

Purpose

The purpose of this quick reference guide is to step through the process of creating an Accounting Assignment Department record as required for General Ledger reporting purposes. The intended audience for this document are System Administrators / Standard Users.

Steps

Manual Creation of an Accounting Assignment Department

Accounting Assignment Departments are related to the Assignment. They allow for the creation of multiple Department split records against an Assignment that can be used to split Accounting Invoices, Cost of Payroll Journals and Leave Accrual Journals by Department.

To create an Accounting Assignment Department, the following steps should be completed:

1. Click on the **App Launcher** icon. (See Figure 1)
2. Go to the **Accounting Assignment Department** object by using the Search function. (See Figure 2)

Figure 1

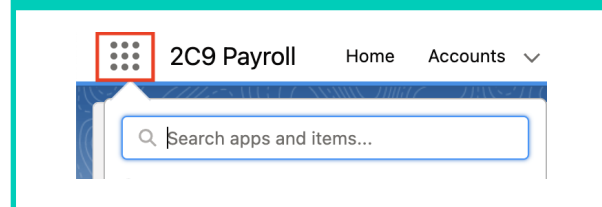

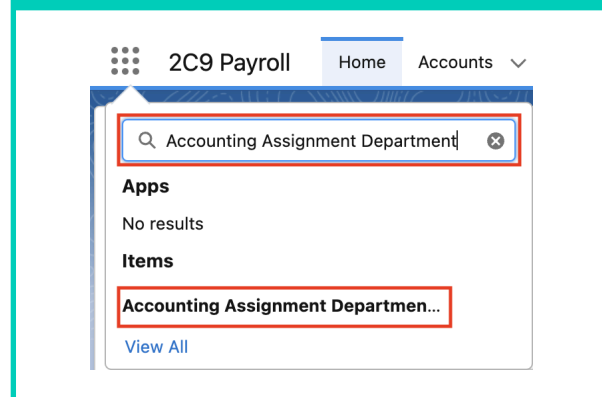

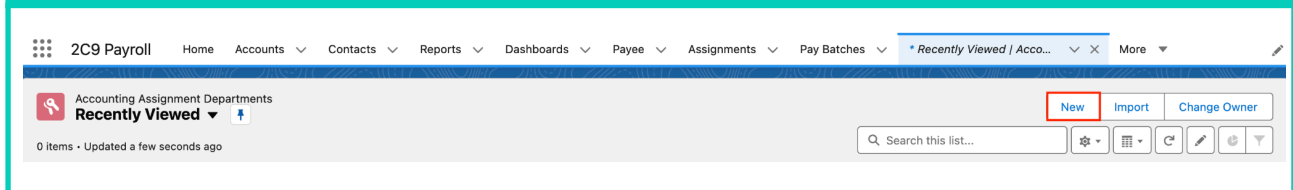

Figure 2

3. Click on the **New** button. (See Figure 3)

Figure 3

4. Populate the following required fields to provide the base details of the Accounting Assignment Department record (see Figure 4):
 - a. **Assignment**
 - b. **Accounting System**
 - c. **Percentage Split**
 - d. **Department**
5. The **Distribution Type** field will be populated by default (see Figure 4).
6. Click on the **Save** button.

For the Percentage Split field, it is worth noting that splits of up to 100% are possible, more than 100% are not possible, and if the splits are less than 100%, the default Department for each posting type will be used to allocate the remaining balance.

7. A new **Accounting Assignment Department** is now created (see Figure 5).

Figure 5

The screenshot shows the 2C9 Payroll interface. At the top, there's a navigation bar with tabs like Home, Accounts, Contacts, Reports, Dashboards, Payee, Assignments, and Pay Batches. A dropdown menu is open for 'Assignments', showing a list of records. The record 'ACCASDEP-0000000' is selected and highlighted. Below the navigation bar, there's a header section for the selected record, showing 'Accounting Assignment Departments' and 'ACCASDEP-0000000'. To the right of this header are buttons for 'New Opportunity', 'New Case', and 'New Lead'. Below the header, there's a table with columns: Accounting System (Xero), Assignment (A-211010-00000), Department (AD-INT), Percentage Split (100.0000%), and Distribution Type (All). Below the table, there's a 'Details' tab and a 'Related' tab. Under the 'Details' tab, there's a section for 'Information' with fields for 'Assignment Department Record' (ACCASDEP-0000000) and 'Assignment' (A-211010-00000). There's also a section for 'Split Details' with fields for 'Department' (AD-INT) and 'Percentage Split' (100.0000%).

Accounting Assignment Department records **CAN NOT** be deleted if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

8. To modify an existing **Accounting Assignment Department**, select the required record and select the **Edit** button available on the top right side of the page. You can also double click within fields that need editing or just click on the pencil icon  that appears within fields when hovering with your cursor.
9. When complete, click on the **Save** button.

Automatic Creation of an Accounting Assignment Department

In many cases, the creation of the Accounting Assignment Department records will need to be automated (e.g. there will be revenue splits defined in a HR system that need to be imported into 2c9 Payroll). In such cases, Users will need to implement an automation such as a Flow to support the automatic creation and maintenance of the Assignment Department records upon creation of Assignments. Please contact your System Administrator or Consultant for assistance with making this automation possible.

Field Descriptions

Assignment is the Assignment this Accounting Assignment Department relates to, so that the revenue and costs of this specific Assignment can be split.

Accounting System is the Accounting System this Accounting Assignment Department relates to.

Percentage Split is the percentage of the revenue or costs that this Accounting Assignment Department consists of, out of the total 100%.

Distribution Type is pre-populated by default and is set to the default value of All.

Department is used to define the Accounting Segment Department that this Accounting Assignment Department record relates to.
