

Purpose

The purpose of this quick reference guide is to step through the process of creating a Project Code. The intended audience for this document are system administrators / standard users.

Steps

Create a Project Code

Project Codes are used to provide various Pay Rates (and Invoice Rates) to be applied to Pay Codes for the same Assignment, based on the particular Project or task being performed.

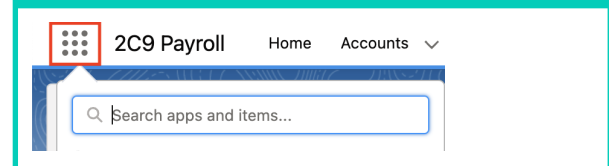

There are three types of Project Code records:

- **Template Level** - The Template Level Project Code is used to create a Template Project Code to be used as a basis for creating Client Level and Assignment Level Project Codes.
- **Client Level** - The Client Level Project Code is used to define a Client specific Project Code which can be used for creating an Assignment Level Project code.
- **Assignment Level** - The Assignment Level Project Code is used to define an Assignment specific Project Code, which will only apply to the related Assignment record, and can be selected on Timesheet Entries and Assignment Rate Records relating to that Assignment.

Create a Project Code by following the below steps:

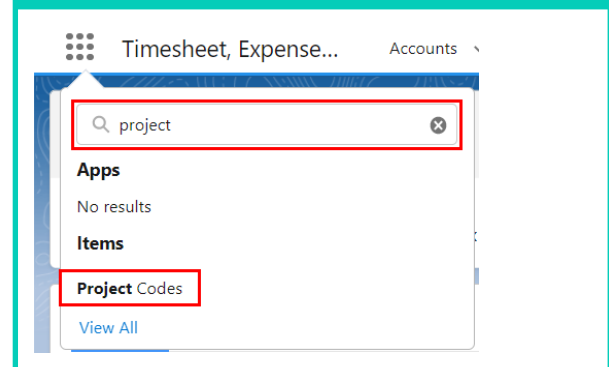

1. Click on the App Launcher icon (see Figure 1).

Figure 1

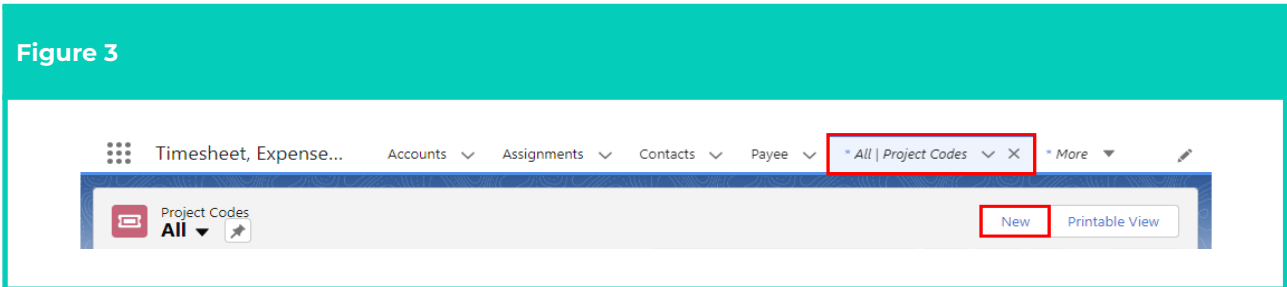

2. Go to the **Project Codes** object by using the Search function (see Figure 2).

Figure 2

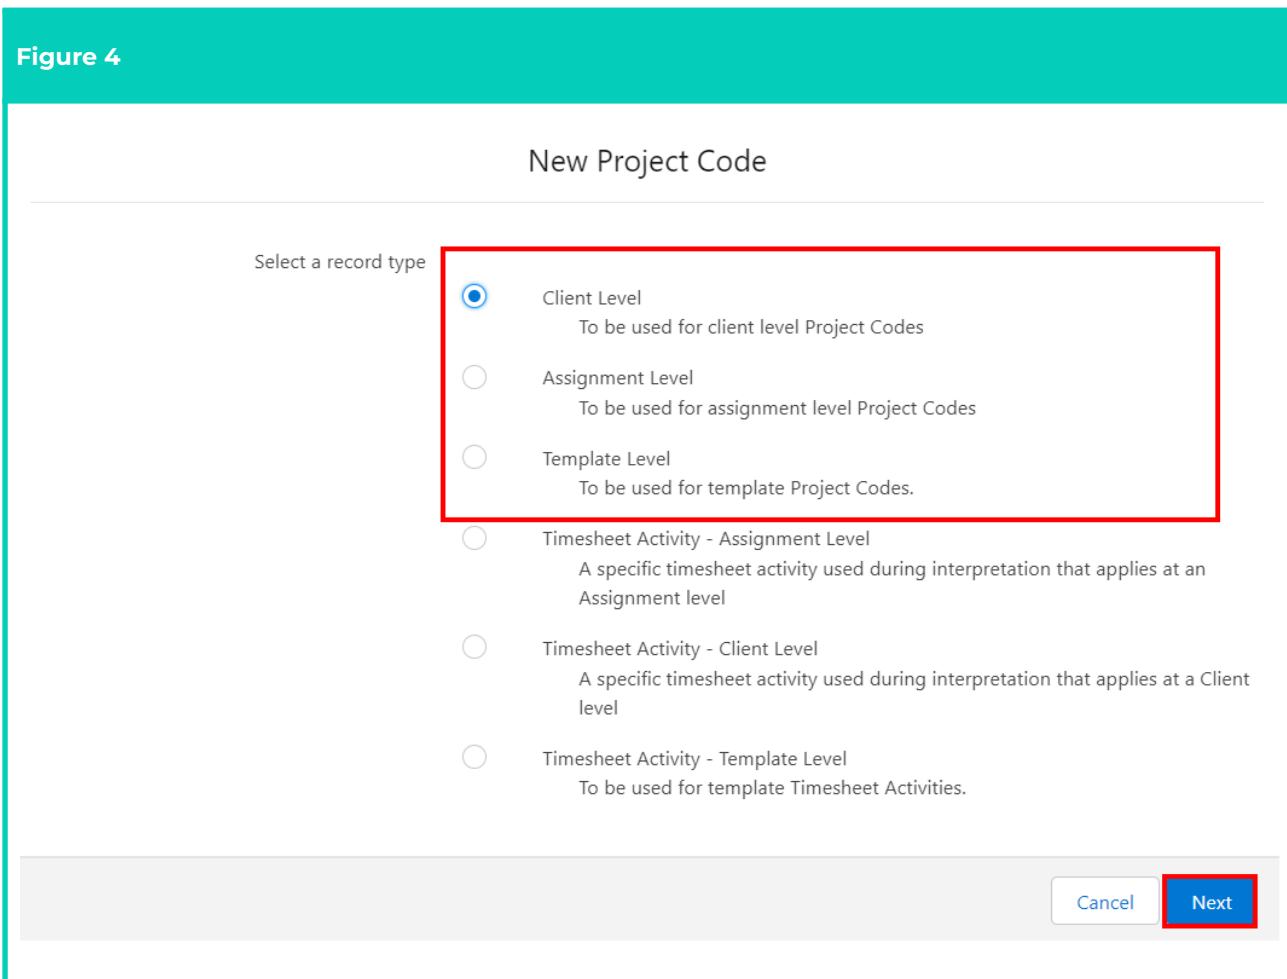

3. Click on the **New** button (see Figure 3).

Figure 3

4. Select **Client Level**, **Assignment Level** or **Template Level** from the available record types, and click on the Next button (see Figure 4).

