

Purpose

The purpose of this quick reference guide is to step through the process of creating an Accounting Invoice Entity. The intended audience for this document is System Administrators / Standard Users.

Steps

Create Accounting Segments - Invoice Entity

The Invoice Entity Accounting Segment is used to link an Invoice Entity at 2cloudnine Payroll with a corresponding Invoice Entity dimension in the Accounting System.

To create an Invoice Entity Accounting Segment, the following steps should be completed:

1. Click on the **App Launcher** icon. (See Figure 1)
2. Go to the **Accounting Segments** object by using the Search function. (See Figure 2)

Figure 1

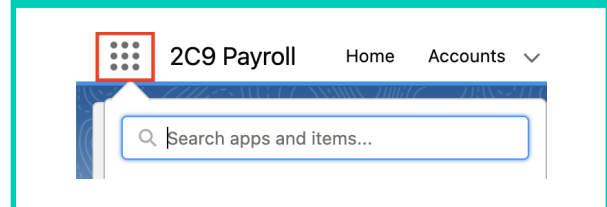

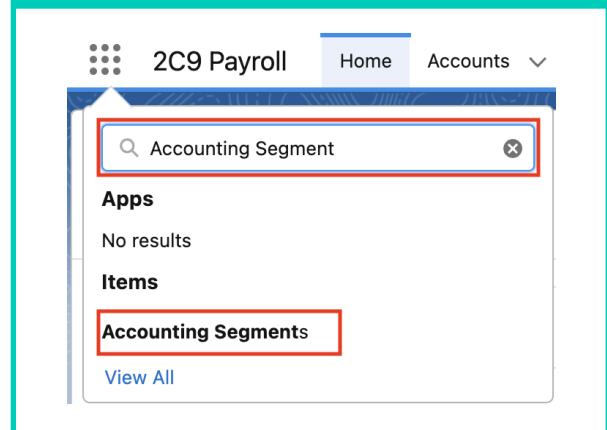

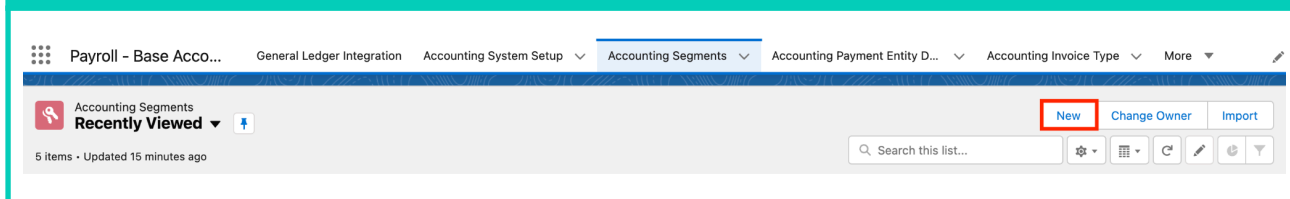

Figure 2

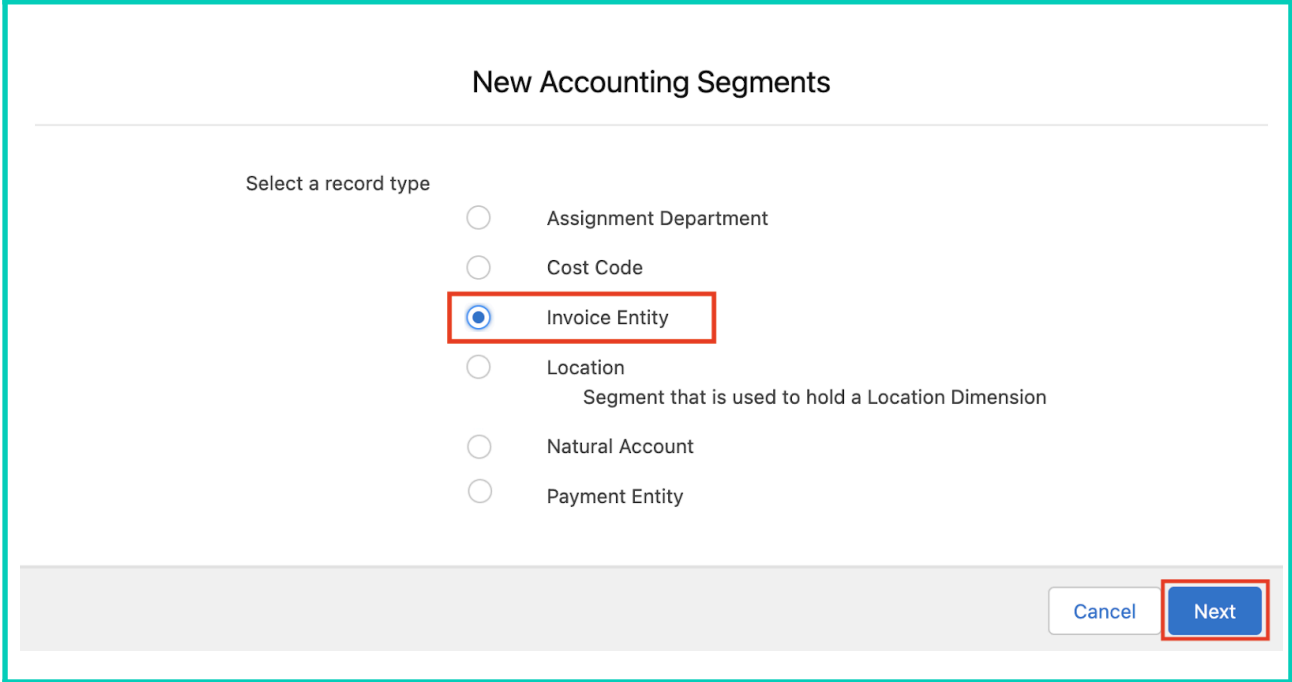

3. Click on the **New** button. (See Figure 3)

Figure 3

4. Select **Invoice Entity** from the available record types and click on the **Next** button. (See Figure 4).

Figure 4

The screenshot shows a web form titled "New Accounting Segments". Below the title is a section labeled "Select a record type" with a list of radio button options: "Assignment Department", "Cost Code", "Invoice Entity", "Location", "Natural Account", and "Payment Entity". The "Invoice Entity" option is selected, indicated by a blue dot in the radio button, and is highlighted with a red rectangular box. Below