

Purpose

The purpose of this quick reference guide is to step through the process of creating an Accounting Invoice as required for General Ledger reporting purposes. The intended audience for this document is System Administrators / Standard Users.

Steps

Create an Accounting Invoice

The Accounting Invoices contain the Accounting information relating to the Natural Account dimensions that are created from the Invoice records.

To create an Accounting Invoice, the following steps should be completed:

1. Click on the **App Launcher** icon. (See Figure 1)
2. Go to the **General Ledger Integration** object by using the Search function. (See Figure 2)

Figure 1

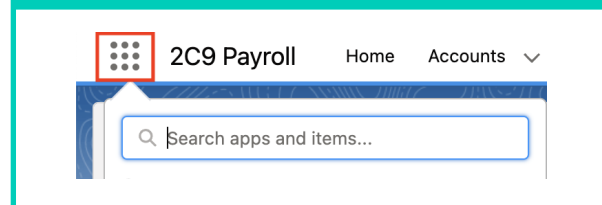

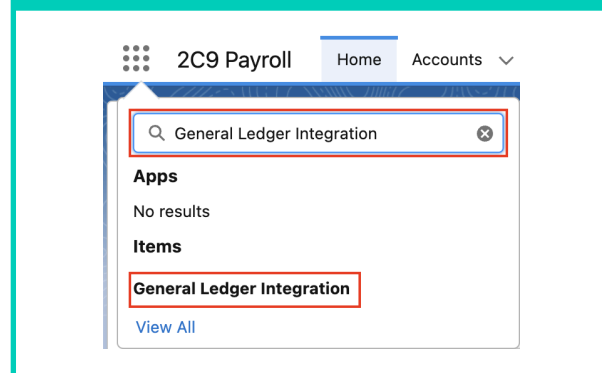

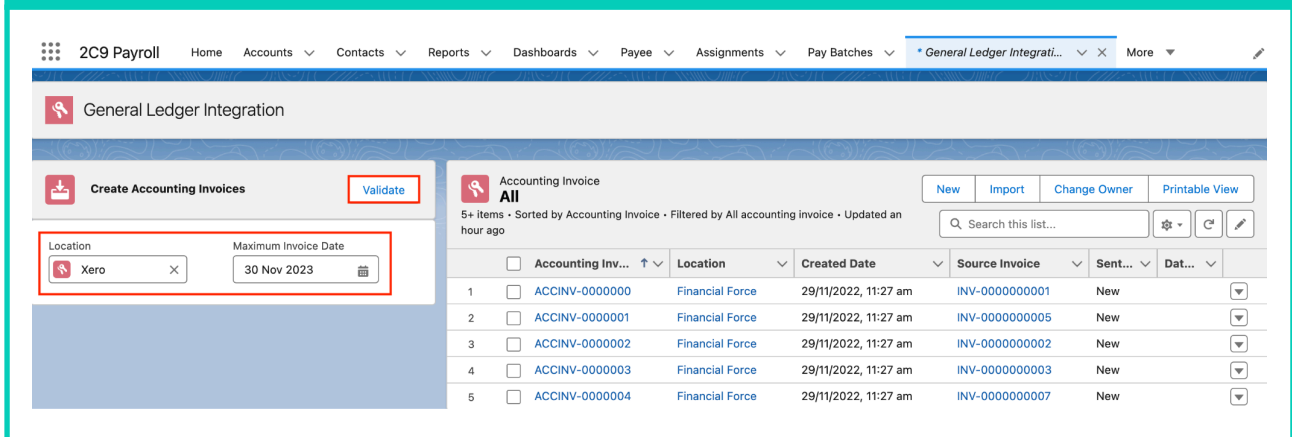

Figure 2

3. Populate the **Location** field with the Accounting System Setup record for this Accounting Invoice. (See Figure 3)
4. Populate the **Maximum Invoice Date** field. Any Invoices and Credit Notes with an Invoice Date after this date will not have their Accounting Invoice created. (See Figure 3)
5. Click on the **Validate** button. (See Figure 3)

Accounting Invoices and the related Accounting Invoice Items should always be created from following the steps detailed in this document, and never by manually creating the records.

Accounting Invoice records CAN NOT be deleted if they have related records or are used in other records. Deleting records is not recommended unless absolutely essential.

Future dated Invoices will not be picked up when trying to create Accounting Invoices. If Invoices are created with an Invoice date in the future, they will not be in the Accounting Invoices, until they reach the Invoice Date.

10. To modify an existing **Accounting Invoice** record, open the required record and select the **Edit** button available on the top right side of the page. You can also double click within fields that need editing or just click on the pencil icon  that appears within fields when hovering with your cursor.
11. When complete, click on the **Save** button.

Field Descriptions

Location indicates the Accounting System Setup record for which the Accounting Invoice records will be created.

Maximum Invoice Date is the maximum date to filter Invoices when creating Accounting Invoices.

Further Information

Document	Document Type	Description
QRG General Ledger Key Information	Key Information	Outlines useful information relevant to the General Ledger functionality. The document includes definitions, prerequisites, and other non-instructional information.