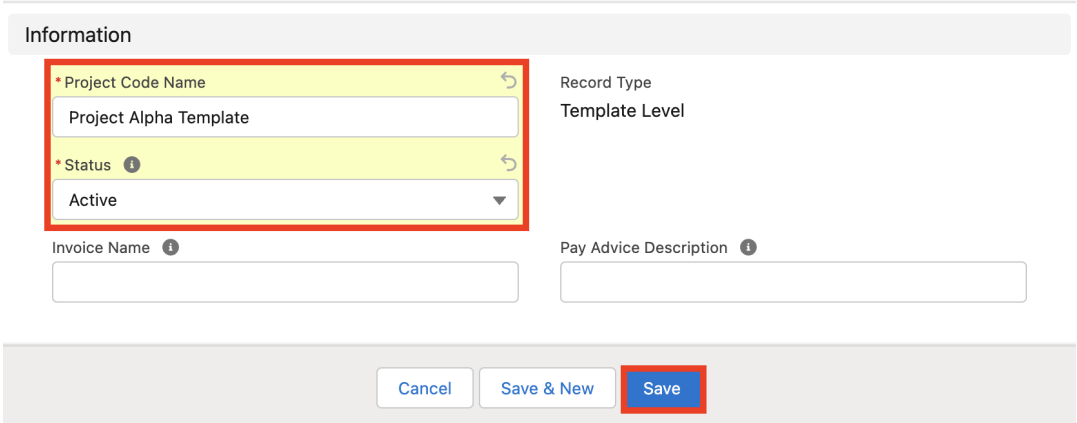

Figure 4

5. If the **Template Level** record type was selected, follow this step in the sequence given below:
 - a. Populate the following required fields to provide the base details of the Project Code (see Figure 5):
 - i. **Project Code Name**
 - ii. **Status**

- b. Populate the following optional fields as required (See Figure 5):
 - i. To define a specific name for any Invoices related to this **Project Code**, populate the **Invoice Name** field.
 - ii. To define a specific description for any **Pay Advices** related to this **Project Code**, populate the **Pay Advice Description** field.
6. Click on the **Save** button (see Figure 5).

Record Type
Template Level

Invoice Name 

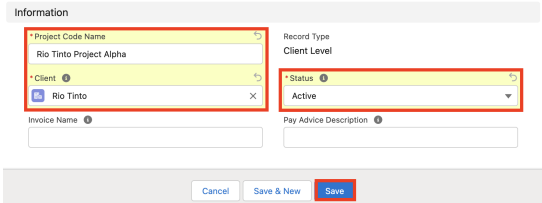

Pay Advice Description 

Cancel Save & New Save

7. If the **Client Level** record type was selected, follow this step in the sequence given below:
 - a. Populate the following required fields to provide the base details of the **Project Code** (see Figure 6):
 - i. **Project Code Name**
 - ii. **Client**
 - iii. **Status**
 - b. Populate the following optional fields as required (See Figure 6):
 - i. To define a specific name for any Invoices related to this Project Code, populate the **Invoice Name** field.
 - ii. To define a specific description for any Pay Advices related to this Project Code, populate the **Pay Advice Description** field.