the "Location" option is a descriptive text: "Segment that is used to hold a Location Dimension". At the bottom right of the form, there are two buttons: "Cancel" and "Next". The "Next" button is highlighted with a red rectangular box.

5. Populate the following required fields to provide the base details of the Invoice Entity Accounting Segment record (see Figure 5):
 - a. **Accounting System**
 - b. **Active/Inactive** - set to true
 - c. **Segment Value** - this will be your dimension for the Invoice Entity as held within the Accounting system (eg 2cloudnine Training Corporation Pty Ltd)
6. Populate the following optional fields as required (see Figure 5):
 - a. **Segment description** - description of the Invoice Entity value (eg Johnson Staffing Agency)
 - b. **Accounting System Reference** - can be used as a secondary field to provide additional description of the Accounting dimension in the Accounting System.
 - c. **External ID** - optional field for exporting data using the Accounting System Record Id.
7. Click on the **Save** button (see Figure 5).

New Accounting Segments: Invoice Entity

* = Required Information

Key Fields

* Accounting System  Xero	Active/Inactive ☒
* Segment Value 2cloudnine Training Corp Pty Ltd	Segment Description 2cloudnine Training Corp Pty Ltd

Optional Fields

Accounting System Reference 2cloudnine Training Corp Pty Ltd	External ID
---	-------------------------------------

