

Purpose

The purpose of this quick reference guide is to step through the process of creating a Cost Code. The intended audience for this document is System Administrators / Standard Users.

Steps

Create Accounting Segments - Cost Code

The Cost Code Accounting Segment links to a dimension within the Accounting System. Example dimensions include cost code, cost centre, project code, etc.

To create a Cost Code Accounting Segment, the following steps should be completed:

1. Click on the **App Launcher** icon. (See Figure 1)
2. Go to the **Accounting Segments** object by using the Search function. (See Figure 2)

Figure 1

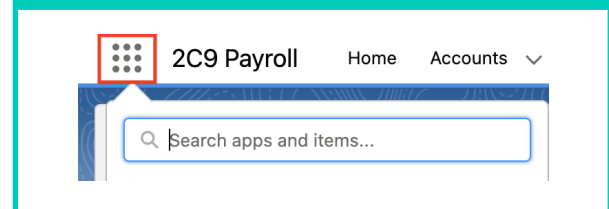

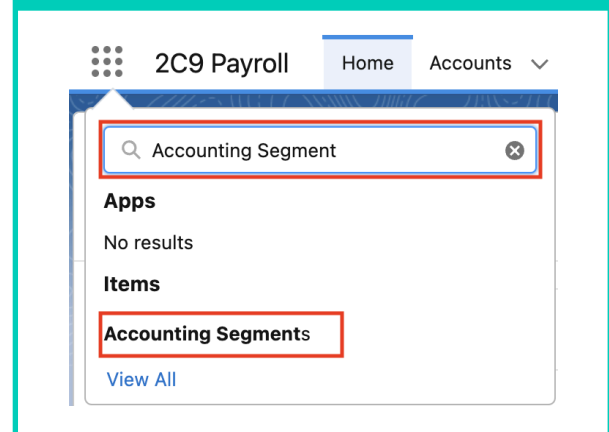

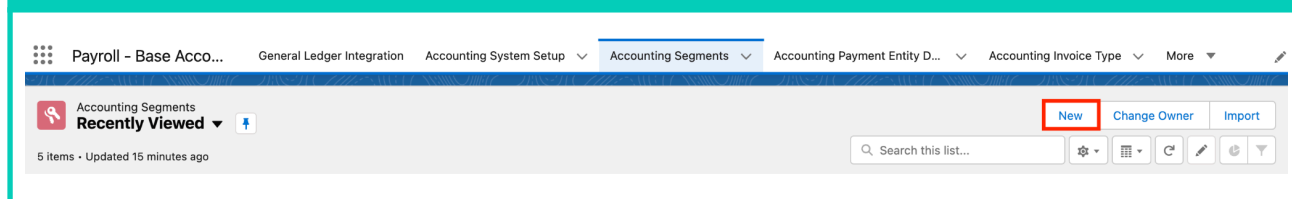

Figure 2

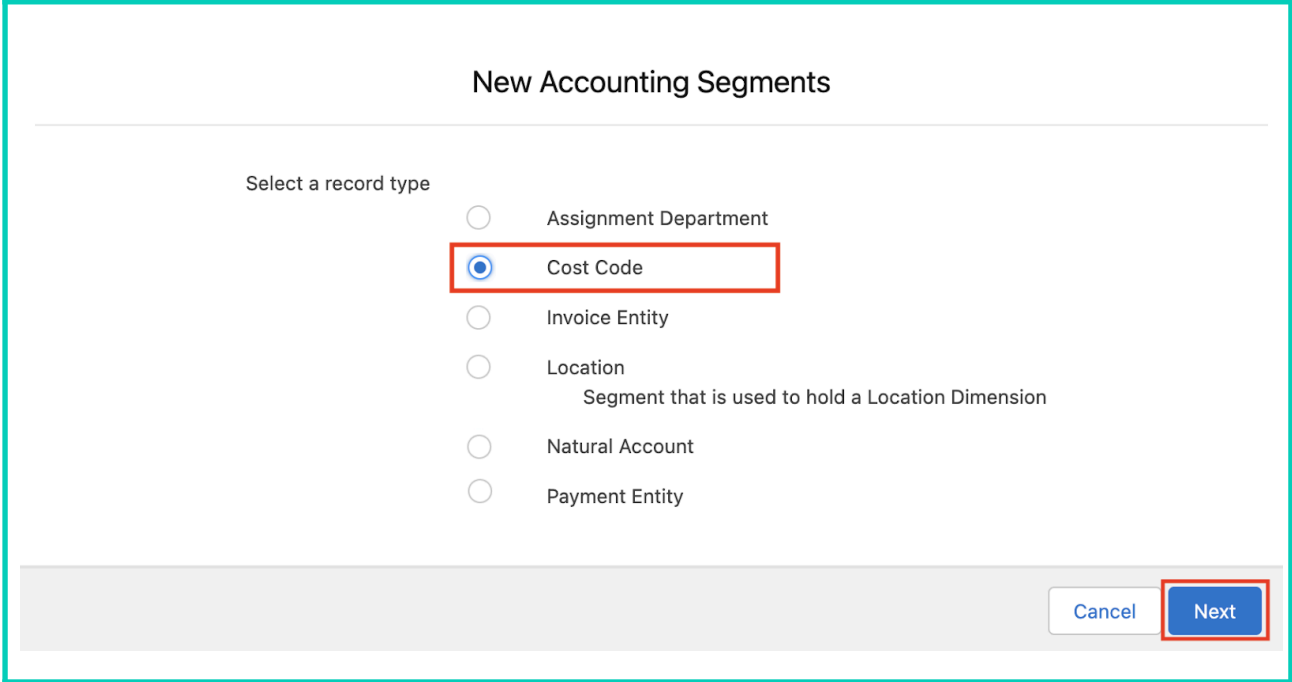

3. Click on the **New** button. (See Figure 3)

Figure 3

4. Select **Cost Code** from the available record types and click on the **Next** button. (See Figure 4).

5. Populate the following required fields to provide the base details of the Cost Code record (see Figure 5):
 - a. **Accounting System**
 - b. **Active/Inactive** - set to true
 - c. **Segment Value** - this will be the accounting dimension code as per the Accounting system (eg 2200)
6. Populate the following optional fields as required (see Figure 5):
 - a. **Segment Description** - description of this Cost Code (eg Cost_Code_A)
 - b. **Accounting System Reference** - can be used if the code requires additional description as detailed in the Accounting software.
 - c. **External ID** - optional field for exporting data using the Accounting Systems Record Id.
7. Click on the **Save** button (see Figure 5).

If there are a large number of Cost Codes to create, it is advisable to data load these records using a suitable data loading tool.

8. A new **Cost Code Accounting Segment** is now created (see Figure 6).

Figure 6