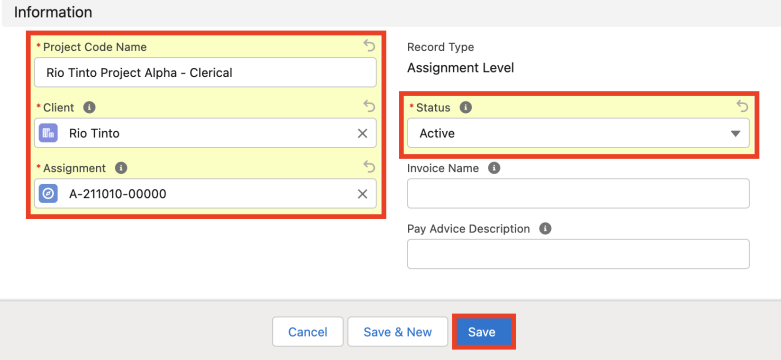

8. Click on the **Save** button (see Figure 6):

Figure 6

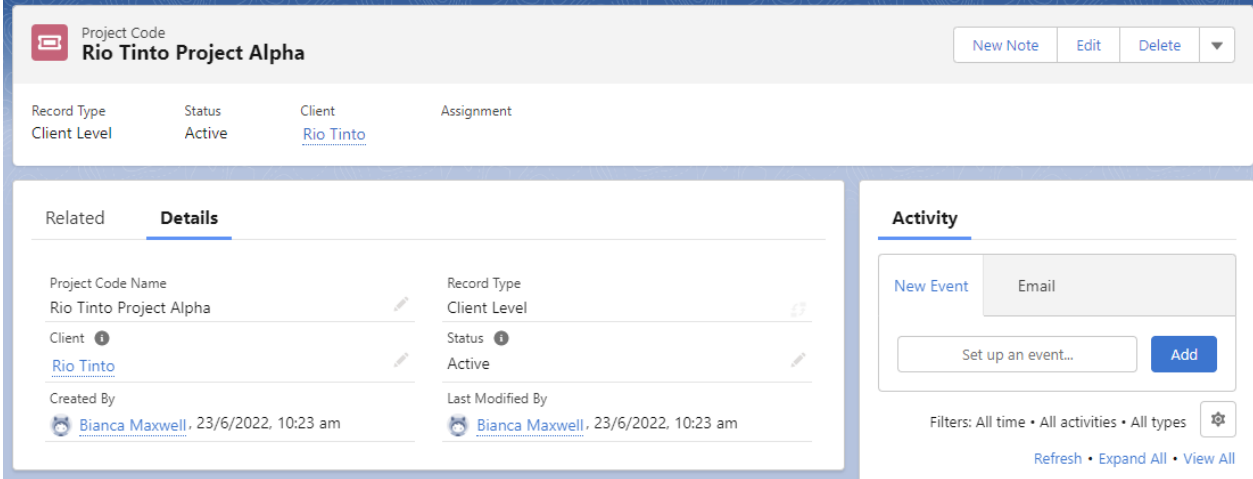

9. If the **Assignment Level** record type was selected, follow this step in the sequence given below:
 - a. Populate the following required fields to provide the base details of the Project Code (see Figure 7):
 - i. **Project Code Name**
 - ii. **Client**
 - iii. **Assignment**
 - iv. **Status**
 - b. Populate the following optional fields as required (See Figure 7):
 - i. To define a specific name for any Invoices related to this Project Code, populate the **Invoice Name** field.
 - ii. To define a specific description for any Pay Advices related to this Project Code, populate the **Pay Advice Description** field.
10. Click on the **Save** button (see Figure 7).

Figure 7

A new **Project Code** record has been created (see Figure 8).

Figure 8

The screenshot shows the 'Project Code' interface for 'Rio Tinto Project Alpha'. At the top, there are buttons for 'New Note', 'Edit', and 'Delete'. Below this is a table with columns: Record Type (Client Level), Status (Active), Client (Rio Tinto), and Assignment. The main area is divided into 'Related' and 'Details' tabs. The 'Details' tab shows fields for Project Code Name (Rio Tinto Project Alpha), Client (Rio Tinto), Created By (Bianca Maxwell, 23/6/2022, 10:23 am), Record Type (Client Level), Status (Active), and Last Modified By (Bianca Maxwell, 23/6/2022, 10:23 am). On the right, there is an 'Activity' section with 'New Event' and 'Email' tabs, a 'Set up an event...' button, and an 'Add' button. At the bottom of the activity section, there are filters: 'All time', 'All activities', and 'All types', along with 'Refresh', 'Expand All', and 'View All' links.

Project Codes **CAN NOT** be deleted if they are used in other records. Deleting records is not recommended unless absolutely essential.

A Project Code record can only be edited if it has not already been referenced within Pay Transactions, Interpretation Rules or Payee Allowance records. A new Project Code will need to be created if updates are required after this point.

1. To modify an existing Client Level Project Code record, open the required record and select the **Edit** button available on the top right side of the page. You can also double click in any of the fields that need editing or just click on the pencil icon  that appears within fields when you move your cursor over the field.
2. When complete, click on the **Save** button.

Field Descriptions

Assignment is the specific Assignment this Project Code applies to.

Client is the specific Client this Project Code applies to.

Invoice Name defines the Name that will be used on Invoices for the Project Code. If not populated, the Project Code will be trimmed to 15 characters

Pay Advice Description is the Project Code description that will be displayed to the Employee on their Pay Advice.

Project Code Name is the name assigned to the Project Code record.

Status is the Status of the Project Code.