System Information

Owner

Cancel

Save & New

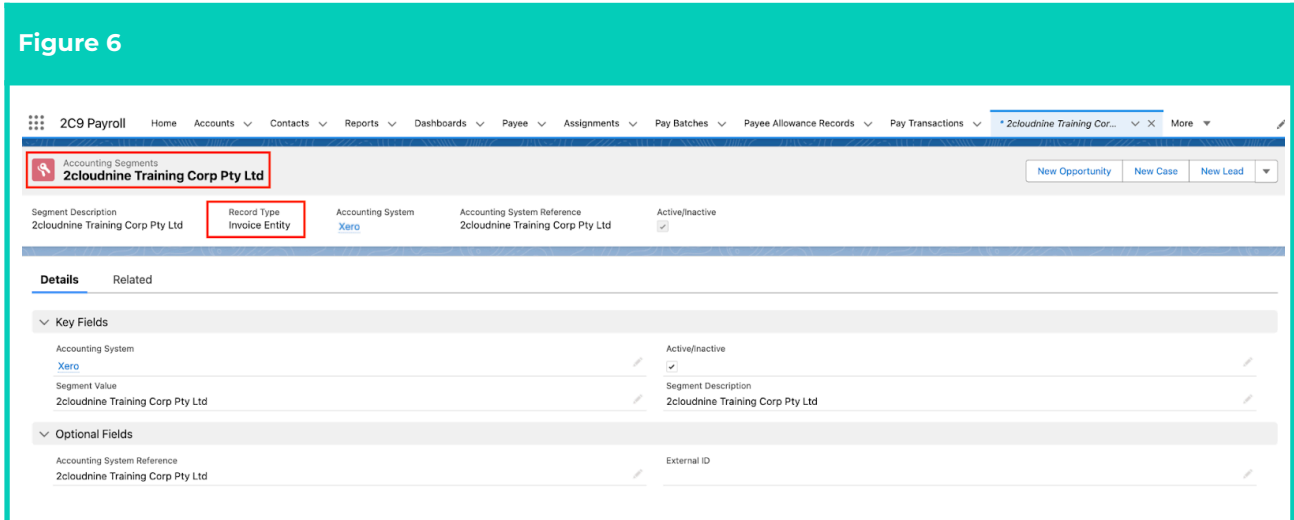

Save

If there are a large number of Invoice Entities to create, it is advisable to data load these records using a suitable data loading tool.

8. A new **Invoice Entity Accounting Segment** is now created. (See Figure 6)
9. Repeat for any additional Invoice Entity Accounting Segments required.

Figure 6

The screenshot shows the 'Accounting Segments' page for '2cloudnine Training Corp Pty Ltd'. The 'Record Type' is set to 'Invoice Entity'. The page displays the following details:

Segment Description	Record Type	Accounting System	Accounting System Reference	Active/Inactive
2cloudnine Training Corp Pty Ltd	Invoice Entity	Xero	2cloudnine Training Corp Pty Ltd	☒

Below the table, there are sections for 'Key Fields' and 'Optional Fields'.

Key Fields:

Field	Value	Active/Inactive
Accounting System	Xero	☒
Segment Value	2cloudnine Training Corp Pty Ltd	
Accounting System Reference	2cloudnine Training Corp Pty Ltd	

Optional Fields:

Field	Value	External ID
Accounting System Reference	2cloudnine Training Corp Pty Ltd	

Invoice Entity records **CAN NOT** be deleted if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

10. To modify an existing **Invoice Entity Accounting Segment**, select the required record and select the **Edit** button available on the top right side of the page. You can also double click within fields that need editing or just click on the pencil icon  that appears within fields when hovering with your cursor.
11. When complete, click on the **Save** button.

Field Descriptions

Accounting System is the Accounting System this Invoice Entity Accounting Segment relates to.

Accounting System Reference is the reference given to this Invoice Entity within the external Accounting System. This is the optional/secondary field that can be used to assist describing the value.

Active/Inactive defines if the record is currently active.

External ID defines the ID of the corresponding record in an external Accounting system that has been used to create/update this record, or used if this data is integrated to an external Accounting system.

Segment Description is a description that is provided to the Invoice Entity Accounting Segment.

Segment Value is the value given to the Invoice Entity Accounting Segment that maps to a corresponding dimension value in the Accounting System.
