

Purpose

The purpose of this quick reference guide is to step through the process of creating a Natural Account. The intended audience for this document is System Administrators / Standard Users.

Steps

Create Accounting Segments - Natural Account

The Natural Account Accounting Segment is a link to the corresponding Natural Account code within the Accounting System.

To create a Natural Account , the following steps should be completed:

1. Click on the **App Launcher** icon. (See Figure 1)
2. Go to the **Accounting Segments** object by using the Search function. (See Figure 2)

Figure 1

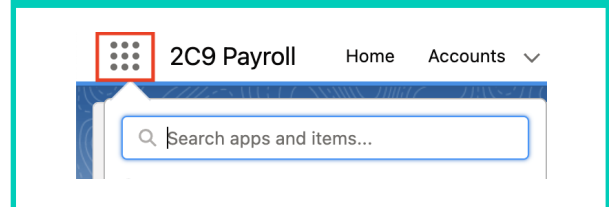

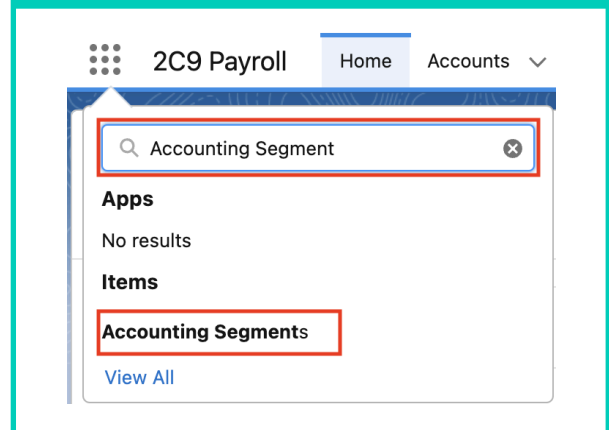

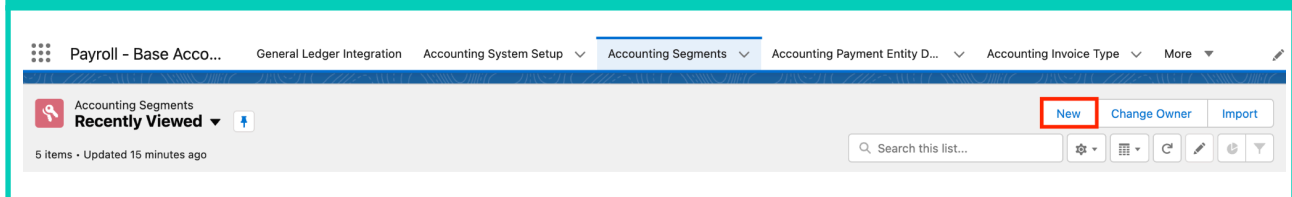

Figure 2

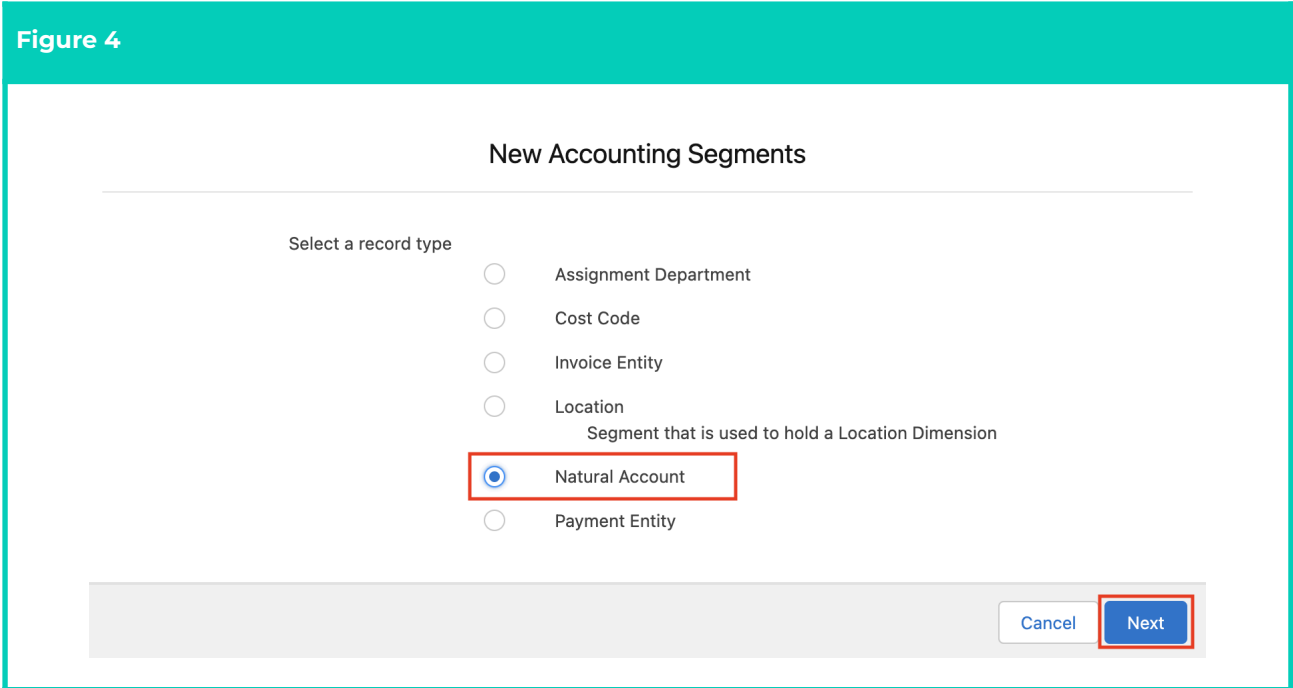

3. Click on the **New** button. (See Figure 3)

Figure 3

4. Select **Natural Account** from the available record types and click on the **Next** button. (See Figure 4).

New Accounting Segments

Select a record type

- ☐ Assignment Department
- ☐ Cost Code
- ☐ Invoice Entity
- ☐ Location
- ☒ Natural Account
- ☐ Payment Entity

Segment that is used to hold a Location Dimension

Cancel Next

5. Populate the following required fields to provide the base details of the Natural Account record (see Figure 5):
 - a. **Accounting System**
 - b. **Active/Inactive** - set to true
 - c. **Segment Value** - this will be the accounting dimension code as per the Accounting system (eg 2000)
6. Populate the following optional fields as required (see Figure 5):
 - a. **Segment Description** - description of this Natural Account (eg Wages)
 - b. **Accounting System Reference** - can be used if the code requires additional description as detailed in the Accounting software.
 - c. **External ID** - optional field for exporting data using the Accounting Systems Record Id.
7. Click on the **Save** button (see Figure 5).

Save

If there are a large number of Natural Accounts to create, it is advisable to data load these records using a suitable data loading tool.

8. A new **Natural Account Accounting Segment** is now created (see Figure 6).

