

Purpose

The purpose of this quick reference guide is to step through the process of creating an Accounting Default Account record for Payment Pay Codes. The Account Default Accounts are used to automatically assign the default Natural Account for the specified Pay Code.

It is used to set Pay Code overrides from the default Natural Account number. The intended audience for this document is System Administrators / Standard Users.

Steps

Create an Accounting Default Account record

To create an Accounting Default Account record, the following steps should be completed:

1. Click on the **App Launcher** icon. (See Figure 1)
2. Go to the **Accounting Default Accounts** object by using the Search function. (See Figure 2)

Figure 1

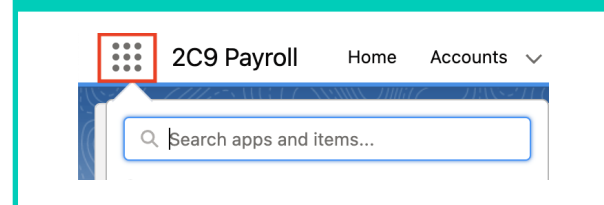

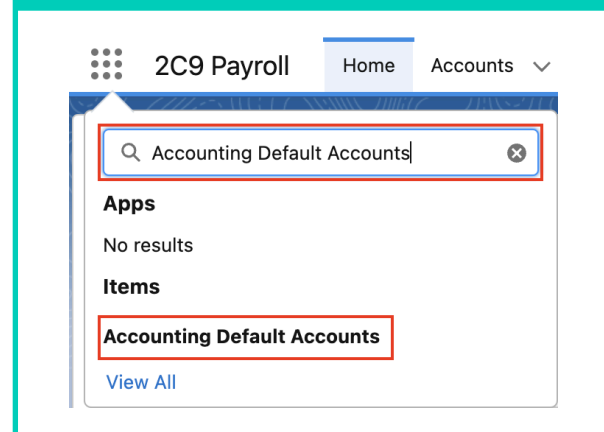

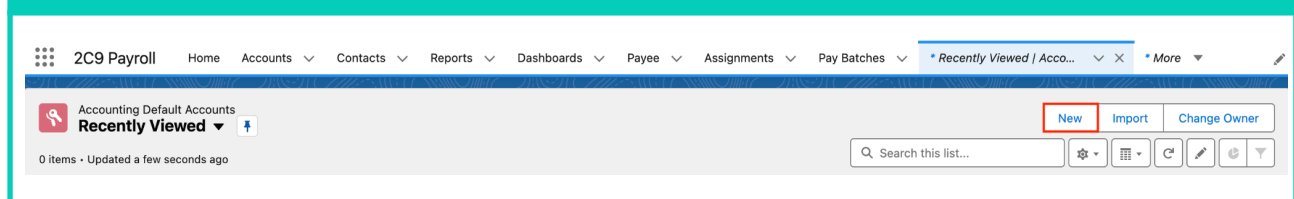

Figure 2

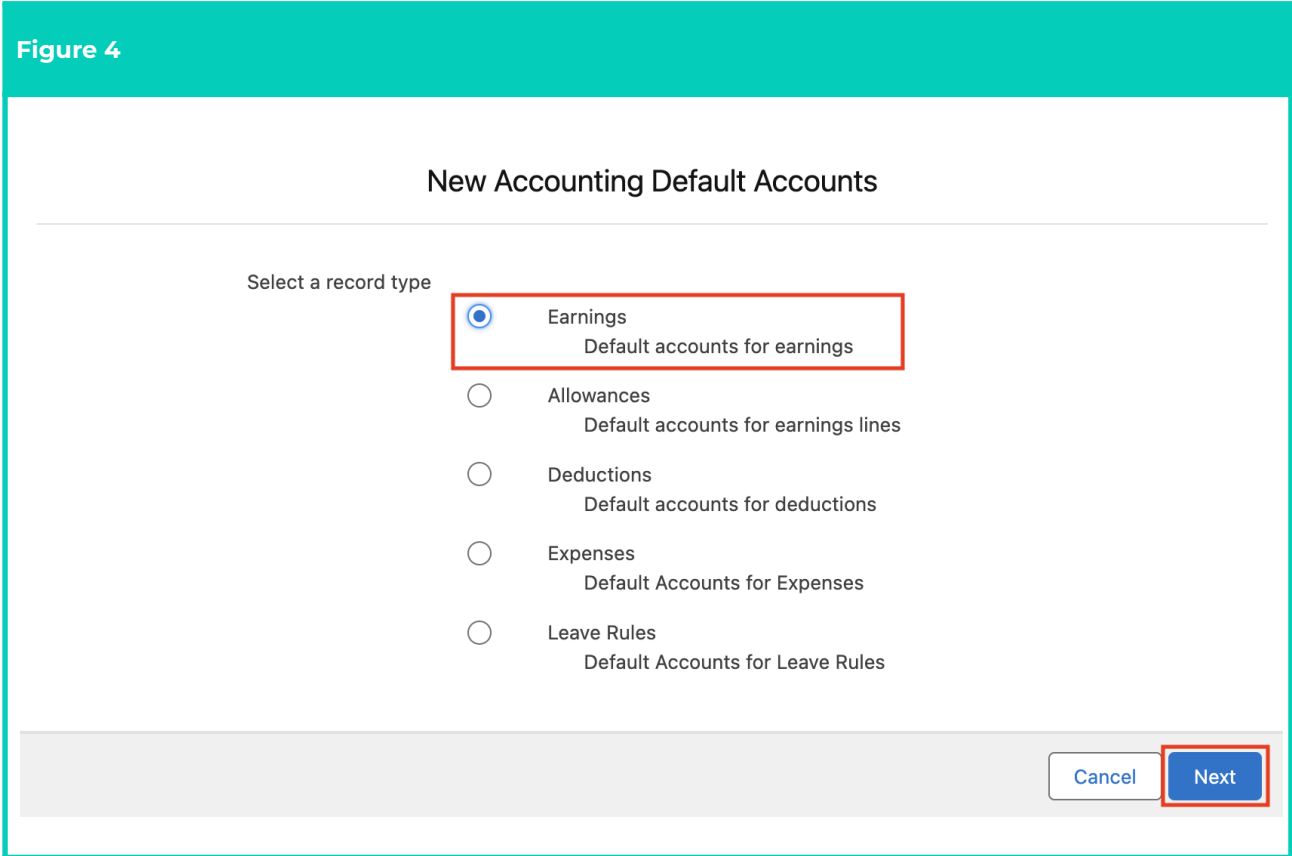

3. Click on the **New** button. (See Figure 3)

Figure 3

4. Select **Earnings** from the available record types, and click on the Next button (see Figure 4).

- ☐ **Expenses**
Default Accounts for Expenses
- ☐ **Leave Rules**
Default Accounts for Leave Rules

5. Populate the following required fields to provide the base details of the Accounting Default Account record (see Figure 5):
 - a. **Accounting System**
 - b. **Pay Code**
6. Populate ONE, or BOTH, of the following required fields depending on the requirements of the Org (see Figure 5):
 - a. To allocate the PAYG wages to a specific Natural Account instead of the Default Account on the Accounting System Setup, populate the Natural Account in the field **Earnings PAYG Account**. If left blank, the revenue will automatically be allocated to the Default Account specified on the Accounting System Setup record.
OR
 - b. To allocate the RCTI wages to a specific Natural Account instead of the Default Account on the Accounting System Setup, populate the Natural Account in the field **Earnings RCTI Account**. If left blank, the revenue will automatically be allocated to the Default Account specified in the Accounting System Setup record.
7. Click on the **Save** button (see Figure 5).
