

Figure 12

3. Follow this step in the sequence given below:
 - a. In the window that appears, ensure the following required fields are populated with the appropriate values (see Figure 13):
 - i. **Rate Calculator Name**
 - ii. **Effective Date**
 - b. Populate the following optional fields, as required:
 - i. **Expiry Date**
 - ii. **Status**
 - iii. To allow the Rate Calculator Template to be related to an Assignment regardless of whether the same related Client Account or Payment Entity records are shared, check the **Global Template** checkbox.
 - OR**
 - To determine that the Rate Calculator Template should only be available for the Client/Payment Entity applied to the existing record, check the **Create the same Client/Payment Entity** checkbox.
 - iv. To automatically open the Rate Calculator Template upon creation of the new record, check the **Navigate to the new rate calculator template once created** checkbox.
4. Click on the **Continue** button.

The new Rate Calculator Template has now been created (see Figure 14)

Figure 14

The screenshot shows a web interface for creating a Rate Calculator Template. At the top, there's a header bar with a green mobile icon, the text 'Rate Calculator', and the ID 'RC-0000000985'. To the right are buttons for 'Edit', 'New Opportunity', and 'New Cas'. Below this is a table with four columns: 'Rate Calculator Name', 'Record Type', 'Calculation Period Start', and 'Calculation Period End'. The first row contains the values 'RC-0000000982 A-230106-63755', 'Template', and empty cells for the start and end dates. Below the table is a 'Details' section with two tabs: 'Details' (selected) and 'Related'. Under the 'Details' tab, there are two rows of information: 'Rate Calculator ID' with the value 'RC-0000000985' and 'Record Type' with the value 'Template'. Below these, there's a row for 'Rate Calculator Name' with a value 'RC-0000000982 A-230106-63755' and an information icon.

Important Notes

(Figure 20)

If the checkboxes 'Global Template' or 'Navigate to the new rate calculator template once created' were NOT selected during Rate Calculator Template creation, follow the instructions in step 11 of QRG Rate Calculator Template - Initial Setup to apply the Rate Calculator Template to a different Client/Payment Entity.

Field Descriptions

Field Name	Description
Award Classification	Defines the Award Classification of the Minimum Pay Rate associated with this Rate Calculator.
Award Level	Defines the Award Level of the Minimum Pay Rate associated with this Rate Calculator.
Create the same Client/Payment Entity	Determines that the new Rate Calculator Template is created with the same Client/Payment Entity applied as the original Employee Specific Rate Calculator.
Define Markup Margin Per Pay Code	Enables the creation of different Mark Up / Margins for each Pay Code.
Effective Date	Defines the Effective Date of the Rate Calculator Template.
Enable Project Code	Indicates whether Project Codes may be applied to the Rate Calculator Template.
Expiry Date	Defines the Expiry Date of the Rate Calculator Template. If blank, no expiry date applies.
Global Template	Indicates whether a Rate Calculator Template may be related to Assignments at a Global Level. If unchecked, the Rate Calculator Template will only be available to the related Client or Payment Entity.
Industry	Indicates the Industry related to the Rate Calculator.
Insurance	Defines the Insurance Employment Cost that applies to the Rate Calculator.
Interpretation Rule	Defines the Interpretation Rule that applies to the Rate Calculator.
Invoice Tax ID	Defines the Invoice Tax ID that applies to the Rate Calculator.
Location	Indicates the Location associated with the Rate Calculator.
Navigate to the new rate calculator template once created	Determines that the new Rate Calculator Template record will be opened as soon as it is created.
Pay Code	Defines the Pay Code that will be used in the Assignment Rate records which are created.
Payroll Tax	Defines the Payroll Tax Employment Cost that applies to the Rate Calculator.
Risk Classification	Indicates the Risk Classification associated with the Rate Calculator.
Rate Calculator Name	Indicates the short name given to the Rate Calculator for identification.
Status	Defines the Status of the Rate Calculator Template.
Superannuation	Defines the Superannuation Employment Cost that applies to the Rate Calculator.

Update with Employment Costs	Defines whether the Rate Calculator Lines will update automatically when changes are made to a related Employment Costs. Rate Calculators with overrides applied will not automatically update.
Update with MPR	Identifies whether the Rate Calculator will automatically create and update associated Rate records according to changes made within the related Minimum Pay Rate records.
Update with Parent	Identifies whether child Rate Calculator records will be automatically updated if the Parent Rate Calculator is updated.
WHS	Defines the WHS Employment Cost that applies to the Rate Calculator.
WorkCover	Defines the WorkCover Employment Cost that applies to the Rate Calculator.

Further Information

Document	Document Type	Description
QRG Rate Calculator Key Information	Information Quick Reference	Outlines useful information relevant to the Rate Calculator functionality. The document includes definitions, prerequisites, and other non-instructional information.
QRG Create a Location record	Task Instructions	How to create a Location record used for Rate Calculators.
QRG Create a Calculation Method	Task Instructions	How to create Calculation Methods to define the calculation type and unit of calculation for Rate Calculator records.
QRG Create an Employment Cost Record	Task Instructions	How to create Employment Cost records used for applying costs to the Rate Calculator.
QRG Manage Employment Cost Items using ECM	Task Instructions	How to manage Employment Cost Items using the Employment Cost Manager.
QRG Create an Employment Cost Exception	Task Instructions	How to apply Employment Cost Exceptions to Clients, Payees & Pay Codes.
QRG Create Pay Rate Loadings	Task Instructions	How to create Pay Rate Loadings used for Casual Loading or Shift Loading.
QRG Create Rate Calculators - Templates - Initial Setup	Task Instructions	How to create Rate Calculator Templates - Initial Setup.
QRG Create Rate Calculator Templates - Final Setup	Task Instructions	How to create Rate Calculator Templates - Final Setup.
QRG Create Rate Calculators - Employee Specific	Task Instructions	How to create an Employee Specific Rate Calculator using Template automation.