Figure 6

The screenshot shows the 'Accounting Segments' page in the 2CloudNine system. The breadcrumb trail indicates the path: Home > Accounts > Contacts > Reports > Dashboards > Payee > Assignments > Pay Batches > Payee Allowance Records > Pay Transactions > * 2000 | Accounting Segm... > More. The main header shows 'Accounting Segments 2000' with buttons for 'New Opportunity', 'New Case', and 'New Lead'. Below this is a table with columns: Segment Description (Accounts Payable), Record Type (Natural Account), Accounting System (Xero), Accounting System Reference (2000), and Active/Inactive (checked). The 'Details' tab is selected, showing 'Key Fields' and 'Optional Fields'. Under 'Key Fields', 'Accounting System' is Xero, 'Segment Value' is 2000, 'Active/Inactive' is checked, and 'Segment Description' is Accounts Payable. Under 'Optional Fields', 'Accounting System Reference' is 2000 and 'External ID' is empty.

Natural Account records **CAN NOT** be deleted if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

9. To modify an existing **Natural Account**, select the required record and select the **Edit** button available on the top right side of the page. You can also double click within fields that need editing or just click on the pencil icon  that appears within fields when hovering with your cursor.
10. When complete, click on the **Save** button.

Field Descriptions

Accounting System is the Accounting System this Natural Account relates to.

Accounting System Reference is the reference given to this Natural Account within the external Accounting System.

Active/Inactive defines if the record is currently active.

External ID defines the ID of the corresponding record in an external Accounting system that has been used to create/update this record, or used if this data is integrated to an external Accounting system.

Segment Description is a description that is provided to the Natural Account.

Segment Value is the value given to the Natural Account for use within the Cost of Payroll Journals and Accounting Invoices.
