

Purpose

The purpose of this quick reference guide is to step through the process of creating an Invoice Tax ID record. The intended audience for this document are System Administrators.

Steps

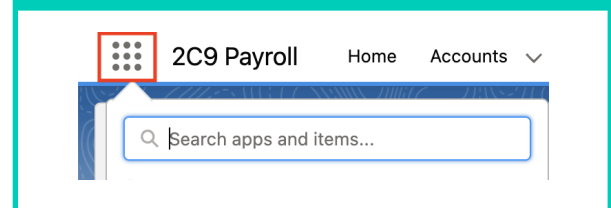

Create an Invoice Tax ID

Invoice Tax ID is used to populate the rate of GST/Tax that is then automatically applied within the Pay Transactions, and will ultimately be updated automatically onto the Invoice Items that are created. Invoice Tax IDs are required in all Orgs using 2cloudnine Payroll, even if they aren't using the invoicing functionality.

To create a new Invoice Tax ID record, follow the steps below:

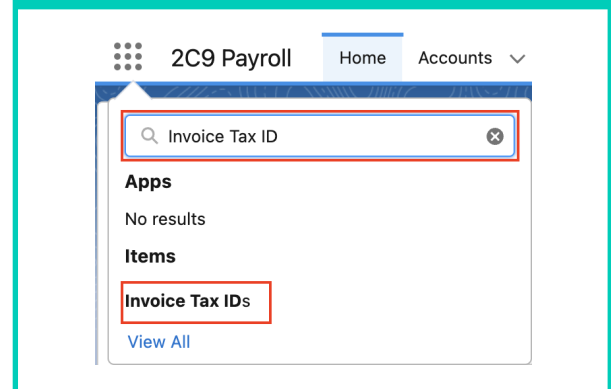

1. Click on the **App Launcher** icon. (See Figure 1)

Figure 1

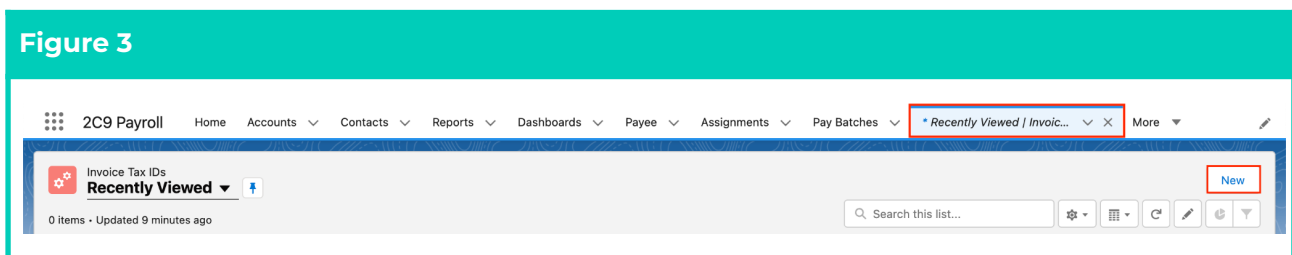

2. Go to the **Invoice Tax IDs** object by using the Search function. (See Figure 2)

Figure 2

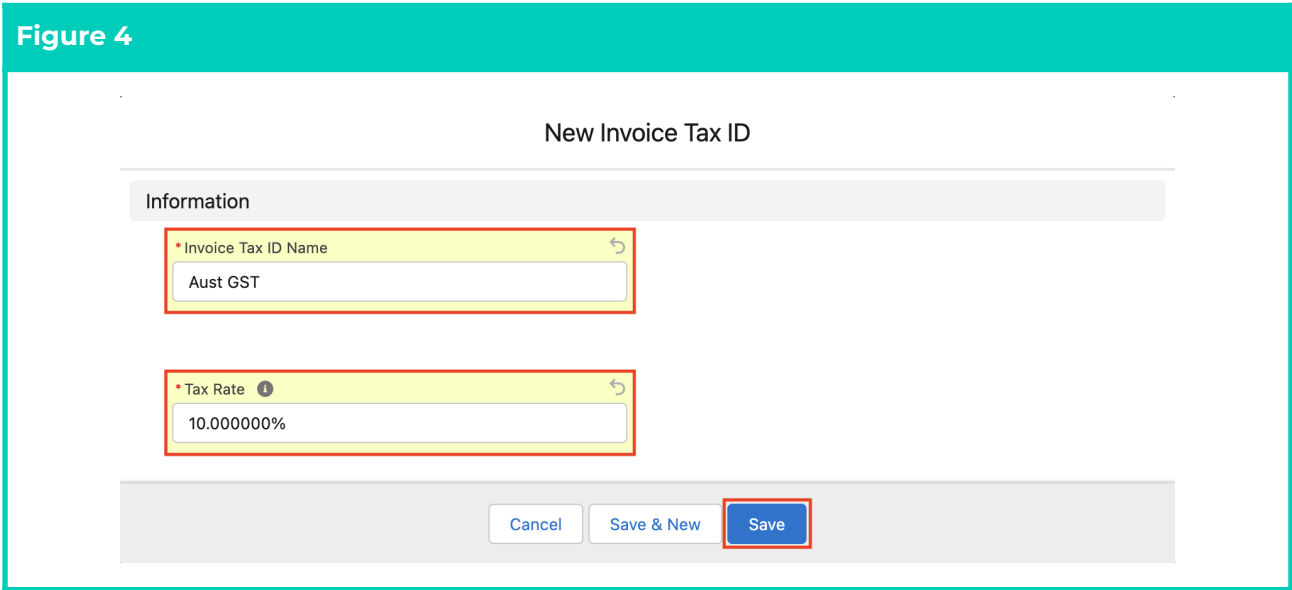

3. Click on the **New** button. (See Figure 3)

Figure 3

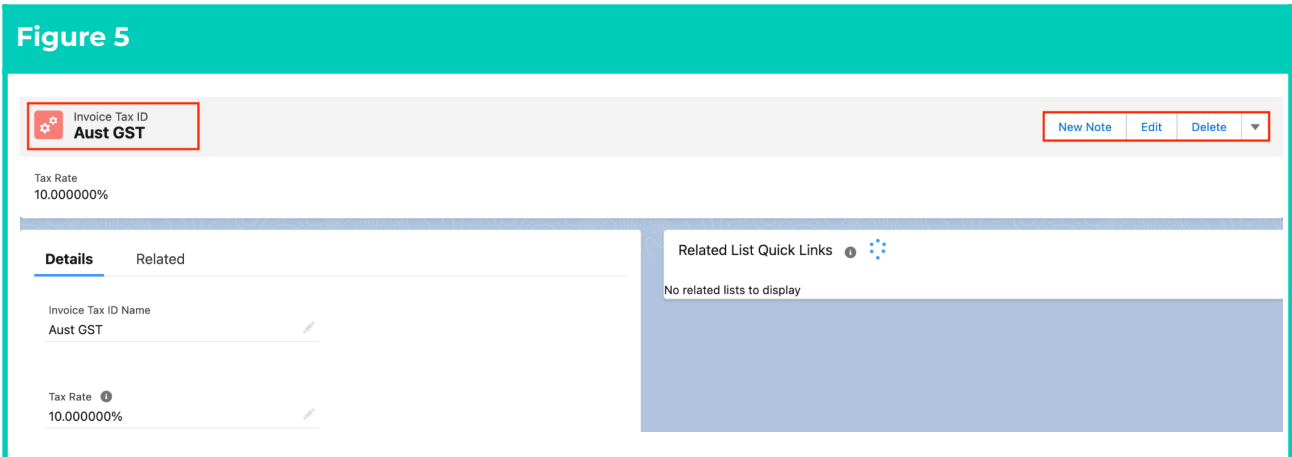

4. Populate the following required fields to provide the base details of the Invoice Tax ID record: (See Figure 4)
 - a. **Invoice Tax ID Name**
 - b. **Tax Rate**
5. Click on the **Save** button.

Figure 4

6. A new Invoice Tax ID record has been created. (See Figure 5)

Figure 5

7. To modify an existing **Invoice Tax ID** record, open the required record and select the **Edit** button available on the top right side of the page. You can also double click in any of the fields that need editing or just click on the pencil icon  that appears within fields when you move your cursor over the field.
8. When complete, click on the **Save** button.

At least one Invoice Tax ID record needs to be created in every Org where 2c9 Payroll is being processed. It is a required field for Pay Transactions to create successfully.

If you will be using various Invoice tax rates, you will need to create an individual record for each rate being used.

Field Descriptions

Invoice Tax ID Name is the name given to the Invoice Tax ID record that is being created.

Tax Rate defines the Invoice Tax Rate that will apply when the Invoice Tax ID is used.