The screenshot shows the 2C9 Payroll interface. The top navigation bar includes links for Home, Accounts, Contacts, Reports, Dashboards, Payee, Assignments, Pay Batches, and a dropdown for '010 | Accounting Segme...'. A sidebar on the left shows 'Accounting Segments' with a red box around the '010' segment. The main content area displays the details for the 'Home Care' segment, which is a 'Cost Code' type, linked to the 'Xero' accounting system, with a value of '010' and an 'Active' status. Below this, there are sections for 'Key Fields' and 'Optional Fields' with edit icons (pencil icons) next to each field.

Segment Description	Record Type	Accounting System	Accounting System Reference	Active/Inactive
Home Care	Cost Code	Xero	010	☒

Details | Related

Key Fields

Accounting System	Xero	Active/Inactive	☒
Segment Value	010	Segment Description	Home Care

Optional Fields

Accounting System Reference	010	External ID	
-----------------------------	-----	-------------	--

Cost Code records CAN NOT be deleted if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

9. To modify an existing **Cost Code Accounting Segment**, select the required record and select the **Edit** button available on the top right side of the page. You can also double click within fields that need editing or just click on the pencil icon  that appears within fields when hovering with your cursor.
10. When complete, click on the **Save** button.

Field Descriptions

Accounting System is the Accounting System this Cost Code relates to.

Accounting System Reference is the reference given to this Cost Code within the external Accounting System.

Active/Inactive defines if the record is currently active.

External ID defines the ID of the corresponding record in an external Accounting System that has been used to create/update this record, or used if this data is integrated to an external Accounting System.

Segment Description is a description that is provided to the Cost Code.

Segment Value is the value given to the Cost Code for use within the Cost of Payroll Journals and Accounting Invoices.
